Andrea,
I'm working on the Federal Register notice to approve LRAPA revised open burning rules into the OR SIP. I've reviewed the changes to the rules, but it's not clear to me why some of the changes are more stringent than the previous version of the rule. I understand that ODEQ staff prepares an evaluation of all new proposed rules for the EQC before they approve them. Has any such analysis of the revised LRAPA open burning rules been developed? If so, please send me a copy of this analysis, it will help me develop the FR notice for this action. Contact me if you have any questions.
Thanks,
Keith
