TO: Our Public Servants

To those who can help us:

I am a glass artist who relies heavily on Bullseye glass as my sole source of materials to make my products.

Bullseye glass has a long history of responsible operation. I stand with Bullseye Glass in its efforts to continue operations as a responsible citizen of the social and business community of Portland, Oregon.

Regulatory decisions must be based on science, not political issues. A leading scientist, Dr. LaCourse, has said Bullseye's furnaces do not produce toxic chromium. We urge DEQ to rely on science and fact, and not to rush to impose these poorly written and misdirected rules.

We sincerely appreciate any support you can provide right now.

Warm regards,

Karen Ehart
