Bullseye glass has a long history of responsible operation. I stand with Bullseye Glass in its efforts to continue operations as a responsible citizen of the social and business community of Portland, Oregon.

Regulatory decisions must be based on science, not political issues. A leading scientist, Dr. LaCourse, has said Bullseye's furnaces do not produce toxic chromium. I urge DEQ to rely on science and fact, and not to rush to impose these poorly written and misdirected rules.

I am a glass artist and these changes would affect my ability to purchase glass for my business.

Thank you for your consideration
