DEQ is proposing a set of sweeping regulations that will severely curtail Bullseye glass production, without clear supporting evidence or an understanding of how they make glass.

Bullseye glass has a long history of responsible operation. I stand with Bullseye Glass in its efforts to continue operations as a responsible citizen of the social and business community of Portland, Oregon.

Regulatory decisions must be based on science, not political issues. A leading scientist, Dr. LaCourse, has said Bullseye's furnaces do not produce toxic chromium.

We urge DEQ to rely on science and fact, and not to rush to impose poorly written and misdirected rules.

Regards,
Deive Butvila
