Subject: Temporary regulations on Bullseye Glass
Date: Monday, March 14, 2016 20:21:26

Bullseye glass is an integral part of the glass community of Portland, state of Oregon, and the Pacific Northwest. I stand with Bullseye Glass in its efforts to continue operations as a responsible citizen of the social and business community of Portland, Oregon. Please do not impose regulations that are poorly written and not based on scientific fact. Regulatory decisions must be based on science, not political issues. A leading scientist, Dr. LaCourse, has said Bullseye's furnaces do not produce toxic chromium. I urge DEQ to rely on science and fact, and not cave into political pressure to impose these poorly written and misdirected rules.

Sincerely,
Kevin J Kanyo
