Subject:	Special meeting of the Oregon Environmental Quality Commission
Date:	Tuesday, March 22, 2016 11:04:51

I am a longtime Bullseye customer and am writing in their support. In all my dealings with them I have felt the utmost high consideration for their neighbors and their very "Green" approach to all aspects of their business.

Bullseye glass has a long history of responsible operation. I stand with Bullseye Glass in its efforts to continue operations as a responsible citizen of the social and business community of Portland, Oregon.

Regulatory decisions must be based on science, not political issues. A leading scientist, Dr. LaCourse, has said Bullseye's furnaces do not produce toxic chromium. We urge DEQ to rely on science and fact, and not to rush to impose these poorly written and misdirected rules.

Laura Brownfield
