Thanks Emil. I agree in principal of course, yet it's not clear who we have available in communications right now and what their workload is; so if communications can review great, but let's not unduly delay. Also, this subject is particularly tricky to explain, so I request final approve of any proposed changes.

Thanks
D

I've placed this version of the document on the rulemaking's SharePoint page. We should have someone in communications review the staff report because it's a public document. We need to have Wendy's ok on the rules and staff report to submit to EQC. The timing of this depends on when Stephanie needs the final version of these documents.

A redline strikeout version of the rules needs to be posted to SharePoint. Cory, when you return can you do this?

Thanks.

Emil

Importance: High

Stephanie and Emil, here's the final draft staff report for the Clean Fuels Program temporary rule for your review. Paul Garrahan has commented approved. What's the schedule for finalizing through Wendy? According to the draft EQC agenda I have this would be Agenda Item N. Cory is traveling today but will be back tomorrow.

Wendy, would you like to meet with Cory and me to refresh yourself on this rulemaking? Cory & I have a dry run scheduled for April 13th from 2:00 to 3:30pm in Room 11. Would you like to attend? We're also happy to reschedule as needed if you'd like to participate. If you have any comments/questions on the draft staff report now it would be great to get them while Stephanie and Emil are also reviewing.

Questions?

Thanks all.

D
