Hi all. Cory updated me this morning on the temporary rulemaking we need to do for Clean Fuels starting right away. This temp rule will be followed by a permanent rulemaking. It's primarily a technical correction to our calculations and should be fairly straightforward, I understand that Meyer needs to take this to Dick to get it added to the agency rulemaking agenda, but that Emil will be lead rule coordinator in charge of this rulemaking, working closely with Cory.

Emil, are you good to go on this? Do you need confirmation from Lydia about your lead role? Meyer- when do you think this can go forward to Dick? I know Wendy wanted to mention it to him later this week.

Cory/Margaret, have we created fund codes yet for this rulemaking?

Let me know what you need from me.

Thanks

D
