Hi Michele,

We received a comment on the art glass rule by email from the Oregon Health Authority (see attached).

This was received while the comment period was open, but didn't get into the online system where people can view and search for it.

Now that the comment period has closed and the online system doesn't allow further comments to be added, is there still a way to add that OHA comment to the database so people can view it? Leah has requested that we find a way to add it.

-Joe
