Date:	Tuesday, September 20, 2016 4:12:30 PM

Sorry about missing the call earlier, it's been a day here. I like the new language.

Joe, if you edited the "clean" rules version on sharepoint, it should be fine, assuming the only thing that changed was the new language instead of the 710. That whole subparagraph is new since the temp rules.

Anyway, I can come in early tomorrow morning and edit the clean sharepoint version to be sure it's still clean if you want me too, just let me know. Don't know how long I'll last, though.

George

Subject: proposed revised art glass rule language + staff report re selenium

Hi All,

Per our conversations today, here is a draft of the rule language and staff report that includes the change at 340-244-9050(3)(a)(G) to replace the 710 ng/m3 selenium level with 'demonstrate to the satisfaction of the Director' language. You can use track changes to see what's new.

Sue, I used some but not all of your suggested language.

George, I edited the 'clean' copy of the rule language but I / you will also have to update the other two (redline compared to current permanent and redline compared to temp) when we have final language.

Please reply all with your comments. It'd be ideal if we can get this finalized by the end of the day today.

-Joe
