Rian,

I don't see any draft ballast rules on your SharePoint site. When you are ready to draft or amend rules, it should be done in a template on SharePoint so that we know the rules comply with the Secretary of State filing requirements. If you tell me what rules you want to amend, I can load them into a template on SharePoint. We can keep the ballast and noise rules separate until we're ready to file the notice, just to make it simpler. If you need any new rule numbers, let me know because I have to request new numbers from the Secretary of State.
