Subject:	New Q-time for AQ risk-based permitting rule making
Date:	Wednesday, March 02, 2016 14:26:41

All,

Effective March 1, 2016, we have a new Q-time center for Air Quality risk-based permitting rule making:

Q-time 44781 – Rulemaking: AQ Risk-Based Permitting
Definition: To be used by DEQ staff coordinating the development of an Air Quality risk-based permitting program. The program as envisioned will take into consideration potential impacts to the nearby area when issuing a permit to a facility.

Leah, could you please send me the current list of participants so that I can provide them and their managers with the needed Q-time information.

Don't hesitate to call if you have questions or suggestions. If you make purchases associated with this rule making, please use this coding: 17-(your index)-71022-A16288-00.

Thanks,
Margaret
