Date: Tuesday, July 7, 2020 4:28:53 PM

Hi Charles,

Thank you for the update! Glad to hear the work will be minimally invasive. I'll keep an eye out for the work plan from ODOT Maintenance for a quick review & documentation from the Johnson Lake source control perspective.

Thank you for keeping DEQ informed of these activities,
Franziska

Subject: Update on I-205 culvert repair at Myers Container

Franziska – ODOT is getting closer to repairing the culvert inlet at Myers Container this summer.
The work should be minimally intrusive and unlikely to cause any impact to Johnson Lake.
I'm waiting to get details from ODOT Maintenance on what they'll do and will forward those to you.
ODOT is also working with Myers Container and their regulatory specialist, Lindsay Crowe.
More to come. Thanks,

Charles Schwarz, RG
