OK. I just took a look. A Federal PA seems very reasonable here, but I would like to check with you on the various determinants of when we do it, versus EPA. I don't see any concerns or disadvantages to a Federal PA, and the concerns I have heard in the past would not apply at this location. Have a great long weekend Ximena and Katie.

Subject: FW: Site Assessment

Hi Paul,

Please take a look at the attached screening that Ximena has completed. We need to decide is we want EPA to consider performing a PA/SI meaning check the box to Add to Superfund Active site inventory or have DEQ pursue this either through option letter to property owner City of St. Helens or complete a PA with DEQ staff (not sure we have capacity to do this).

I'll check in with you next week. We need to have this submitted to EPA before the end of Feb for some reporting purposes.

Thanks
