Katie,

I added the site to ECSI and it is now 6487, I see Kadin provided a Qtime number below, should I reach out to Dawn ISMERIO about linking the qtime to this ECSI number?

Here is the link to the files folder where I added the files Rebecca had linked: V:\Ximena Cruz Cuevas\ECSI PROJECTS TO BE ASSIGNED\ECSI 6487 Warren Barges

Going off of the PDF that was in the folder it looks like the barges are located east of the location of the site in an adjacent tax lot (1N1W12200). I can double check with Paul and Kevin to make sure this is accurate.

Based on the location of the site according to the tax lot (1N1W12300) Portland maps shows that Metro is the owner of the property.

Subject: RE: PA/SI Grant - Warren Barges

Hi Ximena,

When you have time could you please complete the following actions:

1) Add site to ECSI
2) Create project folder and pull in all the information from the link Rebecca sent
3) Pinpoint the location of the barges, Kevin and Paul know if you need help.
4) Try to determine property ownership (are they in the water and does that mean DSL? Or is there a property owner?) ORMAP is a good tool for locating tax maps, then follow up with county assessor off (some have information on-line)

Keep in mind we only have about 40 hours to complete all tasks. Ray and I need to send you some examples. First step is to determine if there are any PRPs we can contact for additional information.

Let me know if you have any questions.
Thanks
Katie

Hi folks,

The new Qtime for Warren Barges is:

#47556: PASI Site Screening - Warren Barges

Project #**E22585**: PASI-TASK 2:WARREN BARGES SITE SCREENING

Please use this time center going forward; doing so will make it much easier to track this grant and this Screening.

Thank you,

Sorry for the back and forth, but I actually will set up a new Qtime for the Warren Barges project to help with hours tracking and grant reporting. I will submit that request soon and inform you of the new Qtime as soon as I can. In the mean time, you can use the typical screening Qtime (I believe it is 25697?) and just make a note that time is for Warren Barges. Sorry to complicate things with a new code, but it will help down the line.

Hi Kadin, How you are feeling better. Please do not set up a qtime. Screenings are handled under a single Qtime. Again we are not seeking Ken's approval just informational that we will be screening this site. This is not a PA/SI where we would seek approval prior to working the site. Thanks, Katie

Yes, thank you Katie, Ray, and Rebecca. I was out sick yesterday and am still feeling under the weather – apologies for my delayed responses. I will send Ken an email today with the information we have on the Warren Barges, and I believe I need to set up a Qtime as well, then we can kick things off.

Subject: RE: PA/SI Grant - Regional Site Selection

Hi all,

Thanks for the additional information regarding the proposed Site Screening.

All of the information that the PA/SI team has received to date regarding the Warren Barges site is available in this folder:
\\deqhq1\cuppdshr\$ - CU FUNDING, BUDGET, FINANCING, COST RECOVERY\GRANTS\EPA Grants\PA-SI\20-22\20-22 WP & budget\2021-2022\2021 Work Plan\Potential Projects\USACOE_Abandoned Barges_Warren Peninsula

If memory serves, Kevin Parrett brought this to our attention last spring as a potential for the PA/SI grant.

Hi all,

Just FYI

For screens in the past, we had let Ken Marcy know but not waited to receive approval. Thanks, Ray

Just to be clear – this is not a SI (Site Inspection) project. This is for a screening (sorry if I am getting down in the weeds just don't want there to be any confusion with the lingo)

- Creating an ECSI # will be part of the screening effort, along with trying to track down additional information
- What you have is likely all the information we have right now. That is why we are doing the screening
- They are in the water at Suavie Island and have been there a long time
- Lead is the primary COPC

That is all I know right now.

Hi Katie,

That's great news!

I still want to run it by Ken so there are no surprises and he knows that we have an SI project nailed down. Could you give me a little more information about the site so I can make the ask? Just a few bullet points should do the trick. I looked through PA/SI files and have a few photos of the site (which I will share with Ken and will be helpful) but don't have much else for site documentation. I also looked on ECSI but couldn't find anything.

Thank you,

Hi Kadin,

I spoke to Kevin and looks like we will want to move forward with federal screening for Warren Barges. The primarily COPC is lead. In the past we have not had to run screenings by EPA PO for approval but I am not familiar with how Ken likes things to run since he took over as EPA PO. Could you please let me know if you need anything further before we start on the screening or if we need to wait for Ken's approval?

Also I am working on pulling some lists of potential sites for additional screenings to talk to Ximena and Ray about but am having issues with the crystal reporting function that won't be fixed (well hopefully fixed) next week. Hope to have a couple more options for screenings id in next couple of weeks.

Thanks,
Katie

Good morning PA/SI Leads,

Pulse check on our statewide "solicitation" for potential PA/SI sites. How are things looking in your regions? Do the lists below look accurate to you? Do you need additional time to speak with regional staff about potential sites? This was a quick turnaround so I understand if you need more time.

Thank you for your work on this.

Subject: PA/SI Grant - Regional Site Selection

Hi Katie, Don, and Tracy,

First I wanted to thank you folks for a productive meeting last Friday and for volunteering to be the Regional PA/SI Lead Workers. I wanted to touch base quickly to recap which potential sites we have in the hopper, how each region feels about capacity, and gather information on new sites. Below I have a summary organized by region, with notes next to each site. This summary includes Site Screenings (Task 2) and Preliminary Assessments (Task 3). Please let me know if these are accurate.

Note: These are not full-fledged committals at this time, I am putting this together to visualize what we have and what we need. When considering capacity, it is important to note we also have $25,023 of funding for PA assistance.

Total need: 4 SI / 40 hours each; 4 PA / 160 hours each

Eastern Region

1. Site Screenings
    a. Ontario Airport (2 sites). Pesticide Applicators.
2. Preliminary Assessments
    a. N/A

Capacity: ER does not have the capacity to do PA's at this time. Tracy is hoping with the addition of Alyssa Leidel that ER could handle two separate SI projects near Ontario Airport.

Western Region

1. Site Screenings
    a. Looking Glass Landfill. More information needed (Seth Sadofsky)
2. Preliminary Assessments
    a. Oakridge. Former SI, sampling needed
    b. JH Baxter. Surrounding JH Baxter area needs to be assessed

Capacity: WR has capacity to handle a mix of SIs and PAs this grant cycle. Don mentions Tina (missed

her last name) could potentially take the lead on a PA (Oakridge?)

Northwest Region

1. Site Screenings
    a. Warren Barges. More information needed (Kevin Parrett)
    b. Oaks Park. More information needed (Mark Pugh)
    c. Dry Cleaners (E Portland). More information needed (Ray Hoy)
2. Preliminary Assessments
    a. GW Model Sampling

Capacity: NWR has capacity to handle a mix of SIs and PAs this grant cycle. However, Ray Hoy is helping with ER workload. On the other hand there may be an opportunity for Ximena to oversee an SI.

At this time it looks like we have a good number of candidates for SI, but need a few more for PA. Please take some time to look this over, ask around the region for information / additional sites, and respond to this email by **Tuesday, Oct 12.** We can decide at that time if we would like to meet again and discuss.

-

Thanks everyone, and have a good weekend.
