Hi Jacob,

Thank you for your email. DEQ has offered to create another spot on the fiscal advisory committee for a person from EPAC, so happily it's not necessary to have an either/or choice in this case.

-Joe

Subject: Fiscal advisory committee for art glass permanent rule

Hello Joe,

As a member of the South Portland Air Quality (SPAQ) group, I'm writing to officially offer my spot on the art glass manufacturing permanent rulemaking fiscal advisory committee to be filled by a member of the Eastside Portland Air Coalition (EPAC).

While we probably will not know why DEQ did not reach out to EPAC and consider one of their members for the committee, I cannot act as a representative for another community that has been deeply impacted by Oregon's regulatory gaps around art glass manufacturing and which will continue to be impacted by DEQ's new regulatory interventions. As a matter of practice, I hope DEQ will do a better job in the future ensuring that impacted communities are part of these types of processes and have a seat at the table.

With this in mind, I am still interested in applying our perspective on the fiscal impacts of this rule, and would like to retain my seat on the committee if DEQ can create another spot on the committee for EPAC.

Please let me know what decision you make, or if you have any questions. Thank you.

Best,
Jacob Sherman
