Subject:	question about confidentiality of data shared during rulemaking fiscal impact analysis
Date:	Tuesday, May 03, 2016 3:16:31 PM

Hi Ella,

I'm working on a fiscal impact statement for the art glass permanent rulemaking. As part of that, I need to estimate the compliance costs for the 5 companies subject to the rule. I've reached out to them for data, and some of them had a question: if they provide DEQ with data they would rather not share with their competitors, is DEQ allowed to keep that data confidential? Or, does all data provided as part of the rulemaking fiscal impact analysis become subject to public records request?

-Joe
