---

Greetings, Committee Members,

An agenda for Friday's meeting is attached. As noted, the biggest part of the meeting is discussing the draft fiscal impact calculation and narrative, and getting your recommendations on these four questions:

1. Would the rule have a fiscal impact?
2. If so, what is the extent of that impact?
3. Would the rule have a significant adverse impact on small businesses?
4. If so, can the economic input be reduced, consistent with the public health and safety purpose of the rule?

Asking a fiscal advisory committee these specific questions is a part of the formal rulemaking process. [ORS 183.333(3)] I plan to go around the table for each of these questions, so each committee member will have a chance to give their answer if they wish.

After the meeting I'll write up a Notice of Rulemaking, which will include a summary of the committee members' recommendations. DEQ will consider your recommendations but is not required to adopt them. The Notice of Rulemaking will be part of the package that goes out for public comment and ultimately to the Environmental Quality Commission (EQC).

Advisory committee meetings are open for the public to attend, but not to participate in. I've set aside 20 minutes at the end of the meeting in case audience members want to ask questions or make comments. I'll encourage them to limit that to comments & questions about the fiscal impact, since the public comment period and public hearing will be coming up later.

I've also attached an updated version of the fiscal impact calculations and narrative. The main change is that ACPD permit fees for Tier 1 CAGMs are lower than in my previous estimate. I used the 'track changes' feature in the narrative to make it easier to see what's changed.

Feel free to call or email me if you have questions. I look forward to working with you on Friday- see you at 9am!

-Joe
