Subject:	FYI- art glass permanent rule public hearing tomorrow 7/19 at 6pm
Date:	Monday, July 18, 2016 10:57:41 AM

Greetings, Fiscal Advisory Committee Members,

Though the work of the committee is complete, I wanted to send you an update about the ongoing rulemaking process.

The input from the committee was included in the Notice of Rulemaking that DEQ published in June. The public comment period for the rule started June 15th and will end on July 29th. People can submit comments online on the DEQ website at http://www.oregon.gov/deq/RulesandRegulations/Pages/2016/Rartglass2016.aspx.

For people who want to comment in person, the opportunity is at the public hearing tomorrow night:

Tuesday, July 19, 2016 at 6 pm
DEQ Headquarters, 10th Floor Conference Room EQC-A
811 SW 6th Avenue, Portland, OR 97204

I plan to have a webinar set up so that people can listen to and/or watch the public hearing remotely:

Meeting Call-In Number: 888-363-4734
Participant Code: 1910322
Webinar Link (for live video of the hearing): https://www.connectmeeting.att.com

People using the webinar can listen and watch remotely but won't be able to submit comments that way. (They can still submit written comments through the website, of course.)

Please feel free to submit your comments in writing or at the hearing. DEQ won't be responding to comments at the hearing, but once public comment closes on 7/29 we'll be reading, summarizing and responding to all comments in writing. (In a document, not in individual responses to the comment authors.) DEQ's response to comments, and potentially changes to the rule because of them, will be part of the rulemaking package that DEQ sends to the Environmental Quality Commission for their vote on the proposed rule.

If you have ideas to improve the rule, giving specific comments is a good way to make sure that DEQ considers and gives a documented response to your ideas.

Feel free to email or call if you have questions about the process, and thank you for your involvement in this rulemaking.

-Joe

Subject: FYI- public comment period for proposed permanent art glass rule starts today

Greetings, Committee Members,

I wanted to let you know that, as planned, DEQ is opening the public comment period for the proposed art glass permanent rule today.

The Notice of Rulemaking includes many but not all of your suggestions, and in particular we're requesting public comment on 3 possible changes to the rule based in large part on your feedback:

- Should the rule be modified to apply to sources that make less than 10 tons per year of colored art glass? If so, what threshold would be appropriate? If proposing a new threshold, what is the scientific/risk based rationale for the change?
- Should the rule be modified to apply statewide, rather than only in the Portland AQMA?
- The temporary rule requires control devices be shown to capture at least 99.0% of incoming particulate matter. DEQ has received indications that, for some facilities, capturing enough particulate matter to show compliance with the 99.0% requirement may require an unmanageably long source test. DEQ seeks comment on whether replacing the 99.0% capture efficiency standard with an emissions standard at the control device outlet would be appropriate for Tier 1 or all facilities and if so, what emissions standard should be chosen. DEQ is considering a control device outlet particulate matter emission standard between 0.001 and 0.01 gr/dscf (grains per dry standard cubic foot of air) based on a range of emissions standards in federal air toxics rules.

It may not be clear how the 3rd bullet point relates to the committee's comments, but it's there to get input on an idea to give facilities more certainty about source test run length and cost. That's

something that some committee members requested at the end of the first meeting.

You (and anyone else that would like to) can see the Notice of Rulemaking document and submit comments on the rule online by going to:
http://www.oregon.gov/deq/RulesandRegulations/Pages/2016/Rartglass2016.aspx

Thank you again for your input as members of the committee.

-Joe
