Hi All,

Let's keep working through these remaining decisions. Note: this is in addition to the Wednesday check-in meeting that many of us are also in.

Items for discussion:
1. Add other materials to glassmaking HAPs list?
a. 'uranium' or 'radionuclides'?
b. Others from table below or elsewhere?
2. Any more discussion needed on baghouse leak detection systems?
3. Any more discussion needed on definition of 'raw material'?
4. Review draft rule language
5. (If time) review draft comment responses

I'll set up a webinar and share the screen as usual.

-Joe
