Hello Joe,

I've attached the staff report from our kitchen sink rulemaking that has a good amount of detail for the implementation section. Below is a more common example.

Implementation

Notification

If approved, the proposed rules would become effective upon filing with the Oregon Secretary of State. DEQ will notify affected parties by email to the Alliance of Automobile Manufacturers, Global Automakers and Oregon's auto dealers associations.

Compliance and enforcement

- Affected parties – These regulations are modifications to an existing program. The rules apply directly to manufacturers of cars plus light and medium-duty trucks. Oregon's auto dealers will also be affected through their franchise agreements with auto manufacturers.
- DEQ staff – The proposed rules would be implemented by existing DEQ Low Emission Vehicle/Zero Emission Vehicle program staff.
