Rian,

I was able to add the text of the email and embed a pdf of the letter into the Excel of the comments on SharePoint.

Subject: FW: Ballast Water Comment Letter

Can you add this to the public comments received? Or let me know where a copy should be kept.
Rian

Subject: Ballast Water Comment Letter

Good Morning Rian,

For the last several years, the American Waterways Operators, the Columbia River Steamship Operators' Association, the Oregon Public Ports Association, the Port of Portland, Sause Bros., and the Western States Petroleum Association have worked together with DEQ and other stakeholders to provide technical understanding and perspective to the development and refinement of Oregon's ballast water rules. We appreciate DEQ's willingness to work with us throughout this process and we look forward to continuing this collaborative effort moving forward. The maritime community recognizes the value and importance of the work being done by DEQ's Ballast Water Management program to protect Oregon waterways from the introduction of non-indigenous aquatic invasive species. We continue to support DEQ in these efforts and would like to provide the attached comments to the proposed revisions to the Oregon ballast water management regulations (OAR 340-143) your consideration.

With kind regards,

Kate
