And I should have added, in case you don't know this:

- For any rule you are going to amend, we have to keep the whole text of that rule in the document, not just the part being amended
- If any rules have associated tables, figures, maps; all of those items have to be included in the document, whether or not they are being amended, so they will remain attached to the rules when we file with secretary of State

Hi Meyer,
We will be amending the following rules:
340-143-0005
340-143-0010
340-143-0050
Please load them into the necessary template form and I will revise accordingly.
No new numbers required.

Thanks,
Rian

Rian,

I don't see any draft ballast rules on your SharePoint site. When you are ready to draft or amend rules, it should be done in a template on SharePoint so that we know the rules comply with the Secretary of State filing requirements. If you tell me what rules you want to amend, I can load them into a template on SharePoint. We can keep the ballast and noise rules separate until we're ready to file the notice, just to make it simpler. If you need any new rule numbers, let me know because I have to request new numbers from the Secretary of State.
