---

Hi Jeff,

Please find attached the Annual 2023 Groundwater Monitoring and LNAPL Removal Report for the Terminal 4 Slip 3 Upland Facility (ECSI No. 272).

This annual report describes the results of groundwater monitoring and light non-aqueous phase liquid monitoring and removal at the Terminal 4 Slip 3 upland site during 2023. The monitoring activities are part of a required remedial action for this upland site defined in the DEQ's 2003 Record of Decision and the 2004 Explanation of Significant Difference.

Please feel free to reach out with any questions.

Thanks,
Kelly
