Hello Brooke-

Thanks for your patience as DEQ was reviewing the revised *Basin L Stormwater Treatment Performance Verification Report*. The project engineer and I both have pretty full plates at the moment.

The responses to DEQ's comments on the draft report are acceptable, with one exception:

- The Response to Comment matrix indicates that Table 3-1 was revised to include reduction efficiencies provided by the detention and settling tanks. Based on inspection of Table 3-1 in the revised report, it appears that the updated table may not have been included(?)

DEQ concurs with the recommendation to suspend source control stormwater sampling. However, based on the number of necessary maintenance actions during the reporting period, DEQ would like to see an additional performance verification report (i.e., without stormwater sampling data) for purposes of tracking the maintenance of the system. DEQ assumes the maintenance issues were related to the breaking-in of the system and would like to see how things improve over the following year.

Please provide the revised report with the updated Table 3-1 and DEQ will approve the report. Please let me know if you have questions.

Best,

Hi Jeff,

On behalf of Kinder Morgan, MFA is pleased to submit a revised Basin L Stormwater Treatment Performance Verification Report. The revised report reflects the DEQ comments received on November 19, 2023. In addition to the revised document, a response to comment matrix and redline strike out version of the report with the revisions are attached for DEQ's review. Please let us know if you have any questions.

Thank you for your patience and also for your acceptance of the revised Basin K1 report.

Best,

Hi Jeff,

I had planned to get the Basin L documents to you last week, but then I came down with whatever is going around. I'm out sick. I just need to do my final review and then we'll get these over to you.

Sorry for the delay.

Thanks,
Brooke Harmon, PE

Hi Jeff,

Confirming receipt. We will review and let you know if we have any questions while we prepare responses.

Thanks,

Kelly-

Attached please find DEQ's comments on the following reports which were prepared by MFA on behalf of the Port of Portland:

1. Basin K1 Bioinfiltration Basin Operational Year 2 Comprehensive Report; and
2. Basin L Stormwater Treatment System Performance Verification Report

DEQ provided EPA and the Tribes an opportunity to review the reports and DEQ's draft comments, although they declined to prepare their own comments.

Please contact me if you have questions or wish to discuss these comments.
