Hi Jeff,

We have not yet received approval of our right-of-way permit application from Clackamas County.

If Clackamas County issues the permit this week, then we would start field work on the 20th and wrap up no later than the 22nd. In this scenario I think the best day for a site visit would be the 21st.

Clackamas County offices are closed on Friday, so if we don't receive the permit by COB tomorrow, then we likely will need to reschedule sampling.

I will send you a follow-up email with more details on Friday morning.

Thanks

Hello Mark-

I wanted to check in regarding the field work for the VI investigation. Is it still looking like August 20 would be the start? How many days do you anticipate being in the field?

I'm trying to look at schedules to see if a field visit is possible.

Thanks,

Hello Jeff,

All is well here. I hope that you are enjoying summer.

We received notice from Clackamas County that our application for a right of way permit has been reviewed and is awaiting final approval from their traffic engineering department.

Field work is scheduled to start on August 20. At this point, I don't foresee any hiccups with the County that would impact this schedule. I will let you know as soon as we receive final approval from the County. In the interim, please let me know if you have any questions.

Thanks

Hello Mark-

Hope this finds you well. The 2nd Quarter 2024 update for Temco (7-15-24) indicated that discussions and permitting with the County related to the VI investigation were underway. Can you provide an update regarding progress on that front and the anticipated start of field activities assuming no hiccups?

Thank you,

Jeff K. Schatz, R.G.
