Hi Mark,

CDM returned the draft Final Data Evaluation report for backcheck last week. We'll get comments/concurrence back to CDM by May 1st. I'd estimate that the final report should be back to us and ready to share in 4-6 weeks.

Hi Derek,

Temco has been inquiring when the EPA site investigation results will be available to the public. Will the data evaluation report, when final, be available to them? Is there an ETA on when that may be? Thanks!
