Date: Friday, June 21, 2024 9:54:53 AM

Gentleman,

The EPA has completed the PII and other relevant review of the Data Evaluation report for the NWPC site. The report integrates data that CDM has been collecting for the last few years and includes modeling outputs related to past and projected plume dynamics of both the Temco and NWPC sites. That report is available for download here:

https://semspub.epa.gov/src/document/10/100550838

Let me know if you have any issues accessing the report or have questions otherwise,

Respectfully,

Derek Pulvino

Hi Jeff,

We've received the final Data Summary Report from CDM. I put it in for pre-release review for PII and other similar information May 17. Once that review is done, we publish the report on the NWPC website. I suspect that's another week or two out.

When we publish, I'll reach to you and Mark with a heads up.

Semi-related, I was forwarded an email last Friday from Mark Wuttig from AECOM, asking to be added to the NWPC list serv. Is that a name either of you are familiar with?

Derek Pulvino

Hello Derek-

It has been a little while since we checked in. DEQ is working with Temco to finalize a work plan for doing some investigation of soil vapor conditions near off-site properties. DEQ has grudgingly allowed Temco to do a phased approach to the investigation, starting with soil gas samples near the upgradient property boundaries for the nearby RS Davis and Columbia Manufacturing properties.

Is there any update on when the information collected during the recent investigations at NWPC would be made public record and could be shared, cited, etc.?

Hope all is well with you. Thanks,
