RE: Microchip Technology – Emission Inventory Extension Request

Dear Julia DeGagne:

Microchip Technology, Inc. (Microchip) received an emission inventory response letter dated March 27, 2026, from the Oregon Department of Environmental Quality (DEQ) officially requesting additional information and revisions to the emission inventory for the Cleaner Air Oregon (CAO) program. Per the letter, Microchip is required to submit a revised emission inventory and additional supporting documentation detailing toxic air contaminant (TAC) emissions no later than May 26, 2026.

Due the complexity of Microchip's semiconductor facility operations and the requested additional information from Oregon DEQ, we are formally requesting an extension of 30 days to submit the revised emissions inventory, with the new submittal deadline of June 25, 2026. This extension will allow us the time necessary to provide accurate and complete information for Oregon DEQ's review and we hope will ultimately minimize any changes to the inventory following its submittal.

In accordance with Oregon Administrative Rule (OAR) 340-245-0030(3), Microchip has made substantive progress to date on preparing the revised emission inventory. Among other things, Microchip has engaged Trinity Consultants to assist Microchip in developing and/or obtaining the requested additional information, as well as completing revised emissions calculations for the inventory. Microchip requires additional time to work with Trinity to revise the facility's working draft inventory, including without limitation to analyze received information from material suppliers, provide technical justifications for proposed emission factors and refine requested potential maximum emissions for use in the inventory.

Microchip would be pleased to discuss its current progress on the inventory and remaining work with Oregon DEQ. If you have any questions on this request, and would like to schedule a meeting to discuss the facility's inventory in progress, please do not hesitate to call me at 609.247.0821 or email me at Oteri.Oghoghomeh@microchip.com. We look forward to continuing to work with Oregon DEQ throughout this call-in process.

Sincerely,

Oteri Oghoghomeh, CIH
Fab 4 EHS Manager
