Re: Memory Lane Interceptor Sewer, Pressure  
Line and Pump Station, City of Brookings,  
Curry County, Oregon

Gentlemen:

The undersigned General Contractor for the installation of the above project, does hereby request an extension of time for completion.

This request is made, and I feel the extension of time is justified, in view of the fact that I have been delayed in getting the sewage pumps which were ordered on September 29, 1967, from Pacific Pumping Co. of Portland, Oregon, and which pumps have as yet not been received by me. It is anticipated that the project can be completed, weather and other factors permitting, within a period of ten days or so after the pumps are received, and it is my intention to proceed with all reasonable diligence and to complete the work without delay.

Also, I feel that the extension of time herein requested is justified further in view of the fact that the City had first considered deleting the exhaust fan, and it was not until recently that it was decided that the fan should be secured and installed. This order was placed right away when the City and the architect decided not to delete it but the best indication that we have as to its delivery date would be around the 1st of January, 1968.

Therefore, for these reasons it is hereby requested that an extension of time be given to January 1, 1968. This is assuming, of course, that we will have received the fan by that time. I feel that, as stated, we can have the project completed for service within a period of ten days from the date that we receive the pumps, so that the sewer system can be put into operation, and it would be just a small matter of installing the fan, which will be done as soon as it is received.

This request would have been made earlier except that I was hope-

Hon. Mayor and City Council  
of the City of Brookings, Oregon

ful that we could have the pumps here and have them installed prior to the completion date, but it now appears that this will not be possible.

Yours very truly,
