Reports

Mr. Lent, reported that repair work on the water tank was completed with the exception of 6 or 8 bolts left to be put in place. He also stated that two electric lines were completed, extending to the Brown and Tuckett property and that both of these parties would be large users of electric energy. He further stated that he would have a Notice put in the next issue of the Canby Herald, calling attention to the City Ordinance regarding dogs running at large. He also reported that it will soon be necessary to use the Biron Jackson pump in the deep well, and that it would be necessary to put on a larger motor to operate it, and that it would require larger motor base or adapter to make this change. After some discussion it was left to the water committee to report on.

City Attorney Wait reported that he had looked up the ordinance on card playing in the pool hall, and read an ammendment which could be added to said Ordinance, if the Council deemed it nessesary. No action was taken.

Mr. Dimick reported that he had filled holes on Streets in different places also that The Canby Rivers Irrigation Co. had made arrangements to have pipes laid and the ditch filled up.

Mr. Bates reported that complaint had been made regarding the use of a deep well being used as a cess pool at the place of John Satter, The Recorder was instructed to notify Mr. Satter to meet with the Health Commitee at once.

Mr. Eid Reported that he had visited the Electric Light Plants in Newberg and Washougal and was well impressed with the Diesel Engine plants, but found it difficult to determine the definate cost of operation.

Mr. Markee then addressed the Council in bealf of the Canby Troop Boy Scouts, stating that said Troop were obliged to raise a sum of 62.50 as their quota to the National Organisation, and asked the Council to subscribe this amount, one half which is now due and the second half on May 1st. After many good comments on the Boy Scouts, the Council voted to subscribe \$25.00 and recomended that the Scouts work out a way to raise the balance.

Mr. Eid again addressed the Council and asked that a date be set for a joint meeting with the Chamber of Commerce and the Womens Civic Club to celebrate the event of the retireing of the last bond of the City's indebtedness.

And stated further in regard to a Diesel Plant, that from a Pay-roll stand point it would be worth while looking into.

Mr. Macintosh of The Fairbanks Morse CO. was then introduced, He gave a leghty report on Cities that are now using Diesel generating plants, and stated that there was on question that the City could save money with the use of a Diesel plant, over the rates now paid for electric energy, and he stated further that if the City was interested in installing one of these plants, that he would submit figures on cost of instalation and opperation.

Mr. Aston of the Supreior Engine Co. then addressed the council requesting that the different Engine Manufacturers be given the oppretunity to submit figures on cost of plants of different sizes and their cost of operation.

Mr. Langman Of the Langman Electric Engeneering Co. Stated that he had figures on a plant ready to submit, and after the Council agreeing to keep his figures confidential, they were left for consideration.

The Council having expressed the desire to have preliminary figures submitted on the cost of installing a plant and the cost of opperation, of same, using the cost per K.W. Hour and a certain load or demand as a basis to figure on, the Recorder was instructed to request these figures from the different Engine Manufacturers.

Mr. Hornig suggested that if a storage resevore be built to store and airiate the water from the deep well. This would illiminate the offensive gas in the water, also the nessesity of putting a larger motor on the pump, and would give more water for fire protection. No action was taken.

The communication of the League of Oregon Cities was now taken up. The League now maintains a Municipal Service Bureau, on the third floor lobby of the State House at Salem, where the legeslature is now in session. The purpose of this bureau is to furnish the various cities with accurate data on measures affecting cities.

The assessment of \$10.00 against this City for the maintainance of the league now being due, On motion of Meeks seconded by Bates and carried it was voted that the sum of \$10.00 be paid.

There being no other business, the Council adjourned.

Approved March 6, 1933

H. A. Dedman

Mayor

J. A. Fosmark
City Recorder
