

# RESOLUTION NO. 1871

## A RESOLUTION ADOPTING LOCAL LIMITATIONS FOR INDUSTRIAL WASTEWATER DISCHARGE TO THE CITY'S TREATMENT PLANT

### THE TROUTDALE CITY COUNCIL FINDS AS FOLLOWS:

1. By Permit Action Letter of March 17, 2006, DEQ formally delegated to the City the authority to implement the industrial pretreatment program.
2. The legal authority to implement the industrial pretreatment program approved by DEQ and EPA was established through the adoption of Ordinance 778.
3. The General Pretreatment Regulations (40 CFR Part 403) require that each POTW with a pretreatment program develop and enforce local limits which will establish the maximum loading of pollutants that can be accepted by their treatment facilities.
4. The City has engaged the services of a consultant (CH2M Hill) to collect data and calculate local limits for certain items being introduced into our sewage treatment system.
5. Our consultant, using guidance from development of local limits published by DEQ and EPA and procedures published by DEQ, has recommended that we establish local limits for cadmium, copper, mercury, molybdenum, selenium, silver, and zinc and maintain the existing local limits for total suspended solids (TSS), biochemical oxygen demand (BOD), non-polar fats, oils, and grease (FOG) and pH.

### NOW, THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE CITY OF TROUTDALE

Section 1. Local Limits are established for the following pollutants as listed below:

Pollutant	Local Limit (mg/L)
Cadmium	0.1
Copper	0.9
Mercury	0.04
Molybdenum	0.4
Selenium	0.4
Silver	0.1

Zinc	3.4
TSS	250
BOD	250
FOG (non-polar)	100
pH	6-9 standard units

Section 2. Local Limits shall be applicable to all industrial users. It shall be unlawful for any industrial user to discharge wastewater to the City's POTW that contains pollutants in greater concentrations than the local limits established in Section 1.

Section 3. This resolution shall be effective immediately upon adoption.
