

## **RESOLUTION NO. 2220**

### **A RESOLUTION GRANTING A SPECIFIC EXCEPTION TO THE CITY OF TROUTDALE CONSTRUCTION STANDARDS FOR PUBLIC WORKS FACILITIES FOR SW 21<sup>st</sup> STREET BETWEEN SW TROUTDALE ROAD AND SW SUNRISE CIRCLE**

#### **THE TROUTDALE CITY COUNCIL FINDS AS FOLLOWS:**

1. In order to meet the demands of public health, safety, and welfare, it is necessary to make improvements to SW 21<sup>st</sup> Street between SW Troutdale Road and SW Sunrise Circle.
2. The existing paved width on SW 21<sup>st</sup> Street between SW Troutdale Road and SW Sunrise Circle is 20 feet. Improvements to provide a 28 foot wide street section will achieve an appropriate fit with the existing improvements and topographic constraints.
3. Topographic limitations make it infeasible to include a sidewalk on the south side of SW 21<sup>st</sup> Street between SW Troutdale Road and SW Sunrise Circle.
4. Topographic limitations and limited right-of-way make it infeasible to install impervious asphalt paved surface and associated stormwater quality improvements.
5. Installation of pervious asphaltic pavement meets the stormwater quality and disposal requirements established by the City.

#### **NOW, THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE CITY OF TROUTDALE**

Section 1. That the following exceptions to the City of Troutdale Construction Standards for Public Works Facilities are granted with respect to improvements made on SW 21<sup>st</sup> Street between SW Troutdale Road and SW Sunrise Circle:

- The minimum street width for SW 21<sup>st</sup> Street between SW Troutdale Road and SW Sunrise Circle is reduced to 28 feet.
- Sidewalks are not required on the south side of SW 21<sup>st</sup> Street between SW Troutdale Road and SW Sunrise Circle.
- An 8-foot wide section of SW 21<sup>st</sup> Street between SW Troutdale Road and SW Sunrise Circle may be pervious asphaltic pavement.

Section 2. This resolution is effective upon adoption.
