

RESOLUTION NO. 1309

A RESOLUTION ADOPTING THE OREGON DEPARTMENT OF TRANSPORTATION'S TIER II TRANSIT ASSET MANAGEMENT GROUP PLAN AND PERFORMANCE MEASURES

WHEREAS, FTA's National Transit Asset Management (TAM) System Final Rule, became effective on October 1, 2016, which defined the "State of Good Repair" (SGR), which requires grantees to develop a TAM plan, establish performance measures, establish annual reporting requirements to the National Transit Database (NTD), and that the FTA provide technical assistance; and

WHEREAS, the TAM Final Rule requires the transit providers Group TAM Plan sponsor to set performance targets for the State of Good Repair by January 1, 2017; and

WHEREAS, the Planning Rule requires each MPO to establish targets no later than June 30, 2017 or 180 days after the date on which the relevant State or public transportation provider establishes its performance targets; and

WHEREAS, the Transit Asset Management (TAM) is a strategic and systematic practice of procuring, operating, inspecting, maintaining, rehabilitating, and replacing transit capital assets to manage the performance, safety, and costs over their life cycles; and

WHEREAS, these performance targets aid in a safe, cost-effective, and reliable public transportation network; and

WHEREAS, TAM provides decision makers with a guide in which to manage capital assets and prioritize funding to improve or maintain a "State of Good Repair;"

NOW, THEREFORE, BE IT RESOLVED by the Canby City Council that it is the official policy of the City of Canby to adopt the Oregon Department of Transportation's Tier II Transit Asset Management Group Plan performance measures and targets for State of Good Repair as identified in the most current Plan.

This Resolution shall take effect on February 20, 2019

ADOPTED BY THE City of Canby Council on the 20th day of February 2019.

INTRODUCTION

In 2016, the Federal Transit Administration (FTA) published a rule, 49 CFR Part 625, to require public transit providers that receive Federal transit assistance to undertake certain transit asset management activities. Transit asset management is the strategic and systematic practice of procuring, operating, inspecting, maintaining, rehabilitating, and replacing transit capital assets to manage their performance, risks, and costs over their life cycles, for the purpose of providing safe, cost-effective, and reliable public transportation. Asset management is a cornerstone of effective performance management. By leveraging data to improve investment decision-making, asset management improves reliability, safety, cost management, and customer service.

BACKGROUND

Maintaining transit assets, such as rolling stock, infrastructure, equipment, and facilities, in a state of good repair is essential to maintaining safety, ensuring system reliability, and reducing long-term maintenance costs. In its 2010 National State of Good Repair Assessment, FTA found that more than 40% of bus assets and 25% of rail transit assets were in marginal or poor condition. There is an estimated backlog of \$50–\$80 billion in deferred maintenance and replacement needs, a backlog that continues to grow. Transit agency customers, policymakers, and public agencies are holding agency management accountable for performance and increasingly expect more business-like management practices. The magnitude of these capital needs, performance expectations, and increased accountability requires agency managers and accountable executives to become better asset managers.

MAP-21 required the establishment of a National Transit Asset Management (TAM) System that would include a definition of “state of good repair;” requirements that recipients and subrecipients of federal transit funding develop transit asset management plans; state of good repair performance measure and reporting requirements; and annual reporting requirements.

To ensure compliance with the requirements of MAP-21, the FTA published a final rule on TAM planning requirements on July 26, 2016. The final rule included a transit-specific asset management framework for managing assets individually and as a portfolio of assets that comprise an integrated system. Within that framework, the FTA has identified three potential roles in transit asset management planning:

Tier I Provider is a recipient that owns, operates, or manages either (1) one hundred and one (101) or more vehicles in revenue service during peak regular service across all fixed route modes or in any one non-fixed route mode, or (2) rail transit. Tier I providers must develop their own, individual TAM plan.

Tier II Provider is a recipient that owns, operates, or manages (1) one hundred (100) or fewer vehicles in revenue service during peak regular service across all non-rail fixed route modes or in any one non-fixed route mode, (2) a subrecipient under the 5311 Rural Area Formula Program, (3) or any American Indian tribe. Tier II providers can develop their own individual TAM plan or can be included in a group plan developed by a sponsor agency.

Sponsor Agency is a State, a designated recipient, or a direct recipient that develops a group TAM for at least one tier II provider.

Asset management processes are ongoing and involve evaluating and managing the relationships between costs, risks, and performance over the asset's lifecycle. The transit asset management framework has three categories of business processes:

1. Asset Management Vision and Direction – agency-wide processes that establish the organization-wide asset management policy and strategy and drive resource allocation
2. Lifecycle Management – the processes involved in the lifecycle management of individual asset classes; these include managing the data (inventory), monitoring the assets' condition and performance, and developing lifecycle management plans
3. Cross-Asset Planning and Management – agency-wide processes that consider information from all asset classes to support the capital programming and operations and maintenance budgeting process

The fundamental concepts of asset management are straightforward; however, implementing the changes required to become a mature asset management organization requires careful planning and execution. In recognition of the potential administrative and planning burden facing small participating organizations, FTA established new guidelines and planning requirements for State Departments of Transportation.

Specifically, §625.27 requires that States, acting as sponsors, develop a group TAM plan for all subrecipients under the Rural Area Formula Program (Section 5311), including American Indian tribes. The sponsor is responsible for setting unified targets for the plan participants and share that information with MPOs that house their participating providers.

The Oregon group plan will include all Tier II provider subrecipients, except those subrecipients that also are direct recipients under the Urbanized Area Formula Program authorized at 49 U.S.C. 5307. Tier II providers may only participate in one group plan and must provide written notification to Oregon Department of Transportation (ODOT) if they choose to opt-out and develop their own plan. Participants must also provide ODOT with any information necessary and relevant to completing the original plan and any future revisions.

TRANSIT ASSET MANAGEMENT PLAN REQUIREMENTS

ODOT has developed this Oregon Statewide Tier II Transit Asset Management Plan in accordance with the guidelines established by the FTA. Specifically, §625.25 requires that all TAM plans must include:

1. An inventory of the number and type of capital assets. (Appendix 1 and 2) The inventory must include all capital assets that the provider owns, except equipment with an acquisition value under \$50,000 that is not a service vehicle. The inventory also must include third-party owned or jointly procured exclusive-use maintenance facilities, passenger station facilities, administrative facilities, rolling stock, and guideway infrastructure used by a

provider in the provision of public transportation. The asset inventory must be organized at a level of detail commensurate with the level of detail in the provider's program of capital projects.

2. A condition assessment of those inventoried assets for which a provider has direct capital responsibility. (Appendix 1 and 2) A condition assessment must generate information in a level of detail sufficient to monitor and predict the performance of the assets and to inform the investment prioritization.
3. A description of analytical processes or decision-support tools used to estimate capital investment needs over time.
4. A project-based prioritization of investments.

In addition to required elements noted above, group plan sponsors, such as Oregon must ensure the following:

1. Coordination with the development of the plan with each Tier II provider's Accountable Executive; and
2. That the completed group plan is made available to all participants in a format that is easily accessible.

DEFINITIONS

Accountable Executive means a single, identifiable person who has ultimate responsibility for carrying out the safety management system of a public transportation agency; responsibility for carrying out transit asset management practices; and control or direction over the human and capital resources needed to develop and maintain both the agency's public transportation agency safety plan, in accordance with 49 U.S.C. 5329(d), and the agency's transit asset management plan in accordance with 49 U.S.C. 5326.

Asset category means a grouping of asset classes, including a grouping of equipment, a grouping of rolling stock, a grouping of infrastructure, and a grouping of facilities.

Asset class means a subgroup of capital assets within an asset category. For example, buses, trolleys, and cutaway vans are all asset classes within the rolling stock asset category.

Asset inventory means a register of capital assets, and information about those assets.

Capital asset means a unit of rolling stock, a facility, a unit of equipment, or an element of infrastructure used for providing public transportation.

Decision support tool means an analytic process or methodology:

- (1) To help prioritize projects to improve and maintain the state of good repair of capital assets within a public transportation system, based on available condition data and objective criteria; or
- (2) To assess financial needs for asset investments over time.

Direct recipient means an entity that receives Federal financial assistance directly from the Federal Transit Administration.

Equipment means an article of nonexpendable, tangible property having a useful life of at least one year.

Exclusive-use maintenance facility means a maintenance facility that is not commercial and either owned by a transit provider or used for servicing their vehicles.

Facility means a building or structure that is used in providing public transportation.

FTA – Federal Transit Administration

Full level of performance means the objective standard established by FTA for determining whether a capital asset is in a state of good repair.

Group TAM plan means a single TAM plan that is developed by a sponsor on behalf of at least one tier II provider.

Horizon period means the fixed period of time within which a transit provider will evaluate the performance of its TAM plan.

Implementation strategy means a transit provider's approach to carrying out TAM practices, including establishing a schedule, accountabilities, tasks, dependencies, and roles and responsibilities.

Infrastructure means the underlying framework or structures that support a public transportation system.

Investment prioritization means a transit provider's ranking of capital projects or programs to achieve or maintain a state of good repair. An investment prioritization is based on financial resources from all sources that a transit provider reasonably anticipates will be available over the TAM plan horizon period.

Key asset management activities means a list of activities that a transit provider determines are critical to achieving its TAM goals.

Life-cycle cost means the cost of managing an asset over its whole life.

ODOT– Oregon Department of Transportation

OPTIS- Transit Division's web-based software that the Public Transit Section uses to manage grants and assets.

Participant means a tier II provider that participates in a group TAM plan.

Performance Measure means an expression based on a quantifiable indicator of performance or condition that is used to establish targets and to assess progress toward meeting the established targets (e.g., a measure for on-time performance is the percent of trains that arrive on time, and a corresponding quantifiable indicator of performance or condition is an arithmetic difference between scheduled and actual arrival time for each train).

Performance target means a quantifiable level of performance or condition, expressed as a value for the measure, to be achieved within a time period required by the Federal Transit Administration (FTA).

Public transportation system means the entirety of a transit provider's operations, including the services provided through contractors.

Public transportation agency safety plan means a transit provider's documented comprehensive agency safety plan that is required by 49 U.S.C. 5329.

Recipient means an entity that receives Federal financial assistance under 49 U.S.C. Chapter 53, either directly from FTA or as a subrecipient.

Rolling stock means a revenue vehicle used in providing public transportation, including vehicles used for carrying passengers on fare-free services.

Service vehicle means a unit of equipment that is used primarily either to support maintenance and repair work for a public transportation system or for delivery of materials, equipment, or tools.

Special Transportation Funds (STF) means a funding mechanism exclusive for Oregon transit systems to use for capital and operating expenses. These funds support transportation for seniors and persons with disabilities.

Sponsor means a State, a designated recipient, or a direct recipient that develops a group TAM for at least one tier II provider.

State of good repair (SGR) means the condition in which a capital asset is able to operate at a full level of performance.

State Transportation Improvement Funds (STIF) - STIF resources are exclusive to Oregon transit systems and may be used for public transportation purposes that support the effective planning, deployment, operation, and administration of STIF-funded public transportation programs. These uses include, but are not limited to, creating new transit systems and services, maintaining or continuing systems and services, creating plans to improve service, and to meet match requirements for state or federal funds used to provide public transportation services.

Subrecipient means an entity that receives Federal transit grant funds indirectly through a State or a direct recipient.

TERM scale means the five (5) category rating system used in the Federal Transit Administration's Transit Economic Requirements Model (TERM) to describe the condition of an asset: 5.0—Excellent, 4.0—Good; 3.0—Adequate, 2.0—Marginal, and 1.0—Poor.

Tier I provider means a recipient that owns, operates, or manages either (1) one hundred and one (101) or more vehicles in revenue service during peak regular service across all fixed route modes or in any one non-fixed route mode, or (2) rail transit.

Tier II provider means a recipient that owns, operates, or manages (1) one hundred (100) or fewer vehicles in revenue service during peak regular service across all non-rail fixed route modes or in any one non-fixed route mode, (2) a subrecipient under the 5311 Rural Area Formula Program, or (3) any American Indian tribe.

Transit asset management (TAM) means the strategic and systematic practice of procuring, operating, inspecting, maintaining, rehabilitating, and replacing transit capital assets to manage their performance, risks, and costs over their life cycles, for the purpose of providing safe, cost-effective, and reliable public transportation.

Transit asset management (TAM) plan means a plan that includes an inventory of capital assets, a condition assessment of inventoried assets, a decision support tool, and a prioritization of investments.

Transit asset management (TAM) policy means a transit provider's documented commitment to achieving and maintaining a state of good repair for all of its capital assets. The TAM policy defines the transit provider's TAM objectives and defines and assigns roles and responsibilities for meeting those objectives.

Transit asset management (TAM) strategy means the approach a transit provider takes to carry out its policy for TAM, including its objectives and performance targets.

Transit asset management system means a strategic and systematic process of operating, maintaining, and improving public transportation capital assets effectively, throughout the life cycles of those assets.

Transit provider (provider) means a recipient or subrecipient of Federal financial assistance under 49 U.S.C. chapter 53 that owns, operates, or manages capital assets used in providing public transportation.

Useful life means either the expected life cycle of a capital asset or the acceptable period of use in service determined by FTA.

Useful life benchmark (ULB) means the expected life cycle or the acceptable period of use in service for a capital asset, as determined by a transit provider/State, or the default benchmark provided by FTA.

Useful mileage benchmark (UMB) means the expected mileage cycle or the acceptable mileage during the life of a capital asset – vehicle, as determined by a transit provider/State.

TIER II TRANSIT SYSTEMS

The State of Oregon currently has 53 Tier II transit systems as defined by the Federal Transit Administration, FTA, participating in this plan. Those systems, listed in Table 1, vary from demand response, fixed route and intercity service modes. Each system has requested to participate in the State Plan to ensure compliance with FTA 49 CFR Part 655. A detailed listing of all capital assets included in this plan are located in Appendix 1 and 2.

BENCHMARKS

The State of Oregon Rail and Public Transit received permanent transportation funding through a state payroll tax adopted into law by House Bill 2017. With the increase of transit funding throughout Oregon, the Rail and Public Transit will initially be adjusting the Transit Asset Management benchmarks performance targets. Please see the [Rail and Public Transit Asset Management Webpage](#) for the yearly performance targets.

Table 1 TAM Plan Systems

Transit Property	Assets			Transit Property	Assets		
	Rolling Stock	Facilities	Equipment		Rolling Stock	Facilities	Equipment
Basin Transit Service Transportation District	10	1		Grant County Transportation District	8		
Benton County	36			Harney County	8

TAM PLAN INCLUSION

Under the requirement for TAM Plan inclusion, ODOT requires all Tier II public transit systems or transit systems providing transportation to the public or segment of the public to be included in this plan. All systems included are either recipients or sub-recipients of FTA 5311 funds who own, operate or manage public transportation capital assets used in the provision of public transportation or FTA 5310 funds providing transportation to the general public or the defined, “segment of the general public” according to age, disability or income.

The ODOT TAM Plan is adopted by all participating agency’s Accountable Executive to ensure data has been properly documented, targets and benchmarks are understood. Each Accountable Executive acknowledges the Plan before the final version is published.

VEHICLE CLASSIFICATIONS

ODOT procures vehicle types to meet the identified need for the vehicle, service geography and ability to maintain the vehicle. Vehicle categories range from Class A – Large, Heavy Duty Bus to Class E – Light Duty Small Bus, Minivan, Van and Sedan. Each vehicle category is designated with a minimal useful life taken from FTA Circular 4010.1E. Below, Table 2 shows the criteria used by ODOT to classify rolling stock and apply Useful Life and Useful Mileage performance measures.

Table 2 Rolling Stock Classifications

ODOT Vehicle Classifications	
Asset Class	Asset Sub-Class
Rolling Stock	Class A: 12 yrs/500,000 miles (large, heavy-duty)
	Class B: 10 yrs/350,000 miles (medium, heavy-duty)
	Class C: 7 yrs/200,000 miles (medium, med-duty)
	Class D: 5 yrs/150,000 miles (medium, light-duty)
	Class E: 4 yrs/100,000 miles (small, light-duty)

ASSET INVENTORY

Data Collection

ODOT requires grant sub-recipients to submit rolling stock data for TAM purposes quarterly. ODOT uses a web portal database designed specifically to track and account for all assets for program management purposes.

The OPTIS portal allows grant recipients to update on a periodic basis, information on each asset managed by ODOT through State, Federal STF, and STIF funding. The information includes the following data points:

- ◆ Owner Name
- ◆ Operator Name
- ◆ Asset #
- ◆ VIN (Vehicle ID Number)
- ◆ Asset Make
- ◆ Asset Model
- ◆ Asset Last Out of Service
- ◆ Year
- ◆ Seating Capacity
- ◆ ADA Securement Areas
- ◆ Original Value
- ◆ Last Condition Assessment
- ◆ Current Status
- ◆ Sub Grant #
- ◆ Estimated Useful Life Category (Table 2)
- ◆ Estimated Useful Life

Once data is collected, ODOT computes the performance measures for each of the three Tier II categories; Rolling Stock, Facilities and Equipment using an Excel Spreadsheet program with formulas relative to the States criteria for State of Good Repair.

A full listing of all 2017 assets is located in Appendix 1 and 2.

CONDITION ASSESSMENTS

ODOT combines both system assessments for rolling stock and equipment and facilities.

Rolling Stock and Equipment

Rolling stock assessments are based on the following conditions in Table 3 and are conducted by transit management or operations supervisors. To conduct a proper vehicle assessment the inspector is required to not only assess the physical vehicle, but also review the maintenance file. The reviewer will identify preventive maintenance inspections as well as maintenance repairs classified as minor or major repairs. Major repairs include substantial work to engine and drivetrain, electrical, body, lift replacement or computer. Minor repairs might include brakes, alignment, minor lift repairs, and other lower cost repairs not associated with preventive maintenance.

Equipment assessments are completed by the subrecipient using the same condition as the rolling stock assessment. This requires transit systems to maintain proper records of each piece of equipment used in the support of public transit service. Only equipment with an acquisition value greater than \$50,000 must be included in their TAM data. The exception is non-revenue service vehicles where value is not a factor. Examples of equipment include non-revenue vehicles, non-permanent facility equipment – movable bus wash system, portable lift systems, tire changing stations, digital bus arrival boards and other major equipment components not a part of the facility.

Table 3

Asset Rating Score	Asset Age	Asset Condition	Asset Performance	Level of Maintenance	Asset Condition Rating	
	(Percent of useful Life Remaining)	(Quality, Level of Maintenance Required)	(Reliability, Safety, Meets Industry Standards)	(Level of Preventive and Corrective Maintenance)	Rating Description	Scoring Range
5	Asset new or nearly new 75% - 100%	Asset new or like new; no visible defects	Asset meets or exceeds all performance and reliability metrics, industry standards	No unfunded or deferred maintenance activities	Excellent	4.8 to 5.0
4	Asset nearing or at its midlife point 50%-75%	Asset showing minimal signs of wear; some slight defects or deterioration	Asset generally meets performance and reliability metrics, industry standards	Corrective maintenance increasing; no skipped preventive or corrective maintenance	Good	4.0 to 4.7
3	Asset has passed its midlife point 25%-50%	Some moderately defective or deteriorated components; expected maintenance needs	Occasional performance and reliability issues; may be substandard in some areas	More frequent corrective maintenance required and some minor component failures	Adequate	3.0 to 3.9
2	Asset nearing or at end of its useful life 0%-25%	Increasing numbers of defects; deteriorating components; growing maintenance needs	Performance and reliability problems becoming more serious; sub-standard elements	Corrective maintenance activities frequently, including major components needing replacement or rehab	Marginal	2.0 to 2.9
1	Asset passed its useful life	Asset in need of replacement or restoration; may have critically damaged components	Frequent performance and reliability problems; does not meet industry standards	Major component failures	Poor	1.0 to 1.9

Facilities

Facility assessments are completed by the subrecipient using a modified Transit Economic Recovery Model (TERM) assessment form developed by ODOT. The form includes 10 areas of concentration with sub-sections for each area. The rating systems uses a 1-5 rating scale as required by FTA. The facility condition assessment is reported yearly in OPTIS. Facility assessments will be conducted annually. The assessment tool is shown in Table 5.

All facility assessments will be documented and entered in a data table to also include useful life data on each facility. Currently, ODOT is using the standard 40 year useful life for facilities and only includes facilities with a purchase price greater than \$50,000. Subrecipients are required to report data for facilities where they have capital responsibility. Facility types include any building or structure used in providing public transportation, including passenger stations, operations, maintenance and administrative facilities.

Capital responsibility is defined as the following:

You have direct capital responsibility	You do NOT have direct capital responsibility
You own the asset You jointly own the asset with another entity You are responsible for replacing, overhauling, refurbishing, or conducting major repairs on that asset, or the costs of those activities are itemized as a capital line item in your budget.	You do not own the asset AND you are not responsible for replacing, overhauling, refurbishing, or conducting major repairs on that asset, or the costs of those activities are not itemized as a capital line item in your budget.

For Maintenance and Administrative facilities:

- ◆ Any maintenance or administration facility under 100 square-ft. does not need to be included (e.g. security guard shack, stand-alone restroom, storage shelter in which no work is performed) in either of your inventories.
- ◆ If your vehicles are the only vehicles that the maintenance facility services, then it is considered an “exclusive use” facility and thus must be inventoried in your TAM plan.
- ◆ If the administrative office is in a building that has only incidental transit use (e.g., city hall), then it is not required to be included in either of your inventories.

For Passenger and Parking facilities:

- ◆ All passenger facilities must be inventoried in your TAM plan and reported to the NTD regardless of ownership.
- ◆ You must inventory all parking facilities for which you have direct capital responsibility, and that are immediately adjacent to a passenger facility (e.g., a park-and-ride lot or a garage).

Table 4 ODOT Conditional Assessment Tool

This table is to be used for completion of the facility assessment. It includes 10 inspection areas requiring ratings (see below) for each sub category. The score will automatically calculate the SGR score for the facility based on weighted averages of each inspection area.

Maintenance and Administrative Facility Conditional Assessment	NTD ID	SCORE	Assessor
Inspection Area			Intls.
Substructure			
Foundations: Walls, columns, pilings other structural components			
Basement: Materials, insulation, slab, floor underpinnings			
Shell			
Superstructure/structural frame: columns, pillars, walls			
Roof: Roof surface, gutters, eaves, skylights, chimney surrounds			
Exterior: Windows, doors, and all finishes (paint, masonry)			
Shell appurtenances: Balconies, fire escapes, gutters, downspouts			
Interiors			
Partitions: Walls, interior doors, fittings such as signage			
Stairs: Interior stairs and landings			
Finishes: Materials used on walls, floors and ceilings			
<i>This component covers all interior spaces, regardless of use</i>			
Conveyance (Elevators and Escalators)			
Elevators			
Escalators			
Lifts: any other such fixed apparatuses for the movement of goods or people			
Plumbing			
Fixtures			
Water distribution			
Sanitary Waste			
Rain water drainage			
HVAC (Heating, ventilation, and air conditioning)			
Energy supply			
Heat Generation and distribution systems			
Cooling generation and distribution systems			
Testing, balancing, controls and instrumentation			
Chimneys and vents			
Fire Protection			
Sprinklers			
Standpipes			
Hydrants and other fire protection specialties			
Electrical			
Electrical service and distribution			
Lighting & branch wiring (interior and exterior)			
Communications and security			
Other electrical system-related pieces such as lighting protection, generators, and emergency lighting			
Equipment/Fare Collection			
Equipment related to the function of the facility, including maintenance or vehicle service equipment			
For clarity, includes items valued above \$10,000 and related to facility function			
Site			
Roadways/driveways and associated signage, markings and equipment			
Parking lots and associated signage, markings and equipment			
Pedestrian areas and associated signage, markings, and equipment			
Site development such as fences, walls, and miscellaneous structures			
Site Utilities			
Overall Assessment Score			

The Condition Assessment Rating Scale is used to reference the description for scores of 1-5 used to complete the Assessment Form. This scale is taken from FTA's Transit Economic Requirements Model (TERM) scale, used primarily for facilities.

Condition Assessment Rating Scale		
Rating	Condition	Description
4.8-5.0	Excellent	No visible defects, new or near new condition, may still be under warranty if applicable
4.0-4.7	Good	Good condition, but no longer new, may have some slightly defective or deteriorated component(s), but is overall functional
3.0-3.9	Adequate	Moderately deteriorated or defective components; but has not exceeded useful life
2.0-2.9	Marginal	Defective or deteriorated component(s) in need or replacement; exceeded useful life
1.0-1.9	Poor	Critically damaged component(s) or in need of immediate repair; well past useful life

This table should be completed to include the individual(s) who assess each component of the Facility Assessment form. A column on the form requires initials of the person completing that section of the assessment. The below table lists each person by name and title.

Instructions

Each Inspection Area requires initials of the staff person conducting the inspection. All staff responsible for the facility inspection must be listed.

Date	Transit System Assessor	Title

DECISION SUPPORT TOOLS

In an effort to determine the State of Good Repair (SGR) that truly reflects the condition of the asset, ODOT uses a three-factor analysis to determine SGR for rolling stock and equipment. The factors include useful life, useful mileage and condition assessment. Each factor uses a 1-5 scale and utilizes the useful life and miles taken from Table 3 in the beginning of this plan. Taking an average of the three factors allows ODOT to identify rolling stock or equipment that may have not have met its useful life but due to extremely high mileage or adverse operating conditions

may not be fit for its intended purpose. Conversely, a vehicle exceeding its useful life may have low mileage and is in good condition and is fit for its intended purpose.

ODOT uses the three-factor analysis on each asset in Rolling Stock and Equipment resulting in an average which is then used in determining replacement priority. The analysis is summarized by each sub class and is listed below in Tables 5.

Table 5 – Fleet Summary by Factor

By Numbers	System Fleet	Performance Measure	Useful Life				
	Asset Sub-Class	Number/Scale	5	4	3	2	1
	Class A: 12 yrs/500,000 miles (large, heavy-duty)	193	41	24	48	40	40
	Class B: 10 yrs/350,000 miles (medium, heavy-duty)	66	19	18	13	12	4
	Class C: 7 yrs/200,000 miles (medium, med-duty)	127	15	16	17	22	57
	Class D: 5 yrs/150,000 miles (medium, light-duty)	239	7	43	22	17	150
	Class E: 4 yrs/100,000 miles (small, light-duty)	318	0	44	22	31	221
	Total Revenue Vehicles	943					

By Numbers	System Fleet	Performance Measure	Useful Miles				
	Asset Sub-Class	Number/Scale	5	4	3	2	1
	Class A: 12 yrs/500,000 miles (large, heavy-duty)	193	50	18	56	23	46
	Class B: 10 yrs/350,000 miles (medium, heavy-duty)	66	16	16	11	6	17
	Class C: 7 yrs/200,000 miles (medium, med-duty)	127	20	16	16	21	54
	Class D: 5 yrs/150,000 miles (medium, light-duty)	239	43	50	32	41	73
	Class E: 4 yrs/100,000 miles (small, light-duty)	318	52	49	46	45	126
	Total Revenue Vehicles	943

	Class E: 4 yrs/100,000 miles (small, light-duty)	318	175	143	55%
	Total Revenue Vehicles	943			

In determining the State of Good Repair for Facilities, ODOT uses two performance measures or factors to obtain a realistic assessment of the facility's SGR. The first factor is Useful Life. The below scale shows the formula ODOT uses to determine, on a scale of 1-5, the useful life of a facility.

Useful Life Rating Scale

5	Excellent	Facility is less than 20 years old
4	Good	Facility is 21-30 years old
3	Adequate	Facility is 31-40 years old
2	Marginal	Facility is 41-50 years old
1	Poor	Facility is 50 years + old

The second factor is condition assessment and is based on a modified Term Lite scale and explained in the Section: Condition Assessment, but scale is below.

Condition Assessment Rating Scale		
Rating	Condition	Description
4.8-5.0	Excellent	No visible defects, new or near new condition, may still be under warranty if applicable
4.0-4.7	Good	Good condition, but no longer new, may have some slightly defective or deteriorated component(s), but is overall functional
3.0-3.9	Adequate	Moderately deteriorated or defective components; but has not exceeded useful life
2.0-2.9	Marginal	Defective or deteriorated component(s) in need or replacement; exceeded useful life
1.0-1.9	Poor	Critically damaged component(s) or in need of immediate repair; well past useful life

By taking an average of these two factors ODOT is able to determine the SGR for each facility and in turn rank them in their Investment Priority Table.

Based on the three-factor analysis for Rolling Stock and two-factor analysis for Facilities, ODOT is able to calculate annual benchmarks to be submitted to FTA as part of the NTD reporting cycle. The benchmarks with performance targets are submitted to the National Transit Database annually and can be found on ODOT's website listed below:

<https://www.oregon.gov/ODOT/RPTD/Pages/Transit-Asset-Management.aspx>

INVESTMENT PRIORITIZATION

Through the process laid out in earlier sections of this plan, ODOT is able to identify a list of capital assets in need of replacement or rehabilitation. ODOT generates the following list annually to provide guidance for future investment projects by ODOT and subrecipients. This is an effort to achieve an increased level of State of Good Repair (SGR) and assure transit riders and transit employees the vehicles they are riding or operating are safe and reliable.

Other factors may have an impact on the ability to replace assets on this list. However, because of the list, ODOT is able to plan more effectively for the next fiscal year.

The following Table 7 shows a list of capital assets scoring the lowest score based on the three-factor analysis. Rolling stock assets include any vehicle with an average score of 2 or below.

**Table 7 – Rolling Stock Investment Priority
