Summary: PM_{2.5} New Source Review/Prevention of Significant Deterioration: This proposed rulemaking would adopt NSR/PSD rules for fine particles (PM_{2.5} or particulate matter less than 2.5 microns in diameter) adopted by a temporary rule on August 19, 2010. The unexpired temporary rule will be repealed upon adoption of the final rule. The proposed rule amendments align Oregon's rules with federal requirements to allow DEQ to continue to implement the NSR/PSD program in Oregon.

Greenhouse Gas (GHG) Prevention of Significant Deterioration: DEQ is proposing rules that would update the PSD program to include greenhouse gases in response to regulations promulgated by EPA. Additional proposed changes clarify existing requirements in Oregon's NSR/PSD rules. Adoption of the rules will allow DEQ to continue implementing the federally approved Prevention of Significant Deterioration program in Oregon.

Small Scale Renewable Energy Sources: EPA requires states to have minor source construction approval programs, but gives states flexibility in how to do this. Oregon's minor source construction approval program basically applies major source NSR/PSD requirements to any source with emissions over the significant emission rate (including some areas where the Oregon SER is lower than the federal SER). HB 2952 revised how the minor source construction approval program works for small scale local energy projects.

Permitting Rule Updates: DEQ is proposing to update the version of the federal acid rain program rules adopted by reference.

These amendments, if adopted, will be submitted to the U.S. Environmental Protection Agency (EPA) as a revision to the State Implementation Plan, which is a requirement of the Clean Air Act
