<b>Header</b>	
<div>— font — — size —</div> <div>Small and Mid-size Boiler Rule Amendments</div>	
<b>Body</b>	
<div>— font — — size —</div> <p>DEQ is proposing to replace temporary rules with permanent rules to exempt small-scale commercial, industrial and institutional boilers from the Heat Smart regulations if they are subject to federal emissions standards for hazardous air pollutants and the user complies with existing construction approval requirements. Small boilers are those with a heat output capacity equal to or less than 1 million Btu per hour.</p> <p>The proposed rules would also require the user to register the boiler with DEQ, which includes confirmation of compliance with existing applicable state and federal particulate and air toxics standards. DEQ is also proposing that mid-size commercial, industrial and institutional boilers that are subject to state and federal air quality standards register with DEQ if they are below air quality permitting thresholds.</p> <p>For more information, including how to comment visit: <a href="http://www.deq.state.or.us/aa/burning/boilerRule.htm">http://www.deq.state.or.us/aa/burning/boilerRule.htm</a></p> <p><b>All comments must be received by DEQ by 5 p.m. August 25, 2011.</b></p> <p><b>Public Hearing</b></p> <p><b>Portland - August 18, 2011</b> <b>6 p.m.</b> DEQ Headquarters, 10th floor 811 SW 6th Avenue</p>
