**Subject:** Notice of Temporary Rulemaking - Updates to the Oregon Clean Fuels Program

Dear Stakeholders,

The Department of Environmental Quality is proposing rule amendments to the Oregon Clean Fuels Program. At their December 11-12, 2013 meeting, the Environmental Quality Commission will consider adopting a temporary rulemaking to make the Oregon Clean Fuels Program more efficient by eliminating unnecessary requirements and immediately reducing the burden on smaller businesses participating in the program. DEQ will propose permanent rule amendments in June 2014.

The Environmental Quality Commission adopted the first phase of the Oregon Clean Fuels Program on Dec. 7, 2012. The program requires all importers and Oregon producers of transportation fuels to register, keep records and submit reports to DEQ about the volumes and types of fuels they supply to Oregon. To date, 64 companies that import gasoline, ethanol, diesel and biodiesel or produce ethanol or biodiesel in Oregon have registered with DEQ. These proposed rule changes are largely based on feedback received from these companies during outreach for this program.

The proposal is online at  
<http://www.oregon.gov/deq/RulesandRegulations/Pages/2013/CFPPH1.aspx>.

The Oregon.gov website is experiencing technical difficulties today. Please check back later if you are unable to access the site.

If you have questions, please contact me at (503) 229-5388 or
