**Subject:** Penalty matrix for non-NPDES turbid water discharges from residential activities

Hi Les and Jeff,

After lots of discussion regarding turbid water discharges from disturbances of less than an acre the managers on the cc line above agreed that we believe that the appropriate language/penalty amounts to address this issue is as follows:

For the \$**2,500** matrix: "Violation of ORS 468B.025(1)(a) or .025(1)(b) resulting from turbid discharges to waters of the state caused by non-residential uses of property **disturbing** less than one acre in size."

For the \$**1,000** matrix: "Violation of ORS 468B.025(1)(a) or .025(1)(b) resulting from turbid discharges to waters of the state caused by residential use of property **disturbing** less than one acre in size."

Please feel free to call me about this if you want to discuss further.
