Subject: Proposed Div. 12 language

Dear Ranei and Zach, I am getting back to this after a prolonged hiatus. Regarding the less than one acre sites here is the language I propose:

For the \$6,000 matrix: "Violation of ORS 468B.025(1)(a) or .025(1)(b) resulting from turbid discharges to waters of the state caused by non-residential uses of property less than one acre in size."

For the \$2,500 matrix: "Violation of ORS 468B.025(1)(a) or .025(1)(b) resulting from turbid discharges to waters of the state caused by residential use of property less than one acre in size."

I also have a question for Ranei: There was a request to include the term "geothermal fluids" in language dealing with UICs in the penalty matrices in OAR 340-012-0140. I can't figure out where we were supposed to insert that. According to Ranei's spreadsheet, the request came from "Paula" but I don't know who that is.
