Jenny,

Thanks for the opportunity to provide you with special lists for noticing the Division 12 rulemaking. Here's where we are for LQ programs:

Cleanup – Bruce Gilles will provide lists for Emergency Response and Dry Cleaner advisory committees.

HW – include these existing GovDoc options:

cid:image001.png@01CE86F9.68B6C430

Also, there are regulated entities in HW permitting and generators lists in addition to training and TUHWR. The HW program will pull something together for you (Lissa, will you coordinate with David on this).

We should be able to get these to you by Mon-Tue next week.

Tom

Subject: Division 12 Rulemaking

Greetings Gentleman,

OCE has been working on its Division 12 rulemaking package for some time. We are now preparing to go out on public notice with the package in August. Division 12 prescribes DEQ's formal enforcement process and civil penalty determinations. Legislation in 2009 increased DEQ's civil penalty maximums from \$10,000 per day per violation to \$25,000 per day per violation (much more for spills!) This rulemaking package implements these new maximums, starting with an increase to base civil penalties. [Here](#) is a link to the rulemaking documents, just in case you are curious what this might entail.

So here's why I'm bugging you. The air quality program has informed OCE that they would like us to send notice of the rulemaking to not only the agency rulemaking list on GovDelivery, but also to

all of the air quality permittees and interested persons list. So, my question to you both is, are there special lists for your respective programs that you also think should receive the Division 12 notice of rulemaking (in addition to the agency rulemaking list)? If so, please let me know what those are and whether they already exist on GovDelivery, or whether we will need to do this by other means. If you can let me know by **next week**, that would be greatly appreciated!
