

# Rule Workshop

**Date:** Wednesday November 28, 2007, 9:00 to 11:00 AM  
**Location:** Springfield Library Meeting Room, 225 Fifth Street  
**What:** Workshop to Discuss Proposed Changes to Air Permitting Rules

---

The Lane Regional Air Protection Agency (LRAPA) is proposing changes to LRAPA Rules and Regulations. This workshop will describe the changes proposed and allow interested parties to ask questions informally. A formal hearing on the rules will be held sometime in the spring of 2008.

The LRAPA industrial permitting rules need to be revised and updated. The proposed rules would amend several major sections of the LRAPA Rules and Regulations in an effort to maintain consistency with ODEQ and EPA regulations and to maximize efficiencies in the program, while maintaining the existing level of environmental protection. These changes are consistent with The Oregon Department of Environmental Quality's (ODEQ's) air permit streamlining phase one and phase two (SPPITT 1 and SPPITT 2) adopted by ODEQ in 2002 and 2007 respectively.

The summary of the rule changes (19 pages) and a copy of the entire LRAPA Rules and Regulations proposed to be revised (approximately 400 pages) are available by downloading them at [www.lrapa.org](http://www.lrapa.org) or by appointment at LRAPA's office at 1010 Main Street in Springfield.
