**Stats. Implemented:** ORS 468A.025 and 468A.035

**RULE SUMMARY**

Short summary

The Environmental Quality Commission adopted rules to update Oregon maintenance plans designed to protect air quality in Grants Pass for carbon monoxide (CO) and

for particulate matter 10 microns and smaller (PM10) as required by federal law. Because CO and PM10 pollution levels have been very low and the area is unlikely to exceed health standards in the future, the area qualified for and DEQ proposed limited maintenance plans that streamline requirements and eliminate costly computer modeling requirements for transportation conformity analysis.

DEQ proposed and EQC adopted the rules for incorporation into the Oregon Clean Air Act State Implementation Plan. The rules will be submitted to the U. S. Environmental Protection Agency for its approval under the federal Clean Air Act.

#### Brief history

Under the Clean Air Act, EPA sets air quality standards to protect public health for six common air pollutants. EPA established the CO standard at 35 parts per million for a 1-hour average and at 9 parts per million for an 8-hour average. EPA established the PM10 standard at 150 micrograms per cubic meter for a 24-hour average and at 50 micrograms per cubic meter for an annual average. The Clean Air Act requires communities that exceed these health standards to adopt plans to achieve and maintain good air quality.

In addition to the PM10 standard, EPA adopted the PM2.5 standard in 1997, for smaller or fine particulate matter 2.5 microns in size or less, since the smaller inhalable particles have been found to pose a greater health risk. Grants Pass has never violated the PM2.5 standard.

In the mid to late 1980s, Grants Pass exceeded the 8-hour CO standard and the 24-hour PM10 standard. The area was designated as a nonattainment area for CO in 1985 and for PM10 in 1990. In response, EQC adopted attainment plans with CO and PM10 control measures to reduce pollution levels within the urban growth boundary to meet the federal standards. This resulted in significant improvement in air quality and Grants Pass was reclassified to attainment for CO in 2000 and PM10 in 2002. EQC adopted the first maintenance plans for Grants Pass at that time.

EPA requires Oregon to establish second maintenance plans for the Grants Pass area to ensure compliance with the standards through 2025. EPA provides an option for states to adopt simplified plans, called limited maintenance plans, for low-risk areas like Grants Pass. Over the last 25 years, Grants Pass's CO and PM10 levels have steadily declined and the area is unlikely to exceed these standards again.

#### Regulated parties

The rules affect the Middle Rogue Metropolitan Planning Organization. The amendment of OAR 340-200-0040 to incorporate the limited maintenance plans into State of Oregon Clean Air Act Implementation Plan did not change the regulated parties.
