Don't know if you need this for the "record?"

Subject: Kitchen Sink Staff Report

Hi Jill,

Wow, was that an impressive staff report! I only had one real question on the report. The following can be found on page 57, in the section "Greenhouse gas Best Available Control Technology determinations:"

*It is possible the analysis will determine that an emission control system must be installed. It is also possible **for** the analysis will determine that no emission controls are feasible; this can occur at Step 2 or Step 4. The individual steps are described in more detail below.*

I think the highlighted word needs to be deleted or change "will" to "to."

I didn't focus too hard on acronyms being spelled out and used consistently. Let me know if that was an oversight on my part and I will review for that specifically..

Thanks for all your hard work, Jill!
Lydia

Did You Know?

DEQ's underground storage tank program is celebrating 30 years of cleaning up and protecting our land and water resources by closing over 26,500 substandard tanks and cleaning up 88% of petroleum releases.
