RE: Comments on Oregon Greenhouse Gas Permitting Rules Proposal

Dear Ms. Inahara:

Weyerhaeuser NR Company (Weyerhaeuser) appreciates the opportunity to provide these comments in response to the Oregon Department of Environmental Quality (DEQ) extended public comment period for the air quality permitting, Heat Smart, and gasoline dispensing facility updates with regard to certain Oregon greenhouse gas permitting rules. Headquartered in Federal Way, Washington, Weyerhaeuser is an international forest products company that in the United States owns and operates bleach Kraft pulp mills, a liquids packaging board plant, both a number of lumber and engineered lumber products mills, and conducts extensive silviculture, sales, and distribution operations. Weyerhaeuser operates two lumber mills and two engineered lumber products mills in Oregon. In addition, Weyerhaeuser operates a variety of Timberlands sites in the state.

Weyerhaeuser continues to be a strong proponent of cost effective air regulations in Oregon that both result in benefits to the environment while also providing for jobs in the Oregon communities in which we do business. Along those lines we are supportive of the August 28, 2014 comments submitted by Associated Oregon Industries (AOI) to DEQ concerning:

- changes to the proposed categorical insignificant activities in the Oregon Administrative Rules (OAR) 340-200-0020;
- the proposed list of source categories that require an air contaminant discharge permit in OAR 340-216-8010; and
- the applicability of minor versus major new source review in OAR 340-224-0010.

We believe the comments submitted by AOI are consistent with our views of how best to address these proposed changes. As such we urge the adoption of these suggested comments from AOI.

The opportunity to provide DEQ with these comments is much appreciated.

Sincerely,

A handwritten signature in black ink, appearing to read 'Dale Wonn', written over a horizontal line.

Dale Wonn

Environmental Manager
