DEQ proposes revisions to air quality permitting, Heat Smart, and gasoline dispensing facility rules

DEQ proposes rule revisions to:

- Clarify and update air quality rules
- Update particulate matter emission standards
- Change permitting requirements for emergency generators and small natural gas or oil-fired equipment
- Establish two new state air quality area designations, “sustainment” and “reattainment,” to help areas avoid and more quickly end a federal nonattainment designation
- Designate Lakeview as a state sustainment area while retaining its federal attainment designation
- Change the New Source Review preconstruction permitting program
- Modernize methods allowed for holding public hearings and meetings
- Re-establish the Heat Smart woodstove replacement program exemption for small commercial solid fuel boilers regulated under the permitting program
- Remove annual reporting requirements for small gasoline dispensing facilities

DEQ requests public comment on the proposed rules. To consider comments on the proposed rules, DEQ must receive the comment by **5:00 p.m., July 31, 2014**. DEQ will hold public hearings **Jul. 16, 2014**. [Click here](#) to view the rulemaking documents and details about the public comment period, including the time and location of hearings and how to submit comments.

DEQ plans to take the final proposal including any modifications made in response to public comments to the Environmental Quality Commission for decision at the commission's January 2015 meeting. If adopted, DEQ will submit the rules to the U.S. Environmental Protection Agency as a revision to the State Implementation Plan as required by the Clean Air Act.
