On April 9<sup>th</sup> Gorge Arbor Care will be removing 2 trees for The Fort Dalles Museum. Located at the corner of 15<sup>th</sup> and Garrison St. This tree removal is going to require one 160' crane, two dump trucks, one excavator, one chipper with truck and trailer,

The crane will need to set up on the west side of 15<sup>th</sup> and will take up the entire road, trucks being loaded with wood and brush from the tree will be traveling from north to south on Garrison to be loaded and exit the site to dump. The intersection will be closed for the crane to lower all wood and brush down to the crew, this is where the crew will process the wood and limbs. .

I will need to close the intersection for approximately 5 hours for all work to be completed. It will be impossible to complete this work without closing the area to all traffic and pedestrians.

Traffic control will consist of street close signs, and detour signs indicating traffic to proceed north on Pentland st and west on 14<sup>th</sup>. Traffic coming from Trevitt will have detour signs to travel north on Trevitt st and east on 14<sup>th</sup>. Signs for sidewalk closed will be placed on all four sidewalks

I have indicated on the map with arrows where and to what direction the sidewalk traffic will be detoured to. I will have a total of 17 signs to redirect pedestrians safely around the work zone. Also I marked an area of the map that shows w 17<sup>th</sup> as no road, because this section of road does not currently exist.

  - For roadways with a pre-construction posted speed of 40 mph or less.
  - See Inset "A" for Temp. Slewback Ramp details.
  - "V" = 60' or, where 60' width cannot be maintained through the entire route, provide 48' min. width with 60' x 80' posting spaces every 200 ft.
  - Use temporary ADA compliant surfaces to traverse planter strips or other non-traversable surfaces.

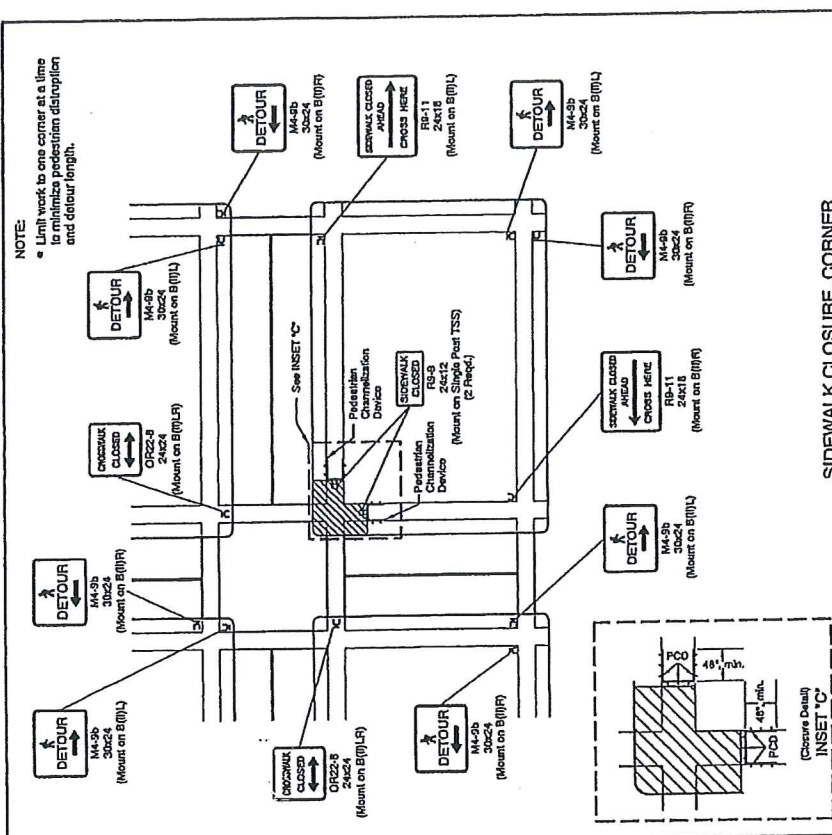

### ADDITIONAL RIGHT OF WAY SIDEWALK DIVERSION

**SIDEWALK CLOSURE, MIDBLOCK**

**GENERAL NOTES FOR ALL DETAILS:**

- When closing or relocating crosswalks or other pedestrian facilities provide ADA compliant facilities. Include accessibility features consistent with existing pedestrian facilities by providing adequate slope transitions and curbside.
- Provide non-slip, 60 inch minimum wide surfaces through entire pedestrian route. If not possible, provide 48" min. width with 60" x 60" paving spaces every 200 feet along the route.
- Only TCD for pedestrians are shown. Other devices may be necessary to control vehicular traffic.
- Stagger work, as necessary, to provide a temporary pedestrian access route at all times. For roadways with no available detours, maintain one open sidewalk at all times.
- Minimize pedestrian out-of-direction travel.
