FOG SEAL - Fog sealing is an application of asphalt emulsion sprayed onto a pavement surface. The emulsion is diluted to the proper consistency to obtain complete coverage of the roadway. Fog sealing has been shown to extend the life of chip seal and scrub seal treatments.

Pictured: A recent fog seal application on E Scenic Dr. – The Dalles.

This road work is expected to extend the service life of the pavement structure.

Please proceed with caution in these areas during construction times and observe all temporary traffic control devices. Thank you for your assistance during this work.

A full list of projects and a 2022 The Dalles Pavement Preservation Program map can be viewed at thedalles.org/transportation.

If you have questions, please contact the Public Works Department at (541) 296-5401.
