DEQ Recommendation to EQC

DEQ recommends that the Environmental Quality Commission adopt the proposed rules and accompanying fee table associated with fee implementation option two (Attachments B, C, and D) as part of Chapter 340 of the Oregon Administrative Rules.

Proposed motion language:

Option Two (deferred fee increase):

“I move that the Environmental Quality Commission adopt the proposed rules as seen in Attachment B and the accompanying fee tables in Attachment C and Attachment D of the staff report for this item as part of Chapter 340 of the Oregon Administrative Rules Divisions 45 and 71”

Introduction

DEQ is proposing amendments to Chapter 340 of Oregon Administrative Rules to increase Water Quality Program fees. However, DEQ also is proposing that the Commission defer a portion of the increase for one year, in recognition of the challenges facing fee payers as a result of the public health pandemic and the resulting effects on the economy. The proposed deferral will result in a reduction relative to the agency's legislatively-approved budget for the remainder of the 2019-2021 biennium.

DEQ's water quality permitting programs are supported by a mix of state General Fund dollars, along with fees paid by regulated businesses and local governments, as well as some federal funds. Funding for the permitting programs has been inadequate to maintain staffing at levels necessary to operate the programs for over ten years. Following multiple third-party reviews, DEQ has implemented a number of process changes to improve efficiency in these programs. However, those reviews uniformly found that without additional resources, the permitting programs will continue to fall further behind. As a result, DEQ worked with fee payers and others over the past three years to develop request to the 2019 Oregon Legislature for additional General Fund and Other Fund (fee) resources, designed as a significant first installment in re-setting funding at levels required for a sustainable water quality program that issues timely, high-quality permits.

In light of the COVID-19 related economic downturn and resulting hardships for some entities subject to fee increases, DEQ has prepared two options for the Oregon Environmental Quality Commission's consideration. DEQ recommends the commission approve the second of the two proposed rule options, which represents a partial deferral of the fee increases approved by the legislature in the agency's 2019-21 budget. Deferral of almost half of the fee increase will delay the hiring authorized by the legislature. At present, DEQ is anticipating possible reductions in General Fund allocations to the water quality program for the 19-21 biennium as well. Together, these reductions will delay some of the program service improvements agreed to last year.

The base (original) recommendation by DEQ reflects the agency's legislatively approved budget. This recommendation is reflected in Option One, which would establish a 21 percent fee increase, effective August 2020. This fee implementation schedule is based on input from the Fee Increase Rulemaking Advisory Committee and consistent with what was proposed during the public comment period. If the commission were to elect this option, the resulting fees are presented in the fee table in Attachments D, and would be effective August 2020.

Option Two, DEQ's current recommendation, involves deferring a portion of the fee increase by a year. Under this option, fees would increase by up to 13 percent effective August 2020, and the remaining 8 percent increase would be delay to July 2021. As a result, this option would result in a delay of hiring for some of the legislatively authorized positions, and a commensurate delay of

implementing permitting program service enhancements. This option involves adopting fee tables in Attachment C, effective August 2020, and Attachment D, effective July 2021.

The two options are summarized below:

Option 1: Legislatively Authorized Fee Implementation and Hiring Plan (Fee table, Attachment D effective August 2020)	
Impact to fee payers	Impact to DEQ
<ul style="list-style-type: none"> • Effective upon adoption August 2020: <ul style="list-style-type: none"> • All applicable fees increased by 3% to support annual increase in program service level costs. • All applicable WQ fees, except annual MS4 permit fees, increased by 18% to support newly authorized positions established by the 2019 Legislature. • DEQ able to support WQ permitting program improvements authorized by Policy Option Packages 122 and 127 in the 2019-21 Legislatively Approved Budget. • 	<ul style="list-style-type: none"> • DEQ able to support increased costs associated with current service level resources. • DEQ hires 11 newly authorized positions
Option 2: Partial deferral of fee increases, along with considerations for economic hardship (Fee table, Attachment C effective August 2020 – June 2021; and fee table, Attachment D effective July 2021)	
Impact to fee payers	Impact to DEQ
<ul style="list-style-type: none"> • Effective upon adoption August 2020: <ul style="list-style-type: none"> • All applicable fees increased by 3% to support annual increase in program service level costs. • All applicable WQ fees, except annual MS4 permit fees, increased by 10% to support newly authorized positions established by the 2019 Legislature. • Effective July 2021: <ul style="list-style-type: none"> • Implement remaining 8% of fee increase necessary to support newly authorized positions established by the 2019 Legislature for all applicable WQ fees, except annual MS4 permit fees. • DEQ will partially implement WQ permitting program improvements authorized by Policy Option Packages 122 and 127 within 2019-21 biennium, but full effect of resource enhancements will be delayed by approximately one year. • Entities experiencing severe economic hardship may seek payment deferral options (installments) from DEQ • Entities experiencing severe economic hardship may seek payment reduction or suspension from EQC. 	<ul style="list-style-type: none"> • DEQ able to support increased costs associated with current service level resources. • DEQ hires 7 of 11 newly authorized positions. • DEQ postpones hiring of remaining 4 positions until after July 2021.

Statement of Need

What need would the proposed rule address?

DEQ must establish the new fees to implement the current service level of the 2019-21 budget to cover costs associated with implementing the permitting program and delivering services to regulated entities, and to carry out implementation of hiring new positions authorized in the current Legislatively Adopted Budget. Without this increase, DEQ would need to reduce permitting staff and delay initiating improvements to the program as identified in the water quality permitting program [Recommendations and Implementation Plan](#). Without this funding, DEQ's capacity to ensure the protection of water quality in Oregon will be reduced and there will be short and long-term impacts on other regulated entities and communities needing federal approvals for financial assistance and federal permits.

The proposed fee increase includes two components:

- The annual increase of three percent authorized "automatically" under ORS 468B.051
- Fees increases approved by the 2019 Legislative Assembly to fund investments in the water quality program (Policy Option Packages 122 and 127)

How would the proposed rule address the need?

The proposed rule implements legislative decisions to approve investments in the water quality program. Those investments are funded by a combination of General Fund dollars – paid by all Oregonians, and Other Fund dollars – paid by fee payers. The rules complete the Other Fund portion of the investment package. Together, the funding enables DEQ to implement improvements to the program as identified in the [Recommendations and Implementation Plan](#) report. The 2015 Oregon Legislature commissioned the report, which a third-party consultant completed in November 2016.

How will DEQ know the rule addressed the need?

If approved, DEQ would begin receiving increased fee revenue in August 2020.

If fee implementation Option One is adopted, DEQ expects the proposed fees in combination with a General Fund appropriation, would support the hiring of the 11 positions established by policy option packages 122 and 127 and in accordance with the hiring plan authorized in the 2019-21 Legislatively Approved Budget.

If Option Two is adopted, DEQ expects that revenue would support 7 of the 11 positions authorized by the 2019 Legislature through fiscal year 2021 that ends June 30, 2021. In this case, a one-year delay to implementation of the full fee increase would result in a commensurate delay in hiring for the remaining four positions, and a one-year delay in work supporting the water quality permitting programs.

Fee Analysis

These proposed rules would increase existing fees and add a clarification to the fee language in OAR 340-045-0075 fee table 70B, permit type B17, for permits that DEQ covers under this fee type.

Brief description of proposed fees

DEQ is proposing a fee increase to implement the permitting program, to deliver services to regulated entities for federal National Pollutant Discharge Elimination System permits and state Water Pollution Control Facility permits, and to support program enhancements authorized in the 2019-21 Legislatively Adopted Budget.

The total fee increase consists of the following:

- a) A three percent increase that ORS 468B.051 authorizes. The statute allows for the amount of the annual increase to not exceed the anticipated increase in the cost of administering the permit program or three percent, whichever is lower, unless DEQ's legislatively approved budget provides for a larger increase; and
- b) An 18 percent increase to support program enhancements authorized in policy option packages 122 and 127 of the 2019-21 Legislatively Adopted Budget in the 2019 Oregon legislative session. The legislature approved these additional resources to help improve the water quality permitting program's performance. Package 122 phases in one new permanent position. Package 127 phases in eight new permanent positions, increases an existing part-time position to full-time, and funds one limited duration position on a mix of fee revenue and General Fund.

DEQ has prepared two different fee implementation options for the EQC to consider: One based on Rulemaking Advisory Committee recommendations and focused on implementing the 2019-21 Legislatively Approved Budget hiring plan, and an alternative option that has been developed in response to economic conditions and uncertainty resulting from the COVID-19 pandemic.

Option One proposes to implement up to a 21 percent increase for applicable fee types, effective upon adoption (see attachment D fee table). This fee increase is comprised of a three percent annual increase to support increasing program costs for 2020, and an 18 percent increase for applicable fee types to support enhancement packages adopted by the 2019 Legislature. Anticipated fee revenue from this option would support hiring all newly authorized positions from policy option packages 122 and 127 according to the established hiring plan within the 2019-21 biennium.

Option Two proposes a two-step phase-in of legislatively approved fee increases in an attempt to balance DEQ's obligation to protect the environment with a consideration of the dramatic disruptions to public health and the economy caused by the COVID-19 outbreak. In the first step, the three percent annual adjustment and an additional 10 percent increase for applicable fee categories would be effective upon adoption and through June 30, 2021, (see Attachment C fee table). This increase of up to 13 percent would support 7 of the 11

new positions with authorized hiring dates before April 2020. The second step, effective July 1, 2021 would implement the remainder of the legislatively approved fee increase (combined total up to 21 percent) that is necessary to support the four additional positions authorized in the 2019-21 Legislatively Approved Budget (see Attachment D fee table).

The notable fee type exception is municipal separate storm sewer system, commonly called MS4, annual permit fees. For either fee implementation option described above, the annual MS4 permit fees are subject to, and are included under, the annual three percent fee increase allowable by statute. However, these MS4 annual permit fees are being excluded from the additional increases identified by this rulemaking proposal. This is because DEQ adopted a fee increase for annual MS4 permit fees in 2018, to support program restoration and enhancements that the 2017-19 Legislatively Adopted Budget authorized. Specifically, this proposal would increase the fees in OAR 340-045-0075, Table 70H, for MS4 General Permit Annual Fees by three percent, effective Aug. 1, 2020.

The following permit fees, excluding annual MS4 permit fees, will be increased by adopting either of the two fee implementation options:

- OAR 340-071-0140:
 - WPCF Permit Fees; Table 9D;
- OAR 340-045-0075:
 - Industrial NPDES and WPCF Individual Permits Application and Modification Fees; Table 70A
 - Industrial NPDES and WPCF Individual Permit Annual Fees; Table 70B;
 - Domestic NPDES and WPCF Individual Permits, Application, Annual Modification Fees; Table 70C;
 - Domestic NPDES and WPCF Annual Population Fees, Table 70D;
 - Annual Pretreatment Fees, Table 70E;
 - All NPDES and WPCF Permits, Technical Activity, Plan Review and Other Fees, Table 70F;
 - General NPDES and WPCF Permits, Application and Annual Fees, Table 70G, *excluding* WPCF 2401 and 2402; and 700PM fees under authority ORS 468B.118;
 - Underground Injection Control Permits Application Fees, Annual Fees, and Surcharges, Table 70I, *excluding* UIC fees authorized by rule, ORS 468B.195 and ORS 468B.196.

Rule language change proposal

In the event that Option Two is the preferred option of the Environmental Quality Commission, DEQ proposes to add the following rule language to OAR 340-045-0075 to explain the two fee tables:

OAR 340-045-0075 (2) Two sets of fee tables are provided. The first identifies fees effective Aug. 1, 2020, through June 30, 2021. The second establishes the fee amounts effective starting July 1, 2021.

Clarification

DEQ proposes the following clarification to the fee language OAR 340-045-0075 fee table 70B, permit type B17, for permits that DEQ covers under this fee type.

Current: “Dairies, fish hatcheries and other confined feeding operations on individual permits”

Proposed clarification: ~~Dairies, fish~~ **Fish** hatcheries and other confined feeding operations on individual permits **except permits the Oregon Department of Agriculture administers.**

Reasons

The proposed fee increases are necessary to continue current service levels, and to pay for a portion of the program re-investments directed by the 2019 Oregon Legislature. Without the increases, DEQ will need to reduce permitting staff and delay or abandon improvements to the program as identified in the [Recommendations and Implementation Plan](#).

The proposed fees include two elements:

- A three percent increase authorized by ORS 468B.051.
- Additional increases approved in the 2019 Legislative session for Policy Option Packages 122 and 127.

Fee proposal alternatives considered

Not increasing fees

DEQ has considered not increasing fees. However, with no fee increase, DEQ will need to curtail service levels below levels that have already been found to be inadequate to meet federal and state performance expectations. The backlog in out-of-date permits in Oregon’s federal water quality permit program, although it is beginning to improve, is still one of the worst in the nation. DEQ does not believe it is responsible to allow further degradation of the program. As a result, while DEQ is recommending a partial deferral of the fee increase, it does not recommend no increase at all.

Other ways to reduce program costs

DEQ has implemented measures over the past four years that are increasing program efficiency. For example, DEQ has created system improvements including a one-year and five-year permit issuance plan, combined with regular tracking a reporting, a permit writer team that is accountable to a single manager, designating subject matter experts to resolve more complex issues, digitizing water quality permit files, and electronic reporting. In addition, going forward, DEQ is nearing implementation of the Environmental Data Management System, which will streamline permit applications and reporting and compliance work for both the agency and for regulated parties.

Option One: Original Fee Increase Recommendations (developed prior to COVID-19)

Based on feedback from the rulemaking advisory committee, and as released during the public comment period (Nov. 15, 2019, through Jan. 7, 2020) DEQ proposed to implement the full, legislatively-approved increase for applicable fee types effective August 2020. This would support the hiring of all 11 new positions authorized by the legislature, by August 2020, (Attachment A, and fee table in Attachment D).

Option Two: Revised Fee Increase Recommendation (partial deferral in response to COVID-19)

In light of COVID-19 related economic uncertainty and potential hardships for some entities subject to fee increases, DEQ has developed an revised recommendation that would delay a portion of the increase until July 2021, (Attachments B, and C and fee table in Attachment D). This deferral option, and the resulting reduction in revenue would require DEQ to delay the hiring for at least four of the newly authorized positions. In the event that the legislature or the Governor direct further budget reductions to General Fund or Lottery Funds, these delays would likely be expanded.

Fee payers

The proposed fees would affect individuals, businesses, and government agencies that hold or apply for two types of permits:

- National Pollutant Discharge Elimination System (NPDES) permits (federal)
- Water Pollution Control Facility (WPCF) permits (state)

Affected party involvement in fee-setting process

DEQ appointed a fiscal advisory committee to address the proposed water quality permit fees in OAR 340 divisions 45 and 71. The advisory committee included stakeholders representing domestic and industrial permit holders, state agencies, and environmental and citizen engagement organizations. The committee met twice to review the proposed rule updates and to assess and comment on the fiscal impacts of DEQ's proposed permit fee increase.

Summary of impacts

DEQ began the analysis on how to raise the approved fee revenue with the simplest approach to raise all annual fees for all permit types by the same percentage. This option allows fee payers with less complex permits and lesser fees an appropriately proportional impact. This also recognizes that increased resources across the water quality permitting programs provides benefits across all permit types, even if newly authorized positions are attributed to specific subprogram areas. Rule and Fiscal Advisory Committee feedback, public comment, statutory requirements, and the broad impacts of Covid-19 led DEQ to make some modifications to the across the board baseline approach, and to the fee increase implementation timeline.

Hardship Relief: Recognizing the economic hardship resulting from COVID-19, DEQ also has examined options for providing relief from fees in particular cases. DEQ can offer installment plans for entities that demonstrate economic hardship resulting from COVID-19 or other circumstances. For entities that request and are granted an installment plan, the deferred payment schedule will not incur any interest or additional fees but rather allow a source to pay their fees over a specified period within the permit year. In addition, OAR 340-045-0070 also allows the Environmental Quality Commission to reduce or suspend annual fees for entities that demonstrate economic hardship. Such requests for an annual fee reduction or suspension must be submitted and evaluated on a case-by-case basis.

The amount of the fee increase for each regulated entity will depend on the type of permit involved. DEQ anticipates some indirect impact on the public if the permit holders pass increased costs on to customers or ratepayers to offset the fee increase, or if the permit holder were to adjust their service level to accommodate a fee increase. However, the absolute dollar value of the fees is small relative to the overall budget of most public entities paying fees, and is also typically a small part of the operating costs of most businesses.

How long will the current fees sustain the program?

Current fees are not sufficient to sustain the program. Foregoing any fee increases would require DEQ to hold legislatively-authorized positions vacant during the biennium. For example, when developing its 2019-2021 Agency Request Budget, DEQ estimated that even with a three percent annual fee increase in 2020, budgeted expenditures to maintain existing staff levels would exceed revenues by more than five percent. The shortfall will cause a reduction in the program’s fund balance and the current fees are not enough to carry out the Legislatively Adopted Budget from the 2019 Legislative session.

Table 1 below shows the increased cost of maintaining the current service level from the 2017-19 to the 2019-21 biennium, excluding program enhancements the 2019 Legislature approved in policy option packages 122 and 127. The information provides context for the annual up-to-three percent fee increase ORS 468B.051 authorizes.

Table 1- Budget Scenario Comparison (Base vs. 3% increase)				
July 1, 2020				
Effective date of last fee increase: Oct. 2019				
EQC adopted fee changes: Sept. 2019				
Funding Source	2017-2019 Legislatively Adopted Budget		2019-2021 Legislatively Adopted Budget (excluding POPs¹)	
Program costs covered by fees	\$12,782,995	58%	\$14,254,336	59%
Program costs covered by General and Lottery Funds	\$7,671,236	35%	\$8,229,707	34%

Table 1- Budget Scenario Comparison (Base vs. 3% increase)				
July 1, 2020 Effective date of last fee increase: Oct. 2019 EQC adopted fee changes: Sept. 2019				
Program costs covered by Federal Funding	\$1,609,781	7%	\$1,716,369	7%
¹ These numbers have passed Department of Administrative Services' audit, and include packages 000 through 070, and adjustments made by the legislature in DEQ's budget bill (package 801) and the end-of-session bill (package 810).				

Table 1.1 below shows the total Water Quality Permitting program budget and includes program enhancements (policy option packages 122 and 127) the 2019 Legislature approved. The 18 percent fee increase proposed in this rulemaking supports the program enhancements.

Table 1.1 – Proposed Budget Scenario (Includes 3% and 18% increases)				
July 1, 2020 Effective date of last fee increase: Oct. 2019 EQC adopted fee changes: Sept. 2019				
Funding Source	2019-2021 Legislatively Adopted Budget (excluding POPs ¹)	2019-2021 Legislatively Adopted Budget (POPs only)	Total 2019-21 Legislatively Adopted Budget	
Program costs covered by fees	\$14,254,336	\$1,329,378	\$15,583,714	58%
Program costs covered by General and Lottery Funds	\$8,229,707	\$1,334,828	\$9,564,535	36%
Program costs covered by Federal Funding	\$1,716,369	\$0	\$1,716,369	6%
¹ These numbers have passed Department of Administrative Services' audit, and include packages 000 through 070, and adjustments the legislature made in DEQ's budget bill (package 801) and the end-of-session bill (package 810).				

Table 2 - Budget Costs
July 1, 2020 Effective date of last fee increase: Oct. 2019 EQC adopted fee changes: Sept. 2019

Budget Period	Cost per FTE
2017-19 Legislatively Adopted Budget	\$301,956
2019-21 Legislatively Adopted Budget (Modified current service level ²)	\$331,340
Percent increase over a two-year period	9.73%
² These numbers have passed Department of Administrative Services' audit, and include packages 000 through 070, and adjustments made by the legislature in DEQ's budget bill (package 801) and the end-of-session bill (package 810).	

Statement of Fiscal and Economic Impact

Fiscal and economic impact

Increasing permit fees will increase costs for entities that hold the affected permits or require fee-based services.

Statement of cost of compliance

State and federal agencies

Oregon state agencies hold approximately 117 active water quality permits. Examples of the total proposed fee increase on select permit types include:

- Industrial NPDES fee permits for Tier 2 sources, fish hatcheries, will increase by \$568. This affects approximately six state agencies (OAR 340-045-0075, Table 70B).
- Annual fees for WPCF individual permits will increase between \$103 and \$3,280. This affects approximately four state agencies (OAR 340-045-0075, Table 70C).
- Annual fees for general NPDES and WPCF permits will increase between \$78 and \$234. This affects approximately 10 state agencies (OAR 340-045-0075, Table 70G).
- Annual compliance determination fees for WPCF Onsite permits will increase between \$9 and \$237. This affects approximately eight state agencies (OAR 340-071-0140, Table 9D).

Local governments and private facilities

The amount of the fee increase for each regulated entity will depend on the type of permit involved. DEQ anticipates some indirect impact on the public if the permit holders pass increased costs on to customers or ratepayers to offset the fee increase, or if the permit holder were to adjust their service level to accommodate a fee increase. However, the absolute dollar value of the fees is small relative to the overall budget of most public entities paying fees, and is also typically a small part of the operating costs of most businesses.

Oregon local governments hold approximately 696 total active water quality permits. Most of the fees paid in the water quality program are paid on an annual basis for all active

permits. Although there are separate fees for new applications, and for modifications, the annual fees represent the bulk of the revenue and economic impact of the proposed changes. Examples of local government entities that hold water quality permits include water districts, irrigation districts, cities, towns, ports, sanitary districts, library districts, counties, and school districts. For the purpose of this fiscal analysis, DEQ considered ports and school districts as separate local governments even if contained within a city or county government.

Examples of the direct impact of the full proposed fee increase on selected permit types include:

- Industrial NPDES annual fees for Tier 1 and 2 sources would increase by \$969 and \$5,006. This affects approximately eight local governments and their permit co-permittees for various permit types in (OAR 340-045-0075, Table 70B).
- Domestic NPDES and WPCF individual permit annual fee increases will range from \$103 to \$19,765. The \$19,765 increase for Domestic NPDES annual fee will affect one local government (OAR 340-045-0075, Table 70C).
- Annual fees for general NPDES and WPCF permits will increase between \$78 and \$234. This will affect an approximately 261 local government entities (OAR 340-045-0075, Table 70G).
- Annual permit processing fees for on-site systems and compliance determination fees for WPCF permits will increase between \$9 for holding tanks to \$237 for an on-site sewage lagoon with no discharge. This will affect approximately 63 local government permits (OAR 340-071-0140, Table 9D).

Large businesses - businesses with more than 50 employees

The proposed fee increase would affect approximately 150 wastewater permit holders that are large businesses. For example, large businesses that require an industrial NPDES Tier 1 permit would pay an additional \$1,125 in annual fees for hardboard, veneer, plywood, particle board, pressboard manufacturing, wood products permits in OAR 340-045-0075, fee Table 70B permit type B20.

Small businesses – businesses with 50 or fewer employees

The proposed fee increase may affect approximately 3,300 small businesses that hold water quality permits. Limited information is available to determine how the fee increases would affect each permit holder. The relative impact on a small businesses would depend on various factors that could include: the type of permit; the ability of the business to pass on the cost to its customers; and the cumulative impact of broader economic conditions on the business. For small businesses, many will hold a general permit rather than an individual permit. For example, two of the most common permit types are industrial stormwater and construction stormwater (over an acre). The annual fee for these permits (Table 70G) would increase by \$234. Another example is for a small facility for food or beverage processing (including produce, meat, poultry, seafood, or dairy for human, pet, or livestock consumption), with a processing flow of less than 0.1 mgd, or between 0.1 mgd and 1 mgd, but for less than 180 days per year. For this class of small businesses, the annual permit fee would increase by an estimated \$1,041.

a. Estimated number of small businesses and types of businesses and industries with small businesses subject to proposed rule.

- DEQ estimates the fee increases for wastewater permits would affect approximately 3,300 small businesses.
- Examples of small businesses that have wastewater permits are food processors, mining operations, dairies, fish hatcheries, smelting and refining operations, timber processors, wood products manufacturers, retail operations, seafood processors, gravel mining, wineries, construction companies, petroleum hydrocarbon cleanup operations, and vehicle and equipment wash water operations.

b. Projected reporting, recordkeeping, and other administrative activities, including costs of professional services, required for small businesses to comply with the proposed rule.

- No additional activities are required to comply with the proposed rules.

c. Projected equipment, supplies, labor, and increased administration required for small businesses to comply with the proposed rule.

- No additional resources are required to comply with the proposed rules.

d. Describe how DEQ involved small businesses in developing this proposed rule.

- DEQ met with a fiscal advisory committee on Aug. 7, 2019, and Oct. 10, 2019. The committee was composed of a diverse group of stakeholders representing a wide cross section of DEQ's permit holders.
- During and after the meetings, DEQ requested stakeholders' input concerning potential impacts to small businesses and how DEQ can reduce that impact.
- During the public comment period, DEQ requested input on whether to consider other options for achieving the rules' substantive goals, while reducing the rules' negative economic impact on small businesses.

Advisory committee fiscal review

DEQ appointed an advisory committee.

As ORS 183.33 requires, DEQ asked for the committee's recommendations on:

- Whether the proposed rules would have a fiscal impact.
- The extent of the impact.
- Whether the proposed rules would have a significant adverse impact on small businesses; if so, then how DEQ could comply with ORS 183.540 to reduce that impact.

The committee reviewed the draft fiscal and economic impact statement. The committee determined the proposed rules would not have a significant adverse impact on small businesses in Oregon. The committee did comment that the fee increases would affect public and local governments. Additionally, DEQ's proposed phase-in of the fees in two increments over the next year will reduce impact to small businesses.

Federal Relationship

ORS 183.332, 468A.327 and OAR 340-011-0029 require DEQ to attempt to adopt rules that correspond with existing equivalent federal laws and rules unless there are reasons not to do so. The proposed rules are “in addition to federal requirements” because there are no applicable federal requirements.

Land Use

In adopting new or amended rules, ORS 197.180 and OAR 340-018-0070 require DEQ to determine whether the proposed rules significantly affect land use. If so, DEQ must explain how the proposed rules comply with statewide land-use planning goals and local acknowledged comprehensive plans.

Considerations

Under OAR 660-030-0005 and OAR 340 Division 18, DEQ considers that rules affect land use if:

- The statewide land-use planning goals specifically refer to the rule or program, or
- The rule or program is reasonably expected to have significant effects on:
 - Resources, objectives or areas identified in the statewide planning goals, or
 - Present or future land uses identified in acknowledged comprehensive plans.

DEQ determined whether the proposed rules involve programs or actions that affect land use by reviewing its Statewide Agency Coordination plan. The plan describes the programs that DEQ determined significantly affect land use. DEQ considers that its programs specifically relate to the following statewide goals:

Goal	Title
5	Open Spaces, Scenic and Historic Areas, and Natural Resources
6	Air, Water and Land Resources Quality
9	Ocean Resources
11	Public Facilities and Services
16	Estuarial Resources

Statewide goals also specifically reference the following DEQ programs:

- Nonpoint source discharge water quality program – Goal 16
- Water quality and sewage disposal systems – Goal 16
- Water quality permits and oil spill regulations – Goal 19

Determination

DEQ determined that the following proposed rules affect programs or activities that the DEQ State Agency Coordination Program considers a land-use program.

- OAR 340-018-0030(5)(c) and OAR 340-018-0030(5)(d)

DEQ's statewide goal and local plan compatibility procedures adequately cover the proposed rules. Oregon Administrative Rule 340-018-0050(2)(a) ensures compatibility with acknowledged comprehensive plans through submission of a land-use compatibility statement.

EQC Prior Involvement

EQC approved Policy Option Packages for the 2019-21 Agency Request Budget in August 2018. That approval identified the positions and the related fee increases necessary for their support. A portion of these Policy Option Packages were then approved by the 2019 Legislature.

Following legislative approval of the agency's budget, DEQ discussed and informed the EQC about the 2020 Fee Increase Rulemaking during the Fee Increase Rulemaking presentation to the EQC on Sept. 27, 2019, in Madras, Oregon.

Advisory Committee

Background

DEQ convened the 2020 Fee Increase Rulemaking Fiscal Advisory Committee. The committee met twice and included representatives from local governments, NPDES permit holders, environmental and citizen involvement organizations. Information about the committee can be found at [Water Quality Permit Fees 2020](#) web page.

The committee members were:

2020 Water Quality Fee Increase Advisory Committee	
Affiliation	Name
Aqua Resource Design & Consulting	Brannon Lamp
Oregon Homebuilders Association	Ellen Miller
Oregon Environmental Council	Karen Lewotsky
Special Districts Association of Oregon	Mark Landauer
Northwest Environmental Defense Center	Mark Riskedahl
Association of Oregon Counties	Mike Eliason
League of Women Voters	Peggy Lynch
Oregon Business and Industry	Sharla Moffett
Oregon Association of Clean Water Agencies	Susie Smith
League of Oregon Cities	Tracy Rutten

Meeting notifications

To notify people about the advisory committee's activities, DEQ:

- Sent GovDelivery bulletins, a free e-mail subscription service, to the following lists:
 - Rulemaking
 - Water Quality Permits
- Posted information about and materials for the meeting on this rulemaking's web page
- Added advisory committee announcements to DEQ's calendar of public meetings at [DEQ Calendar](#).
- Additionally, DEQ submitted notification of this rulemaking through the GovDelivery system to Onsite permit holders.

Committee discussions

In addition to the recommendations described under the Statement of Fiscal and Economic Impact section above, the committee recommended that DEQ combine the local government and public sections of the Statement of Cost Compliance of the Fiscal Impact Statement. This change is to highlight the impacts of fee increases that possibility include local governments having to reduce services to accommodate fee increases.

Public Engagement

Public notice

DEQ provided notice of the proposed rulemaking and rulemaking hearing by:

- On Nov. 15, 2019, filing notice with the Oregon Secretary of State for publication in the December 2019 Oregon Bulletin;
- Posting the Notice of Rulemaking and draft rules on the web page for this rulemaking, located at: [Water Quality Fees 2020 Web Page](#)
- Emailing interested parties on the following DEQ lists through GovDelivery:
 - Rulemaking
 - Water Quality Permits
- Emailing the following key legislators required under [ORS 183.335](#)
 - Senator Michael Dembrow, Chair of Senate Committee on Environment and Natural Resources
 - Senator Alan Olsen, Vice-chair of Senate Committee on Environment and Natural Resources
 - Representative Ken Helm, Chair of House Committee on Water
 - Representative Gary Leif, Vice-chair of House Committee on Water
 - Senator Kathleen Taylor, Co-Chair of Joint Committee on Ways and Means Subcommittee on Natural Resources
 - Representative Jeff Reardon Co-Chair of Joint Committee on Ways and Means Subcommittee on Natural Resources
- Emailing advisory committee members
- Emailing notification to Onsite permit holders
- Posting on the DEQ event calendar: [DEQ Calendar](#)

Public Hearing

DEQ held one public hearing. DEQ received zero comments at the hearing. Later sections of this document include a summary of the seven comments received during the open public comment period, DEQ's responses and a list of the commenters. Original comments are on file with DEQ.

Presiding Officers' Record

Hearing 1

Date	Dec. 19, 2019
Place	700 NE Multnomah Street, Portland, Oregon; Room 601
Start Time	1 p.m.
End Time	1:25 p.m.
Presiding Officer	Michele Martin

Presiding Officer's report

The presiding officer convened the hearing, summarized procedures for the hearing, and explained that DEQ was recording the hearing. The presiding officer asked people who wanted to present verbal comments to sign the registration list, or if attending by phone, to indicate their intent to present comments. The presiding officer advised all attending parties interested in receiving future information about the rulemaking to sign up for GovDelivery email notices.

As Oregon Administrative Rule 137-001-0030 requires, the presiding officer summarized the content of the rulemaking notice. No person presented any oral testimony or written comments at the public hearing on Dec. 19, 2019.

Summary of Public Comments and DEQ Responses

Public comment period

DEQ accepted public comment on the proposed rulemaking from Nov. 15, 2019, until 4 p.m. on Jan. 7, 2020.

The following is a summary of each comments received by the close of the public comment period. Original comments are on file with DEQ. DEQ did not change the proposed rules in response to comments.

Comments received by close of public comment period

Commenter 1

Susie Smith, Association of Clean Water Agencies
Tracy Rutten, League of Oregon Citifies
Mark Landauer, Special Districts Association of Oregon

Summary: Commenters agree with the fee proposal as provided in the Notice of Rulemaking.

DEQ response: DEQ appreciates the comments.

Commenter 2

Ryan Pessah, Western Wood Preservers Institute
Summary: Strongly opposes the fee increase for policy option packages 122 and 127, approved by the Oregon Legislature in 2019.

Comment: "...proposing an annual fee increase to resolve 'over 15 years of persistent and chronic permit renewal backlogs' is not the responsibility of the regulated community (Recommendations and Implementation Plan, November 2016). Resolving this fiscal mismanagement should be addressed through cost-saving measures such as digitizing and automating services; it should not be resolved on the backs of industries that support our rural economies."

DEQ response: DEQ has completed digitization of paper files for most of the water quality program areas, and electronic reporting also has been put in place for the NPDES permit programs. In addition, the Oregon legislature has approved over \$10 million for modernization of DEQ's data management systems, and DEQ is nearing roll-out of the first of three waves of system modernization. The second and third waves will be completed next year. More information is online: <https://www.oregon.gov/deq/Permits/Pages/Your-DEQ-Online.aspx>.

These investments have improved program efficiency significantly. However, DEQ remains below national norms for staffing for these programs, as determined by multiple reviews. The number of program staff has declined over the past twenty years, and system efficiencies

can only go so far. Failure to institute fee increase will result in backsliding on the program improvements and investments that have been made by the public sector.

Comment: "...we urge DEQ to phase this increase over a two-year period."

DEQ response: DEQ appreciates the suggestion, and notes that it's recommendation has changed to reflect this approach. We acknowledges the challenges that fee increases place on our fee payers, particularly in this economy. We strive to provide as much advance notice of our proposed fee increases as possible to give fee payers time to adjust their budgets. DEQ provided estimates of the fee increases in its Agency Request Budget, in its Governor's Recommended Budget, during its Ways & Means presentation, and in its Legislatively Adopted Budget book.

DEQ has already phased in many of the new positions authorized by the legislature. Further delays in hiring have been put in place in the last three months in response to declining state revenues.

Commenters 3 and 4

Glenn Woodbury, Power and Control Inc., *Industrial electrical wholesale*
Matthew Hadler, Crater Lake Resort

Comment: Do not increase fees; the Oregon taxpayer is already paying too much in taxes.

DEQ response: DEQ appreciates the concerns about taxes. The proposal before the commission is to approve deferred increases in fees, for specific purposes, rather than general taxes. If there are particular hardship from these increases, DEQ would ask the permittee to contact the agency about options for fee payment plans or waivers.

Commenter 5

Phillip Buttolph, resident of the Enterprise Water District, Wallowa County, Oregon

Comment: Concerned about water quality in Enterprise, Oregon.

DEQ response: This comment did not address the substance of this fee rulemaking. DEQ referred this comment to its Drinking Water Protection program staff for response.

Commenter 6

Steven Wright, 700PM permit holder

Comment: Regarding mining general permits for suction dredges; 700PM permits

DEQ response: Fees for the 700PM permits are established in Oregon Revised Statute 468B.118. These permit fees are excluded from this fee increase rulemaking proposal.

Commenter 7

Dannon Farrald, small business owner, septic system permit, Westlake, Oregon

Comment: Concerning the services provided for the annual fees related to the commenter's septic system.

DEQ response: The fees support implementing DEQs onsite wastewater management program. Fees collected are to support implementing programmatic activities regionally and statewide with a goal to ensure that environmentally protective practices are in use by onsite septic system users. DEQ is required to implement the onsite program under Oregon Revised Statute 454 and Oregon Administrative Rules divisions 340-71 and 340-73. Fees for onsite permits support processing the application material, managing the data provided through the permitting requirement, and the compliance activities associated with permitted facilities. The purpose of the onsite program is to protect surface water and groundwater. The permitting process ensures that the systems in use across the state remain efficient and environmentally protective.

Implementation

Notification

If approved, the proposed rules would become effective upon filing on approximately Aug. 1, 2020. DEQ would notify affected parties by:

- Emailing interested parties on the following DEQ lists through GovDelivery:
 - Rulemaking
 - Water Quality Permits
 - Onsite
- Posting notification on relevant, permit-related webpages

In addition to notifications upon filing, and if EQC adopts Option 2, DEQ will clearly identify the two fee tables and the respective effective dates. Under option 2, DEQ will also provide a second round of follow-up notifications in July 2021, prior to the second (and final) fee increase effective date associated with this proposed rulemaking.

Compliance and enforcement

Affected parties: Water Quality permit holders

DEQ staff: Water Quality staff by email

Systems

Website: Water Quality staff to add notification to relevant webpages

Database: Water Quality staff by email

Invoicing: Water Quality staff by email

Five-Year Review

Requirement

Oregon law requires DEQ to review new rules within five years after EQC adopts them. The law also exempts some rules from review. DEQ determined whether the rules described in this report are subject to the five-year review. DEQ based its analysis on the law in effect when EQC adopted these rules.

Exemption from five-year rule review

The Administrative Procedures Act exempts all of the proposed rules from the five-year review because the proposed rule changes would amend an existing rule: ORS 183.405(4).

State of Oregon Department of Environmental Quality

Water Quality Permit Rules 2020

Draft Rules

Option 1 – No Rule Text Changes

Division 45

REGULATIONS PERTAINING TO NPDES AND WPCF PERMITS

340-045-0075

Permit Fee Schedule

(1) OAR chapter 340, division 71 contains the fee schedule for onsite sewage disposal system permits, including WPCF permits, and graywater reuse and disposal system WPCF individual permits.

(2) DEQ establishes fees for various industrial, domestic and general water quality permits:

(a) Table 70A lists the application and modification fees that apply to industrial NPDES and WPCF individual permits.

(b) Table 70B lists the annual fees that apply to industrial NPDES and WPCF individual permits.

(c) Table 70C lists application, modification and annual fees for domestic NPDES and WPCF individual permits.

(d) Table 70D lists annual population fees.

(e) Table 70E lists annual pretreatment fees applicable to domestic wastewater systems.

(f) Table 70I lists application, annual and surcharge fees for Underground Injection Control rule authorizations and general permits.

(3) DEQ must consider the following criteria when classifying a facility for determining applicable fees. For industrial sources that discharge to surface waters, discharge flow rate refers to the system design capacity. For industrial sources that do not discharge to surface waters, discharge flow refers to the total annual flow divided by 365:

(a) Tier 1 industry. A facility is classified as a Tier 1 industry if the facility:

(A) Discharges at a flow rate that is greater than or equal to 1 mgd; or

(B) Discharges large biochemical oxygen demand loads; or

(C) Is a large metals facility; or

(D) Has significant toxic discharges; or

(E) Has a treatment system that will have a significant adverse impact on the receiving stream if not operated properly; or

(F) Needs special regulatory control, as DEQ determines.

(b) Tier 1 domestic facility. A facility is classified as a Tier 1 domestic facility if the facility:

(A) Has a dry weather design flow of 1 mgd or greater; or

(B) Serves an industry that can have a significant impact on the treatment system.

(c) Tier 2 industry or domestic facility: A facility is classified as Tier 2 if it does not meet Tier 1 qualifying factors.

(4) New permit application fee. Unless this rule does not require it, the applicant must submit the applicable new permit application fee listed in Table 70A, 70C, 70G, or 70I with each application. The facility category and type of permit (e.g., individual vs. general) determines the amount of the fee.

(5) Permit modification fee. Tables 70A and 70C list the permit modification fees. Modification fees for Individual WPCF Underground Injection Control permits are contained in Table 70I. Permit modification fees vary with the type of permit, the type of modification and the timing of modification as follows:

(a) Modification at time of permit renewal:

(A) Major modification — involves an increase in effluent limitations or any other change that involves significant analysis by DEQ;

(B) Minor modification — does not involve significant analysis by DEQ.

(b) Modification prior to permit renewal:

(A) Major modification — involves an increase in effluent limitations or any other change that involves significant analysis by DEQ. DEQ may require a permittee requesting a significant modification to their permit to enter into an agreement to pay for these services according to ORS 468.073. ORS 468.073 allows DEQ ". . . to expedite or enhance a regulatory process by contracting for services, hiring additional staff or covering costs of activities not otherwise provided during the ordinary course of department business"

(B) Minor modification — does not involve significant analysis by DEQ.

(6) Annual fees. Tables 70B and 70G list applicable annual fees for general and industrial permit holders. Table 70H lists applicable annual fees for Municipal Separate Storm Sewer permits. Tables 70C, 70D, and 70E also list annual fees for domestic sources and include the following:

(a) Annual fee. This is based on the type of treatment system, the dry weather design flow, and the duration assigned to the permit before a renewal application is required;

(b) Population-based fee. A permit holder with treatment systems other than Type F (septage alkaline stabilization facilities) must pay an annual population-based fee. Table 70D lists the applicable fee;

(c) Pretreatment fee. A source DEQ requires to administer a pretreatment program under federal pretreatment program regulations (40 C.F.R., Part 403; January 29, 1981, and its amendments) must pay an additional annual fee plus a fee for each significant industrial user specified in their annual report for the previous year. Table 70E lists the applicable fee.

(7) Technical activities fee. Table 70F lists the technical activity, plan review and administrative fees. They are categorized as follows:

(a) All permits. A permittee must pay a fee for NPDES and WPCF individual and general permit-related technical activities. DEQ will charge a fee for initial submittal of engineering plans and specifications. DEQ will not charge fees for revisions and re-submittals of engineering plans and specifications or for facilities plans, design studies, reports, change orders, or inspections.

(b) General permits. A permittee must pay the technical activity fee shown in Table 70F when the following activities are required for application review:

(A) Disposal system and environmental management plan review;

(B) Site inspection and evaluation.

(8) For permits the Oregon Department of Agriculture administers, the permit applicant or permit holder must pay the permit fees following the fee schedule the Oregon Department of Agriculture establishes.

(9) Administrative activity fees are listed in Table 70F:

(a) The annual electronic reporting requirement waiver fee applies to permit holders who qualify for a temporary or permanent waiver exempting them from submitting data and reports electronically.

(b) A permittee must pay a fee for a transfer of ownership as specified under OAR 340-045-0045 and for requests to change the legal or common name on the permit issued to the facility.

State of Oregon Department of Environmental Quality

Water Quality Permit Rules 2020

Draft Rules

Option 2 – Two Stage Rules

Division 45

REGULATIONS PERTAINING TO NPDES AND WPCF PERMITS

340-045-0075

Permit Fee Schedule

(1) OAR chapter 340, division 71 contains the fee schedule for onsite sewage disposal system permits, including WPCF permits, and graywater reuse and disposal system WPCF individual permits.

(2) Two sets of fee tables are provided. The first identifies fees effective August 1, 2020 through May 31, 2021. The second establishes the fee amounts effective starting July 1, 2021

~~(3)~~ DEQ establishes fees for various industrial, domestic and general water quality permits:

(a) Table 70A lists the application and modification fees that apply to industrial NPDES and WPCF individual permits.

(b) Table 70B lists the annual fees that apply to industrial NPDES and WPCF individual permits.

(c) Table 70C lists application, modification and annual fees for domestic NPDES and WPCF individual permits.

(d) Table 70D lists annual population fees.

(e) Table 70E lists annual pretreatment fees applicable to domestic wastewater systems.

(f) Table 70I lists application, annual and surcharge fees for Underground Injection Control rule authorizations and general permits.

~~(4)~~ DEQ must consider the following criteria when classifying a facility for determining applicable fees. For industrial sources that discharge to surface waters, discharge flow rate refers to the system design capacity. For industrial sources that do not discharge to surface waters, discharge flow refers to the total annual flow divided by 365:

(a) Tier 1 industry. A facility is classified as a Tier 1 industry if the facility:

- (A) Discharges at a flow rate that is greater than or equal to 1 mgd; or
 - (B) Discharges large biochemical oxygen demand loads; or
 - (C) Is a large metals facility; or
 - (D) Has significant toxic discharges; or
 - (E) Has a treatment system that will have a significant adverse impact on the receiving stream if not operated properly; or
 - (F) Needs special regulatory control, as DEQ determines.
- (b) Tier 1 domestic facility. A facility is classified as a Tier 1 domestic facility if the facility:
- (A) Has a dry weather design flow of 1 mgd or greater; or
 - (B) Serves an industry that can have a significant impact on the treatment system.
- (c) Tier 2 industry or domestic facility: A facility is classified as Tier 2 if it does not meet Tier 1 qualifying factors.

(54) New permit application fee. Unless this rule does not require it, the applicant must submit the applicable new permit application fee listed in Table 70A, 70C, 70G, or 70I with each application. The facility category and type of permit (e.g., individual vs. general) determines the amount of the fee.

(65) Permit modification fee. Tables 70A and 70C list the permit modification fees. Modification fees for Individual WPCF Underground Injection Control permits are contained in Table 70I. Permit modification fees vary with the type of permit, the type of modification and the timing of modification as follows:

(a) Modification at time of permit renewal:

(A) Major modification — involves an increase in effluent limitations or any other change that involves significant analysis by DEQ;

(B) Minor modification — does not involve significant analysis by DEQ.

(b) Modification prior to permit renewal:

(A) Major modification — involves an increase in effluent limitations or any other change that involves significant analysis by DEQ. DEQ may require a permittee requesting a significant modification to their permit to enter into an agreement to pay for these services according to ORS 468.073. ORS 468.073 allows DEQ ". . . to expedite or enhance a

regulatory process by contracting for services, hiring additional staff or covering costs of activities not otherwise provided during the ordinary course of department business"

(B) Minor modification — does not involve significant analysis by DEQ.

(76) Annual fees. Tables 70B and 70G list applicable annual fees for general and industrial permit holders. Table 70H lists applicable annual fees for Municipal Separate Storm Sewer permits. Tables 70C, 70D, and 70E also list annual fees for domestic sources and include the following:

(a) Annual fee. This is based on the type of treatment system, the dry weather design flow, and the duration assigned to the permit before a renewal application is required;

(b) Population-based fee. A permit holder with treatment systems other than Type F (septage alkaline stabilization facilities) must pay an annual population-based fee. Table 70D lists the applicable fee;

(c) Pretreatment fee. A source DEQ requires to administer a pretreatment program under federal pretreatment program regulations (40 C.F.R., Part 403; January 29, 1981, and its amendments) must pay an additional annual fee plus a fee for each significant industrial user specified in their annual report for the previous year. Table 70E lists the applicable fee.

(87) Technical activities fee. Table 70F lists the technical activity, plan review and administrative fees. They are categorized as follows:

(a) All permits. A permittee must pay a fee for NPDES and WPCF individual and general permit-related technical activities. DEQ will charge a fee for initial submittal of engineering plans and specifications. DEQ will not charge fees for revisions and re-submittals of engineering plans and specifications or for facilities plans, design studies, reports, change orders, or inspections.

(b) General permits. A permittee must pay the technical activity fee shown in Table 70F when the following activities are required for application review:

(A) Disposal system and environmental management plan review;

(B) Site inspection and evaluation.

(98) For permits the Oregon Department of Agriculture administers, the permit applicant or permit holder must pay the permit fees following the fee schedule the Oregon Department of Agriculture establishes.

(109) Administrative activity fees are listed in Table 70F:

(a) The annual electronic reporting requirement waiver fee applies to permit holders who qualify for a temporary or permanent waiver exempting them from submitting data and reports electronically.

(b) A permittee must pay a fee for a transfer of ownership as specified under OAR 340-045-0045 and for requests to change the legal or common name on the permit issued to the facility.

Description	Fee
Pretreatment Fee	\$2,168 <u>2,450</u>
Significant Industrial User	\$723 <u>817</u> per industry

OAR 340-045-0075 Table 70F All NPDES and WPCF¹ Permits: Technical Activity, Plan Review, and Other Fees Revised Sept. 2019 <u>May 2020</u> <u>Effective August 1, 2020 - June 30, 2021</u>	
Activity	Fee
New or substantially modified sewage treatment facility	\$ 9,973 <u>11,268</u>
Minor facility or pump station modifications	\$ <u>1,225</u> 1,083
Major system or pressure system expansion	\$ 760 <u>859</u>
Minor system expansion or modification	\$ <u>216</u> 244
New or substantially modified septage alkaline stabilization facility	\$ 1,083 <u>1,225</u>
Site inspection and evaluation ²	\$ 1,698 <u>1,919</u>
Disposal system plan review ²	\$ 679 <u>767</u>
Environmental management plan review ³	\$ 679 <u>767</u>
Other Fees	
Annual temporary or permanent electronic reporting requirement waiver	\$ 827 <u>935</u>
Permit transfer, legal name change.	\$ 107 <u>121</u>
1. Does not include Onsite septic systems. Please see Tables 9A-9F in OAR 340-071 for appropriate technical activity fees. 2. This fee only applies when these activities are required for DEQ's review of a General permit application. 3. This fee is not charged to new applicants for individual NPDES and WPCF permits. Plans updated after the permit is issued are subject to plan review as specified in the permit.

TABLE 9A	
SITE EVALUATION AND EXISTING SYSTEM EVALUATION FEES	
New Site Evaluation Fees.	
Fees in this section apply to each system for which site suitability is evaluated.	
Single family dwelling - First lot	\$700
Single family dwelling - Each additional lot evaluated during initial visit	\$700
Commercial facility with a design capacity of 1,000 gpd or less	\$700
Commercial facility with a design capacity of 1,001-1,500 gpd	\$882
Commercial facility with a design capacity of 1,501-2,000 gpd	\$1,063
Commercial facility with a design capacity of 2,001-2,500 gpd	\$1,244
Commercial facility s with a design capacity of 2,501-3,000 gpd	\$1,426
Commercial facility with a design capacity of 3,001-3,500 gpd	\$1,607
Commercial facility with a design capacity of 3,501-4,000 gpd	\$1,788
Commercial facility with a design capacity of 4,001-4,500 gpd	\$1,969
Commercial facility with a design capacity of 4,501-5,000 gpd	\$2,151
Commercial facility with a design flow greater than 5,000 gpd	\$2,373
Site Evaluation Report Review fee	\$659
Existing System Evaluation Report fee	\$659

OAR 340-071-0140

TABLE 9B

PERMITTING FEES FOR SYSTEMS NOT SUBJECT TO WPCF PERMITS

Type of Fee		System Type					Plan Review fees for Commercial Facility Systems
		A	B	C	D	E	
Construction-Installation Permit Fees	For systems with a design capacity of less than 600 gpd	\$461	\$890	\$1,038	\$1,272	\$1,566	\$0
	For systems with a design capacity of 601-1,000 gpd	\$461	\$890	\$1,038	\$1,272	\$1,566	\$379
	For systems with a design capacity of 1,001-1,500 gpd	\$560	\$989	\$1,137	\$1,352	\$1,710	\$445
	For systems with a design capacity of 1,501-2,000 gpd	\$659	\$1,088	\$1,236	\$1,433	\$1,763	\$511
	For systems with a design capacity of 2,001-2,500 gpd	\$758	\$1,187	\$1,335	\$1,513	\$1,862	\$577
Reinspection fee		\$103	\$103	\$103	\$103	\$103	\$103
Pump Evaluation fee. For all permits that specify the use of a pump or dosing siphon except for sand filter, Alternative treatment technologies, Recirculating gravel filter, and pressurized distribution systems		\$66	\$66	\$66	\$66	\$66	\$66
<p>System Type Key: Type A = Gray Water waste disposal sumps Type B = Holding tanks Type C = Standard subsurface, Absorption trenches in saprolite, Redundant, Seepage trench, Steep slope Type D = Alternative treatment technologies, Capping fill, Pressurized distribution, Tile dewatering Type E = Recirculating gravel filter, Sand filter (commercial or residential)</p>

Fee Tables

OAR 340-045-0075 Table 70A Industrial NPDES and WPCF Individual Permits: Application and Modification Fees Revised <u>Effective Sept. 2019</u> June 1, 2021 TBD			
Application fees for new industrial permits			
Tier 1 Industrial Facilities	\$68,175 <u>82,492</u>		
Tier 2 Industrial Facilities	\$13,720 <u>16,601</u>		
Special WPCF Permits (OAR 340-045-0061)	\$649 <u>78</u> <u>5</u>		
Note: New permit applications must include the annual fee specified in Table 70B in addition to the new permit application fee listed above. The application fee is not required for renewal unless a modification is needed or requested.			
Modification Fees¹			
	Major		Minor
	At Permit Renewal	Prior to Expiration	
Tier 1 Industrial Facilities	\$17,128 <u>20,725</u>	\$34,033 <u>41,180</u>	\$1,194 <u>1,445</u>
Tier 2 Industrial Facilities	\$4,354 <u>5</u> <u>270</u>	\$6,802 <u>8</u> <u>230</u>	\$1,194 <u>1,445</u>
1. A new application, application fee and modification fee must accompany all requests for permit modification. DEQ may charge the environmental management plan review fee amount in Table 70F when only the environmental management plan required by the permit requires review.			

OAR 340-045-0075

Table 70B

Industrial NPDES and WPCF Individual Permit Annual Fees

Revised ~~Effective Sept. 2019~~ June 1, 2021 TBD

Type	Description	NPDES Tier 1	NPDES Tier 2	WPCF Tier 1	WPCF Tier 2
B01	Pulp, paper, or other fiber pulping industry	\$23,838 <u>28,844</u>	N	\$22,125 <u>26,770</u>	N
Food or beverage processing - includes produce, meat, poultry, seafood or dairy for human, pet, or livestock consumption:					
B02	Washing or packing only	N	\$3,3144 <u>.010</u>	N	\$3,0503 <u>.691</u>
B03	Processing – small. Flow ≤ 0.1 mgd, or 0.1 < flow < 1 mgd for less than 180 days per year	N	\$4,9555 <u>.996</u>	N	\$4,6875 <u>.672</u>
B04	Processing – medium. 0.1 mgd < Flow < 1 mgd for 180 or more days per year, or flow ≥ 1 mgd for less than 180 days per year	N	\$6,9928 <u>.460</u>	N	\$6,7258 <u>.137</u>
B05	Processing – large. Flow ≥ 1 mgd for 180 or more days per year	\$23,838 <u>28,844</u>	\$20,947 <u>25,345</u>	\$26,770 <u>22,125</u>	\$20,676 <u>25,018</u>
Primary Smelting or Refining:					
B06	Aluminum	\$28,844 <u>23,838</u>	\$25,345 <u>20,947</u>	\$26,770 <u>22,125</u>	\$25,018 <u>20,676</u>
B07	Non-ferrous metals utilizing sand chlorination separation facilities	\$28,844 <u>23,838</u>	\$25,345 <u>20,947</u>	\$26,770 <u>22,125</u>	\$25,018 <u>20,676</u>
B08	Ferrous and non-ferrous metals not elsewhere classified	\$13,633 <u>16,496</u>	\$10,739 <u>12,994</u>	\$11,919 <u>14,422</u>	\$10,474 <u>12,674</u>
B09	Chemical manufacturing with discharge of process wastewater	\$28,844 <u>23,838</u>	\$25,345 <u>20,947</u>	\$22,125 <u>26,770</u>	\$25,018 <u>20,676</u>
B10	Cooling water discharges in excess of 20,000 BTU per second	\$16,496 <u>13,633</u>	\$12,994 <u>10,739</u>	\$11,919 <u>14,422</u>	\$12,674 <u>10,474</u>
Mining Operations – includes aggregate or ore processing:					
B11	Large (over 500,000 cubic yards per year or involving chemical leaching)	\$28,844 <u>23,838</u>	\$25,345 <u>20,947</u>	\$26,770 <u>22,125</u>	\$25,018 <u>20,676</u>
B12	Medium (100,000 to 500,000 cubic yards per year)	N	\$7,3338 <u>.874</u>	N	\$7,0678 <u>.551</u>
B13	Small (less than 100,000 cubic yards per year)	N	\$2,2322	N	\$1,9662

Permit transfer, legal name change.	\$ 107 <u>129</u>
1. Does not include Onsite septic systems. Please see Tables 9A-9F in OAR 340-071 for appropriate technical activity fees. 2. This fee only applies when these activities are required for DEQ's review of a General permit application. 3. This fee is not charged to new applicants for individual NPDES and WPCF permits. Plans updated after the permit is issued are subject to plan review as specified in the permit.

				High Risk	\$331 <u>401</u>	\$10 <u>133</u>
1900-B General Permit	Injection During Geothermal Exploration	\$616 <u>745</u>	\$633 <u>765</u>			
Type	Description	Application Fee	Annual Fee	Individual WPCF Modifications		
				Major	Minor	
Individual WPCF Permit	As defined in 40 CFR parts 9, 144, 145 and 146	\$13,720 <u>16,601</u>	\$2,904 <u>3,514</u>	\$2,276 <u>2,754</u>	\$1,194 <u>1,445</u>	

1. Includes facilities with less than 50 injection systems. All systems must be located over 500 feet from a water well and outside a 2 -year time of travel from a water source.
2. Includes aquifer storage and recovery, low temperature geothermal injection, remediation and other underground injection control systems that do not drain stormwater.
3. Includes facilities with less than 50 injection systems and for systems within 500 ft from a water well and within a 2-year time of travel from a water source.
