FINDINGS

1. A moratorium extending from July 7, 1980 to August 4, 1980 at 7:30p.m. is essential in order to provide adequate time to study the impacts of the language permitting mobile home parks and mobile home subdivisions within the City of Newberg.

2. The current R-1 ordinance permitting mobile home parks and mobile home subdivisions are too lenient, and do not provide for adequate controls relating to their compatibility to adjoining uses, distribution within this community and percent of overall housing.

3. The intent of the Newberg Comprehensive Plan was to provide a mixture of housing types in order to satisfy the housing needs of all residential uses in an appropriate and proportionate fashion as to achieve a balanced community both economically and socially. The current R-1 ordinance regarding the placement of mobile home parks and mobile home subdivisions do not provide the necessary community balance and restricts the flexibility of housing types and locations of other residential uses, thereby being inconsistent with the statewide LCDC Housing Goal, Goal 10.

4. Family types most often found residing in mobile houses are predominently lower income families, first home buyers and elderly. In addition the property valuation of mobile homes as compared to stick built construction is substantially less and depreciates over time. Without a proper balance of other types of residential uses and family incomes, the economic balance of the overall community will be offset. The temporary moratorium is thereby consistent with the Statewide Economy of the State Goal, LCDC Goal 9.

5. A moratorium extending from July 7, 1980 to August 4, 1980 at 7:30p.m. for lands within the R-1 zoning district, on reviewing mobile home park and mobile home subdivision applications is a temporary measure and will not adversely affect the housing needs of the community as vacant lots and spaces for mobile homes are available within the urban area in adequate quantities to satisfy the need for mobile home housing within the approximately 29 day period for which the moratorium remains in effect.

6. Adequate public notice to affected persons and public hearings have been held relating to the moratorium in compliance with the Statewide Land Use Planning Goal, LCDC Goal 2.

7. The moratorium extending from July 7, 1980 to August 4, 1980 at 7:30p.m. is necessary in order that the availability of sufficient land for the various residential uses identified within the Newberg Comprehensive Plan, insuring choices in the market place, is not adversely affected as specific percentages of residential land uses are identified and the current ordinances do not provide the controls to implement and maintain the balance of the ratios. The temporary moratorium is necessary to provide adequate time to review the comprehensive plan and implementing ordinances for their consistency with the Statewide Urbanization Goal, LCDC Goal 14.

8. The R-1 (Low Density Residential) district currently allows as an outright permitted use, mobile home parks and mobile home subdivisions through a Staff Review. No public hearings are required for mobile home parks. A public hearing is required for mobile home subdivisions, but only to the extent of the review of the subdivision design and not whether the use itself shall be permitted in a certain location. The Newberg Comprehensive Plan states that within R-1 areas a Conditional Use Permit will be required before construction of other than single family housing. Ambiguity exists as to what constitutes single family housing and whether or not a mobile home park would fall within that category. No definition exists within the Newberg Comprehensive Plan to define single family housing.

9. Within the Newberg Urban Growth Boundary 242 acres have been provided as vacant buildable land in the Medium Density Residential district. The Comprehensive Plan further indicates a projected need for an additional 452 mobile homes within the Newberg Urban Growth Boundary by the year 2000. Using the permitted density of 8.8 units per gross acre (which includes a 25% street factor) within the Medium Density Residential plan designation, approximately 52 acres would be needed to supply adequate available lands for the placement of mobile homes within the Newberg Urban Growth Boundary. Again, 242 acres have been provided which provides ample areas for development of mobile home parks and mobile home subdivisions while providing a variety of locations for market choice.

10. The Medium Density Residential district allows for the placement of mobile home parks and mobile home subdivisions as an outright permitted use. Within the Newberg Urban Growth Boundary, adequate available land designated as Medium Density Residential has been provided and can be made available for development of the projected mobile home placement needs within the community. Lands within the Low Density Residential district are not needed for development of mobile home parks and mobile home subdivisions as adequate available vacant lands have been provided within the Medium Density Residential district. The Medium Density Residential district provides for the housing needs for the community and because of its higher density and smaller lot size requirements, will tend to provide a type of housing at prices which are commensurate with regional income levels. For these reasons, the provisions of Goal 10 (Housing) have been satisfied through lands provided within the Medium Density Residential districts.

11. The compatibility of mobile home parks and mobile home subdivisions with adjoining Low Density/single family areas cannot be guaranteed through the procedures established by the Newberg Zoning Ordinance in that mobile home parks and mobile home subdivisions are an outright permitted use within the R-1 district. The establishment of mobile homes affects the market value of adjoining lands and is more compatible with higher density areas. With the ability of randomly locating mobile home parks and mobile home subdivisions within the Low Density areas, their compatibility with adjoining areas cannot be controlled.

12. The Low Density and Medium Density Residential districts represent approximately 98% of the available vacant buildable areas established within the Newberg Urban Growth Boundary. By allowing mobile home parks and mobile home

subdivisions as an outright permitted use within these areas, having no controls relating to their siting and compatibility with adjoining land uses, the City of Newberg runs the potential of being overburdened by mobile home developments.

13. The St. Helens policy established by the Land Conservation and Development Commission requires that, where a need has been shown for a particular type of housing that should be permitted outright in some zones although it may be a conditional use in other zones. The City of Newberg has placed mobile home parks and mobile home subdivisions as an outright permitted use in R-1 and R-2 zones which makes up the bulk of developable residential lands within the Newberg Urban Area. Because of this, the potential exists that the majority of all housing units then coming into the City of Newberg can be mobile homes. Mobile homes are often times associated with lower income families and a slightly lesser property valuation than stick built construction. With a predominance of lower income families and lesser property valuations, it will become increasingly more difficult to run the necessary City services based on tax levies applicable within the Urban area. A mixture of residential uses is necessary in order to provide for the housing needs of all residential types in an appropriate and proportionate fashion as to achieve a balanced community.

Housing Report - 2000 Commission

In response to your request, I have completed an analysis of recent population and housing trends in Oregon and have examined anticipated future trends.

INTRODUCTION

Rapid growth in Oregon during the past eight years has triggered new concerns about how to plan for this growth in the future.

This report is meant to provide a comprehensive look at Oregon's housing market now and in the year 2000. More specifically, it (1) provides current data on population, housing, income and employment and analyzes recent trends; (2) projects housing demand and tenure shifts to the year 2000, based upon state and national trends; and (3) looks at key issues where state policy or strategy may have a positive impact.

PART I

OREGON HOUSING TODAY

Employment, Population and Household Change, 1960-1978

Oregon has experienced rapid growth in employment, population and housing in recent years. The state's population increased by 400,000 persons between 1970 and June, 1978, an annual growth rate of more than 2%. This rate was more than twice the national figure (1%).

A significant factor in Oregon's growth has been its ability to provide an expanding population with diverse employment opportunities. Between 1970 and 1978, 319,000 new jobs were created in the state.

While population and employment growth of this magnitude is significant in its own right, its impact on housing has been intensified by concurrent shifts in age composition and household structure. As shown in Table 1, the state registered a significant drop in its average household size between 1970 and 1978. This decrease, which mirrors national trends, reflects two factors. First, there was rapid growth in the 15-24 and 65+ age groups. These groups are most apt to form one- or two-person

STATE HOUSING REPORT

Exhibit 13 - Pt

households. Second, an increasing divorce rate led to fragmented families and smaller households.

Inventory		12,970		107,606

Exhibit 13 R-2

As a result of the decrease in family size, the number of households increased at a faster rate than did population during the eight-year period. In June, 1978, there were approximately 910,000 households in the state, 218,000 more than in 1970; 63.5% of these households were owner occupied, a decrease from the 1970 ratio.

The low vacancy rate for both single-family and multifamily units is evidence of strong residential demand. Given a balanced supply/demand market, the single-family vacancy rate should fall between 1.75% and 2.0%, and the multifamily rate between 5.0% and 6.0%.

Building Permit Activity

Since 1970, approximately 278,000 building permits have been issued in the state. Single-family units accounted for 48% of these permits; multifamily units, 32%; and mobile homes, 20%. Historical data is presented below.

Table II

Oregon Building Permit Activity
1970 - 1978

Year	Single-Family Permits	Multifamily Permits	Total
1970	9,231	7,752	16,983
1971	11,973	14,437	26,410
1972	14,213	16,128	30,341
1973	13,153	9,639	22,792
1974	10,732	4,739	15,471
1975	14,527	5,617	20,144

1977	25,986	13,506	39,492
1978 (Jan-June)	13,857	7,632	21,489
TOTAL	134,177	90,137	224,314
Net Change Mobile Homes 1970-1978			+ 53,981
TOTAL NEW UNITS			278,295

Exhibit 13 - P.3

The highest level of residential construction activity in the state's history occurred between 1976 and 1978 when 92,173 permits were issued. This activity was the result of strong demand and available money.

The percentage of single-family permits issued during the eight-year period is of particular significance. In 1970, approximately 77% of the state's housing stock was single-family. With the addition of new units between 1970 and 1978, this ratio dropped to 69%.

Mobile homes registered the greatest increase during the period. The addition of almost 54,000 mobile homes since 1970 increased their proportion of the state's housing stock from 5.1% to 9.4%.

Housing Age and Condition

As of 1978, 230,000 units, or approximately 25% of the state's housing stock, were built prior to 1940. While this does not automatically mean that 25% of the state's housing was bordering on obsolescence, it does indicate that a large number of units were especially prone to some form of deterioration.

Table III

Age of Housing Stock - 1978

Year Built	Percent of Units
1970-1978	27%
1960-1969	19%
1950-1959	16%
1940-1949	13%
1939 or earlier	25%
Median Age	20 years

By using the 1970 ratio of substandard pre-1939 units (35%), it is estimated that about 80,000 units in Oregon have significant repair needs. Approximately 70,000 of these units are occupied.

Family Income

Oregon's median family income climbed from $9,970 in 1969 to $16,300 in 1978, an increase of 67.5%. The increase among renter families,

which represent 37% of all households, was only 60% during the same period. As a group, renters' median family income ($14,085) was about 23% less than the median income of homeowner families ($18,310).

Table IV

Family Income
1969 - 1978

Deciles	All Families (Owners & Renters)	Renters
1969		
1	$ 3,314	$ 2,853

4	14,497	12,032
5	16,768	14,085
6	19,211	16,137
7	21,981	18,244
8	26,585	22,065
9	36,470	29,905
9.5	43,053	35,303
Median	$16,768	$14,085

Housing Costs

Oregon's housing market has experienced rapid inflation in recent years. Prices for new, as well as existing, units have increased dramatically since 1972. The rise in prices for single-family units averaged 13%

~~Exhibit 13 - P. 5~~

between 1972 and 1977. During the most recent 18-month period, prices rose at a yearly rate of 17.5%.

Escalating prices, coupled with rising interest rates, have led to unprecedented increases in average monthly payments on newly originated mortgages.

Current statistics indicate that rising housing costs and interest rates place a new single-family residence beyond the means of most Oregonians.

Based upon current market conditions, the minimum price of a home built in Oregon in 1977 was approximately $35,000. A household must have an annual income of $17,472 to avoid paying more than 25% of gross income for a home priced at this level. This conclusion is based upon the following assumptions:

Assume:

Price of Basic New Home	$35,000
Down Payment	10%
Interest Rate	10%
Mortgage Term	30 years
Taxes and Insurance	3% of home value annually

Payments:

Principal and Interest	$ 276
Taxes and Insurance	$ 88
Monthly Payment	$ 364

Annual Income Required $(364 \div .25) \times 12 = \$17,472$

Presently, using this rule of thumb, only 45% of all Oregon households could afford a new $35,000 house.

In 1977, the median price of a new home built in Oregon approximated $50,000. Less than 23% of Oregon's households and only 15% of its renters can afford a new home at this price. If we assume the home will be purchased with a 10% down payment, 30-year loan, at 10% interest and annual property taxes and insurance premiums totaling 3% of home value, monthly housing payments would be $520. A family needs an annual income of $24,950 to avoid paying in excess of 25% of their income on housing.

Some households are obviously in a better position than others to afford the advanced costs of home purchase. In particular, home buyers with houses to sell or trade hold a significant advantage over first-time buyers. Sellers of existing homes, who in recent years have accrued

large amounts of housing equity, are able to use this equity to meet down-payment requirements and thus reduce monthly mortgage payments. Renters entering the market for the first time, however, must ordinarily meet down-payment requirements out of financial asset balances. Many are unable to accumulate sufficient savings for an adequate down payment and cannot afford high monthly mortgage payments.

Subsidized Housing

For nearly a decade, the cost of decent, safe and sanitary housing has risen at a rate faster than the ability of Oregonians to pay. Various inflationary effects of late have been most critical.

Of 331,000 Oregon renter households, about 109,000, or 33%, with incomes less than $15,000 pay more than 25% of their incomes for housing in 1978. Adding this factor together with such other criteria as household size, income (below 80% of median), overcrowding and substandardness and eliminating double-counting, as many as 130,000 (40%) Oregon households may be defined as eligible for most forms of housing assistance. About 70,000 households have significant repair needs.

The vast majority of these needy/eligible households are elderly households, female-headed households and households with a male head under 25 years old. Many others have physical, emotional and mental handicaps.

There are about 30,000 units of assisted housing in Oregon. This amount represents only 3% of the state's total households. The proportion of assisted housing runs as high as 5% or 6% in some counties to less than 1% in others. Some individual communities in the Willamette Valley have 15% - 20% of their households receiving some form of housing assistance, and few have even 30% - 35%. Usually these are communities with subdivisions where a large number of residents qualify for low-interest mortgage loans through the Farmers Home Administration. Almost no Oregon communities have large concentrations of exclusively low-income households receiving housing assistance. Areas of the state with the lowest proportion of households receiving assistance are in south, central and eastern Oregon.

PART II

OREGON'S HOUSING MARKET IN THE FUTURE

Population, Employment and Housing Forecasts - 2000

The population forecasts for Oregon used in this section were prepared by Portland State University. The general model employed by PSU is the traditional cohort survival technique. Three components -- mortality, fertility and migration -- are each given separate attention and through the framework of the model, allowed to interact in a manner which simulates the actual dynamics of population change. This technique was used to arrive at the three sets of forecasts identified below.

	2000 Population	Assumptions
High	3,761,465	A continuation of 1970-1975 trends for 30 years.
Middle	3,301,361	A set which begins with 1970 to 1975 trends and shows in-migration tapering down to the 1960 to 1970 pattern.
Low	3,020,208	A set which begins with the 1970 to 1975 trends and shows in-migration tapering to a zero net change level with other states by the year 2000.

In analyzing the three estimates, the low was disregarded as being unrealistic. The middle and high projections were used in conjunction with employment forecasts by the Oregon Employment Division to project housing demand between 1978 and 2000. Historical data since 1970 are presented so that recent trends may be compared with future projections.

Table VI

Employment, Population and Housing Characteristics
1978 - 2000

	1970	Current	Middle Projections	High Projections
Labor Force	847,888	1,166,600	1,578,000	1,789,000
Unemployment Rate	7.007	5.040	4.943	4.975
Employment	788,475	1,107,800	1,500,000	1,700,000
Part. Rate	0.405	0.468	0.478	0.476
Population	2,091,385	2,491,215	3,301,255	3,761,564
Household Size	2.941	2.670	2.450	2.450
Households	691,631	909,818	1,318,879	1,506,760
Owner Ratio	0.661	0.635		
Vacancies	44,000	41,025		
Available	24,069	25,025		
Sales Rate	1.18	1.90		
Rental Rate	7.35	4.00		
Other	19,931	16,000		
Inventory	735,631	950,844		

Average Annual Changes

	1970-Current		Middle Cur.-Projected		High Cur.-Projected	
	Rate	No.	Rate	No.	Rate	No.
Labor Force	3.868	38,631	1.373	18,700	1.943	28,290
Employment	4.122	38,706	1.378	17,827	1.947	26,918
Population	2.121	48,464	1.280	36,820	1.373	57,743
Households	3.324	26,446	1.688	18,593	2.293	27,133
Inventory		107,606				

According to the PSU forecasts, the state's population will increase from 2,491,125 in 1978 to between 3,301,255 and 3,761,564 in 2000. This represents a population increase ranging from 33% to 51%, or a net growth of between 810,000 and 1,270,000 residents. While the numerical increase over the next two decades will be substantial, the rate of increase is projected to be less than during the 1970 to 1978 period. Even the high estimate represents a growth rate significantly below the 1960-1970 and 1970-1978 rates.

Household growth between 1978 and 2000 is expected to increase at a faster rate than population. This is due to a continuing decline in household size. A net gain of between 409,000 and 597,000 households is projected for Oregon over the next two decades.

In addition to the units required to accommodate new household formation, new units must replace demolitions and provide for an adequate vacancy rate to insure a balanced supply/demand market. Assuming a projected household size of 2.45 and a vacancy rate of 2% for ownership units and 6% for rentals, residential demand over the next two decades will be:

	Total Units 1978-2000		Yearly Average 1978-2000	
Unit Type	Middle	High	Middle	High
Owner	240,000	335,000	10,925	15,225
Rental	158,800	221,400	7,225	10,050
Mobile Home	110,000	144,000	5,000	6,550
TOTAL	508,800	700,400	23,150	31,825

Key factors relating to housing demand in the future (2000) are cited below.

1. Household size will continue to decline, but should level off at between 2.40 and 2.50 persons per unit. The 25-45 age group will register the greatest numerical increase over the next two decades. While larger households are typically associated with this group, the trend toward smaller families, in addition to a high divorce rate, will keep household size at about 2.45 persons.

2. Demand for ownership units will continue to be strong. However, the detached single-family unit will become less attractive due to high costs of purchase and maintenance. As was shown, many Oregonians were unable to afford single-family detached houses in 1978. As the gap between incomes and housing costs widens, the demand for condominiums and attached (common wall) ownership units will increase.

3. High land costs will necessitate increased densities in the future. Single-family lot costs, which presently range between $14,000 and $18,000, will continue to escalate if the standard 7,000-10,000 square foot lots are produced. Encouraging greater densities and smaller lots will slow down this trend. Five thousand square foot lots for single-family development should be encouraged, particularly on parcels close to employment and commercial centers.

4. Mobile home demand will remain strong. Their attractiveness is due to affordability in relation to stick-built single-family units.

5. Decreasing family size, increasing construction costs and escalating energy costs will cause a decline in household size (square footage). A greater proportion of two-bedroom households will be constructed.

6. Because per capita incomes have not kept pace with housing and energy costs, the number of two-income households has increased. This fact is reflected by the increase in the state's participation rate. Currently, the rate is approximately 46.7%. Over the next two decades, it should climb slightly and level off between 48% and 49%.

7. Ownership housing will continue to be a good investment for Oregonians, as long as inflation in housing prices keeps pace with, or exceeds, the general inflation rate. In recent years, many investors have entered the single-family market to take advantage of 16%-18% annual inflation rates in housing. As this rate drops in relation to the overall inflation rate, the number of investors will taper off.

8. If housing costs continue to increase at present rates, a greater proportion of Oregon's households will be in need of federal or state housing assistance by 2000.

PART III

KEY HOUSING ISSUES IN THE FUTURE

The most pressing housing issue to be addressed over the next two decades centers on the state's ability to provide housing at a level commensurate with the financial capabilities of Oregon's residents. As present statistics indicate, new housing is beyond the financial means of many Oregonians. In order to reverse this trend and narrow the gap between income and housing costs, the Commission should focus its attention on the following issues.

1. Goal #10 - Housing

   Goal #10 represents the most far-reaching housing planning law on the books of state government anywhere in the country. It requires every city and county to encourage affordable housing in terms of its residents' economic capabilities.

Thus far, however, it has not received adequate attention by the Department of Land Conservation and Development (DLCD). DLCD has addressed agricultural issues and developed policy in this area almost exclusively at the expense of housing. No criteria or standards for Goal #10 review have been established by DLCD. Instead, approval is left up to the discretion of the reviewer.

If statewide housing policy is to be effective in encouraging affordable housing, Goal #10 must be addressed satisfactorily by every city and county in the state. Uniform standards must be applied by reviewing bodies so that goal compliance/noncompliance is measurable.

2. Goal #11 - Public Facilities

Who should pay for public facilities needed as a result of population and housing growth? Many communities around the state have answered: new residents.

How and when these facilities are financed will have a direct bearing on housing costs in the future. One method becoming popular around the state is the systems development charge. A recent study conducted by the Bureau of Governmental Research and Service concluded that in many cases, this charge was a front-end tax which added to housing costs. In most cases, the charge was paid by the builder and included in the price of new units. It was then financed at conventional interest rates over the life of the mortgage. In essence, this means that new facilities are being financed at conventional interest rates.

Many communities do not have a well-planned method of financing public facilities. It is becoming increasingly evident that present methods, such as systems development charges, are ineffective and costly. Therefore, communities must examine the cost effectiveness of alternative financing methods as they relate to housing costs and determine the level of public involvement in providing these services.

3. Density

One of the keys to meeting housing needs in the future relates to urban design. Many Oregonians can no longer afford the 1600-square-foot, 3-bedroom, 2-bath home on a 7,000-10,000 foot lot or the new two-bedroom apartment. In order to increase housing options and promote affordability, communities must increase the capacity of the land. Densities for single- and multifamily development must be increased so that services are better utilized and land costs

are reduced. Incentives should be given to developers to encourage smaller units in cluster developments.

Vacant parcels close to employment and commercial centers with sewer and water available are of particular importance. Many of these parcels are adjacent to residential housing and zoned for large-lot (7,000-10,000 sq. ft.) development. Much of this land should be rezoned to allow higher densities and cluster development. Better utilization of this land will enhance housing affordability. However, in many communities, cluster developments/higher densities do not always result in lower land costs. Unfortunately, communities often lay on extra requirements for design teams, design review, neighborhood comment, extra public hearings and appeals, and the cost of these outweigh the land economies that are supposed to be achieved. It is critical to allow densities to be high enough so that higher processing costs can be offset and lower land prices realized.

4. Urban Growth Boundaries

Another factor influencing land costs relates to urban growth boundaries. An adequate supply of vacant, buildable, serviced land must be maintained in order to keep land prices from escalating. Communities must closely monitor these boundaries and establish provisions for their expansion and revision. Otherwise, urban growth boundaries may restrict the supply of land for housing and adversely impact housing costs.

MID WILLAMETTE VALLEY
COUNCIL OF GOVERNMENTS

400 SENATOR BUILDING ★ 220 HIGH ST. N.E., SALEM, OREGON 97301
TELEPHONE (503) 588-6177
ALAN H. HERSHEY, *Director*

January 7, 1980

Mr. Clay Moorehead
Newberg City Hall
Newberg, OR 97132

Dear Clay,

This letter is in response to your request for a description of COG's involvement in "208" Water Quality Planning as it relates to population projections. More specifically, it discusses the population projections that have been prepared as part of the COG's 208 Plan, and the significance of the Master Sewerage Plan (a component of the 208 Plan) and its relationship to Newberg's comprehensive planning efforts.

In 1976, population projections were prepared as part of the 208 Areawide Water Quality Management Plan. These projections were jointly developed by Council of Governments staff and the planning staffs of Marion, Polk, and Yamhill Counties. The COG and county staffs selected Portland State University's (PSU) mid-range projection for counties as the most accurate reflection of future population trends. These projections were included in the COG's 208 Water Quality Plan and submitted to the Oregon Department of Environmental Quality (DEQ) and the U.S. Environmental Protection Agency (EPA). These figures thus became part of DEQ's water quality plan for the state and are the basis for the sizing of sewerage facilities under EPA's Section 201 grant program. The year 2000 projection established for Newberg in this process was 17,784.

Since the 1976 preparation of the 208 projections, each city and county in the region has been preparing new or revised comprehensive plans to achieve compliance with State Planning Goals. This has resulted in a re-evaluation of population figures. Also, population trends since the water quality planning projections were first developed indicated some need for readjustment. Under direction from the COG Board of Directors, COG staff undertook this readjustment in late 1978.

MEMBER AGENCIES:

State of Oregon. COUNTIES: Marion, Polk, Yamhill. CITIES: Amity, Aumsville, Aurora, Carlton, Dallas, Dayton, Detroit, Falls City, Gervais, Hubbard, Idanha, Independence, Jefferson, Lafayette, McMinnville, Monmouth, Mt. Angel, Newberg, Salem, Sheridan, Silverton, Stayton, Sublimity, Turner, Willamina, Woodburn. SPECIAL DISTRICTS: Chemeketa Community College, Marion County Fire District #1, Marion County Education Service District, Yamhill County Education Service District, Marion, Polk and Yamhill Soil & Water Conservation Districts, Salem School District 24J.

Exhibits-

Council Meeting - Januart 14, 1980

Planning: Question of population projection to year 2000

On January 1, 1979, MWVCOG released a preliminary projection through LCDC - designated County Coordinators for review by each county and city. The preliminary figures represented four months of work researching city and county planning data, as well as analyzing demographic components of change in the regional population as a whole. In general, where individual jurisdictions were maintaining the 1976 208 projections, or had developed new ones, such figures appeared in the preliminary revised water quality projections. New projections were prepared only for those cities where historical population trends were inconsistent with the then existing (1976) 208 projections and where these projections were also inconsistent with adopted plan policies.

Following release of the preliminary figures, MWVCOG staff met regularly with the planning directors of each county and with each LCDC County Coordinator. This process resulted in final adjustments to the preliminary projections to ensure that the figures were consistent with local comprehensive plans. Finally, in May, 1979 the MWVCOG Board of Directors adopted the revised projections and submitted the new figures to DEQ and EPA as an amendment to the Water Quality Management Plan.

***

The Master Sewerage Plan is a part of COG's 208 Areawide Water Quality Management Plan. It is a regional analysis of sewerage treatment needs in the Mid Willamette Valley. Using the previously discussed population projections and waste load coefficients developed for each mid valley community, the Master Sewerage Plan projects total daily waste loads from each city. This projection allows regional and state agencies to analyze future water quality needs.

Section 10 of the Master Sewerage Plan prioritizes, on a regional basis, needed sewerage improvements for municipalities. Federal law is quite specific regarding the importance of a Master Sewerage Plan in the distribution of future construction grant funds. Section 208 (d) of U.S. Public Law 92-500 states:

> "... the administrator (EPA Region X) shall not make any grant for construction of a publically owned treatment works under Section 201 (g) (i) within such area except ... for works in conformity with such plan."

Therefore, P.L. 92-500 mandates that construction grants be in conformance with Section 208 Master Sewerage Plans.

COG staff has prepared, on a preliminary basis, revised waste load projections based on the new (1979) population projections. These waste load projections, along with a discussion of the Master Sewerage Plan and the Clean Water Act, were forwarded to all Mid Willamette Valley counties and cities by letter on July 17,1979.

***

On September 27, 1978 the EPA issued regulations requiring states to disaggregate state level population projections provided to EPA by the Bureau of Economic Analysis (BEA) to county levels and areas served by Designated 208 Areawide Planning Agencies, such as the COG. It is the intention of EPA to use the disaggregated population projections as the basis for future funding of sewerage construction projects.

The DEQ in December, 1979, submitted COG's revised (1979) population projections to EPA for approval as Oregon's official projection for District 3 (Marion, Polk and Yamhill Counties). As of this writing, the EPA has not yet made its final determination. However, should EPA accept the DEQ-COG submission, then the areawide total and its subsequent disaggregation to the city and county level, will officially become part of the Master Sewerage Plan. This could potentially place Newberg in the position of having a year 2000 population projection of 17,784 persons in its comprehensive plan, and a population projection of 27,000 in the Master Sewerage Plan. Possible implications of this situation are discussed below.

Under the assumption that the EPA will approve the new projections, three possible scenarios are possible: 1) the Master Sewerage Plan and the comprehensive plan remain inconsistent, 2) COG revises its Master Sewerage Plan to be consistent with Newberg's comprehensive plan figure (with subsequent re-submittal to DEQ and EPA, and assumed approval), or 3) Newberg revises its comprehensive plan projection to be consistent with COG's revised (1979) projections in the Master Sewerage Plan. Each scenario has implications as follows:

1) The two documents remain inconsistent. It is our understanding, obtained through conservations with DEQ personnel, that the DEQ and LCDC have a Memorandum of Understanding recognizing the inherent authority of the comprehensive plan. It is the DEQ staff's opinion (and that opinion is not based on precedent), that the Comprehensive Plan figure (the lower) would supersede the Master Sewerage Plan projection. If this occurred, Newberg would be considered for funding for sewer system improvements based on a projected population of 17,784, rather than 27,000 (assuming of course, that EPA funds were available).

2) COG revises its Master Sewerage Plan to be consistent with Newberg's Comprehensive Plan figure (with subsequent re-submittal to EPA, and assumed approval). This would entail revising wasteload projections for Newberg to reflect the population of 17,784. Newberg would then be eligible to receive funding for sewer system improvements based on 17,784 people. The crucial question here then becomes: if, in the next several years Newberg finds it wants to apply to EPA for sewer system improvements for a population greater than 17,784, would DEQ-EPA accept a revised population figure? An alternative way of asking the question is: if COG - DEQ - EPA now accept the 17,784 figure into the Master Sewerage Plan as the basis for sizing and funding sewerage facilities, for how long does Newberg have to live with this number?

Unfortunately, I cannot give you clear and definitive answers to these questions. The EPA regulations do not specify the procedure for altering projections once the present cycle of disaggregation is completed. I have called EPA officials in Washington and Seattle, but they can only offer conjecture, not assurance.

The most definite statement I can make is that should the Master Sewerage Plan have fixed in it a figure of 17,784, there is a distinct possibility that EPA might not accept further adjustments for several years.

3) Newberg revises its comprehensive plan projections to be consistent with COG's revised projections. COG, DEQ, EPA and Newberg would then share a common year 2000 projection for Newberg for purposes of funding sewerage system improvements. Of course, a significant change in the population projections implies other significant changes in the plan as well.

I am sure you understand that this letter does not constitute a recommendation as to how Newberg should deal with the issue of population projections. Its purpose rather is to provide background for understanding the implication of alternative decisions.

Please do not hesitate to contact me if I can provide any further information or assistance.

Sincerely,

Richard Santner

BOARD OF COMMISSIONERS

Exhibit #2 1-14-80

January 14, 1980

Elvern Hall, Mayor
City of Newberg
414 East First
Newberg, OR 97132

Dear Mayor Hall:

The Board of Commissioners met this morning to discuss how the City of Newberg can best approach the revision process needed to prepare an acknowledgeable plan. The Board considered these factors:

1. The City is midway through a 120 day continuance of its request for acknowledgement.

2. There is a large population discrepancy between the Newberg Plan projections and the Mid-Willamette Valley Council of Government's projections in its Master Sewerage Plan.

3. The County and the City have signed an Urban Area Management Agreement which is now in effect.

4. Newberg has major sewerage deficiencies so it is important that the City be in a position to request construction funds from the Environmental Protection Agency.

It is the position of the Board that the City of Newberg should proceed to rejustify and if needed readjust the Urban Growth Boundary, make the revisions which the Plan needs to be in compliance with Statewide Planning Goals 2, 6 and 10, and add an addendum to the Plan which explains the descrepancy between the City's and MWVCOG's population projections. The addendum can make it clear that the City may want to begin a major update of its Plan after acknowledgement in order to incorporate a higher population projection and resulting policies into the Plan. This approach to Plan revision will ensure that Newberg will have an acknowledged Comprehensive Plan and Urban Growth Boundary to serve the City during the long process of a major Plan update, meets the time requirements of LCDC, and allows the City enough flexibility to properly apply for EPA sewerage contruction grant monies.

Courthouse • McMinnville, Oregon 97128 • Telephone 472-9371

The Board also discussed the proper avenue for considering the revisions to the Plan, whether they be textual or map amendments. We are agreed that if the Urban Growth Boundary is to be amended or text changes are needed to justify the Boundary, the procedures as set forth in the Urban Area Management Agreement should be used. The Urban Area Management Commission (NUAMC) will hear those revisions. Text changes not directly related to the justification of the Urban Growth Boundary can be adopted by the City and reviewed by the County as has been previously done. However, considering the time constraints of this continuance period, the City might want to speed up the process by using NUAMC for all the revisions.

We hope this letter clarifies the County's position. If our planning staff can help speed you on the way to having an acknowledged plan, we would be glad to have them do so.

Sincerely,

Ted Lopuszynski

Ted Lopuszynski, Chairman
Board of Commissioners

Exhibit #3 1-14-80

January 14, 1980

Elvern Hall, Mayor
City of Newberg
Newberg City Hall
Newberg, OR 97132

Dear Mayor Hall:

The City has been recently discussing the desirablility of adjusting population figures in the City's plan. The language below will accommodate the City's position without jeopardizing the acknowledgment of the City's plan:

> The City of Newberg has prepared the plan with a population estimate of 18,000 people. This projection is consistent with the Areawide Master Sewerage Plan adopted by the Council of Governments which has been submitted to the Department of Environmental Quality and to the Environmental Protection Agency. As the City was approaching completion of this plan the Council of Governments prepared new population estimates for all areas in Yamhill, Polk and Marion Counties. The new estimate prepared as part of this work for Newberg is 27,000 persons. The status of the planning work in the City does not allow this new population estimate to be incorporated into the plan at this time. However, the City does intend to update the plan according to the update schedule in the plan and will incorporate new population estimates available at the time of the update.
>
> With respect to public facilities and improvements in those facilities, the City will use a figure of 27,000 persons in designing whatever system improvements are made between now and the first plan update.

This can be inserted into the plan giving the City the ability to do whatever work is necessary to move toward the new population figure without undergoing massive revisions to the plan which would be necessary to fully adopt the 27,000 projection.

Certain other points have been raised with respect to the City's position on the work to be done during the acknowledgment period. These points include the following:

1) Any City unilateral action on the urban growth boundary would not have effect until the County concurred in those actions.

2) The joint agreement between the City and County regarding the procedure for changes to the urban growth boundary (NUAMAC) is now operational and should be utilized in any review or amendment process.

3) More time is likely to be necessary to complete City work on the plan under the continuance order adopted by the Commission. Reasonable additional time would be given as long as good faith efforts are being made by the City to comply with the continuance agreement.

4) Massive revisions to the plan are not appropriate under the continuance period, and would be regarded as a breach of the agreement between the City and the State. Additionally, the work necessary to incorporate the revisions to the plan under a population estimate of 27,000 would necessitate massive revisions. Not only would these be unable to be incorporated in the continuance period, but are unlikely to be able to be completed by July 1, 1980, the date when plans are due throughout the STate. Inability to complete the work by the specified date would mean that enforcement actions would be initiated against the City. Such actions would likely take the form of those I described to you over the phone.

I am confident that we can make the language with any reasonable changes work to bring the City's plan into compliance and to sufficiently protect the City's interests. I do not expect that the enforcement actions described in number four above would be necessary if we are able to continue to work together.

Sincerely,

Craig Greenleaf

Mr. Clay Moorhead
Planning Director
City of Newberg
414 East First Street
Newberg, Oregon 97132

RE: WQ-City of Newberg
File No. 60597
Yamhill County
Population Projections

Dear Mr. Moorhead:

As we discussed during our December 18 meeting with officials from Yamhill County and the Mid-Willamette Valley Council of Governments (MWVCOG), a solution appears available to resolve the dilemma associated with your population projections (as used in your Comprehensive Land Use Plan) and those recently proposed by the MWVCOG.

I have developed a possible insertion for your Comprehensive Plan which, it seems, should satisfy all local jurisdictions, while enabling you to proceed with your sewerage upgrading program under the requirements of the Environmental Protection Agency's (EPA's) Construction Grants Program. A copy of that insertion is attached for your review.

As you know, the City has major sewerage deficiencies (infiltration/inflow and bypassing, sludge disposal, industrial users, etc.) which must be resolved regardless of which population projection is used. To expedite corrections and optimize chances for EPA grant funds, your sewerage upgrading program should continue to be based on the 18,050 projected population. The initial expansion should have sufficient flexibility to facilitate additional expansions in the future. Therefore, I strongly suggest we (City, your consulting engineer and DEQ) meet soon to discuss what sewerage plan updating is necessary.

We do not yet have our 1980 allocation of EPA Construction Grant Funds. Therefore, the potential for the City of Newberg receiving a Step II grant for design is hopeful but uncertain. However, it is certain that no money will be available to a city not in a position to proceed. Therefore, the City of Newberg must finish its Facilities Planning effort and submit a complete Step II Grant Application as soon as possible (but no later than May 1, 1980).

I hope this information helps in your current planning effort. Please call me at 378-8240, Salem, if you have any questions.

Sincerely,

Stephen C. Downs

Proposed Insertion Into The City of Newberg's Comprehensive Land Use Plan

The City of Newberg is designated as a Sewerage Works Implementation Agency under the Section 208 Areawide Waste Treatment Management Plan, a program designed to carry out the Clean Water Act. The City has responsibility for planning, operation, maintenance and financing sewerage works.

Mid-Willamette Valley Council of Governments (MWVCOG) is the Areawide Waste Treatment Planning Agency under the hierarchy of Section 208 of the Clean Water Act. MWVCOG has developed a Water Quality Management Plan which includes a Master Sewerage Plan for all jurisdictions within Marion, Polk, and Yamhill Counties. The MWVCOG Water Quality Management Plan is adopted as part of the State of Oregon's Water Quality Management Plan.

The Oregon Department of Environmental Quality (DEQ) is the designated regulatory agency for design criteria, operation and maintenance of sewage treatment works. DEQ must approve sewage treatment plant and sewer system expansion plans before construction begins. Environmental Protection Agency (EPA) sewage works grant funds are dispersed according to a DEQ priority list adopted annually. The City must obtain DEQ certification that a grant proposal conforms to the MWVCOG Master Sewerage Plan before applying to EPA for a sewerage works construction grant.

The City of Newberg pledges to continue implementing its Master Sewerage Upgrading Program as outlined by its Facilities Planning Study (and supplements thereto). All major facilities, including sewage treatment plant expansion and sludge disposal, will be based upon a projected population of 18,050 by the year 2000. The treatment plant expansion will have sufficient flexibility to facilitate additional expansions in the future.

The City of Newberg hereby acknowledges that both the MWVCOG Water Quality Management Plan and this Comprehensive Plan are dynamic documents, requiring periodic updating to reflect changes in population projections, economic and environmental considerations, etc. Therefore, the City pledges to initiate all necessary amendment processes at appropriate times to insure compatibility between the two plans.

Exhibit #5 1-14-80

Concerns Relating to Revised Mid-Willamette Valley Council of Government Population Projections for the City of Newberg.

1. Explanation of the revised MWVCOG population projection of 27,000.

2. Discussion of letter from Department of Environmental Quality relating to the revised population figures and its effect on the Newberg Sewer Facility Study.

3. Possible alternatives relating to the Comprehensive Plan.

Alternative "A"

Complete required amendments to satisfy LCDC acknowledgment of the Comprehensive Plan using 18,000 population.

Possible Effects

(1) Receive acknowledgment from LCDC.
(2) Request that EPA accept the 18,000 population figure.
(3) Go forward with application and processing of Step 2 of the sewer facility funding from the State.

Alternative "B"

Complete the required amendments to satisfy LCDC acknowledgment of the Comprehensive Plan and add a disclosure indicating that the population projection in the Comprehensive Plan was based on 1976 information, and that since that time, revised estimates have been prepared by the MWVCOG indicating a higher than anticipated population projection. The disclosure should indicate that as soon as population projections can be properly evaluated and analyzed by the City, the City will initiate an amendment to the Comprehensive Plan to remain consistent with any revised population projection.

Possible Effects

(1) Receive acknowledgment from LCDC.
(2) Possible to go forth with Step 2 of the sewer facility funding from the State.
(3) Possible to go forth with Step 2 of the sewer treatment facility funding, having certain flexibility in the design of the structure.

Alternative "C"

Cease work at pursuing acknowledgment of existing Comprehensive Plan. Maintain Comprehensive Plan in its existing status and begin revisions and analysis based on a higher population projection.

Possible Effects

(1) Acknowledgment request for the Newberg Comprehensive Plan is denied by LCDC. It may be possible to receive some time extensions to upgrade and revise the Comprehensive Plan. It's possible that LCDC could

place an enforcement order on the City requiring certain items relating to the Comprehensive Plan to be completed.

(2) Submit the existing Comprehensive Plan to EPA with a possible amendment indicating that a higher population figure may be more appropriate.

(3) It may be possible to go forth with Step 2 sewer treatment facility funding.

Alternative "D"

Cease work on the present Comprehensive Plan in light of the MWVCOG population projection of 27,000 and revise the Plan accordingly.

Possible Effects

(1) Acknowledgment of the Comprehensive Plan as it now exists would be denied. Possible extensions of time may be provided by LCDC. It's possible that an enforcement order may be placed on the City regarding completion of the Comprehensive Plan.

(2) Revise sewer facility study. This would probably necessitate additional hearings which would take us beyond the Step 2 application date, which would make us ineligible for Step 2 funding this year. DEQ has indicated that they are anticipating a decline in State funds for sewer treatment plant construction over the coming years.

(3) Request that EPA accept the higher population figure of 27,000 until a new Comprehensive Plan is devised.

AL'S DRIVE IN

111 WEST FIRST STREET – NEWBERG, OREGON 97132 – PHONE 503-538-4447

Al and Karen Blodgett, Owners

29, JAN. 1980

Dear Elvern:

While driving around town I have noticed that some of the 2 hour parking signs and poles have been taken down. I suppose this was done due to complaints from citizens.

As a member of the community and a tax payer, it appears that the Council really ~~has~~ blew it. Rather than wasting valuable employee time and money on materials in the future, why can't a committe be formed to study the needs of the area, and consult with the residents and businesses there-in?

I for one asked a question about the parking the night action was taken and I felt my question was taken very lightly. Now, the base for my question appears to be one of the reasons for the change.

Would hope you and the Council will look a little farther ahead before acting next time.

Sincerely

Al Blodgett

1006 E Hancock
Newberg, Oregon 97132
February 4, 1980

Mayor Elvern Hall
City Hall
Newberg

Dear Mr. Hall

Re - Fire Zone #1

Residence Address - 1006 E Hancock - Newberg

My residence is on the south side of Hancock Street, #1006 E Hancock, and is in a commercial zoning. I bought it with the intent to convert to commercial business enterprise. Quite recently I discovered that I am in a Fire Zone 1 area, which prohibits the use of my residence for commercial enterprise; because it is of wood construction and therefore must remain a residence. There is no way the exterior walls could be changed to masonary. My home is in a very undesirable residential area, because it has a lot of noise from the traffic.

This present fire zoning is causing a financial burden to me and I am asking the city council to repeal this ordinance, or take my property out of fire zone I completely.

Please present this letter at your city council meeting to act upon my request.

Yours truly
Ernest E. Amundson.

Ernest Amundson

Council
3/3/80
Agenda # 5A

CONDITIONS FOR PRELIMINARY APPROVAL
OF COPPERGOLD PUD

A. General.

1. Compliance with the intent of plans on file with the planning department dated and received on December 17, 1979, as approved by the Newberg Planning Commission.

2. The commercial apartment and townhouse areas and density are approved, but the applicant is required to submit the standard PUD application for the Commission review of the site design details before any development takes place within these sites. Detailed site plans, elevations, landscaping and parking designs must be submitted.

3. Preliminary approval of Phase One, Coppergold PUD is granted. Preliminary approval of the remaining phases is contingent upon acceptance of an appropriate bid for construction of the proposed City water improvements (includes construction of a new well and a submarine transmission line) and until construction is initiated to correct the sewer infiltration problems.

B. Housing.

1. The proposed maximum units for Coppergold Park will be 330 units with 10448 density points which shall be adhered to as part of this approval.

2. No factory built housing shall be allowed within the project.

3. The planned approval will become null and void if the final plat for Phase One is not processed as outlined within one year after approval by the Commission.

4. Patio Home Areas. Detailed drawings showing setbacks, landscaping and driveway configuration within each patio house cul-de-sac area shall be submitted and approved by staff prior to issuance of any building permits in these areas. These plans shall be sent to the Building Department to establish setbacks from structures.

Units within these areas may be attached or detached provided:

(a) Each dwelling unit shall be situated on an individual lot within the subdivision.

(b) No structure shall contain more than two units.

(c) Setback shall be waived on one side. All units must be situated on a zero lot line. When two units are situated against the same zero lot line, then the units shall be attached and have common foundations.

(d) Side yard setback requirement shall be 5 feet and shall otherwise be not less than 10 feet between buildings. Front and rear yard setback requirements shall conform to the requirements of the Newberg Zoning Ordinance.

(e) Each dwelling unit shall have independent services which include, but are not limited to sewer, water and electricity. Individual services shall be located on their respective lots, beyond the tap locations.

(f) Authorization of single family attached dwellings does not waive any requirement specified within the Uniform Building Codes or other applicable requirements.

(g) Each site shall accommodate a minimum of 3 off-street parking spaces and shall have a landscaped area equal to a minimum of 7 percent of the gross lot area.

(h) A site plan is approved by the City Planner prior to issuance of a building permit. In approving a site plan, the City Planner may attach any conditions necessary to fulfill the purpose of this Ordinance.

5. Single Family Homes.

(a) Each site shall accommodate a minimum of 4 off street parking spaces.

C. Transportation.

1. Sidewalks will be required to be built on both sides of Center Street, on the South side of Mountainview Drive, East side of College, West side of Villa Road and at least one side of all cul-de-sac streets, tying into the park pedestrian way. Construction plans and specifications are subject to approval by the Engineering office and City Planner.

2. A 34-foot cul-de-sac road pavement is to be built in the townhouse and patio house clusters and a 28-foot cul-de-sac road pavement is to be built in the single family clusters. All roadways with an improved width of 28 feet shall be designated with appropriate street markings (signin to prohibit parking on either side.

3. ACCESS.

(a) No housing unit shall have direct access from Mountainview Drive, Villa Road, Crestview Drive or College Street with the exception of the two lots facing Crestview Drive at its intersection with Villa Road. In order to minimize any hazard, these two lots shall have one common access and curb cut at least 60 feet (measured along the property line) from the intersection. In addition, there shall be an on-site maneuvering area as to allow no backward movement of a vehicle onto the public road right-of-way.

(b) The church site access will be limited to two access points, one on Mountainview Drive, the second on Villa Road. These access points shall be at least 150 feet (measured along the property line) from the intersection.

(c) No access from the apartment complex will be allowed to College Street.

(d) Access for the commercial site will be limited to Mountainview Drive and N. Center unless an access acceleration/deceleration lane is provided along College Street, subject to approval by the Oregon State Highway Division and the City Engineer, and then only one access location will be permitted along College Street.

4. The applicant must obtain the necessary road approach permits from the State Highway Division prior to approval of the final plat for Phase One.

5. The pedestrian ways must be developed for emergency access and shall be designed and constructed subject to approval by the City Engineer and Fire Chief.

6. All street names shall be approved by the City prior to the submittal of final plat for Phase One.

7. Except as provided within these conditions, all roadways within and the half roads of all roadways abutting the subject property shall be installed to City street standards and are subject to approval by the City Engineer.

8. Mountainview Drive right-of-way. A 60-foot right-of-way shall be provided on Mountainview Drive and a 70-foot right-of-way at the intersection with College Street and fronting the commercial site.

9. A one-foot reserve strip shall be provided along the northern edge of the subdivision to eliminate any lot access directly to Mountainview Drive.

D. Utilities:

1. A detailed drainage plan for the entire site must be prepared and submitted to staff for review and approval prior to the submission of the Phase One final plat. The drainage plan is subject to approval by the City Engineer

2. Approved fire protection facilities are to be provided to comply with the requirements of the Fire Department.

3. Service utilities must be installed underground.

4. A 5-foot utility easement may be required on rear and front lot lines if found necessary for the purpose of placement of utility lines.

5. An easement must be obtained to connect the subdivision to the Hess Creek sewer system prior to approval of the final plat for Phase One.

6. The applicant shall engineer and install all sewer, water and storm drainage systems to and within the project subject to approval by the City Engineer.

E. Open Space System.

1. Before submittal of Phase One of the final plat, the applicant must submit for approval a contract between the applicant and the Chehalem Park and Recreation District which sets forth the acceptance, development and maintenance of the Coppergold Park system which shall be in substantial conformity to the preliminary approved PUD plans; or the applicant must submit for approval restrictive covenants and home owner's association by-laws for its development and maintenance.

   Development of the park as approved on the preliminary plans (which includes tennis courts, ball fields, parking areas, bikeway, and restrooms) shall be completed prior to submittal of the final plat for Phase Four, or a security for improvement may be approved in lieu thereof.

2. Covenants of the subdivision shall indicate fences along the open space areas shall be no higher than four feet and of a uniform nature.

   Berming and the planting of street trees shall conform to a detailed plan showing the location, height and width which shall be submitted to the City for approval. The plan must conform to vision clearance requirements and must otherwise meet with the intent of the preliminary PUD plans. The berming and street tree plan must be approved prior to the submittal of the final plat for each phase.

F. Commercial.

1. At least 7.5% of the 4.3 acre commercial site shall be landscaped and shall conform to landscape plans to be approved by the Newberg Planning Commission upon submittal of Phase Four design plans.

2. A maximum of 37,000 sq. ft. of gross floor space will be permitted at the proposed commercial site.

March 3, 1980

The Honorable Elvern Hall, Mayor
City Hall
Newberg, Oregon 97132

Re: Coppergold Park

Dear Mayor Hall:

We have submitted a proposal for annexation, zone change, comprehensive plan amendment, PUD, and preliminary plat approvals for Coppergold Park. The following findings are consistent with factual statements and conclusions drawn from those facts previously presented to the Planning and Zoning Commission. To assist the City Council's review of Coppergold Park and to make conclusions the following material is presented.

1. ANNEXATION:

A. Public Facilities: After reviewing the project with city officials, the city can provide the necessary public facilities and services to the entire site for the level of development proposed. Water and sewer facilities are available to the site and these facilities can fully accomodate the project. Also fire and police, etc, services can be both physically and financially provided without requiring excessive improvements or additions that are not programmed. Also, based upon agency comments and the testimony at the Planning and Zoning hearing, there will be no unusual burdens on existing services to serve the development.

B. Urban Development: The property is within an area that is physically developed. As previously outlined in material presented to the Commission, the property is surrounded with currently developed subdivisions to the west, south and north. Also, the site is surrounded on three sides by the Newberg City Limits. Prior approval of three subdivisions north from the subject property place the proposed project in an "infill" situation. Also, urbanization has been progressing to the north, and this parcel is the next logical step in development of this portion of the city. The city has certain physical limitations to

development and growth on the west (Chehalem Creek), to the south (Willamette River, Publishers Paper), and to the east where excellent farm land should be preserved. Growth to the north is both logical and good for the city. The County Comprehensive Plan, also, recognizes that the area north of Newberg will eventually develop in residential uses even though some of the area is zoned agriculture/forestry currently. This area is needed to accomodate projected population of Newberg. The project compatiability with adjoining land uses is answered when considering the project is in compliance with the Newberg Comprehensive Plan. The development of this parcel would not have negative impact on the adjoining residential uses and would not preclude adjacent agricultural operations to the north of the project.

C. Unique Site: The parcel size provides unique opportunities for development. Smaller parcels that are currently within the Newberg City limits would not provide the type of development that is possible at this site. A PUD with open space amenities and range of housing types compatiably arranged would not be possible at other sites within the city.

D. Need: The site is clearly needed for urbanization as previously stated in the report presented by Business Economics. Also, the site will be within an urban growth boundary when the boundary is adopted. The City of Newberg and the County has previously identified the urban growth boundary for Newberg to the north of the site. The plan prepared for Coppergold Park was prepared in recognition of the urban area defined and stated goals outlined in the Newberg Comprehensive Plan.

2. COMPREHENSIVE PLAN AND ZONING ORDINANCE AMENDMENTS

A. The proposed change would be in conformance with the goals and policies of the Newberg Comprehensive Plan.

B. The propsed changes comply with all other city ordinances and requirements.

C. Need for additional housing at the density and cost range and the commercial area which would be supplied by the granting of this request has been adequately established in supporting documents submitted by the applicants.

D. Although there are other parcels within the city limits which are appropriately zoned and planned for the requested uses, the area included in this application is more suitable for the proposed development because of its inclusion in an overall master development plan

that fully complies with the Newberg Comprehensive plan. The granting of this request, subject to the master development plan submitted by the applicants, would retain the integrity of the comprehensive plan density and the intent to allow a convenience commercial center site.

E. The proposed change in zoning is provided for and is consistent with the purpose of the zoning districts as set forth in the Newberg Zoning ordinance.

F. Approval of this request, subject to the master development plan submitted by the applicants, would be in the best interests of the citizens of Newberg in that a diversity of housing choices, and a convenient shopping center would be provided in a comprehensive cohesive development program. Further, this development will proceed with review options by the Planning Commission to insure a complete, quality development.

3. PLANNED UNIT DEVELOPMENT:

The preparation of the Coppergold Park plan was based upon the goals and objectives outlined in the Newberg Comprehensive Plan. Every goal, objective, and policy outlined in the city's plan was analyzed to determine the means which Coppergold Park could help implement. The design presented by the applicant meets each city goal. Also, it acheives a quality residential development.

Thank you for considering our application, and if you have questions, please do not hesitate to contact us.

Sincerely,

Ron Willcuts

APPLICATION FOR VARIANCE TO ORDINANCE NO. 1772 PROVIDING FOR CONSTRUCTION AND MAINTENANCE OF DRIVEWAYS

WHEREAS, Section 7 of Ordinance No. 1772 provides for the Council to grant a variance from the requirements of this Ordinance upon application for such.

APPLICANT: Newberg Professional Center — David F. Ames

LOCATION: Villa Road
Newberg, Oregon 97132

REQUIREMENT FOR WHICH VARIANCE IS REQUESTED:
The flair at the street curb should be expanded to a 9-10 ft. opening.

REASON FOR REQUEST:
Driveway is going to be used as access to the Newberg Professional Center and will accommodate public traffic. At present, the entrance will not allow easy access when one auto is awaiting exit. This variance would help accommodate traffic flow. One adjacent property owner (Finis Carter) desires this and it will not effect the other property owner.

Bidder A.M. Jannsen Well Drilling Co. Inc.

Address: 21075 SW Tualatin Valley Hwy
Aloha Oregon 97006

PROPOSAL

SCHEDULE A

City Council
City of Newberg
Newberg, Oregon 97132

The undersigned Bidder offers to enter into a contract with the City of Newberg, Oregon, hereinafter referred to as the Owner, to furnish all materials, equipment, machinery and labor necessary to construct two eight inch (8") test wells and two sixteen inch (16") municipal water supply wells as shown on the plans, or called for by the Contract Documents.

The undersigned Bidder declares that: He has carefully examined the Contract Documents; that he has made an examination of the site of the proposed work and has made such investigations necessary to determine the conditions to be encountered independently of those indicated on the drawings; that if his proposal is accepted, he will furnish all necessary bonds required by the specifications and will contract with the Owner, in the form bound herein, to provide all materials, equipment, machinery and labor required to complete the work according to the Contract Documents; that within ten (10) days from execution of the Contract, he will begin and pursue the work to completion without cessation or shutdown unless approved in writing by the Owner; that he will comply with all local, state and federal laws even though such laws may not have been quoted or referred to in the specifications; that he will do all the work as required by the Contract Documents and this Proposal.

The following unit prices are submitted with the understanding that the amount of the unit quantities may be changed by additions or deletions and are used only for comparison of bids and that the prices stated are independent of the final quantities.

Bid Item 1 - Mobilization and Demobilization

This item shall cover mobilization to the job site at the start of the project and demobilization from the job site at the end of the project regardless of the number of test wells and municipal water supply wells to be drilled.

Bid Item 1 - Mobilization and Demobilization

Lump Sum Price Six thousand nine hundred and no/100 dollars
($6,900.00)

Bid Item 2 - Test Well

These items will be utilized only as required by field conditions encountered and as authorized by the Engineer. Variation in quantities or total elimination of any or all of the following items shall not be grounds for renegotiation of the contract. Construction shall be in accordance with the plans and specifications.

The quantities listed are the estimated quantities necessary to complete two (2) 8-inch test wells.

Item 2A - Drilling, development, 24-hour yield and drawdown test, and all other incidental work to complete two eight (8) inch test wells, (not including Items 2B through 2E.)

220 Lineal Feet at Forty nine and 20/100 dollars per lineal foot.

($ 49.20 /L.F.)

Total Cost ($ 10,824.00)

Item 2B - Well casing, to include removal and salvage.

190 Lineal Feet at Five and 25/100 dollars per lineal foot

($ 5.25 /L.F.)

Total Cost ($ 997.50)

Item 2C - Pulling back the casing, supplying and installing 8-inch well screen including removal and salvage, or perforating the well casing.

30 Lineal Feet at Thirty seven and no/100 — dollars per lineal foot

($ 37.00 /L.F.)

Total Cost ($ 1,100.00) 1,110.00

Item 2D - In the event of a non-productive test well, abandon test well as ordered by the Engineer, remove casing and screen, if used, and fill hole with concrete.

1 each Eight hundred eighty and no/100 dollars

($ 880.00)

Item 2E - Additional testing for yield and drawdown beyond the basic 24-hour period per well.

24 hours at Eighty two and 50/100 — dollars per hour

($ 82.50 /Hr.)

Total Cost ($ 1980.00)

Total Bid Price Item 2 Fifteen thousand seven hundred eighty one and 50/100 dollars
($ 15,781.50) 15794.50

Bid Item 3 - Municipal Water Supply Well Construction

These items will be utilized only as required by field conditions encountered and as authorized by the Engineer. Variation in quantities or total elimination of any or all of the following items shall not be grounds for renegotiation of the contract. Construction shall be in accordance with the plans and specifications. The quantities listed are the estimated quantities necessary to complete two (2) 16-inch municipal wells.

Item 3A - Drilling, developing, 24-hour yield and drawdown test on each well, and all other incidental work to complete two municipal water supply wells. (Mobilization and demobilization costs to be included in Bid Item 1, Schedule A.)

220 Lineal Feet at Seventy eight and 92/100 - dollars per lineal foot

($ 78.92 /L.F.)

Total Cost ($ 17,362.40)

Item 3B - Well casing, grouting and sealing

190 Lineal Feet at Twenty one and no/100 dollars per lineal foot

($ 21.00 /L.F.)

Total Cost ($ 3,990.00)

Item 3C - Pulling back the casing, supplying and installing 16-inch well screen.

30 Lineal Feet at One hundred ninety seven & 82/100 dollars per lineal foot

($ 197.82 /L.F.)

Total Cost ($ 5934.60)

Item 3D - Additional testing for yield and drawdown beyond the basic 24-hour period.

48 hours at Eighty two and 50/100 — dollars per hour

($ 82.50 /hr.)

Total Cost ($ 3,960.00)

Total Bid Price, Bid Item 3 Thirty one thousand two hundred forty seven & no/100 dollars
($ 31,247.00)

Total Bid Price, Schedule A Fifty three thousand nine hundred twenty eight & 50/100 dollars
($ 53,92850) 53938.50

The undersigned, as bidder, acknowledges that Addenda numbered 1 through _____ have been delivered to him and have been examined as part of the contract.

Accompanying this proposal is a surety bond, cashier's check, or certified check for the sum of $ 5,392.85 which is not less than 10 percent (10%) of the base bid.

The undersigned agrees to complete the project within 45 calendar days and that the provisions required by ORS 279.350 shall be compiled with and he has knowledge of the liquidated damages portion of the General Conditions.

PROPOSAL

SCHEDULE B

City Council
City of Newberg
Newberg, Oregon 97132

The undersigned Bidder offers to enter into a contract with the City of Newberg, Oregon, hereinafter referred to as the Owner, to furnish all materials, equipment, machinery and labor necessary to construct two well houses, well pump assemblies, water transmission line and appurtenances as shown on the plans, or called for by the Contract Documents.

The undersigned Bidder declares that: He has carefully examined the Contract Documents; that he has made an examination of the site of the proposed work and has made such investigations necessary to determine the conditions to be encountered independently of those indicated on the drawings; that if his proposal is accepted, he will furnish all necessary bonds required by the specifications and will contract with the Owner, in the form bound herein, to provide all materials, equipment, machinery and labor required to complete the work according to the Contract Documents; that within ten (10) days from execution of the Contract, he will begin and pursue the work to completion without cessation or shutdown unless approved in writing by the Owner; that he will comply with all local, state and federal laws even though such laws may not have been quoted or referred to in the specifications; that he will do all the work as required by the Contract Documents and this Proposal.

The following unit prices are submitted with the understanding that the amount of the unit quantities may be changed by additions or deletions and are used only for comparison of bids and that the prices stated are independent of the final quantities.

Contractors submitting bids shall stipulate that they will obtain the pumps from a supplier located with a 100-mile radius of Newberg, Oregon, and who regularly operates a maintenance service and repair facility for the make and model of the pumps.

SCHEDULE B

Item 1A - Construction of two well houses and well pump assemblies, as shown by the plans and specifications including all appurtenant work. This shall include pipeline with Class D backfill to a point 5 feet outward from the well houses.

Lump Sum Price One hundred seventeen thousand eight hundred twenty-nine dollars

($117,829)

PROPOSAL

SCHEDULE A

City Council
City of Newberg
Newberg, Oregon 97132

The undersigned Bidder offers to enter into a contract with the City of Newberg, Oregon, hereinafter referred to as the Owner, to furnish all materials, equipment, machinery and labor necessary to construct two eight inch (8") test wells and two sixteen inch (16") municipal water supply wells as shown on the plans, or called for by the Contract Documents.

The undersigned Bidder declares that: He has carefully examined the Contract Documents; that he has made an examination of the site of the proposed work and has made such investigations necessary to determine the conditions to be encountered independently of those indicated on the drawings; that if his proposal is accepted, he will furnish all necessary bonds required by the specifications and will contract with the Owner, in the form bound herein, to provide all materials, equipment, machinery and labor required to complete the work according to the Contract Documents; that within ten (10) days from execution of the Contract, he will begin and pursue the work to completion without cessation or shutdown unless approved in writing by the Owner; that he will comply with all local, state and federal laws even though such laws may not have been quoted or referred to in the specifications; that he will do all the work as required by the Contract Documents and this Proposal.

The following unit prices are submitted with the understanding that the amount of the unit quantities may be changed by additions or deletions and are used only for comparison of bids and that the prices stated are independent of the final quantities.

Bid Item 1 - Mobilization and Demobilization

This item shall cover mobilization to the job site at the start of the project and demobilization from the job site at the end of the project regardless of the number of test wells and municipal water supply wells to be drilled.

Bid Item 1 - Mobilization and Demobilization
fifty two and no-100 dollars

Lump Sum Price Eleven thousand dollars
($ 11,052.00)

Bid Item 2 - Test Well

These items will be utilized only as required by field conditions encountered and as authorized by the Engineer. Variation in quantities or total elimination of any or all of the following items shall not be grounds for renegotiation of the contract. Construction shall be in accordance with the plans and specifications.

The quantities listed are the estimated quantities necessary to complete two (2) 8-inch test wells.

Item 2A - Drilling, development, 24-hour yield and drawdown test, and all other incidental work to complete two eight (8) inch test wells, (not including Items 2B through 2E.)

220 Lineal Feet at Sixty dollars per lineal foot.

($ 60.00 /L.F.)

Total Cost ($ 13,200.00)

Item 2B - Well casing, to include removal and salvage.

190 Lineal Feet at Forty one dollars per lineal foot

($ 41.00 /L.F.)

Total Cost ($ 7,790.00)

Item 2C - Pulling back the casing, supplying and installing 8-inch well screen including removal and salvage, or perforating the well casing.

30 Lineal Feet at One hundred sixty eight dollars per lineal foot

($ 168.00 /L.F.)

Total Cost ($ 5,040.00)

Item 2D - In the event of a non-productive test well, abandon test well as ordered by the Engineer, remove casing and screen, if used, and fill hole with concrete.

1 each Five thousand four hundred Sixty and n0/100 dollars dollars

($ 5,460.00)

Item 2E - Additional testing for yield and drawdown beyond the basic 24-hour period per well.

24 hours at Fifty eight and no/100 dollars per hour

($ 58.00 /Hr.)

Total Cost ($ 1,392.00)

Total Bid Price Item 2 Forty three thousand nine hundred thirty four and no/100 dollars
($ 43,934.00)

Bid Item 3 - Municipal Water Supply Well Construction

These items will be utilized only as required by field conditions encountered and as authorized by the Engineer. Variation in quantities or total elimination of any or all of the following items shall not be grounds for renegotiation of the contract. Construction shall be in accordance with the plans and specifications. The quantities listed are the estimated quantities necessary to complete two (2) 16-inch municipal wells.

Item 3A - Drilling, developing, 24-hour yield and drawdown test on each well, and all other incidental work to complete two municipal water supply wells. (Mobilization and demobilization costs to be included in Bid Item 1, Schedule A.)

220 Lineal Feet at Ninety nine and no/100 dollars per lineal foot

($ 99.00 /L.F.)

Total Cost ($ 21,780.00)

Item 3B - Well casing, grouting and sealing

190 Lineal Feet at Forty five and no/100 dollars per lineal foot

($ 45.00 /L.F.)

Total Cost ($ 8,550.00)

Item 3C - Pulling back the casing, supplying and installing 16-inch well screen.

30 Lineal Feet at Three hundred forty and no/100 dollars per lineal foot

($ 340.00 /L.F.)

Total Cost ($ 10,200.00)

Item 3D - Additional testing for yield and drawdown beyond the basic 24-hour period.

140,000 due Apr. 1, 1988	@ 9.25	260,000 due Apr. 1, 1997	@ 9.50
150,000 due Apr. 1, 1989	@ 9.10	275,000 due Apr. 1, 1998	@ 9.60
160,000 due Apr. 1, 1990	@ 9.10	295,000 due Apr. 1, 1999	@ 9.70
170,000 due Apr. 1, 1991	@ 9.10	315,000 due Apr. 1, 2000	@ 9.75

providing that the bonds maturing after April 1, 1990 will be redeemable at the option of the city on April 1, 1990 and any interest payment date thereafter in inverse numerical order at par plus interest accrued to the date fixed for redemption, both the principal of and the interest upon the bonds payable at the office of the City Recorder in Newberg, Oregon, all in accordance with your published notice of sale, we will pay you at the rate of $ 98.434 for each $100.00 face value, together with accrued interest to date of delivery to us in Portland, Oregon.

On the basis of the above bid, the interest cost to the city is as follows:

Coupon Interest Cost	4,264,640.00
Plus Discount Bid	53,248.00
Net Interest Cost	4,317,888.00
Effective Interest Rate	9.57403

This bid is made for prompt acceptance only and for as prompt delivery of the bonds as they can be conveniently prepared and executed, but not later than 30 days from the date of sale, unless further extended by mutual agreement.

This bid is also made with the understanding that prior to our taking up and paying for the bonds, you will provide without cost to us the opinion of Messrs. Rankin, McMurry, Osburn, VavRosky & Doherty of Portland, Oregon, approving the legality of said bonds and the sale thereof, which opinion will be reproduced on each bond.

As evidence of good faith, we attach hereto our cashier's check #17282 dated March 28, 1980 for $68,000.00 in favor of the City of Newberg upon the understanding that if said bonds are awarded and delivered to us in accordance with this bid, said check may be applied as part payment; otherwise, same is to be promptly returned to us.

Municipal Credit Report

NEWBERG, OREGON

March 25, 1980
G

Sale: $3,400,000 hospital bonds and $2,700,000 water bonds for bids April 1. Please see last page for details.

Rating: A

Opinion: The very significant increase in bonded debt is partially off-set by the City's rapid tax base growth. Water system revenues appear adequate to provide for much of the debt service on water bonds and a rate increase is planned. Hospital operations, however, are unlikely to generate much revenue for debt service without a revision of fees. At this time most of the burden for debt service on hospital bonds will be borne by the City's taxable property.

Summary: Newberg is located in the northern Willamette Valley approximately 23 miles southwest of Portland. Industrial activity in the community is fairly diverse and includes the manufacture of dental equipment, food processing, electronics, and forest products. Population and assessed value growth continues to be significant. General financial operations are satisfactory and tax collections have been about average for the state. These sales represent a very significant addition to the City's general obligation debt. Newberg intends to apply revenues of the water system to the Water Bond debt service, but such funds have not been formally pledged through council resolution. Recent results in the water system would provide for most of the debt service on water bonds and a planned rate increase would provide additional security. Hospital Bonds are to be initially secured from revenues of the Newberg Community Hospital. These revenues have not been formally pledged and, in recent years, have been well below what is needed for debt service. Without rate increases most of the burden for this debt service would be borne by ad valorem taxes.

DEBT FACTORS: The current issues will more than double the City's bonded indebtedness, but the burden is expected to be off-set by application of net revenues from the water system and hospital. Direct general obligation debt prior to this issuance consists of $10,000 1960 Swimming Pool Bonds, $67,000 1960 Sewer Bonds, $120,000 1960 Water Bonds, $114,000 1969 Building Improvements Bonds, $400,000 1970 Water Bonds, $400,000 1970 Sewer Bonds, $900,000 1979 Sewer Bonds and $115,000 Bancroft Improvement (assessment) Bonds.

THIS REPORT MAY NOT BE REPRODUCED IN WHOLE OR IN PART IN ANY FORM OR MANNER WHATEVER.

It is furnished by Moody's Investors Service, Inc. at your request under your subscription agreement for your exclusive use. The information herein has been obtained from sources believed to be accurate and reliable, but because of the possibility of human and mechanical error its accuracy or completeness is not guaranteed.

Moody's ratings are opinions, not recommendations to buy or sell, and their accuracy is not guaranteed. A rating should be weighed solely as one factor in an investment decision, and you should make your own study and evaluation of any issuer whose securities or debt obligations you consider buying or selling.

Issuers of corporate bonds, municipal bonds and notes, preferred stock and commercial paper which are rated by Moody's Investors Service, Inc., have, prior to receiving the rating, agreed to pay a fee to Moody's for the appraisal and rating services. The fee ranges from $100 to $45,000.

Debt Statement (as of 12/31/79) in 000:

Bonded debt outstanding			$ 2,126
Current offering (4/1/80) Hospital Bonds			3,400
(4/1/80) Water Bonds			2,700
Gross bonded debt			$ 8,226
Other debt: Hospital equipment lease			89
Hospital management fee			95
Gross direct debt			$ 8,410
Less: bond fund cash			129
Direct net debt			$ 8,281
Overlapping debt:	Amount	%	
Yamhill County	$ 126	14.4	18
School District No. 29	6,060	41.4	2,509
Chehalem Park & Rec. Dist.	200	43.3	87
Overall net debt			$10,895

Defaults: No record found

Security: G.O., U.L.T. Initial security for the hospital bonds is provided by net hospital revenues and for water bonds by net revenues of the water system.

Trend: Last sale, $900,000 G.O. on 8/15/79. Historically, an infrequent borrower.

Structure: All bonds are serial and are structured for slower than average redemption.

Principal Maturities-All G.O. bonds (000):

In 10 yrs.	3,316	40.3

*Cities 10,000 - 25,000 population.

Use of Bond Proceeds: Proceeds from the sale of the water bonds will be used to finance various additions and improvements to the water supply, transmission, treatment and distribution facilities of the City and demolition of a bridge carrying a water transmission line. Proceeds from the sale of the hospital bonds, together with $600,000 funds on hand, will be used to finance new construction and extensive remodeling at the Newberg Community Hospital.

Bonds authorized but unissued: The Hospital Bonds were approved by Newberg voters on May 22, 1979 by a vote of 735 for and 309 against and are being issued pursuant to City Council Resolution No. 80-822. The Water Bonds were approved by the electorate by a vote of 133 for and 91 against at a special election held October 2, 1979 and are being issued in accordance with the terms of City Council Resolution 80-821. No other bonds have received voter approval at this time.

Short term borrowing: None

Debt limits: 3% of true cash value. Among debt which is exempted are bonds for water, sewer, hospital and Bancroft assessment bonds.

Interest rate limits: 10% for these bonds.

GOVERNMENT FACTORS: The City is governed according to the Mayor-Council structure with eight councilmen elected at large to four-year terms. The Mayor is elected to a term of two years and appoints City officials with the consent of the Council. The Newberg Community Hospital is operated as a municipal enterprise and is governed by a nine-member commission (at least five of whom must be Newberg residents, with the balance consisting of residents of the service area). Commissioners are appointed by the Mayor with the consent of the Council. Hospital operations are managed by a professional administrator.

Service Provision: Electricity by Portland General Electric; telephone service by General Telephone Company of the Northwest; and gas by Northwest Natural Gas Company.

Welfare: State and County. Schools: Independent districts.

Enterprises/Utilities: Water, sewer and hospital.

Source of Information: Official statement, audits.

Public employees: 70 city; 167 hospital. Employees are not unionized and there has never been a strike against the City.

Pensions: Employees participate in retirement annuity programs obtained from the Bankers Life Company to which both the City and employees contribute. In fiscal 1979 City contributions to the retirement programs were $94,352 for the City and $14,280 for the Hospital.

Tax Limitation Legislation: The 1979 Oregon Legislative Assembly approved House Bill 2540 which established two classes of property for purposes of determining assessed values: (1) homesteads and (2) all other taxable property. Beginning with the assessment year 1980-81, annual increases in assessments for each class shall not exceed 5% statewide. Each year a ratio for each class will be determined by the State Department of Revenue and applied to the true cash value to insure compliance with the 5% growth limitation. This law will be subject to a statewide referendum at the May 20, 1980 election to approve continuation of the measure after 1980-81. The limitation does not affect local units' ability to levy ad valorem taxes without limitation as to rate or amount for general obligation debt service.

FINANCIAL FACTORS: Satisfactory operating results have been recorded in each of the years examined. Approximately 82.5% of General Fund revenues (excluding transfers) are generated locally. When transfers into the General Fund are included the locally generated share of revenues falls to 62%. Most transfers into the General Fund are in the form of Revenue Sharing monies -- $205,961 from the City's Revenue Sharing Fund and $33,500 from the State Revenue Sharing Fund in fiscal 1979. Most of these funds were utilized to pay salaries in the police and fire departments. Transfers out of the General Fund in fiscal 1979 totaled $23,500 and were used to finance capital improvements for the police and fire departments.

Financial Data (000)[a]

	Fiscal Year Ending 6/30:			% Change	
	1977	1978	1979	77/78	78/79

Year-end operating loans	none	none	none	-	-
Year-end cash surplus (def.)	(28)	173	166	-	-4.0
Year-end receivables	323	87	72	-73.1	-17.2

a. Data are for the City's General Fund and Bonded Debt Fund. In fiscal 1977 water and sewer operations were recorded in the General Fund. Accounts are maintained on the modified accrual basis.

Sources of 1979 revenue:	
Property taxes	32.5%
Licenses and Permits	15.6
Intergovernmental aid[a]	10.6
Charges for services	17.0
Revenue sharing[b]	15.7

Items of 1979 expenditure:	
Public safety	65.4%
General government	11.9
Highways and streets	3.1
Library	2.9

a. Excludes Revenue Sharing.
b. Includes $205,961 direct federal revenue sharing and $33,500 from the State Revenue Sharing Fund.

Items as a % of 1979 revenue	
Debt service	15.9%
Year-end cash surplus	12.7

Property Tax Data

Tax rate, levy and collection:

Year	Tax rate/000[a]	Levy (000)	% total collected as of 3/4/80
1977	$6.93	$504	99.29
1978	5.35	488	98.24
1979	3.79	448	96.22
1980	4.14	617 (est.)	in process

Year-end current delinquency[b]: 1978: 6.1%
1979: 6.8%

a. Overall rate, 1979 per $1,000 assessed: $21.80
b. To 8/15 of year shown.

Hypothetical tax bill, $50,000 market value Home:
$1,090

Property tax base: Real and personal.

Exemptions: Intangibles and a percentage of inventories increasing to 100% in 1980.

Assessing agent: County, based on State-certified appraisals.

Reassessment procedures: Every six years, trended annually.

Basis of assessment: 100% of true cash value.

Collecting agent: County. Subunits of county receive a pro rata share of total county collections.

Taxes due: Quarterly beg. 11/15. Collections will be in three installments beg. in 1980-81 (11/15, 2/15 and 5/15).

Penalties: 2/3 of 1% per month.

Rate and levy limitations: Levy is limited to the largest single levy of the preceding three years plus 6% thereof. City may exceed this limit only with voter approval. Levy for debt service is exempted.

Water System: The City of Newberg provides water to all residents of the municipality and a few customers outside the corporate limits of the City. At this time the supply and delivery system are sufficient to provide for the needs of a population of approximately 19,000 during normal water years. The existing supply is derived from three wells and a number of springs. A fourth well is to be drilled utilizing funds on hand and a fifth well is to be financed from bond proceeds. When completed, the five wells will combine with existing spring sources to provide 5.8 million gallons per day (five million gallons per day from the wells and 0.8 million gallons per day from the springs). The system includes two 4 million gallon storage tanks and a treatment facility capable of providing 3.75 million gallons of potable water daily. At this time the treatment capacity is restricted to 3.2 million gpd due to the 12-inch transmission line from the wells to the plant. A portion of the proceeds of this sale will be used to replace these lines with 24" transmission lines, eliminating the delivery restriction. As of 12/31/79 the system had 2,821 active accounts (see "Newberg Growth Indices" on page 7 for trend).

Water System Financial Operations: (to 6/30; $ in 000)

				% Change

TOTAL EXPENSE	215	265	304	23.3	14.7
NET REVENUE	109	159	107	45.9	-32.7

Rates: The following bi-monthly water rates, effective September 1, 1974, and currently under study to be revised effective July 1, 1980, apply to all customers within the City and to industiral or manufacturing businesses outside the City (other customers outside the City pay at double the rates):

Water Usage	Rate
First 700 cubic feet	$5.00 minimum charge
Next 500 cubic feet	55¢ per 100 cubic feet
Next 500 cubic feet	40¢ per 100 cubic feet
Next 2,000 cubic feet	30¢ per 100 cubic feet
Next 1,000 cubic feet	25¢ per 100 cubic feet
All Over 4,700 cubic feet	23¢ per 100 cubic feet

In addition, for providing service to new construction the City has a Connection Charge and a Development Fee. The basic Connection Charge is $350 to cover the hook-up expense. The basic Development Fee is $300 per unit.

Newberg Community Hospital: The Newberg Community Hospital is an acute care medical/surgical facility with an active medical staff of 22 physicians. The Hospital currently maintains 47 beds, but will reduce that number to 45 following the improvements financed by the current bond issue. Effective April 23, 1979, the Hospital executed a three-year management services agreement with St. Vincent Hospital and Medical Center, a major Portland medical institution. Under this agreement, St. Vincent provides a full-time hospital administrator for Newberg Community Hospital and a broad range of consulting, planning, in-service training, purchasing pool, and physician retirement services. The Newberg Hospital's admission rates have been fairly level in recent years with the average patient paying $245 per day, including $112 per day in double occupancy. As indicated below, increasing transfers to the Hospital Improvement Fund have resulted in declines in year-end net revenue. A deficit fund balance of $54,816 was recorded in the Hospital Capital Improvement Fund at fiscal year-end 1979.

				% Change

X-Ray Procedures	1,578	9,304	10,151

ECONOMIC FACTORS: For a community of its size, the economy of Newberg is fairly diverse. Principal components of the economy include A-dec, Incorporated, a manufacturer of dental equipment which employs 570 people, the Newberg Division of Publishers Paper Company, located just outside the City limits, which employs 310 people, Allen Fruit Company, a producer of food processing equipment and processor of cherries, which employs 118 people, and Technical Images, Incorporated, a manufacturer of printed circuitry for electronics firms, which employs 120, Smaller manufacturing firms produce a variety of goods, including boat trailers, steel goods, transformers, machine tools and plastic products. Newberg is the home of George Fox College, a co-educational, liberal arts institution governed by the Friends Church. Current enrollment at the College is 734.

Per capita trade (1977 approx.): Retail $4,456, State $3,920

Unemployment: The State Department of Human Resources-Employment Division reported unadjusted unemployment of 7.4% in Yamhill County in December of 1979. This compared to 6.8% in November of the same year. Statewide figures for November and December of 1979 were 7.1% and 7.6%, respectively.

Re: $3,400,000 City of Newberg General Obligation Hospital Bonds, Series 1980

Dear Terry:

We have reviewed the election transcript for this issue and find it to be satisfactory. We have also reviewed the documents furnished us for the sale transcript, and find them satisfactory; however, we will require the following additional documents for the sale transcript:

1. A certificate from the Yamhill County Assessor stating the true cash value of the City of Newberg;

2. A certificate from the City Recorder stating the outstanding bonded indebtedness of the city, with each bond issue, and the purposes for which it was issued, stated separately;

3. An arbitrage certificate in substantially the attached form; and

4. A signature and non-litigation certificate (this form should be furnished to you by United States National Bank of Oregon).

Very truly yours,

RANKIN, McMURRY, OSBURN,
VavROSKY & DOHERTY

Re: $2,700,000 City of Newberg General Obligation Water Bonds, Series 1980

Dear Terry:

We have reviewed the transcript documents furnished to us for this issue, and they are satisfactory. We will require, in addition, the following documents:

1. The minutes of the City Council meeting following October 2, 1979 showing the canvass of the water bond election;

2. A certificate from the Yamhill County Assessor showing the true cash value of the City of Newberg;

3. A certificate from the City Recorder stating the outstanding bonded indebtedness of the City, with each outstanding bond issue, and the purpose for which it was issued, stated separately;

4. An arbitrage certificate (in the attached form); and

5. A signature and non-litigation certificate (this should be supplied to the city by United States National Bank of Oregon).

Very truly yours,

RANKIN, McMURRY, OSBURN,

ARBITRAGE CERTIFICATE

CITY OF NEWBERG, OREGON

GENERAL OBLIGATION WATER BONDS, SERIES 1980

I, M. C. GILBERT, certify as follows regarding the City of Newberg, Oregon General Obligation Water Bonds, Series 1980, which are dated April 1, 1980 and are in the aggregate principal amount of $2,700,000 (the "Bonds"):

1. I am the Administrator of the City of Newberg, Oregon, and I am one of the officials of the City charged with the responsibility for issuing the Bonds.

2. I am authorized to make this certificate on behalf of the City, as evidence that the Bonds are not "arbitrage bonds" within the meaning of the Internal Revenue Code and Treasury Regulations. Those regulations limit the investment of the proceeds of tax-exempt bonds.

3. This certificate is based on facts, circumstances, estimates, and expectations of the City on the date on which the Bonds are to be physically delivered in exchange for payment (the "date of issue"). To the best of my knowledge and belief, the

estimates and expectations of the City set forth in this certificate are reasonable.

4. The Bonds are being issued to provide funds necessary to finance improvements to the City's water system and to pay costs of issuing the Bonds.

5. The City expects to receive $2,700,000 from the sale of the Bonds, which is the amount that the City estimates will be required for the project listed in paragraph 4, above.

6. The City expects that it will have spent, or be bound by contract to spend, at least $2,700,000 of Bond proceeds for the purposes listed in paragraph 4 within six months of the date of issue.

7. The City expects the projects listed in paragraph 4 to commence and proceed to completion with due diligence.

8. The City expects that the projects listed in paragraph 4 will be completed by June, 1981. The City expects it will have spent all bond proceeds for the purposes set forth in paragraph 4 by June, 1981.

9. The City does not expect to sell the facilities which will be financed with Bond proceeds.

10. The City expects that all earnings from the investment of bond proceeds will be spent for the purposes listed in paragraph 4 within three years from the date of issue.

11. Bond principal and interest will be paid from an annual tax which will be levied upon the taxable property within the City. The City expects that tax monies received each year will be sufficient only to pay principal and interest on the Bonds which will be due in the next 13 months. Any surplus remaining after the payment of principal and interest in any fiscal year will be deducted from the amount to be levied for the next fiscal year. The City does not expect that the surplus, and earnings on the surplus, accumulated in the Bond redemption fund will ever exceed 15% of the face amount of the Bonds.

12. The Internal Revenue Service has not notified the City that the City may not issue this certificate regarding the use of Bond proceeds.

DATED this 29th day of April, 1980.

CITY OF NEWBERG, OREGON

GENERAL OBLIGATION HOSPITAL BONDS, SERIES 1980

I, M. C. GILBERT, certify as follows regarding the City of Newberg, Oregon General Obligation Hospital Bonds, Series 1980, which are dated April 1, 1980 and are in the aggregate principal amount of $3,400,000 (the "Bonds"):

1. I am the Administrator of the City of Newberg, Oregon, and I am one of the officials of the City charged with the responsibility for issuing the Bonds.

2. I am authorized to make this certificate on behalf of the City, as evidence that the Bonds are not "arbitrage bonds" within the meaning of the Internal Revenue Code and Treasury Regulations. Those regulations limit the investment of the proceeds of tax-exempt bonds.

3. This certificate is based on facts, circumstances, estimates, and expectations of the City on the date on which the Bonds are to be physically delivered in exchange for payment (the "date of issue"). To the best of my knowledge and belief, the estimates and expectations of the City set forth in this certificate are reasonable.

4. The Bonds are being issued to provide funds necessary to finance improvements to the City's municipal hospital and to pay costs of issuing the Bonds.

5. The City expects to receive $3,400,000 from the sale of the Bonds, which is the amount that the City estimates will be required for the project listed in paragraph 4, above.

6. The City expects that it will have spent, or be bound by contract to spend, at least $782,000 of Bond proceeds for the purposes listed in paragraph 4 within six months of the date of issue.

7. The City expects the projects listed in paragraph 4 to commence and proceed to completion with due diligence.

8. The City expects that the projects listed in paragraph 4 will be completed by February, 1982. The City expects it will have spent all bond proceeds for the purposes set forth in paragraph 4 by February, 1982.

9. The City does not expect to sell the facilities which will be financed with Bond proceeds.

10. The City expects that all earnings from the investment of bond proceeds will be spent for the

purposes listed in paragraph 4 within three years from the date of issue.

11. Bond principal and interest will be paid from hospital revenues and an annual tax which will be levied upon the taxable property within the City. No hospital revenues are pledged to pay the Bonds, and no sinking fund is being established for hospital revenues. The City expects that tax monies received each year will be sufficient only to pay principal and interest on the Bonds which will be due in the next 13 months. Any surplus remaining after the payment of principal and interest in any fiscal year will be deducted from the amount to be levied for the next fiscal year. The City does not expect that the surplus, and earnings on the surplus, accumulated in the Bond redemption fund will ever exceed 15% of the face amount of the Bonds.

FACSIMILE BALLOT

DISTRICT ELECTION

May 22, 1979

INSTRUCTIONS FOR THE USE OF VOTE RECORDERS
TO VOTE, FOLLOW THE EASY STEPS OUTLINED HERE.

1. Using both hands, insert your ballot card in the slot. Insert your ballot card as far as it will go, positioning the two holes over the green pins on the Vote Recorder. Turn to the first ballot page.
2. Using the voting stylus, record your vote by punching the hole indicated by the arrow for the candidate or measure of your choice. Continue turning the ballot pages and vote your selection of candidates or measures. Be certain that you vote all ballot pages, for which you are qualified.
3. Lift your ballot from the pins and remove it from the vote recorder. The long stub may be used to record your write-in vote. On the perforation, fold the ballot card so that the write-in stub covers the face of the punched portion of the ballot, thereby providing security for your vote. Return your ballot card to the election board. Now your ballot is ready for rapid computer processing when the polls close.

NOTE TO VOTERS: Candidate's names may appear in a different position in your individual precinct on election day. (ORS 249-362).

The Polls will be open from the hour of 8:00 a.m. until the hour of 8:00 p.m. Qualified voters may cast their ballots in the following polling places or request an absentee ballot in person or in writing from the Yamhill County Clerk, Courthouse, 5th & Evans, McMinnville, Oregon 97128.

Yamhill County, Oregon
City of Newberg Election

Tuesday
May 22, 1979

BALLOT NUMBER

City of Newberg Ballot

Submitted to the voters by the City Council.

51 BUDGET LEVY
EXCEEDING SIX PERCENT LIMITATION

Shall the City of Newberg, Yamhill County, Oregon, be authorized to levy for the operation of the City during the fiscal year 1979-80 the sum of $259,221.00 outside the limitation set forth in Section 11, Article XI, of the Oregon Constitution?

EXPLANATION OF THE BALLOT QUESTION

Without the approval of the voters, the City Council has authority to levy only the tax base of the City, which is $106,165.00. This sum, together with available non-tax revenue, is insufficient to meet increased costs of operation, salaries, fixed charges and essential city services. If this measure is approved, the operating budget to be financed by local taxes for the tax year 1979-80 will be $58,687.00 greater than the operating budget financed by local taxes for the preceding year.

YES →
NO →

52 CHARTER AMENDMENT

AN ACT

To amend the Charter of the City of Newberg, Oregon, by adding thereto Chapter XIX authorizing the issuance of $3,400,000.00 in General Obligation Bonds of said City, to finance the cost of improving and expanding the Newberg Community Hospital, including adding a new wing, updating the present facility and purchasing new equipment, for expenditures necessary or desirable therefore, and to provide for the levy of a special tax to pay the principal and interest on said bonds.

YES →
NO →

53 CHARTER AMENDMENT

AN ACT

To amend the Charter of the City of Newberg, Oregon, by rescinding existing Chapter XVIII and substituting a new Chapter XVIII authorizing the issuance of $900,000.00 in General Obligation Bonds of said City to defray the cost of improving the sewage system of said City, for expenditures necessary or desirable therefore, and to provide for the levy of a special tax to pay the principal and interest on said bonds.

YES →
NO →

Willamina School District Ballot

27-1 AUTHORIZES ISSUANCE OF BONDS

Shall School District No. 30J in Yamhill, Polk and Tillamook Counties, Oregon, issue general obligation bonds in an amount not to exceed the sum of SEVEN MILLION, THREE HUNDRED THOUSAND AND NO/100 DOLLARS ($7,300,000.00) to mature serially over a period of not to exceed thirty years for the purpose of providing funds with which to acquire real property, construct, equip and furnish school buildings, and otherwise improve District property.

YES →
NO →

Willamina Rural Fire Protection District Ballot

36-6 SPECIAL LEVY

Shall the Willamina Rural Fire Protection District be authorized to levy for the fiscal year 1979-80 the sum of nine thousand, five hundred dollars ($9,500.00) outside the limitation set forth in Article Eleven Section Eleven of the Oregon Constitution?

If this measure is approved, the operating budget to be financed by local taxes for the tax year 1979-80 will be $734.00 less than the operating budget financed by local taxes for the preceding year.

Funds from this levy are needed to support the Superior Ambulance Service. If the voters do not approve this levy, the District will not be able to have ambulance service.

YES →
NO →

Amity School District Ballot

36-1 TAX LEVY OUTSIDE THE CONSTITUTIONAL LIMITATION

Shall the Board of Directors of Amity School District 4-J, Yamhill County, be authorized to levy for the Fiscal Year 1979-80 the sum of $790,965.00 outside the limitation set forth in Section 11, Article XI of the Oregon Constitution for the purpose of operating the Schools of the District?

EXPLANATION OF THE BALLOT QUESTION

If this measure is approved, the operating budget to be financed by local taxes for the Fiscal Year 1979-80 will be $147,905.00 greater than the operating budget financed by local taxes requested for the preceding year.

If this measure is approved, the total operating budget requirements represent an increase of 7.77 per cent above the current 1978-79 operating budget requirements.

The District has no tax base; therefore, any tax to be levied by the School Board must be approved by the voters. The available non-tax revenue is insufficient to provide an educational program adequate to meet the needs of the children of the District.

YAMHILL COUNTY BOARD OF COMMISSIONERS STATE OF OREGON

NOTICE OF BOND SALE
$3,400,000
CITY OF NEWBERG, OREGON
GENERAL OBLIGATION HOSPITAL BONDS SERIES 1980

TIME AND PLACE OF SALE

Sealed bids will be received for the purchase of this general obligation hospital bond issue by the City Administrator at City Hall, 414 E. First Street, Newberg, Oregon until 11:00 a.m. on April 1, 1980.

Immediately thereafter the bids will be publicly opened and announced, and within four hours thereafter the city will act upon the bids.

DESCRIPTION OF BONDS

The bonds will be negotiable general obligation coupon bonds of the city in the principal amount of $3,400,000, dated April 1, 1980, in denominations of $5,000 each, numbered 1 to 680, and will mature serially in numerical order on the first day of April as follows:

Maturity Date	Amount
1983	$100,000
1984	110,000
1985	115,000
1986	125,000
1987	130,000
1988	140,000
1989	150,000
1990	160,000
1991	170,000
1992	185,000
1993	195,000
1994	210,000
1995	225,000
1996	240,000
1997	260,000
1998	275,000
1999	295,000
2000	315,000
	$3,400,000

INTEREST RATE

The bonds will bear interest payable semiannually on April 1 and October 1 at such rate or rates, in multiples of one-eighth (1/8) or one-tenth (1/10) of one percent (1%), not exceeding a net effective rate of 10% per annum, as specified by the successful bidder. The bonds shall have but one coupon for the interest due on any interest payment date, no bond shall bear more than one rate of interest, and supplemental coupons will not be permitted. The highest coupon interest rate quoted shall not exceed the lowest coupon interest rate quoted by more than two percent (2%).

Terry L Wagner

Notary Public for Oregon.

(My Commission expires 4-5-80)

PAYMENT

Both the principal of and the interest on the bonds will be paid at the office of the City Recorder in Newberg, Oregon.

REDEMPTION

Bonds maturing after April 1, 1990 will be redeemable at the option of the city on April 1, 1990 and any interest payment date thereafter in inverse numerical order at par plus interest accrued to the date fixed for redemption.

AWARD OF BONDS

Bonds will not be sold for less than ninety-eight percent (98%) of par value and the full amount of accrued interest. Bonds will be sold to the highest bidder, but the city reserves the right to reject any or all bids. Unless all bids are rejected, the bonds will be awarded to the bidder complying with the terms of this notice of bond sale and submitting the bid which, if none of the bonds are called for redemption prior to final maturity date, provides the lowest net interest cost to the city. Each bidder shall include in its bid a statement of the net interest cost and the net effective interest rate if its bids is accepted, but this statement shall not be deemed to be a part of the bid.

GOOD FAITH DEPOSIT; FORM OF BID

Each bid must be unconditional, and must be for the purchase of all bonds herein described. Each bid must be accompanied by a certified check or cashier's check in favor of the city, of or upon a bank doing business in the State of Oregon, in the sum of $68,000, and should be enclosed in a sealed envelope marked "Proposal for Bonds." No interest will be allowed on the deposit with the bid, and the check of the successful bidder will be retained as part payment for the bonds or to secure the city against any loss resulting from failure of the bidder to comply with the terms of its bid.

LEGAL OPINION

The successful bidder will be furnished, without cost, with the approving opinion of the law firm of Rankin, McMurry, Osburn, VavRosky & Doherty of Portland, Oregon, to the effect that the bonds are valid and legally binding general obligations of the city, that unless paid from other sources, the bonds are payable from ad valorem taxes which may be levied upon all of the taxable property within the city without limitation as to rate or amount, and that the interest on the bonds is exempt from all present federal income taxes and present State of Oregon personal income taxes. The legal opinion will be reproduced on each bond.

DELIVERY OF BONDS; NO LITIGATION

The bonds will be delivered complete without undue delay at the expense of the city in Portland, Oregon, or in the place designated by the successful bidder at the expense of the bidder. Settlement must be in funds immediately available to the city at the time and place of closing.

The successful bidder will be provided with the usual closing documents, including a nonlitigation certificate.

CUSIP NUMBERS

It is anticipated that CUSIP numbers will be printed on the bonds, but neither the failure to print such numbers on any Bond nor any error with respect thereto shall constitute cause for a failure or refusal by the purchaser to accept delivery and pay for the bonds. The expense of CUSIP registration will be paid by the purchaser; the expense of printing will be paid by the city.

ADDITIONAL INFORMATION

Copies of the preliminary official statement for this bond issue may be obtained upon request from Marshall and Meyer Inc., 1705 Norton Building, Seattle, Washington 98104, telephone (206) 622-2405.

NOTICE OF SPECIAL CITY ELECTION
Tuesday, May 22, 1979

NOTICE IS HEREBY GIVEN that a special city election will be held in the City of Newberg, Yamhill County, Oregon, on Tuesday, May 22, 1979.

An Amendment to the Charter of the City of Newberg, Oregon, of February 10, 1893 as amended will be submitted to the legal voters of said City for their approval or rejection at said election, which said amendment with its ballot title and number is as follows, to-wit:

BALLOT TITLE:

CHARTER AMENDMENT SUBMITTED TO THE VOTERS BY THE COUNCIL

VOTE YES OR NO. MARK (X) OR (✓) IN THE SQUARE FOR THE ANSWER VOTED FOR.

An Act

52. To amend the Charter of the City of Newberg, Oregon, by adding thereto Chapter XIX authorizing the issuance of $3,400,000.00 in General Obligation bonds of said City, to finance the cost of improving and expanding the Newberg Community Hospital, including adding a new wing, updating the present facility and purchasing new equipment, for expenditures necessary or desirable therefore, and to provide for the levy of a special tax to pay the principal and interest on said bonds.

( ) YES
( ) NO

CHARTER AMENDMENT: CHAPTER XIX

Section 1. For the purpose of procuring funds in amounts sufficient to provide and pay for the construction and installation of improvements and additions to the Community Hospital of the City of Newberg, Oregon, and for all other purposes necessary or desirable in order to carry out the purposes above set forth, the Council of the City of Newberg is hereby authorized and empowered to issue and dispose of General Obligation Bonds of said City in the sum of $3,400,000.00, in denominations of Five Thousand and no/100ths ($5,000.00) Dollars each, bearing interest at the rate of not to exceed ten percent (10%) per annum.

PAYMENT

Both the principal of and the interest on the bonds will be paid at the office of the City Recorder in Newberg, Oregon.

REDEMPTION

Bonds maturing after April 1, 1980 will be redeemable at the option of the city on April 1, 1990 and any interest payment date thereafter in inverse numerical order at par plus interest accrued to the date fixed for redemption.

AWARD OF BONDS

Bonds will not be sold for less than par value and the full amount of accrued interest. Bonds will be sold to the highest bidder, but the city reserves the right to reject any or all bids. Unless all bids are rejected, the bonds will be awarded to the bidder complying with the terms of this notice of bond sale and submitting the bid which, if none of the bonds are called for redemption prior to final maturity date, provides the lowest net interest cost to the city. Each bidder shall include in its bid a statement of the net interest cost and the net effective interest rate if its bids is accepted, but this statement shall not be deemed to be a part of the bid.

GOOD FAITH DEPOSIT; FORM OF BID

Each bid must be unconditional, and must be for the purchase of all bonds herein described. Each bid must be accompanied by a certified check or cashier's check in favor of the city, of or upon a bank doing business in the State of Oregon, in the sum of $54,000, and should be enclosed in a sealed envelope marked "Proposal for Bonds." No interest will be allowed on the deposit with the bid, and the check of the successful bidder will be retained as part payment for the bonds or to secure the city against any loss resulting from failure of the bidder to comply with the terms of its bids.

LEGAL OPINION

The successful bidder will be furnished, without cost, with the approving opinion of the law firm of Rankin, McMurry, Osburn, VavRosky & Doherty of Portland, Oregon, to the effect that the bonds are valid and legally binding general obligations of the city, that unless paid from other sources, the bonds are payable from ad valorem taxes which may be levied upon all of the taxable property within the city without limitation as to rate or amount, and that the interest on the bonds is exempt from all present federal income taxes and present State of Oregon personal income taxes. The legal opinion will be reproduced on each bond.

DELIVERY OF BONDS; NO LITIGATION

The bonds will be delivered complete without undue delay at the expense of the city in Portland, Oregon, or in the place designated by the successful bidder at the expense of the bidder. Settlement must be in funds immediately available to the city at the time and place of closing.

The successful bidder will be provided with the usual closing documents, including a nonlitigation certificate.

CUSIP NUMBERS

It is anticipated that CUSIP numbers will be printed on the bonds, but neither the failure to print such numbers on any Bond nor any error with respect thereto shall constitute cause for a failure or refusal by the purchaser to accept delivery and pay for the bonds. The expense of CUSIP registration will be paid by the purchaser; the expense of printing will be paid by the city.

NOTICE OF SALE

$75,000,000
STATE OF CONNECTICUT

Bond Sale

Sealed proposals will be received by the Treasurer of the State of Connecticut at his office at 20 Trinity Street, Hartford, Connecticut, until 11:00 o'clock A.M. (Hartford time) on Wednesday,

MARCH 19, 1980

at which time and place all such proposals will be publicly opened and announced, for the purchase of all (but not less than all) of the following issues of bonds (the "Bonds") of the State of Connecticut:

$ 7,500,000 General State Purposes Bonds (1975 Act) Series A
$24,000,000 School Construction Bonds, Series Q
$25,000,000 Mass Transportation Bonds, Series C
$ 7,500,000 Transportation Capital Improvement Bonds
$ 3,000,000 Home Heating Loan Bonds
$ 3,000,000 Energy Action Grant Bonds
$ 5,000,000 Coliseum Reconstruction Bonds

The Bonds will be general obligations of the State of Connecticut and the full faith and credit of the State will be pledged for the payment of the principal of and interest on the Bonds as the same shall become due.

The Bonds will be dated March 15, 1980 and will bear interest at the rate or rates per annum specified by the successful bidder therefor in accordance herewith, payable on September 15, 1980 and semiannually thereafter on March 15 and September 15 in each year until maturity, will be issued in bearer form with a single coupon attached for each installment of interest thereon, will be of the denomination of $5,000 each, and will be registrable as to principal only or as to both principal and interest. The Bonds will be payable at the office of the undersigned Treasurer in Hartford, Connecticut, or at the principal offices of Hartford National Bank and Trust Company in said City of Hartford or Hartford Trust Company of New York (a Limited Purpose Trust Company) in the Borough of Manhattan, City and State of New York.

Stated in combination, the Bonds will mature (without option of prior redemption) on March 15 in the principal amount of $7,500,000 in each of the years 1981 to 1990, inclusive.

Each proposal must state the amount bid for the Bonds (not less than $75,000,000) and must state in a multiple of 1/20 of 1% the rate or rates of interest per annum which the Bonds are to bear but shall not state (a) more than four different interest rates for the Bonds, or (b) more than one interest rate for any Bonds having like maturity, or (c) any interest rate for any Bonds (i) which exceeds the interest rate stated in such proposal for any other Bonds by more than 1% or (ii) which is less than the interest rate stated in such proposal for any bonds having an earlier maturity (e.g., if 3.00% is stated for any of the Bonds,no rate more than 4.00% shall be stated for any other of the Bonds and no rate less than 3.00% shall be stated for any other of the Bonds having a later maturity). In addition to the amount bid for the Bonds, the purchaser must pay an amount equal to the interest on the bonds accrued to the date of delivery.

All proposals must be enclosed in sealed envelopes and addressed to Hon. Henry E. Parker, State Treasurer, 20 Trinity Street, Hartford, Connecticut and marked on the outside in substance "Proposal for Bonds." As a condition precedent to the consideration of his proposal, each bidder must enclose with it, as a good faith deposit, a certified or cashier's check, drawn upon a solvent bank or trust company, payable to the order of the State in an amount not less than 1% of the principal amount of the Bonds.

As between proposals which comply with this notice, the Bonds will be sold to the bidder (herein called the "successful bidder") whose proposal offers to purchase all the Bonds at the lowest interest cost, such cost under each proposal to be determined by computing the total amount of interest payable on the Bonds, at the rate or rates stated in such proposal, from March 15, 1980 until their respective maturities and deducting therefrom the sum (if any) by which the amount bid for the Bonds in such proposal exceeds the principal amount of the Bonds, and if there be more than one such proposal making said offer at the same lowest interest cost, the Bonds will be sold to the bidder whose proposal is selected by the Treasurer by lot from among all such proposals making said offer at said lowest interest cost.

When the successful bidder has been ascertained, the Treasurer will promptly notify him and will promptly return all deposits to the persons making the same except the deposit made by the successful bidder. The check of the successful bidder will be retained to be applied as part payment for the Bonds or to secure the State from any loss resulting from the failure of such bidder to comply with the terms of his proposal. No interest will be allowed on the amount of any good faith deposit. Bids will be accepted or rejected promptly after opening and not later than 2:00 o'clock P.M. (Hartford time) on Wednesday, March 19, 1980.

The right is reserved to reject all proposals and to reject any proposal not complying with this notice and, so far as permitted by law, to waive any irregularity or informality with respect to any proposal.

The successful bidder may at his option refuse to accept the Bonds if prior to their delivery any income tax law of the United States of America or the State of Connecticut shall provide that the interest on such Bonds is taxable, or shall be taxable at a future date, for Federal or State of Connecticut income tax purposes, and in such case the deposit made by him will be returned and he will be relieved of his contractual obligations arising from the acceptance of his proposal.

It shall be a condition to the obligation of the successful bidder to accept delivery of and to pay for the Bonds that the Bonds shall be delivered in accordance herewith on or before April 16, 1980, or such later date as may be acceptable to him and that contemporaneously with or before accepting the Bonds and paying therefor, he shall be furnished, without cost, with (i) the approving opinion of Messrs. Robinson, Robinson & Cole with respect to said $7,500,000 General State Purposes Bonds (1975 Act) Series A, and said $24,000,000 School Construction Bonds, Series Q, and (ii) Messrs. Hawkins, Delafield & Wood with respect to said $25,000,000 Mass Transportation Bonds, Series C, said $7,500,000 Transportation Capital Improvement Bonds, said $3,000,000 Home Heating Loan Bonds, and said $3,000,000 Energy Action Grant Bonds, and (iii) Messrs. Updike, Kelly & Spellacy with respect to said $5,000,000 Coliseum Reconstruction Bonds to the effect that the Bonds referred to in said opinions respectively are valid and legally binding general obligations of the State of Connecticut for the payment of the principal of and interest on which the full faith and credit of the State are pledged, (b) certificates in form satisfactory to said firms evidencing the proper execution and delivery of the Bonds and receipt of payment therefor, and (c) the certificates of the Attorney General and of the Treasurer described in the Official Statement under the caption "Documents Accompanying Delivery of the Bonds and the Notes."

It is expected that the Bonds in definitive form will be ready for delivery in New York City on or about April 3, 1980 against payment of the balance of the purchase price in Federal Reserve funds payable to the order of "State of Connecticut" and immediately and unconditionally available to it on the date of such delivery. The successful bidder will be given at least seventy-two hours notice of the time and place of delivery.

The State does not expect to offer any other of its bonds for sale within 45 days from March 19, 1980 except with the consent of the successful bidder. For information concerning the Bonds, the State and its financial condition, reference is made to the Official Statement of even date herewith, copies of which can be obtained from the undersigned. The State will furnish the successful bidder with 250 copies of the Official Statement without cost to such bidder.

HENRY E. PARKER
State Treasurer

Dated at Hartford
this 7th day of
March, 1980

NOTICE OF SALE

$125,000,000
STATE OF CONNECTICUT

Bond Anticipation Note Sale

SEALED PROPOSALS will be received by the Treasurer of the State of Connecticut at his office, 20 Trinity Street, Hartford, Connecticut,until 12:00 noon (Hartford Time) on Wednesday

MARCH 19, 1980,

at which time and place all such proposals will be publicly opened and announced, for the purchase of all or a part of the following series of bond anticipation notes (the "Notes") of the State of Connecticut:

$20,000,000	General State Purposes Bond Anticipation Notes (1978 Act)
$20,000,000	General State Purposes Bond Anticipation Notes (1977 Act)
$10,000,000	General State Purposes Bond Anticipation Notes (1973 Act)
$20,000,000	General State Purposes Bond Anticipation Notes (1972 Act)
$20,000,000	General State Purposes Bond Anticipation Notes (1967 Act)
$21,000,000	School Construction Bond Anticipation Notes
$ 8,500,000	Municipal Redevelopment Bond Anticipation Notes
$ 4,300,000	Veterans' Bonus Bond Anticipation Notes
$ 1,200,000	Housing Purchase and Rehabilitation Fund Bond Anticipation Notes

The Notes will be dated April 3, 1980, will mature on April 2, 1981 without option of prior redemption and will be payable as to both principal and interest in Federal Reserve Funds at maturity. The Notes shall be issued in bearer form in denominations of $25,000 or a multiple thereof, shall not be subject to registration and shall bear interest payable at maturity, at such rate or rates per annum as shall be specified by the successful bidder or bidders in accordance herewith. The Notes shall be payable at the ofice of the undersigned Treasurer in Hartford, Connecticut, and at the principal office of the Hartford National Bank and Trust Company in Hartford, Connecticut, and Hartford Trust Company of New York (A Limited Purpose Trust Company) in the Borough of Manhattan, City and State of New York. Each successful bidder shall specify the denominations of the Notes purchased in its proposal or shall specify the same in writing to the Treasurer at the address shown below within twenty-four (24) hours of the time for receiving proposals as set forth above. In the event of failure to so specify within such time, the Treasurer shall determine the denomination of Notes to be delivered in his sole descretion.

All proposals for the purchase of the Notes are requested to be submitted on the form furnished by the Treasurer. Copies of such form of proposal may be obtained from the Treasurer at the address indicated above. NO TELEPHONE OR TELEGRAPH PROPOSALS CAN BE ACCEPTED.

Proposals may be for all or part of the Notes but a separate proposal will be required for each part of the Notes for which a separate rate is bid. Each proposal must state the rate of interest per annum in a multiple of 1/100 of 1% per annum and no proposal for less than par and for less than $1,000,000 principal amount of the Notes will be considered. Proposals for a part of the Notes must be for a principal amount which is a multiple of $25,000. The Notes will be awarded to the bidder or bidders offering to purchase the Notes at the lowest interest rate without reference to premium, but among proposals specifying the same interest rate the Notes will be awarded on the basis of the highest premium per dollar principal amount offered to be purchased. The Treasurer reserves the right to award all or any part of the Notes and to award Notes to any bidder an an amount less than the principal amount of Notes bid for in any proposal in which event any premium bid shall be reduced in proportion to the Notes actually awarded and any necessary adjustment in

Continued on next page

Continued from preceding page

the denominations specified will be made by the treasurer upon consultation with such bidder. The further right is reserved to reject all proposals and to reject any proposal not complying with this notice and, so far as permitted by law, to waive any irregularity or informality with respect to any proposal.

It shall be a condition to the obligation of each successful bidder to accept delivery of and to pay for the Notes awarded to it that such Notes shall be delivered in accordance herewith on April 3, 1980, or such later date as may be acceptable to it and that contemporaneously with or before accepting such Notes and paying therefor, it shall be furnished without cost with (a) the approving opinion of (i) Messrs. Robinson, Robinson & Cole, Hartford, Connecticut, with respect to said $20,000,000 General State Purposes Bond Anticipation Notes (1978 Act), said $20,000,000 General State Purposes Bond Anticipation Notes (1977 Act), said $10,000,000 General State Purposes Bond Anticipation Notes (1973 Act), said $20,000,000 General State Purposes Bond Anticipation Notes (1972 Act), said $21,000,000 School Construction Bond Anticipation Notes, said $8,500,000 Municipal Redevelopment Bond Anticipation Notes, and said $4,300,000 Veterans' Bonus Bond Anticipation Notes, (ii) Messrs. Day, Berry & Howard, Hartford, Connecticut, with respect to said $20,000,000 General State Purposes Bond Anticipation Notes (1967 Act), and (iii) Messrs. Updike, Kelly & Spellacy with respet to said $1,2000,000 Housing Purchase and Rehabilitation Fund Bond Anticipation Notes, to the effect that such Notes are valid and legally binding general obligations of the State of Connecticut for the payment of the principal of and interest on which the full faith and credit of the State are pledged and that, for the payment of such principal and interest the General Assembly of the State has power to levy ad valorem taxes upon all the taxable property within the State without limitation as to rate or amount, and (b) certificates in form satisfactory to said firm evidencing the proper execution and delivery of such Notes and receipt of payment therefor, and (c) the certificates of the Attorney General and of the Treasurer described in the Official Statement under the caption "Documents Accompanying Delivery of the Bonds and the Notes."

It is expected that the Notes in definitive form will be ready for delivery in New York City on or about April 3, 1980 against payment of the purchase price in Federal Reserve Funds payable to the order of the "State of Connecticut" and immediately and unconditionally available to it on the date of such delivery. Each successful bidder will be given at least seventy-two hours notice of the time and place of delivery.

For information concerning the Notes, the State and its financial condition, reference is made to the Official Statement of the State, dated March 7, 1980, copies of which can be obtained from the undersigned. The State will furnish the successful bidder or bidders with a reasonable number of copies of the Official Statement without cost.

HENRY E. PARKER
State Treasurer

Dated at Hartford
March 7, 1980

NOTICE OF BOND SALE

$3,400,000
CITY OF NEWBERG
OREGON
General Obligation Hospital Bonds Series 1980

TIME AND PLACE OF SALE

Sealed bids will be received for the purchase of this general obligation hospital bond issue by the City Administrator at City Hall, 414 E. First Street, Newberg, Oregon until 11:00 a.m. on

APRIL 1, 1980

Immediately thereafter the bids will be publicly opened and announced, and within four hours thereafter the city will act upon the bids.

DESCRIPTON OF BONDS

The bonds will be negotiable general obligation coupon bonds of the city in the principal amount of $3,400,000, dated April 1, 1980, in denominations of $5,000 each, numbered 1 to 680, and will mature serially in numerical order on the first day of April as follows:

Maturity Date	Amount	Maturity Date	Amount
1983	$100,000	1992	$185,000
1984	110,000	1993	195,000
1985	115,000	1994	210,000
1986	125,000	1995	225,000
1987	130,000	1996	240,000
1988	140,000	1997	260,000
1989	150,000	1998	275,000
1990	160,000	1999	295,000
1991	170,000	2000	315,000
			$3,400,000

INTEREST RATE

The bonds will bear interest payable semiannually on April 1 and October 1 at such rate or rates, in multiples of one-eighth (⅛) or one-tenth (1/10) of one per cent (1%), not exceeding a net effective rate of 10% per annum, as specified by the successful bidder. The bonds shall have but one coupon for the interest due on any interest payment date, no bond shall bear more than one rate of interest, and supplemental coupons will not be permitted. The highest coupon rate quoted shall not exceed the lowest coupon interest rate quoted by more than two per cent (2%).

PAYMENT

Both the principal of and the interest on the bonds will be paid at the office of the City Recorder in Newberg, Oregon.

REDEMPTION

Bonds maturing after April 1, 1990 will be redeemable at the option of the city on April 1, 1990 and any interest payment date thereafter in inverse numerical order at par plus interest accrued to the date fixed for redemption.

AWARD OF BONDS

Bonds will not be sold for less than ninety-eight per cent (98%) of par value and the full amount of accrued interest. Bonds will be sold to the highest bidder, but the city reserves the right to reject any or all bids. Unless all bids are rejected, the bonds will be awarded to the bidder complying with the terms of this notice of bond sale and submitting the bid which, if none of the bonds are called for redemption prior to final maturity date, provides the lowest net interest cost to the city. Each bidder shall include in its bid a statement of the net interest cost and the net effective interest rate if its bids is accepted, but this statement shall not be deemed to be a part of the bid.

GOOD FAITH DEPOSIT: FORM OF BID

Each bid must be unconditional, and must be for the purchase price of all bonds herein described. Each bid must be accompanied by a certified check or cashier's check in favor of the city, of or upon a bank doing business in the State of Oregon, in the sum of $68,000, and should be enclosed in a sealed envelope marked "Proposal for Bonds". No interest will be allowed on the deposit with the bid, and the check of the successful bidder will be retained as part payment for the bonds or to secure the city against any loss resulting from the failure of the bidder to comply with the terms of its bid.

LEGAL OPINION

The successful bidder will be furnished, without cost, with the approving opinion of the law firm of Rankin, McMurry, Osburn, VavRosky & Doherty of Portland, Oregon, to the effect that the bonds are valid and legally binding general obligations of the city, that unless paid from other sources, the bonds are payable from ad valorem taxes which may be levied upon all of the taxable property within the city without limitation as to rate or amount, and that the interest on the bonds is exempt from all present federal income taxes and present State of Oregon personal income taxes. The legal opinion will be reproduced on each bond.

DELIVERY OF BONDS; NO LITIGATION

The bonds will be delivered complete without undue delay at the expense of the city in Portland, Oregon, or in the place designated by the successful bidder at the expense of the bidder. Settlement must be in funds immediately available to the city at the time and place of closing.

The successful bidder will be provided with the usual closing documents, including a nonlitigation certificate.

CUSIP NUMBERS

It is anticipated that CUSIP numbers will be printed on the bonds, but neither the failure to print such numbers on any Bond nor any error with respect thereto shall constitute cause for a failure or refusal by the purchaser to accept delivery and pay for the bonds. The expense of CUSIP registration will be paid by the purchaser; the expense of printing will be paid by the city.

ADDITIONAL INFORMATION

Copies of the preliminary official statement for this bond issue may be obtained upon request from Marshall and Meyer, Inc., 1705 Norton Building, Seattle, Washington 98104, telephone (206) 622-2405.

**BY ORDER OF THE CITY OF
NEWBERG, OREGON**

Notice of Redemption

PAULDING COUNTY WATER AUTHORITY (GEORGIA)

**Revenue Bonds
Series 1970
Dated May 1, 1970**

Notice is hereby given to the holders of Paulding County Water Authority (Georgia) Revenue Bonds, Series 1970, dated May 1, 1970, maturing on May 1, 2000, that such Bonds have been called for redemption on **May 1, 1980;** provided, however, $75,000 in principal amount of said Series 1970 Bonds will be mandatorily redeemed by lot on or prior to May 1, 1980, in the years and amount set forth, and in the manner specified in, the resolution of the Paulding County Water Authority authorizing the issuance of said Series 1970 Bonds.

Funds for the payment of said Series 1970 Bonds (not mandatorily redeemed by lot) in the aggregate principal amount of $1,155,000 and for interest due May 1, 1980, and for the required call premium will be available at the principal office of The Citizens and Southern National Bank, Atlanta, Georgia, Paying Agent, on the date set for redemption and said Series 1970 Bonds and all matured coupons thereto appertaining should be presented to said Paying Agent for redemption.

This notice is given under and pursuant to a resolution of the Paulding County Water Authority, adopted on the 28th day of July, 1976.

(SEAL)

M. C. Gilbert, City Administrator
City of Newberg
Newberg, Oregon 97132

Re: Limited Partnership to Manage and Run Bowman's Restaurant

Dear Mr. Gilbert:

A limited partnership is being formed to run Bowman's Restaurant. Presently we are making the necessary application to the OLCC in order to have the license transferred to the partnership. In the meantime, we will need the City's concurrence for the transfer of the license to the partnership.

The general partners who will have the sole responsibility of running the partnership are:

Charles Floyd Hindman
203 S. River St.
Newberg, Oregon

William S. Pilkenton
1275 S.W. Myrtle
Dundee, Oregon

The general partners will be glad to meet with the Police Committee or any designated committee of the City to discuss change in the restaurant. If we can furnish any additional information, please do not hesitate to contact us. We will be glad to attend any meeting necessary.

Yours very truly,

Charles Floyd Hindman

William S. Pilkenton

NEWBERG PUBLIC SCHOOLS

Gerald E. Post, Ed.D.
Superintendent

Newberg, Oregon
97132

April 30, 1980

RECEIVED
MAY 1 1980
CITY OF NEWBERG, ORE.
OFFICE OF RECORDER

Myrland Gilbert, Administrator
City of Newberg
414 East First St.
Newberg, Oregon 97132

Dear Myrland:

I understand that the council will be discussing the issue of a development moratorium on May 5, and that the issue has arisen because of comments I made to the Planning Commission. I'm sorry I will be unable to attend but let me use this letter to make my position as clear as possible. To review the pertinent facts:

1. The District has a need to acquire an elementary school site. New developments appear to be accelerating the date by which we must have the school operational.

2. The District simply did not have the money to buy a site within the UGB. The only option open to us was to find the most suitable site outside the UGB and work for a revision.

3. The School District will need city water and sewer services. They are easily available at the site on which we have an option.

4. A County Planner has stated that the county will not issue a building permit on the proposed site. She cites "urbanization of rural areas" as her reason. This means that a contract with the city for sewer and water will not serve our needs because the county could block construction.

5. The City Planner appears to support theDistrict proposal, and I have had some informal comments that lead me to believe the Planning Commission would find it acceptable. The School Board believes it is the only viable option open to us.

My problem is that the City has no procedures by which I can have the District's request for a revision of the UGB considered. A request has been prepared at considerable time and expense, a fee paid, two hearings have been tentatively scheduled, but nothing has been resolved.

I am really not as interested in a moratorium as I am interested in the establishment of an orderly process so that needed services can be provided for growth. I do believe, however, that the City Council has a very clear choice before them--it must be one or the other. A "no growth" posture is personally repugnant to me, and I hope I will not be forced into that position by the failure of the council to take any positive action.

In summary, the District has proposed a viable program to meet the educational needs of a growing population. My suggestion of a moratorium was not as much a request for inaction as it was an urging for action for the orderly growth of Newberg.

Very truly yours,

Gerald E. Post

Mayor Elvern Hall
City of Newburg
414 East First Street
Newburg, OR 97132

Dear Mayor Hall:

One of our Association's members has informed us that the City Council will be considering this evening a request for a moratorium on new construction or development. Since we have just learned this afternoon of the possibility we do not have the full story behind the proposal. The information we have is that the school district is requesting the moratorium because of difficulties it is having in building a new school.

Obviously, an action of this sort would have a dramatic impact on the home building industry. We are sympathetic to the district's fear of reaching its capacity. However, we do not believe that a moratorium is generally the appropriate solution to the problem of inadequate or delayed facilities. Rather, the city's energy should be directed to quickly resolving that problem rather than creating new ones through a moratorium. The city should not rush into a moratorium but should take the time to examine all alternatives. The Home Builders Association would also like the opportunity to participate in that investigation.

We also want to point out certain limitations on the power of cities to adopt a moratorium. The Land Conservation and Development Commission laid out the tests state law requires a city to meet in its ruling in Robert Randall Co. v. City of Beaverton, LCDC No. 78-015. Under the ruling in that case, state law requires the city to make factual findings concerning several factors.

1. The city must consider its positive duty under LCDC Goal 10 to accomodate its share of the regional housing need and how a moratorium can be reconciled with that need.

2. The city must determine the precise nature of the service inadequacy, including its severity, the number

of additional dwellings that could be built with existing services, and whether such services are essential to residential development. It must also find that a moratorium would have a positive effect in providing new facilities and that there exists no less drastic alternative to alleviate the problem.

3. The city must also set a time limit, based on findings of need, for the duration of the moratorium and must prepare a plan for alleviating the service inadequacy on which the moratorium is based.

Before reaching the process to be followed in adopting a moratorium, however, it should be noted that the city's authority to base a moratorium solely on inadequate school facilities is subject to serious doubt. Attorney General's opinion No. 7768, issued in June 11, 1979, emphasizes that "the issue of adequacy of school facilities involves a good faith evaluation by the county of the many possible alternatives for increasing capacity available to the district" without new construction. It mentions such possibilities as busing, double shifting and extending classroom periods. The emphasis of the opinion is that local governments, when considering new development, must balance the many competing needs of its citizens but that LCDC Goal 10 has created a special duty to provide adequate housing. The opinion states that those duties "would not be satisfied by using the existence of crowded school facilities as the sole basis for denying a subdivision application, particularly if this were a subterfuge for a no-growth policy . . . The (city) would also have to consider such matters as public need within the (city) for housing." That reasoning applies even more strongly to proposals to stop all development.

Our members are sympathetic to problems of service provision. However, we believe that a moratorium is rarely the solution to that problem. We ask that the city council set this proposal over to another hearing when all affected parties - the school district, the city, builders, and citizens - have had a chance to study all the consquences of a moratorium and all the alternatives available to the city.

Sincerely,

Kevin L. Hanway
Legal Counsel
Governmental Affairs Division

RITA FARRINGTON
Grievance - June 1980

26F

6/80

CITY OF

NEWBERG

414 E. First Street Newberg, OR 97132

July 17, 1980

Mrs. Rita C. Farrington
1822 Ann Court
Newberg, Oregon 97132

Dear Mrs. Farrington:

The Personnel Committee has rendered it's decision on your grievance regarding your request for a shift change to eliminate graveyard shifts from your work week and your additional request for back pay for 12M to 8 A.M. shifts you did not work from the time of your request for a change, as follows:

1. A change in your shift to permit a 40 hour work week excluding from your work load the 12M to 8A.M. shift is approved.

2. Compensation for shifts not worked between the time of your request and the time of the Personnel Committee's approval of your shift change is denied.

Sincerely,

M. C. Gilbert
City Administrator

MCG/bjm

Minutes
A Meeting of The
Personnel Committee
July 14, 1980

Present - Councilman Tom Tucker, Chairman
Councilman Roger Gano
Councilman Maurice Chandler

Richard Faus, City Attorney
M. C. Gilbert, City Administrator
Elvern Hall, Mayor
Herbert Hawkins, Chief of Police
Arvilla Page, City Recorder

The meeting was called to order by Chairman Tucker.

Mayor Hall stated he had talked with Rita and Bob Farrington and they did not wish to return but would accept a written determination.

The Chairman stated he would entertain two motions:

1. A motion on the determination of the grievance by Rita Farrington.

2. A motion to set compensation if any.

Also, findings of facts are to be submitted by each Committee member.

Mr. Gano, Mr. Chandler and Mr. Tucker then stated their findings of fact respectively and written copies of each a made a part of these minutes. Mr. Gano's and Mr. Tucker's findings are in favor of upholding the grievance. Mr. Chandler's are in the form of a minority report denying the grievance.

Motion: Gano to find in favor of the employee in regard to the grievance presented to us with findings. Mr. Tucker seconded the motion with findings. Mr. Chandler stated he disagreed with findings.

Motion: Gano to issue back pay for shifts not worked as the denial of the shift change at the doctor's request equals a temporary suspension.

The Administrator stated it was not a suspension as she called in sick each graveyard shift not worked. It was not paid sick leave as there was none due. She would have been paid if she had sick leave due.

Motion: Chandler to deny compensation as it was her own decision not to work.

Motion: Tucker to compromise and grant 4 days pay in lieu of 8 days.

The Administrator stated that before he can expend money at the direction of the Committee, he must have the City Attorney's opinion.

Motion: Gano to add to his previous motion "after direction of legal counsel".

The Chairman stated he would entertain a motion to have the City Attorney investigate the legalities on compensation.

Mr. Chandler restated his motion to deny compensation and asked for Mr. Tucker's vote as we have already given her a favorable decision. She was not 100% right.

Mr. Chandler stated he felt very firm because of the evidence, no ordinance guidance, compensation not due. Mr. Tucker stated he could not change from 4 days.

Mr. Gano stated he would withdraw his motion and side with Mr. Chandler because they have taken care of one major grievance problem. If Mrs. Farrington feels strongly , she can bring it up. Seconded by Chandler.

Motion: Chandler-Gano to adjourn. Carried.

Personnel Committee
July 14, 1980

Grievance - Rita Farrington

FINDINGS by Tom Tucker

The decision on this matter was made for the following reasons:

1. For the overall good of the Newberg Police Department and other City employees. It is better if possible to change shift than hire new employees. This in my opinion is to the City's best interest, both financially and good working relationship with its employees.

2. We have received enough testimony that the police officers have been given light duty and shift changes. If this hadn't been done, it would have changed the entire outcome of this grievance.

3. Seniority has not been clearly defined to me, only to the point of bidding on jobs or shifts.

4. It has been pointed out to some degree that the graveyard shift has more of a stress factor than the other two.

5. Testimony by the administration that employees working for the NPD know in advance to employment that their shifts can be altered and have been.

As a Summary Statement, I think that under the circumstances the trading of shifts and trying to accommodate Rita Farrington should have been done within the NPD. This to my way of thinking would have been the ideal way of handling it. My findings of facts leave me no choice but to grant Rita Farrington shift change for the period of time prior to childbirth. After that, her schedule will be taken care of on a regular basis.

Personnel Committee
July 14, 1980

Grievance - Rita Farrington

FINDINGS by Roger Gano

I find in favor of Mrs. Farrington, re: the grievance filed before the Personnel Committee relating to a shift change (and not covering the question of back pay). My findings of fact include the following: Sufficient evidence has been presented for me to realize that the Newberg Police Department does have an "unofficial" policy of granting "light duty" situations for its members; the City has made certain shift changes and granted "light duty" situations in other City departments (what's good for one City employee should apply equally to all City employees); the Newberg Police Department has expended considerable time, effort, and money over Mrs. Farrington's tenure with NPD to ensure that she become and remain a valued, knowledgeable employee, finding against Mrs. Farrington would place an undue hardship on the dispatching staff at NPD and would place a financial burden upon the City; therefore I feel it in the best interest of NPD and the City to make a temporary shift change (removing Mrs. Farrington from only her two graveyard shifts) until such time as Mrs. Farrington has completed her pregnancy. At that time it is expected that she be able to return to her normal shifting responsibilities.

Personnel Committee
July 14, 1980

Grievance - Rita Farrington

FINDINGS by Maurice Chandler
Minority Report

Becuase of the uniqueness of this particular case, the responsibility must lay with both the City and the individual. I find that there is a difference in a shift change and light duty, yet in the minds of many the treatment given to Patrolman Niehus is comparable to that of a shift change. The City has a responsibility in having a document of Personnel Rules and Regulations but in fact does not. The City also has a repsonsibility to its peoples working conditions and could have handled this without a hearing. The individual has a responsibility also to their own health and welfare and in this case also to the future welfare of the baby.

Because of this I request we find not in favor of either party, but I instead look to the future with a shift change for Rita.

I recommend that the City adopt a Personnel Rules and Regulations manual as soon as possible.

Findings of fact besides what is written above:

1. Management has certain rights in running a department and employees cannot set policy. Each department in the City has different needs.

2. No precidence in any preferential treatment of shift changes.

3. Because of limited personnel and not being able to make a change without affecting the rights of others.

4. Rita Farrington was accommodated at her request by changing from graveyard to relief shift and has not been discriminated against.

5. Rita Farrington has in fact placed her own health as well as her baby's health in jeoporady and must assume her responsibility for now and in the future.

A Recessed Executive Meeting
Of The Personnel Committee
7:00 a.m., July 14, 1980

Present - Councilman Tom Tucker, Chairman
Councilman Roger Gano
Councilman Maurice Chandler

Rita Farrington, Petitioner
Bob Farrington, husband of petitioner
Richard Faus, City Attorney
M. C. Gilbert, City Administrator
Elvern Hall, Mayor
Herbert Hawkins, Chief of Police
Arvilla Page, City Recorder

The meeting was called to order by Chairman Tucker.

Bob Farrington - Friday afternoon Rita received an abusive phone call, also, a witness that had agreed to appear called Saturday and stated he would not be able to as he did not think he had anything to offer. Captain Hailey talked with another dispatcher "She knew what was going on around here and that she was doing a good job and that he would hate to see anything happen to her job.". The Committee should be aware there may be a potential for intimidation or harrassment for the people involved in the meeting. I also found out that Capt. Hailey was on light duty due to surgery on his gun hand. I also understand the Department is about to do a complete shift reorganization which will do away with the erratic shift.

Hawkins - We are working on new schedules, but they will be for the best interest of the Department, not people.

Mr. Chandler to Bob Farrington - Did the caller give a name? Bob Farrington- No. It was a male.

Rita Farrington - We do not know if Capt. Hailey was referring to this or to another issue.

Mr. Gano - Where are Sgt. Parrett and Officer Niehus?

Hawkins - They are available.

Gilbert - If Parrett and Niehus testify, we would like Capt. Hailey here.

Mr. Gano - According to the procedure letter, Sgt. Parrett is the immediate supervisor.

Mr. Gano stated he contacted Dr. Abbott by phone. He verified the notes. The reason for the two notes was because of the stress and anxiety in the Police Dept. He stated he had counseled Mrs. Farrington to find another job, which she declined. He then advised no graveyard work.because of the destruction of the biorhythm in the body during that shift. He indicated the straight graveyard shift would also upset the biorhythm. Dr. Abbott

also stated he had placed an unnamed police officer on light duty and had his shift changed off graveyard.

Mr. Chandler to Rita Farrington - The stress is not related to pregnancy only. Have you considered not working in the Police Dept.? Rita - Yes.

Mr. Gano - She is able to work day and swing shifts.

Mr. Chandler - The doctor advised her not to work in the Police Dept. The responsibility is on Rita. There is no firm evidence of light duty being assigned.

Sgt. Lois Parrett now present.

Mr. Gano to Parrett - Are you familiar with the events and procedures? Parrett - Yes. Gano - Why were you not present at previous meetings? Parrett - I did not realize I should be.

Gilbert - Sgt. Parrett was not advised she should attend.

Mr. Gano to Parrett - Do you have any personality conflict or other problems with Mrs. Farrington? Parrett - No. Gano - Is she competent? Parrett - Yes. Gano - If Mrs. Farrington has worked in the department for three years, then she must be a good employee. Why was no effort made to retain a good employee? Parrett - Has nothing to do with it. Only question was whether she had the right to displace another person just because she is pregnant.

Mr. Chandler to Parrett - What is policy regarding dispatcher shift changes? Is it loose? Parrett - Short time off could be given. Any shift switches must be reported of course. Any changes must be consistant on the basis of emergency priority. Chandler - How long have you been Supervisor? Parrett - Since 1969. Chandler - Have there been changes in dispatcher shifts since then? Parrett - Yes. With the overall good of the department in mind. Chandler - Do you believe you have followed through on Rita? Parrett - I tried. Chandler - Did you advise her she would have to talk with Chief Hawkins? Parrett - I remember telling Bob Farrington he would have to ask Chief Hawkins.

Rita Farrington - Lois said I would have to talk to the Chief.

Mr. Chandler to Parrett - What is the policy on shift changes? Parrett - Any shift change must be approved by Chief Hawkins.

Rita Farrington - Only one day shift changes can be approved by Sgt. Parrett.

Mr. Chandler to Parrett - Did you recommend the request? Parrett - I gave it to Capt. Hailey as the Chief was absent. I did not recommend at that point.

Mr. Tucker to Rita Farrington - You mentioned you accomodated someone with a shift change so they could attend school? Rita Farrington - Yes. Tucker - This had to be approved? Rita Farrington - Yes. By Lois and then Chief Hawkins.

Mr. Chandler to Parrett - Do you remember any special duty? Parrett - Not among the dispatchers. Chandler - Among police officers? Parrett - Not under my supervision, but none remembered. How can we honor the request. We would have to change the shif of another dispatcher.

Mr. Chandler to Rita Farrington - Can you cite any case when Sgt. Parrett gave preferential treatment. Farrington - The Wilhelm case.

Parrett - Lynette Wilhelm was off for a period of time without pay. She returned to work on the same shift.

Rita Farrington - Her shift was changed. I do not know if it was then or later.

Mr. Chandler to Rita Farrington - Is there any reason you know of that you might be treated different than others? Farrington - I can think of only one. About 6 or 8 months ago, I and another member of the Police Department went to Councilmembers Gano and Nybakke to discuss problems within the department. Neither Chief Hawkins or Administrator Gilbert were advised. We received letters of reprimand because we had not followed proper procedure.

Mr. Chandler - The Council must set a policy of non interference in management. The Council members were out of line.

Mr. Tucker to Rita Farrington - Were you ever advised how to proceed with a grievance. Farrington - Yes and no. I have always been aware of the chain of command.

Bob Farrington to Parrett - How many shift changes do you handle? Parrett - The school switch was decided between the girls. Bob Farrington - You have to consult with the Chief? Parrett - Yes. Bob Farrington - Does the Chief consult with the Administrator? Parrett - I don't know. Bob Farrington - When was the last employee evaluation done? Parrett - I have not done before. Just asked for input recently.

Bob Farrington to Rita Farrington - How many evaluations have been done? Rita Farrington - None.

Mr. Gano to Parrett - Did you look into the request? Parrett - Yes. There was no time to train a new person. Each shift depends on another shift. Gano - You would be looking at a total shift change? Parrett - It should be to work efficiently.

Bob Farrington - I disagree. I believe two days could be changed without a complete shift change.

Mr. Gano to Parrett - What about a two day shift change with Morgan? Parrett - The schedule of Morgan would cause a 16 hour shift.

Mr. Tucker to Parrett - If Rita quit what would be the cost? Parrett - There would be overtime until someone is trained.

Mr. Gano to Parrett - When will one of those now training be ready? Parrett - We hope before the endo of Augst. Gano - You would have to make accommodations fo cover Rita's job if she leaves. Parrett - Yes, probably overtime. Gano - Did you ever consider taking it on yourself to save a good employee.

Gilbert - It is not Sgt. Parrett's responsibility. Any change will inconvenience another employee or cost the City extra money.

Sgt. Parrett excused. Patrolman Ron Niehus now present.

Mr. Gano to Niehus - How long have you been with the Department? Niehus - 8 years. Gano - Have you ever received any preferential treatment or light duty? Niehus - Yes. From July 19, 1972 to September 24, 1972 on sick leave without pay because os surgery. West back to work September 25, 1972 on duties I considered light. Not on the road but walking meters, evidence pick up, desk until October 5, 1972. September 5 to October 1, 1976 off for injury. October 2,3 & 4 I worked straight desk duty on Dr. Abbott's orders that I could return to work but it had to be light duty. Gano - Do you know of similar circumstances with other officers. Niehus - Only by appearance.

Mr. Chandler to Niehus - Would you say that the light duty given you was for you as a person or for the good of the Department? Niehus - The surgery had not healed and doing road work I could have damaged some of that surgery.

Bob Farrington to Niehus - What shift were you working at the time the doctor ordered light duty? Niehus - Either swing or day. Farrington - Do you recall Capt. Savage's light duty? Niehus - He worked at a desk and could not have performed on the road. I would not have wanted him as back up officer. Farrington - Do you recall Wilhelmsen? Niehus - Unsure. Farrington - Hailey? Niehus - He worked in the office.

Mr. Chandler to Niehus - Can patrol shift personnel easier than dispatch? Was your light duty an imposition on others. Niehus - Someone had to cover my shift.

Hawkins - I would have to check the records. I do not doubt Niehus' word. Capt. Savage did not have to respond to alarms of back up. Hailey had minor surgery on his gun hand. There were no shift changes and he wore civilian clothes. He was not physically incapacitated.

Mr. Chandler to Hawkins - Do you consider these instances preferential treatment? Hawkins - These were for short periods of time and no request was mor for a 4 or 5 month period and involving others. Chandler - The Niehus situation had different variables.

Rita Farrington to Niehus - Was there any change made involving any one else in the Department as far as covering your shift? Niehus - Somebody had to cover my shift.

Hawkins - We possibly worked short handed. The Capt. or Chief possibly worked.

Mr. Tucker stated that if light duty was allowed for one then should be allowed for all.

Mr. Gano to Niehus - How many days were you on light duty? Niehus - 9 days.

Mr. Gano to Rita Farrington - When is the baby due? Farrington - October 10. Gano - Than would be 24 more days of graveyard shift.

Mr. Chandler to Niehus - You were a new employee? Niehus - Yes. I had worked 4 or 5 weeks by myself. Probably another officer was on duty. Chandler - Do you think there has been discrimination against you? Niehus - No. Chandler - Against Rita? Niehus - Maybe. There are enough dispatchers to cover without the split shift. Chandler - Do you feel the discrimination is against Rita as a person? Niehus - No. Chandler - Rita has the opportunity to go to Graveyard. What are your feelings regarding a solution? Is it the responsibility of Rita or management? Niehus - Management should accomodate if possible.

Bob Farrington to Niehus - What do you recall about Wilhelm? Niehus - She was working graveyard, went to the hospital, was on vacation then worked day shift.

Bob Farrington read sections from the "Newberg Police Policy and Procedure Manual" regarding duties of the Captain and dispatchers.

Bob Farrington - The Captain's duties are such that any incapacity would have to be on light duty. Officer Niehus thought he and others were on light duty. The manual refers to Current Personnel Rules and Regulations though there are none.

Mayor Hall - Captain Savage was probably here at his desire not the departments.

Hawkins - The decision made now is going to be extremely important to the City. We have tried to function in the Police Department in what we consider to be the best interests of the City and the people. This involves minor modifications of shifts for short periods of time. People have always been able to do a job needed when we are able to place them temporarily. A lot of the testimony heard has been hearsay. We do not have a Personnel Rules and Regulations. Management needs the flexibility of changing shifts for the good of all. As far as changing Rita's shift, it could be done, but it will involve others. it had no bearing on the welfare of the Department, the other people that would be involved did object to the change and the change would be for a longer period of time than we have ever considered any minor modification of shifts.

Bob Farrington - As to the hearsay, we have tried to verify. The reason for the grievance is to quote Mr. Gilbert's letter of June 17, "The policy of the Newberg Police Department with regard to temporary medical conditions has been that if the employee is unable to carry out all assigned duties then the employee must take sick time or leave of absence and no light duty shift changes have been granted to accomodate temporary medcal conditions which make an employee unable to carry out their assigned duties." I believe we have shown where shift changes have been made and light duty assigned. The change requested would benefit the Department as well as Rita. We do feel discrimination as the only option is to take leave of absence or work against the doctor's orders.

The Committee excused all present while they make their decision.

A Recessed Executive Meeting
Of The Personnel Committee
7:00 a.m., July 11, 1980

Present - Councilman Tom Tucker, Chairman
Councilman Roger Gano
Councilman Maurice Chandler

Rita Farrington, Petitioner
Bob Farrington, husband of petitioner
Richard Faus, City Attorney
M. C. Gilbert, City Administrator
Herbert Hawkins, Chief of Police
Arvilla Page, City Recorder

The meeting was called to order by Chairman Tucker.

Mr. Tucker stated he had tried to investigate various personnel rules by other companies and the findings were very conflicting. He could find no past policy by the City on a similar case in the police department. The Lynette Wilhelm change was normal procedure.

Rita Farrington - Two part-time positions, myself and Amsinger, plus Wilhelm were merged to two full-time positions. Self and Wilhelm. Amsinger was removed.

Mr. Gano stated that in the past Capt. Savage was on light duty because of a shoulder injury and Ron Niehus because of a gunshot wound. Also, Gary Nelson with an ankle sprain.

Hawkins - Savage was performing full duty as Captain. I do not recall assigning light duty on the others. Possible for a short period of time. No more than several days.

Mr. Tucker - Action taken by this committee will set future policy for City. An employer should accomodate if possible.

Bob Farrington - We were unable to obtain evidence of other light duty, but feel there probably were. We agree there is a staffing shortage.

Hawkins - I will try to accomodate when possible, but the good of the department must be primary.

Gano to Hawkins - What if she took leave of absence until October? Hawkins - There would be temporary hardship. I have had no communication with Rita , just with Bob. Gano - What is the seniority? Hawkins - Two dispatchers have seniority over Rita.

Rita Farrington - I did talk to Chief Hawkins after Bob did.

Bob Farrington - Should not be locked into the seniority system.

Mr. Tucker - If there were no medical problem, it would not be necessary for the Committee to interfere.

Hawkins - The department does not assign by seniority. Dispatchers work the shift they have always worked. They would be reassigned if necessary.

Gano to Rita - How many days have you not worked graveyard shift. Rita - Eight.

Mr. Chandler made a motion to deny the request as there has been no preferential treatment, personnel are limited, rights of others could be placed in jeopardy, there is no policy for light duty, she was accomodated to the best of ability and she has right to vacation and sick leave. She should be given the opportunity to take the graveyard shift, management will cooperate in vacation and sick leave, if other shift becomes available she be assigned to it and a personnel policy is to be worked on posthaste.

Mr. Gano stated he would not second that motion becuase there have been instances of light duty and a precedent set for any City employee is for all City employees. Grievance should be upheld.

Chandler to Gano - How will the Chief accomodate? Gano - He indicated the other employee will take shift change if ordered.

Mr. Tucker stated he did not agree with either. Would like employee to be accomodated if possible.

Mr. Chandler - The issue is discrimination.

Mr. Gano - Other departments have offered light duty.

Mr. Chandler - The Police Department is not the same as a secretarial pool. It is not the Committee's function to set policy.

Mr. Gano - What about the Manning case?

Mr. Chandler - Not the same. They paid the penalty, not the City.

Mr. Tucker - Rita Farrington does not feel she was treated fairly.

Mr. Gano - Ron Niehus would testify.

Mr. Chandler - There are more patrolmen than dispatchers. The doctor has not offered a reason for no graveyard.

Bob Farrington - Police work has a high stress factor. The stress problem is the same as broken leg, etc.

Mr. Tucker - The doctor ordered her off graveyard because of the stress factor.

Mr. Gano - There is evidence of previous light duty.

Mr. Chandler - Should not set precedent. The Department should work out problem is at all possible.

Bob Farrington - She is forced to work against doctor's orders or lose wages.

Mr. Chandler - Only way to change her shift is to modify her job or dictate that other dispatchers change shift. She could go to full graveyard shift. Straight graveyard would offer more rest.

Rita Farrington - The doctor was adamant on no graveyard.

Mr. Chandler - If we are unable to agree, bring in the doctor and Officer Niehus.

Mr. Tucker - We should bring in Sgt. Parrett. I feel there is something not being brought out.

Mr. Gano - Supervisor, Sgt. Parrett, should be here.

Mr. Tucker - Also Dr. Abbott if possible.

The Farringtons agreed that if setting policy, need all information possible.

Mr. Chandler - We could get written detail for the record from the doctor.

Motion: Chandler-Gano to recess to 7:00 a.m., Monday, July 14, 1980. Sgt. Parrett to attend and Dr. Abbott present or Mr. Gano to meet with him and obtain facts. Carried.

AN EXECUTIVE SESSION OF THE
PERSONNEL COMMITTEE

July 9, 1980

Present - Tom Tucker, Chairman
Roger Gano
Maurice Chandler
Rita Farrington
Bob Farrington

Elvern Hall, Mayor
Herbert Hawkins, Police Chief
M. C. Gilbert, City Administrator
Richard Faus, City Attorney
Arvilla Page, City Recorder

Chairman Tucker stated hearing is being held under ORS 192.620, 1a & b. Grievance of employee, Rita Farrington: Denial of request for shift change.

The file on the grievance was read into the record as follows:

Letter 6/10/80 - to Herbert Hawkins, Police Chief from Rita Farrington requesting the shift change,

Letter 6/11/80-to M. C. Gilbert, City Administrator from Rita Farrington requesting Grievance Procedure information.and reason for the request.

Chief Hawkins stated the letter does not include the total of the conversation referred to.

Bob Farrington stated that was the statement made.

Letter 6/12/80 - to Rita Farrington from M. C. Gilbert outlining steps of the Grievance Procedure.

Mr. Chandler asked and received further clarification of the procedures from the City Administrator.

Letter 6/13/80 - to M. C. Gilbert from Rita Farrington requesting that Grievance Procedure proceed.

Chief Hawkins in reply to statement in letter that he had refused written comment stated that a change in the shift would have been in writing, no change in shift would require no written comment.

Letter 6/17/80 - to Rita Farrington from M. C. Gilbert recapping the procedures and the status of the grievance. Outlining reasons for denial of the shift change request.

Letter 6/24/80 - to Personnel Committee from Rita Farrington appeal as per Grievance Procedures outlined in previous correspondence. Reasons for request stated. Other cases of light duty and changes granted were cited.

Gano to Hawkins and Gilbert: "Is anything in the letter misquoted or in error?". Answer: "No".

Gano to Gilbert: In the letter of 6/17 you advised that she had not submitted oral or written grievance. Hawkins replied that after the Grievance Procedure

outline letter of 6/12 there was no further contact with the Department.

Gano to Hawkins: Is light duty assigned to injured patrolmen. Hawkins: There is no such policy. Either the patrolman is fully fit or not working.

Chandler to Hawkins: Comment on the Lynette Wilhelm case cited. Hawkins: According to the records, a leave of absence was granted.

Farringtons: She was taken by ambulance from the dispatch office to the hospital, then a shift change was granted from Graveyard.

Hawkins: A new shift had been created and Lynette bid for it.

Tucker to Hawkins: Do you believe the medical problems as stated. Hawkins: We only have Dr. Abbott's note and my conversation with him. He indicated it was related to morning sickness and would probably improve. She did not work Graveyard for 3 weeks prior to hospitalization. Graveyard shift could not have aggravated the condition in that case.

Tucker to Hawkins: If Dr. Abbott said she could not work Graveyard shift, would an attempt been made to change? Hawkins: There has been poor communications.

Bob Farrington: Dr. Abbott felt his advice was being challenged. Communication has been poor. Three shifts in five days is very stressful. Sgt. referred the matter entirely to Chief Hawkins.

> Second note from Dr. Abbott introduced: "Return to work 7/4/80. Day and evening only"

Tucker to Rita Farrington: What is your relationship to Sgt. Parrett? Farrington: Fairly good.

Gano to Hawkins: One letter states "concern for health" and "work something out". Hawkins: Dispatch has never rotated. Specific people are assigned specific jobs on specific shifts.

Chandler to Rita Farrington: Have you worked straight Graveyard? Farrington: Yes. For about 18 months. Taken off on my request. Normal procedures were followed. Chandler: If there were a resignation in Day shift would you have been given a chance at the shift. Farrington: Yes and no. I was denied a recent change as it was a training shift only.

Hawkins: If there is a vacancy on any shift, any other shift can request the position.

Chandler to Hawkins: Comment on Sgt. McCabe. Hawkins: Yes, he has problems. He has applied for disability from Social Security and been denied. Gilbert: Sgt. McCabe is doing full duty on his assignment as Liaison Officer.

Gano to Gilbert: Comment on Aguilar and Mannings. Gilbert: There is no comparison to the Police Dept. Gano: Weren't you setting precedent by granting half-time to any City employee? Gilbert: They used sick leave, accumulated comp time and then were unpaid.

Chandler to Rita Farrington: Why not take a leave of absence? Farrington: Cannot afford and likes job.

Hawkins: The only solution would be to interupt the shift of someone else or swap shift. Only two positions are available on shifts other than Graveyard. Both have seniority over Farrington and both have refused swap.

Farrington: Dispatchers must work any shift assigned and others could be assigned different shift.

Chandler: Why should others sacrifice their life style?

Gilbert: The Police Dept. is emergency service and must be able to work when required.

Hawkins: With Farrington not working Graveyard, personnel have been temporarily assigned to work the shift.

Chandler: Pregnancy is a personal matter. Are the doctors orders her responsibility or the City's?

Tucker to Rita Farrington: Would the same shifts be accepted after the baby is born? Farrington: Yes.

Gano to Hawkins: Do officers work three shifts in five days? Hawkins: We have relief officer shifts. Farrington requested her working shift after working a five night Graveyard shift

Chandler to Hawkins: Did she request that she be taken off Graveyard? Hawkins: Yes. Opted for her present shift in place of straight Graveyard.

Chandler to Rita Farrington: Do you feel discriminated against? Farrington: Yes. A City employee is a City employee. What is done for one should be done for others. Chandler: Can you relate an example of a shift change request denied other thanyour own. Farrington: No.

Chandler to Hawkins: A small department is not very flexible. Can trainees be trained in other shifts? Hawkins: Yes and it is partially done. A new position is being created with about two months more training time required. The position will then be open for bid. We have two full Day shift plus two CETA trainees.

Chandler to Rita Farrington: Would you take full time Graveyard? Farrington: No. Chandler: Wouldn't it be better than the present shift? Farrington: Probably.

City Attorney: While policies are not written, they are consistant within the Department. Bob Farrington: We object to the legal opinion as we are not represented by counsel.

Chandler to Hawkins: Is this a precedent? Hawkins: There have been other pregnancies but this is the first case with a request from the doctor for a shift change.

Mr. Tucker stated he felt uncertain about some things and would like more time for a decison.

Mr. Gano stated the rules as set out require a written decision on the 10th day which is today.

The City Attorney stated they could recess to a time certain with the approval of the Farringtons and the City.

The Farringtons stated 2 or 3 days would be agreeable. The City was agreeable.

Motion: Gano-Chandler to recess to Friday, July 11, 1980 at 7:00 a.m. in the same location based on agreement of all parties. Motion carried.

The Mayor reminded those present there was to be no discussion among themselves or with other parties concerned with the hearing.

City of Newberg
Personnel Committee

24 June 1980

Dear Committee Members:

This letter is to officially advise you of a formal grievance arrising from my city department and is an appeal to you, the normal channels of relief having been exhausted.

I am a dispacher for the police department and have held that position working the 12 to 8 AM midnight shift for nearly three years. The past year or so I have submitted written and verbal requests to my supervisor, Sgt. Parrott, and Chief Hawkins, requesting a change of shift. My husband has also asked Chief Hawkins, on three occasions, if some adjustment in my shift could be made. The reason: I have become burnt out working that shift to the extent that it effects my work and home life.

The answer I receive is that "It is impossible".

I don't expect to work a preferred shift all the time and I am more than willing to work any reasonable shift. I have married since being employed by the city and would like to enjoy my home life at least to the extent the men of our department do. By that I refer to the patrol shift rotations.

Several months ago I was assigned to the relief shift. I now work Monday, Tuesday midnight to eight AM, Thursday day shift and Friday, Saturday swing shift with Sunday, Monday off. I have continued to request a change of shift as the odd work hours haven't helped my well being. I would note: The patrolmen refused to work this same shift and the shift was deleated from their scheduling.

About four months ago I was delighted to learn that I was pregnant. The pregnancy hasn't gone well to the point that I was recently hospitalized. My Doctor, Dr. Abbott, wrote a note requesting that the city make a change in my schedule to delete the midnight shifts. He explained to me that it appeared most of my problems were job stress related and heading the list were the odd assortment of shifts that I worked.

Chief Hawkins was on vacation when I submitted the doctors note along with a request to my supervisor, Sgt. Parrott, that I be taken off the two midnight shifts. I made it clear that my doctor had advised that I was fully capable of assuming the duties of day or swing shifts.

Chief Hawkins returned to work June 9th. and Sgt. Parrott called me at home June 10th to advise me that the chief had met with the city administrator and that their decision was that I continue my present relief shift or request a maternity leave. My husband called Sgt. Parrott that afternoon to discuss the decision and was told that he would have to contact Chief Hawkins the next day.

I wrote Chief Hawkins, June 10th letter, recapping my conversation with my supervisor and requested from him, notification in writing that my request had been denied. My husband hand carried the letter to Chief Hawkins and talked with him. The chief understood my husbands refusal to let me disregard my doctors orders saying "Concern for her health must come first but I must consider what's best for the department. If I bumped one of the other girls from their shift they might file an action against me. I am sure we will be able to work something out." My husband said the chief then read my letter, his jaw tightened and he said " there will be NO written decision, she knows her shift and she will be notified if there are any shift changes."

I wrote the City Administrator, Mr. Gilbert June 11th., and related my doctors instructions of no midnight shifts. I also told him that I had contacted my supervisor and the chief and that both my request for shift change and to have the decision in writing were denied. That my condition was temporary and that I was capable of working days or swing and requested a written decision from him and also to furnish me and outline of the proper grievance procedure.

June 12th I received a letter over Mr. Gilberts signature outlining the steps to innitiate a grievance.

June 13th I sent Mr. Gilbert a second letter officially informing him that I was filing a grievance against the chiefs decision not to change my shift to comply with doctors orders.

June 17th I received a letter over Mr. Gilberts signature indicating todate that: I have not followed steps 1 and 2 of his letter June 12th., Dr. Abbotts note on a prescription pad was not sufficient, followed by several interpretations of police department policy as justification for denying my request for shift change.

In answer to the June 17th letter, I would like to point to my conversation and letter to my supervisor and department head as well as my husbands conversations with Sgt. Parrott and Chief Hawkins, as complying with step 1. Mr Gilbert was notified in writing and inturn confirmed the denial---step 2, which leaves me at step three, an appeal to the personnel committee.

On Dr. Abbotts June 4th prescription blank note, the department has always accepted notes from doctors written and signed on their prescription pads. also, on June 9th Chief Hawkins telephoned Dr. Abbott and irritated him by asking him if I really were ill.

Please correct me if I am wrong, but the grievance procedure set forth in Gilberts June 12th letter havenot been approved by the city council and is not the same as the procedures addopted into ordinance in the 1970s. If Mr. Gilberts procedures are not a city ordinance then I would question their validity.

City employees are just that, city employees, irregardless of which department they work in. I speak to Mr. Gilberts "Temporary medical conditions, have consistantly been that if an employee is unable to carry out all assigned duties, then the employee must take sick time or leave of absence and no light duties or shift changes have been granted to accommodate temporary medical conditions, etc." In fact Lynette Wilhelm, Sgt. Nelsons fiancee, had her shift changed because of a temporary condition, She, coincidentally, worked midnights until it brought her to a supposedly diagnosed near nervous break down. Becky and her father Dennis Manning were granted the privlidge of working staggered half days to care for their mother/wife who suffered only a temporarily medical condition. Linda Aguilar contracted "Mono" and was granted half day light duty. Etc. & Etc..

To the normal and effective functioning of the Police Department, Gilberts June 17th letter pg. 2, I don't think the dispachers jobs are flexible as required. Each girl works one shift and no one, aside temporary swaps, is allowed to change. Chief Hawkins said " I couldn't bump one of the girls off her premanent shift as she might file an action against me."

Mr. Gilberts June 17th, letter pointing out established policy appears to find the established policy the exception not the rule.

In summary I pray that you find for my grievance and grant me a shift change to comply with my doctors orders.

In addition I pray that you grant me pay for the days I did not work midnights and was capable of day or swing shift work but could not because my shift change was denied. I call your attention to Newberg City Ordinance 1-17.29, A reinstated employee shall lose no pay. A denial such as this should constitute a suspention.

CITY OF

NEWBERG

414 E. First Street Newberg, OR 97132

June 17, 1980

Mrs. Rita C. Farrington
1822 Ann Court
Newberg, OR 97132

Dear Mrs. Farrington:

With regard to your letter of June 13, 1980, we would first like to assert that you have not completed steps 1 or 2 as required therein in that you have not submitted your grievance orally to your department head nor have you submitted a detailed written statement of your grievance. As a consequence, allow me to recap the material we have:

> On June 4, 1980, Dr. Abbott noted on a prescription blank to you that you could resume day work or swing shift work but not graveyard shift work due to a condition not described in the note but determined to be the pregnancy. At some point after that you requested that your shift be changed to eliminate any work on graveyard shifts; your present shift being two graveyard shifts, one day shift and two swing shifts a week. On or about June 10, 1980, Sgt. Parrett indicated to you that there would be no shift change from your present shift but that you were free to request a medical leave of absence. On June 11th you wrote a letter to me recapping these events, reiterating your desire for a shift change due to your temporary condition and requesting grievance procedure information.

If we understand your grievance correctly, you desire to have your current shift, which you have been on for some time, altered to eliminate two days of graveyard in any given workweek, thus making your shift consist only of day and swing shift hours. You are requesting this change due to your temporary medical condition of pregnancy.

The Newberg Police Department has denied your request for a shift change and has indicated that you may use sick leave or be granted a leave of absence if you are unable to perform your duties during your designated shift.

May I add, before discussion of our reasoning, that we have not been presented any documentation of a medical condition which makes you unable to work as assigned beyond the doctor's note.

The reasons for the Newberg Police Department's denial of your request are as follows:

> First, the policy of the Newberg Police Department, with regard

to temporary medical condition, has consistently been that if an employee is unable to carry out all assigned duties, then the employee must take sick time or leave of absence and no light duties or shift changes have been granted to accommodate temporary medical conditions which make an employee unable to carry out their assigned duties; though private arrangements between employees to switch shifts on a single day basis have not been interfered with.

Second, the normal and effective functioning of the Newberg Police Department requires that employees be able to work all shifts as assigned. This promotes the safe and orderly operation of the law enforcement emergency services that the Newberg Police Department provides to the community. All jobs in the police department require flexible shift assignments and all employees need to be available to serve on all shifts if necessary. These requirements are designed to balance the hardships caused by shift assignments among all employees. An attempt to accommodate a shift change here outside of established policy would place undue hardship on other employees, quite possibly result in large increased expenses to the department, and decrease the flexibility and efficiency of the department for a period of some months.

It has been the established policy of the Newberg Police Department that no shift changes or light duties be granted because of temporary medical conditions; rather the employee may utilize their sick time and leave of absence time when they are unable to carry out their assigned duties due to a medical condition.

Sincerely,

M.C. Gilbert
City Administrator

Mr. Myrland C. Gilbert
City Administrator
City of Newberg
Newberg, Oregon 97132

Dear Mr. Gilbert;

I wish to inform you that my letter dated June 11, 1980 was in accordance with the procedure set up in which to file a grievance.

I do at this time wish to advise you that I am filing a grievance in reference to my request for a shift change at my doctor's orders. Again, let me specify that I am able to work either day or swing shifts but no graveyards.

I have complied with both steps one (1) and two (2). Chief Hawkins has indicated that he will put nothing into writing pertaining to the request for shift change.

Respectfully,

Rita C. Farrington

RCF

June 12, 1980

Ms. Rita C. Farrington
1822 Ann Court
Newberg, Oregon 97132

In reply to your request of June 11, 1980 the following steps shall be followed if you wish to proceed with a grievance.

Step 1. The aggrieved employe or group of employes shall orally present the grievance to the department head within five working days of its occurence, not including the day of occurence. The supervisor shall give his oral reply within five working days of the date of presentation of the grievance, not including the date of presentation.

Step 2. If the grievance is not settled in Step 1, or if it is an appeal from the discplinary action, it shall be prepared in detail, shall be reduced to writing, shall be dated, shall be signed by the aggrieved employe or group of employes, the department head and shall be presented to the Administrator within five working days after the supervisor's oral reply is given, not including the day the answer is given. The Administrator shall reply in writing to the grievance within five working days of the date of the presentation of the written grievance, not including the day of presentation.

Step 3. If the grievance is not settled in Step 2, the written grievance shall be presented along with all pertinent correspondence, records and information accumulated to date to the Personnel Committee of the Council within ten working days after the Administrator's response is given, not including the day the response is given. The Personnel Committee of the Council shall meet with the aggrieved employe or group of employes, the Department Supervisor the department head and the Administrator. The Personnel Committee of the Council shall reply to the grievance in writing within ten working days of the date of presentation of the written grievance. The decision of the Personnel Committee of the Council shall be final and binding on the employe or the group of employes.

If the grievance procedures are not initiated within the time limits stated the grievance shall be considered not to have existed.

Any grievance not taken to the next step of the above stated procedure shall be considered settled on the basis of the last reply made and received in accordance with the provisions as stated.

If the City fails to meet or answer the grievance within the time limits prescribed for such action, the grievance will automatically advance to the next step. If the City fails to meet or answer the grievance on the last step stated above within the time limits prescribed, it shall be deemed that the City has considered the grievance to be in favor of the grievant and shall resolve the matter accordingly.

Sincerely,

M. C. Gilbert
City Administrator

11 June 1980

Mr. Myrland Gilbert
City Administrator
City of Newberg
Newberg, Oregon 97132

Dear Mr. Gilbert;

Enclosed is a copy of a letter to Chief Hawkins requesting written notice of a decision on a shift change for me to comply with my doctors' instructions of no graveyard shifts.

Sgt. Parrett, my supervisor, relayed the Chief's apparent decision (un-written) that I continue to work my present shift or request a leave of absence. As I outlined to the Chief I am fully capable of working day or swing shifts.

My husband handed Chief Hawkins the enclosed letter and was told that: "There will be no written decision; she knows her shift and she will be notified if there are any shift changes"..

The Chief has apparently made a decison and has indicated he will not submit it in writing..

I would like to stress the fact that my pregnancy is only a temporary condition as the baby is due to arrive in mid--October.

In lieu of that decision I am requesting that decision in writing from you as the Chief indicated you wereinvolved in making that decision. Further I wish to submit a grievance on the decision and request that you furnish me with the proper grievance procedure information, so that I may proceed with a grievance.

Respectfully,

Rita C Farrington

Newberg, Oregon 97132

10 June 1980

Dear Chief Hawkins;

Sgt. Parrett called me at home today to relate an apparent decision by you and other administrators regarding my shift.

q

Sgt.. Parrett said that your intentions were that I continue my present two graveyard shifts, one daysshift, and two swing shifts work week., or request a leave of absence for maternity reasons.

Sgt.. Parrett has my original note from Dr.. Abbott and to recap the note I am completely able to work wither day or swing shifts but graveyards are out for the time being.. My husband has also directed that I not disregard the doctor's orders..

Sgt. Parrett has related your decision, but I would request that notification of your decision be put in writing to me..

Respectfully,

Rita C. Farrington

CITY OF

NEWBERG

414 E. First Street
Newberg, OR 97132

6/2/80 F

June 2, 1980

Hon. Elvern Hall, Mayor
City of Newberg

Respectfully I hereby submit my resignation to become effective November 30, 1980.

Submitting my resignation at this early date should give sufficient time to advertise, interview and employ my successor.

In selecting this date for retirement I will have completed almost 20 years with the City of Newberg. It is with some regret, but also a feeling of pride and many favorable memories I carry with me upon my retirement.

Charlotte and I will continue to live in Newberg, and after an extended vacation trip I hope that I may be selected to serve the City as a volunteer on a committee or commission in the future.

I wish to extend my thanks and appreciation to all members of the City's government, both appointive and elective. Throughout the past years I have found them all dedicated individuals.

Sincerely,

M. C. Gilbert
City Administrator

MCG/bjm

6-9-80
Exhibit A
Public Hearing
Agenda 3B
Comp. Plan Amend.

FINDINGS - WERTH PROPERTY

1. Currently, the subject property which lies outside the Urban Growth Boundary but within the City limits has been included within the Land Use Needs and Provisions Section of the Newberg Comprehensive Plan which identifies the minimum necessary land requirements to accomodate a population of 18,000 people utilizing the methodology as identified within the Newberg Comprehensive Plan. The Comprehensive Plan identifies that there is a certain amount of inaccuracy involved with the vacant buildable land figures as several different scaled maps had to be used together with the usage of a plenimeter to calculate the acreage figures. In actuality, with the subject property included, the Urban Growth Boundary is very close to those acreages indicated as being needed to accomodate the projected population of 18,000 people.

2. Within the Comprehensive Plan there is a discussion relating to population projection as it relates to the Newberg Urban Growth Boundary. It reads as follows:

> "The Comprehensive Plan was based on a City population projection of 18,000 people. The initial projection was made in 1976. Since that date it has become evident that the initial projections are low and that a projection of 27,000 people is more accurate. Because of this fact, a Comprehensive Plan Amendment Schedule has been incorporated into this document (meaning the Newberg Comprehensive Plan). In light of the Plan Amendment Schedule, it would be of little value to decrease the Urban Growth Boundary at this time to coincide exactly with the projected needs using a population projection of 18,000 people."

The Comprehensive Plan further states that the City does intend to update and amend the Newberg Comprehensive Plan using a 27,000 population projection according to a schedule which would be effective immediately. The subject request does not conflict with Newberg's population projection.

3. The seven factors of LCDC Goal 14 were considered and were made a part of the decision making criteria regarding the establishment and change of the Urban Growth Boundary for the City of Newberg.

4. The subject property was annexed to the City of Newberg on May 31, 1971.

5. The corporate City of Newberg is an urban center. Section 1 of the Revised Goals and Policies of the Yamhill County Comprehensive Plan sets the Urban Area Development Goal, "To encourage the containment of growth within existing urban centers, provide for the orderly, staged, diversified and compatible development of all of the cities of Yamhill County, and assure an efficient transition from rural to urban land use."

The request would encourage containment of urban growth within the City's existing urban center. By establishment and change of the Newberg Urban Growth Boundary to be consistant with the Newberg City limits, the Newberg Comprhensive Plan through its adopted Goals and Policies, would provide for the orderly, staged, diversified and compatible development of the subject property. The subject request is consistant with the Urban Area Development Goal of the Yamhill County Comprehensive Plan.

6. The subject property is included as urbanizable land within and has been made a part of the adopted Newberg Comprehensive Plan text. The subject request is consistant with the Newberg Comprehensive Plan.

7. The subject parcel is of adequate size to maximize the utility of the land resource and enable the logical and efficient extension of public services.

8. According to the Newberg-Dundee System Facilities Planning Report, July 1976, with improvements, Newberg's treatment plant is capable of servicing a population of from 16,000 to 20,000 people. The City of Newberg is currently upgrading the municipal sewer network which will add to the capability of the sewer system.

The Newberg Comprehensive Plan provides special restrictions for residential developments within the Newberg Urban Growth Boundary. A policy applicable to development of the subject property, controlled by the Newberg Comprehensive Plan, reads as follows:

> "New developments shall be permitted only when all urban services become available. These services shall include public water and sewers, electric power, solid waste collection, streets, parks, schools, police and fire protection (Housing Policy - Location No. 1, Page 15, NCP)".

Adequate growth and development policies are provided within the Newberg Comprehensive Plan to ensure the orderly and efficient use and development of the land in relation to the City's ability to provide public services and allow improvements.

9. The subject property, in terms of acreage needs, has been incorporated into the Comprehensive Plan text and is included within the overall need for housing and livability within the Newberg Urban Growth Boundary.

10. Subject property was annexed to the City of Newberg on May 3, 1971. Since that date and up until the adoption of the Newberg Comprehensive Plan in July of 1979, the subject property has been considered to be urbanizable. The State Land Conservation and Development Commission has also considered

lands within the City limits of incorporated cities to be urbanizable by use of an administrative rule, although the Court of Appeals has determined that portions of it appear to be in conflict with the statewide planning goals.

11. The Urban Growth Boundary Amendment, if approved, would coincide and be compatible with the Newberg City limits which presently lies outside the Newberg Urban Growth Boundary.

12. Development of the subject property can be made to be compatible with adjoining land uses through conformance of the Newberg Comprehensive Plan and through zoning restrictions which may include a site review sub-district classification.

13. The subject property has been considered to be urbanizable land since the date of annexation in 1971 and up to the adoption of the Newberg Comprehensive Plan in July of 1979, at which time the property remained zoned for low density residential uses, but had no Comprehensive Plan designation. In that the property has been within the Newberg City limits for approximately 9 years, and that the property still remains in the City limits and carries a City R-1 (low density residential) zoning classification and that taxes have been assessed to the property as urbanizable land for that period that the property has been within the City, then a commitment to allow the property to be considered as urbanizable has been adequately established.

14. In that the Newberg Comprehensive Plan text as adopted by the Newberg City Council June 2, 1980, has incorporated the subject property in terms of vacant buildable land, including the rationale for including the lands necessary for urban development, a demnostrative need to accomodate long-range urban population growth has been established for the subject property.

15. The subject property will provide lands usable for low density residential uses, which when developed within the planning period controlled by the Newberg Comprehensive Plan, will encourage the availability of adequate numbers of housing units within the financial capabilities of Oregon households. The residential development anticipated on the site has the potential to provide a form of livibility not otherwise found within the Newberg Urban Growth Boundary primarily due to the topographical and asthetic qualties of the site. The site can be supported in large part by adjoining commercial and industrial lands.

16. Since the subject site is a part of a much larger parcel containing approximately 324 acres, of which abuts main line sewer and water facilities, the site can be developed utilizing an orderly and economic expansion of necessary municipal services. Through growth policies found within the Newberg Comprehensive Plan, no development will occur without adequate public facilities and services.

17. In that the subject property is currently within the Newberg City limits, the property can be more efficiently administrated through the provisions of the Newberg Comprehensive Plan. The implementing Ordinances of the City will encourage the maximum efficiency of land uses. The site in itself provides for the maximum efficiency of land uses in that the parcel is part of a 324 acre site containing a variety of land use designations (Commercial, Industrial, Medium Density Residential) which will promote energy conservation in terms of being within close proximity to necessary urban services, reducing the amount of traffic on Highway 99W; will provide for the efficient extension of sewer and water, in that the services can be provided in a faster, more coordinated fashion than a development with a large number of small ownerships.

18. The site will promote energy conservation because of its close proximity to necessary urban services and because of the ownership pattern. A social commitment has been conveyed to the property to allow for urbanization because of the act of annexation. The owners have also participated in the cost of City taxation and special assessments because the parcel is within the City limits. The parcel through taxation has participated in the cost of the City; in turn the act of annexation has provided a commitment to allow for urban development.

19. The subject property was annexed in accordance to the requirement applicable in 1971. The site is found to be needed for urban use and will provide for orderly development. In that the site is urbanizable due to the finding presented herein and by virtue of it being located within the Newberg City limits, the development of the site would not conflict with Goal Number 3 (Agricultrual Lands) and Goal Number 4 (Forest Lands).

20. Through development of the subject property in accordance with applicable City Ordinances, development within the site will be compatible with nearby agricultural activities to the same extent as the remaining portion of the Newberg Urban Growth Boundary.

21. Urban development should be permitted on the subject property as development might occur in accordance with the provisions of the Newberg Comprehensive Plan, over agricultural or forestry uses as the property is presently committed to urban development, due to the parcel being located within the City limits, the need established for urbanization by the Newberg Comprehensive Plan and the findings as mentioned herein.

22. An urbanization priority is established by virtue of the site being located within the City limits, being controlled by City low density residential zone. Other alternative sites could be used for the necessary urban development, however, since this site is currently within the process of becoming urbanizable, as annexation to an urban area has already occurred, the site is more desirable in terms of urban development than other parcels not currently within the Newberg City limits.

23. Inclusion of the subject site into the Newberg Urban Growth Boundary will allow for urbanization of the property and will, after developed, eliminate the current open space, agricultural or forestry uses of the site. A greater need has been established for urban development of the site in accordance with the provisions of the Newberg Comprehensive Plan, than for the need to retain the site in an agricultural designation.

24. The findings incorporated herein set forth the compelling reasons and facts for incorporation of the subject property into the Newberg Urban Growth Boundary in accordance to the seven factors of Goal 14 and for a forestry (Goal #4) and Agricultural (Goal #3) exception in accordance with the four criteria for a goal exception as identified within LCDC Goal Number 2 (Land Use Planning).

25. The reason that the subject property was not included into the Urban Growth Boundary of the Newberg Comprehensive Plan adopted in July, 1979, related primarily to the previous policy relating to not allowing sewer pump stations. This policy has been amended since the review of the property in terms of the initial Urban Growth Boundary. The policy now allows for sewer pump stations.

RECEIVED
JUL 30 1982
CITY OF NEWBERG, ORE.
OFFICE OF RECORDER

Chief Herb Hawkins
Newberg Police Department
City Hall
Newberg, Oregon 97132

Dear Chief Hawkins:

At the meeting of the Old Fashioned Festival Committee this morning high praise was given to the Police Department for the excellent job they did in traffic control, not only during the parade but in all parts of the festival. Cooperation was superb and the quality of their work, and even the anticipation of what would be needed, was excellent.

I'm pleased to extend to you and your officers the deepest appreciation of the committee.

Sincerely,

Jerry

GERALD E. POST, Secretary
Old Fashioned Festival Committee

Mrs. Arvilla Page
City Recorder
City Hall
Newberg, OR 97132

Dear Mrs. Page:

Pursuant to your transmittal to me July 29, the proposed amendment to the City Charter relating to parks which was proposed by initiative petition, I submit herewith to you in accordance with Ordinance No. 923, Section 11, the following ballot title:

CHARTER AMENDMENT PROPOSED

BY INITIATIVE PETITION

VOTE YES OR NO

An Act

51. To amend the Charter of the City of Newberg by adding thereto a new Chapter XX: "Notwithstanding any other provisions of this Charter, all areas now or hereafter dedicated to or used for public park purposes are reserved forever to the use of the public; and no such area shall be sold or otherwise disposed of, or used for other than public park and recreation purposes, without prior approval thereof by a majority of the votes cast thereon by the people of the City.

( ) YES

( ) NO

Sincerely,

Richard D. Faus

INITIATIVE PETITION

To the Recorder of the City of Newberg, Yamhill County, Oregon:

We, the undersigned citizens and legal voters of the City of Newberg, Yamhill County, Oregon, respectfully demand that the following proposed amendment to the Charter of the City of Newberg of February 10, 1893, as amended, shall be submitted to the legal voters of the City of Newberg, Yamhill County, Oregon, at the regular City election to be held on the 4th day of November, 1980, for their approval or rejection:

"PROPOSED CHARTER AMENDMENT PRESERVING PUBLIC USE OF PARKS

AN ACT to amend the Charter of the City of Newberg by adding thereto a new chapter, as follows:

Chapter XX. Notwithstanding any other provisions of this Charter, all areas now or hereafter dedicated to or used for public park purposes are reserved forever to the use of the public; and no such area shall be sold or otherwise disposed of, or used for other than public park and recreation purposes, without prior approval thereof by a majority of the votes cast thereon by the people of the City."

The undersigned, each for himself or herself, says: I have personally signed this petition; I am a legal voter of the City of Newberg, Yamhill County, Oregon; and my residence address is correctly written after my name.

To the Recorder of the City of Newberg, Yamhill County, Oregon:

We, the undersigned citizens and legal voters of the City of Newberg, Yamhill County, Oregon, respectfully demand that the following proposed amendment to the Charter of the City of Newberg of February 10, 1893, as amended, shall be submitted to the legal voters of the City of Newberg, Yamhill County, Oregon, at the regular City election to be held on the 4th day of November, 1980, for their approval or rejection:

"PROPOSED CHARTER AMENDMENT PRESERVING PUBLIC USE OF PARKS

AN ACT to amend the Charter of the City of Newberg by adding thereto a new chapter, as follows:

Chapter XX. Notwithstanding any other provisions of this Charter, all areas now or hereafter dedicated to or used for public park purposes are reserved forever to the use of the public; and no such area shall be sold or otherwise disposed of, or used for other than public park and recreation purposes, without prior approval thereof by a majority of the votes cast thereon by the people of the City."

The undersigned, each for himself or herself, says: I have personally signed this petition; I am a legal voter of the City of Newberg, Yamhill County, Oregon; and my residence address is correctly written after my name.

INITIATIVE PETITION

To the Recorder of the City of Newberg, Yamhill County, Oregon:

We, the undersigned citizens and legal voters of the City of Newberg, Yamhill County, Oregon, respectfully demand that the following proposed amendment to the Charter of the City of Newberg of February 10, 1893, as amended, shall be submitted to the legal voters of the City of Newberg, Yamhill County, Oregon, at the regular City election to be held on the 4th day of November, 1980, for their approval or rejection:

"PROPOSED CHARTER AMENDMENT PRESERVING PUBLIC USE OF PARKS

AN ACT to amend the Charter of the City of Newberg by adding thereto a new chapter, as follows:

Chapter XX. Notwithstanding any other provisions of this Charter, all areas now or hereafter dedicated to or used for public park purposes are reserved forever to the use of the public; and no such area shall be sold or otherwise disposed of, or used for other than public park and recreation purposes, without prior approval thereof by a majority of the votes cast thereon by the people of the City."

The undersigned, each for himself or herself, says: I have personally signed this petition; I am a legal voter of the City of Newberg, Yamhill County, Oregon; and my residence address is correctly written after my name.

INITIATIVE PETITION

To the Recorder of the City of Newberg, Yamhill County, Oregon:

We, the undersigned citizens and legal voters of the City of Newberg, Yamhill County, Oregon, respectfully demand that the following proposed amendment to the Charter of the City of Newberg of February 10, 1893, as amended, shall be submitted to the legal voters of the City of Newberg, Yamhill County, Oregon, at the regular City election to be held on the 4th day of November, 1980, for their approval or rejection:

"PROPOSED CHARTER AMENDMENT PRESERVING PUBLIC USE OF PARKS

AN ACT to amend the Charter of the City of Newberg by adding thereto a new chapter, as follows:

Chapter XX. Notwithstanding any other provisions of this Charter, all areas now or hereafter dedicated to or used for public park purposes are reserved forever to the use of the public; and no such area shall be sold or otherwise disposed of, or used for other than public park and recreation purposes, without prior approval thereof by a majority of the votes cast thereon by the people of the City."

The undersigned, each for himself or herself, says: I have personally signed this petition; I am a legal voter of the City of Newberg, Yamhill County, Oregon; and my residence address is correctly written after my name.

INITIATIVE PETITION

To the Recorder of the City of Newberg, Yamhill County, Oregon:

We, the undersigned citizens and legal voters of the City of Newberg, Yamhill County, Oregon, respectfully demand that the following proposed amendment to the Charter of the City of Newberg of February 10, 1893, as amended, shall be submitted to the legal voters of the City of Newberg, Yamhill County, Oregon, at the regular City election to be held on the 4th day of November, 1980, for their approval or rejection:

"PROPOSED CHARTER AMENDMENT PRESERVING PUBLIC USE OF PARKS

AN ACT to amend the Charter of the City of Newberg by adding thereto a new chapter, as follows:

Chapter XX. Notwithstanding any other provisions of this Charter, all areas now or hereafter dedicated to or used for public park purposes are reserved forever to the use of the public; and no such area shall be sold or otherwise disposed of, or used for other than public park and recreation purposes, without prior approval thereof by a majority of the votes cast thereon by the people of the City."

The undersigned, each for himself or herself, says: I have personally signed this petition; I am a legal voter of the City of Newberg, Yamhill County, Oregon; and my residence address is correctly written after my name.

INITIATIVE PETITION

To the Recorder of the City of Newberg, Yamhill County, Oregon:

We, the undersigned citizens and legal voters of the City of Newberg, Yamhill County, Oregon, respectfully demand that the following proposed amendment to the Charter of the City of Newberg of February 10, 1893, as amended, shall be submitted to the legal voters of the City of Newberg, Yamhill County, Oregon, at the regular City election to be held on the 4th day of November, 1980, for their approval or rejection:

"PROPOSED CHARTER AMENDMENT PRESERVING PUBLIC USE OF PARKS

AN ACT to amend the Charter of the City of Newberg by adding thereto a new chapter, as follows:

Chapter XX. Notwithstanding any other provisions of this Charter, all areas now or hereafter dedicated to or used for public park purposes are reserved forever to the use of the public; and no such area shall be sold or otherwise disposed of, or used for other than public park and recreation purposes, without prior approval thereof by a majority of the votes cast thereon by the people of the City."

Re: Insurance Proposal

Dear Sir:

We of the Rushlow-Busch Division of Fred S. James are pleased to present our bid for the city insurance coverages. Our proposal meets all the specifications in the bidders instructions and in the area tort liability we exceed the requirements. We also are including in our bid access to our full in house engineering service to assist the city in insurance matters.

I am sure the city is aware that price alone should not be the sole basis for determination of an award. For the quality of the professional services that the agency provides is also of great importance. At our agency we endeavor to provide to our clients with professional insurance services of the highest order. Our reputation in this area is unmatched by any other agency as witnessed by our unparalleled growth which has made us the largest agency in the Northwest.

Should you or the city council have any questions on such matters as our professional credentials or claims handling matters, or any other questions, we would be pleased to discuss them with you in a personal interview.

We thank the city for this opportunity to make this bid and hope that this is the beginning of a long and pleasant relationship.

With Best Regards,

Harlan R. Crop

EMERGENCY WATER REGULATION

Pursuant to the declaration of a Water Crisis Emergency, and it is an act which is reasonable and necessary to protect the health, safety and welfare of the City of Newberg, the Mayor of the City of Newberg hereby declares the following water saving measure to be enforced:

Effective date and time: Beginning at 12:00 noon August 5, 1980, until September 30, 1980, at 12:00 noon or until further notice.

The following measure and restriction will be enforced:

1. Irrigation and outside watering is allowed only as follows:

   Even house or box numbers water only on even calendar days.
   Odd house or box numbers water only on odd calendar days.

Thank you for your cooperation.

Subscribed this 5th day of August, 1980.

An Executive Session
Of The City Council
August 18, 1980

The Mayor stated the Executive Session was being held inder ORS 192.660. All members of the public were excused. News media permitted to remain but cautioned that the discussions were not public information. Purpose of the meeting is to discuss litigation and negotiations on Sitka Street.

Terry Mahr, former City Attorney, stated Lloyd Nisly has filed suit in Circuit Court to rescind the deed for Sitka Street right of way to the City. Mr. Nisly is stating that the City made representation that the City had all right of ways. Mr. Nisly has been issued building permit, land partitioning and zone change based on the right of way on the Nisly part of the street. The City needs a 58 square foot wedge of right of way from Mr. Nisly to construct the street. The City's offer to Mr. Nisly has been refused and he is demanding relief from assessment. Negotiations with other property owners appear to be completed.

The Council and staff discussed timing of utility construction on the street and time needed for condemnation proceedings if they become necessary. The City Attorney will have condemnation ready by September 2, 1980 if agreement is not reached by that date.

Executive session adjourned to Adjourned Meeting of the City Council, August 18, 1980.

RE: Street Improvements

It is understood that streets will need improvement and repair from time to time. It is also understood that a certian amount of inconvience is necessary for travelers as well as boardering residents and businesses.

The point we would like to address is the amount of time contractors are allowed to complete a given project. Streets such as Haworth, Deborah and Springbrook are a good recent example. It seems the time given to complete these streets has been excessive and has resulted in severe hardships for local residents and businesses that need the use of these streets. Springbrook Plaza has had road improvements adjacent to it almost from the time the first retail store opened its doors. If Springbrook Street is completed by October 1st, that will be six (6) months.

We urge you to do what you can to reduce "down time" on future road improvements in our city.

Sincerely,

Wm D Vaughan

To the City Council,

On Monday, August 11,1980, Springbrook Road was closed to through traffic, (residents only were permitted through), effectively closing Springbrook Plaza. We the merchants of Springbrook Mall Association are very concerned that Springbrook Road is closed and will be for some time.

It would be greatly appreciated if the City Council of Newberg would, ifpossible, put additional pressure on the contractor to get Springbrook Road paved at least to the back of Springbrook Plaza.

Gentlemen:

The purpose of this letter is to bring to your attention the dilemma the merchants in the Springbrook Shopping Center are facing with the recent construction activity on Springbrook Rd. The dilemma is this:

While we fully recognize the need for completion of this project, we question the methods the contractor is utilizing to both complete the project in a professional manner and at a minimum disruption to the community. Logically, to do the very best job, the contractor would like to close down the street entirely and take whatever time he needs to complete the project as professionally and as economically as possible. The problem is that it is highly unlikely that the community, especially the entrepreneur, is going to be very receptive to this situation. The solution is an attempt to strike a compromise between the contractor and the community. We have been in conference with both the contractor and representatives of the Oregon State Hiway department to hopefully arrive at that compromise. We have met with the contractor on one occasion and with the State on several occasions with moderate success. In most instances we took the initiative to research the alternatives available to us as well as to the contractor through the scheduling and arrangement of these conferences. The results were often less than gratifying, and for the most part, the concessions that were made were made by us, to reserve the contractor a certain amount of latitude which is his right according to the terms and conditions of his contract. As an illustration, we met with State officials just recently to inquire if anything could be done in light of the many complaints we were getting from our customers and in light of the dramatic decline in business. They did agree to remove some of the barricade on the South end of the project to allow access to Springbrook Rd. as you travel West on Hiway 99W. During that conference it was revealled that indeed there are many things the contractor can do to ensure more comfort and less disruption to the merchants, however, in this instance these consessions either were not included or were not clearly defined in the original contract. As you may well imagine this situation dramatically undermines the "leverage" that the State may have in the control of the project. Quite frankly, the Oregon State Hiway department has been very accommodating to our business to the degree allowed them acccrding to the terms of the contract.

The problem is that this contract was apparantly negotiated without consideration to the disruption it may cause. It would seem logical that some kind of a plan be put into these types of contracts that would allow for not only the very strict engineering specifications in which a project must be completed, but also a protection for the community involved. These specifications should be as clearly defined as any of the engineering specifications. For instance, maintaining bank access to us means that the little old lady making her deposit should be able to drive her car <u>safely</u> to the parking lot or the drive in without excessive problems. Certainly not an obstacle course that would discourage her from her visit. This may still mean that she may have to drive on a graded surface with the aid of signs, barricades, flagmen and she

should be able to obtain access in and out of the parking lot without funny angles, holes, or any other "surprises." In contrast the contractor's definition of bank access means that if he can get his 4-wheel drive shop truck in the parking lot everything is fine. This is evidenced many times over during the course of a day when we see the large commercial depositor carrying large heavy coin orders across Springbrook Rd. as opposed to trying to park in the lot. This is not to mention the obvious breach in security. As further evidence, consider the young mother who parks at the shopping center and packs her child, baby carriage and all across the road in lieu of parking in our lot. What if something happens to these people? We have witnessed these and many other occurrences similar in nature. Quite honestly, the first few days of the major construction work resulted in the majority of our customers parking else where and walking in. Today, of the people who are still visiting the bank, a very sign-ifigant protion of these people come in on foot. An estimate would be 40%.

We recognize at this point that there is very little that can be done now, be-cause of the progress of the project, but we may want to keep in mind that there will undoubtedly be future projects of this nature that could benefit from this incident. If we can take heed to the virtue of planning and logical management, perhaps we can save some people a lot of "heartburn."

Sincerely;

William J. Worley

August 25, 1980

City of Newberg
City Council
414 East First Street
Newberg, OR 97132

Dear City Council Members:

The need for a multi-purpose Senior Center in Newberg has been recognized for some time. There is presently no such facility in Newberg, although local churches have helped to fill the gap by allowing Seniors to use their facilities to run the local meals program.

Seniors do not live by bread alone, however. Seniors need a place to meet and socialize with other Seniors which does not require the spending of money. The proposed multi-purpose Center will not only provide a permanent site for the mealsite, it will also contain a recreation room, arts and crafts center and library. It will provide a place where Seniors can linger at ease and pursue a new hobby.

In order to realize this dream, the Chehalem Valley Senior Citizens Council, Inc. is proposing to apply for a Housing and Urban Development Community Development Block Grant of $500,000. It is felt that this amount of money would be sufficient to build a Senior Center suitable for the present needs of Newberg.

As a first step in this process, the "Council" is applying to the Yamhill Community Action Agency for a $2,500 Self-Help Grant. If the application is successful, the money would be used to hire a grantwriter to prepare the CDBG pre-application which is due on November 17, 1980.

Although the grantwriter would be responsible for all the activities related to the preparation of the CDBG pre-application, the City of Newberg does have an important role to play in sponsoring the application. Federal regulations require that all CDBG applications be sponsored by some type of governmental unit (e.g., county, city, etc.). Chehalem Vally Senior Citizens Council, Inc. feels that the City of Newberg would be the most appropriate sponsor.

As a sponsor for a CDBG application, the City of Newberg would have certain responsibilities regarding the administration of the grant. In other words, the City would be ultimately responsible for implementing the project once the application is approved. The CDBG program however, does provide sufficient funds for the administration and implementation of its projects (20% of the tatal) so, acceptance of this responsibility would not be a financial burden for the City of Newberg. It is also hoped that the grantwriter hired to prepare the pre-application would be available to help the City to prepare the final application and provide advice on the administration of the grant.

The Chehalem Valley Senior Citizens Council, Inc. requests the Newberg City Council to accept the responsibility of sponsoring this grant application. The 2,500 Senior Citizens who are presently living in Newberg would surely appreciate it.

Sincerely,

Robert H. Schmidt
President
Chehalem Valley Senior Citizens Council, Inc.

September 1, 1980

Dear Ladies & Gentlemen:

Concerning the zone change requested by Mr. Thomas Hailey next to Wynooski Street. I do not live in the area at this time so realy do not have much pull as to what I feel should be done.

But I would like to tell you of an experiance that some one from out of town told me. I have lived in Newberg most of my life and never thought of it as much more than just Newberg. Some friends moved here and were always saying how they wish they had moved else where because they thought this was such a dirty, boched up little town. After talking to them I started to look around and I am sorry to say that I have to agree with them. There are old delapodated houses sitting right next to new ones and two blocks down there is an apartment building that dosn't look to great. It all looks as if their was no plans, as if everyone just went on about their own business and did as they damn well pleased.

Before you make this decision I suggest you take a drive sround this town and pretended like you have never been here before and think about if you would like to move into this town.

Thank you,

Janice L. Simpson

Janice L. Simpson

9/5/80

MEMORANDUM
August 29, 1980

TO: City Council

FROM: Bob L. Sanders, RLS Director of Public Works/City Engineer

SUBJECT: Planning Commission denial of PUD-4-80 and Z-4-80

Both of the subject projects were reviewed for the impact they may have on existing services, and a report was made for the Planning Commission. Each project will need specific improvements and extentions of service to the site.

The services for Z-4-80 will be the new 18" water line in Wynooski, new Hess Creek sanitary sewer line and a new storm sewer line run to Hess Creek.

The services for PUD-4-80 will consist of extending the existing 6" water line in College south to the site and looped over to Wildwood Addition. The sanitary sewer service is from an existing stub out on Wildwood Addition. The storm drainage will be directed to the natural drainage way running through the project and continuing westward.

The Planning Commission was concerned about the impact these developments would have on the existing water system (current water rationing mainly) and the sewer treatment plant. As you know, the majority of the water improvement projects are under contract and the last project, the water transmission line, will be re-bid within several weeks. All projects are anticipated to be completed by March 1, 1981, well ahead of the July - September water shortage as we experienced this year. There will be sufficient water supply with the new system to amply handle these two developments. The intent of the projects was to have sufficient capacity to allow continuing development.

With respect to the sewer treatment plant, Robert E. Meyer's October, 1979 Facilities Plan Supplement states that "with respect to average flow, the treatment plant will be overloaded after 1985 (projected population of 14,250). The plant is overloaded with respect to peek flow now and will continue to be overloaded during the winter and even after the rehabilitation of the collection system to remove excessive infiltration and inflow." One basic assumption Meyer made is that this is not a valid assumption; however, without losing sight of my point, there is still average flow capacity remaining in the plant to handle these two developments.

It is anticipated that when grant money is available again, the plant expansion planning will continue with the expansion a reality prior to exceeding capacity of average flow in 1985 or 14,250 population (including industrial population equivalents).

If grant money does not become available within the next 6-9 months* for FY 82, it will be necessary for the Council to take a hard look at the remaining capacity of the plant and evaluate alternate financing or face building moritoriums around 1984 - 1985.

*See attached August 7, 1980 memorandum to M. C. Gilbert, City Administrator

MEMORANDUM
August 7, 1980

TO: M. C. Gilbert

FROM: Bob Sanders BS

SUBJECT: Sewer Treatment Plant Expansion

I attended the Public Hearing on August 5, 1980 which DEQ held to explain the proposed administration rules relating to grant priorities and to take public testimony on the proposed priority list. After hearing the testimony from various cities, it is very apparent that if our rating changes, it will go down on the list rather than up.

There are cities like Gladstone and Oregon City which have had moritoriums on building for three years and they are just ahead of us on the list with a B rating. They, along with West Linn (who is ready for a moritorium) are protesting for an A rating.

DEQ reported that legislation has passed the House and is in the Senate which changes all Federal grants to a 50% match by the local agency, if and when grant money is released.

As I understand, over a year ago it was determined that our plant could handle about 4000 dwelling units or equivalent units. My rough guess is that we have used up at least half of that figure. The sewer rehabilitation project will pick up some increased capacity; however, our days are numbered.

In view of the legislation on the 50% grant money, it is inevitable that the City must plan to finance a large portion, if not all, of the sewer plant expansion. It would seem prudent with the little time left before we reach capacity on the plant that we start now with some wise financial planning.

Newberg has been through a growth boom which I am sure far exceeded the expectations of the community. It would be a real shame to deter the future growth potential by neglecting to present sound financial planning for the treatment plant expansion to the community.

Oregon City and Gladstone have missed three years of the most valuable growth in the history of the State by not making provisions for sewer plant expansions and they are still coming up short by a low priority rating. They are still waiting for the Federal Government to bail them out.

The plant expansion will take most of a year to construct and the financing will take at least that long to set up, hence, there is no time to waste; we should start the planning for financing <u>now</u>.

cc: Roger Gano

File: #Z-4-80

Applicant: Thomas H. Hailey

Request: Zone Change
R-2 to R-3 - 16.2 acres
Comp. Plan Amendment
Medium Density Residential to High Density Residential

History:

This property is located in an area that is almost fully developed. It is near the core area of the City and has been in the City limits for some time. Prior to the adoption of the new Comp. Plan, the property was being developed with more units than is presently being requested. The applicant was doing the project. He had the plans approved, the engineering work done, the approval of the City, the approval of the state, paid his fees and the building permits issued. Then his property was down-zoned. He could not place the same number of units on the property. This request is not to obtain the same density he previously had, but to obtain slightly more density than presently zoned, the sub-district will limit the density.

The Planning Commission's recommendation for denial seemed to be mainly based upon two factors:

1. Lack of adequate sewer and water services
2. Condition of Wynooski Street and impact on transportation system

At the hearing itself, the applicant stated that he was aware of no adverse comments from any of the agencies or City departments responsible for delivering the services. One commissioner indicated that the City should do a comprehensive study and formulate a plan for expansion of City services. A discussion followed and it seemed to be an attitude that the Commission would "deny" the change until such studies were made. This seems unfair to the applicant.

The finding regarding the sewer and water services seems unsupported by the record. The City Engineer who should be most knowledgeable on these facts is quoted in the staff report on page 4 as follows:

> "In conclusion, the Newberg City Engineer has indicated that there is no reason for denial of the request and subsequent development of the property based upon the availability of City sewer and water."

In discussion with the City Engineer after the Planning Commission meeting, he was still of the same opinion. The water system is presently under

contract and the new wells will be on-line well before these units are on-line. The sanitary sewer is presently being upgraded and will be finished this year. The storm sewer capacity will not be affected. To adopt a finding of fact to the contrary is simply not supported by the evidence nor the record.

The transportation question was the second major point with this project. Wynooski Street is a collector route, but is sub-standard in right-of-way and paved improvement width. The proposed development has only an entrance way from Pacific Street, but it was stated that the decision was not merely for this one proposal. The emergency services access to the property was a question.

Every development has some impact upon the transportation system and can be couched as "adverse" merely because it increases traffic to some degree no matter how insignificant. This property is presently zoned R-2 (medium density), and the change to R-3 (high density) carries a sub-district classification which limits the density below the maximum density allowable in the R-3 zone. This sub-district lessens the impact of the zone change and makes the increase in traffic insignificant. The impact on the transportation system must be measured against present zoning, not against leaving the property vacant. When measured against the density allowable under present zoning, the impact is insignificant on the transportation system.

The applicant has expressed his willingness to do two things which would solve the transportation objections:

1. Dedicate additional right-of-way on Wynooski Street.
2. Make a covenant running with the land, giving up the right to remonstrate against an L.I.D. on Wynooski Street.

The contention concerning entrances to the project off Pacific Street or emergency services is easily handled under the new zoning ordinance. I think perhaps the Planning Commission failed to remember that the property will carry a "site review" designation which will allow for review of any plans.

The opponents to the zone change seemed to have the following objections:

1. Did not want another apartment complex in the neighborhood.
2. Traffic impact.
3. Water/sewer services not available.

This development is not an apartment complex, but an owner-occupied attached single-family dwelling. The historical problems associated with absentee ownership should not be a problem. The neighbors related problems with

litter, theft and vandalism, these are problems they related to the apartment complex. This is not an apartment complex development.

The traffic problem when considered with the allowable units under present zoning is not of significant impact. The applicant is willing to take two steps mentioned above to lessen any impact and improve present conditions.

The neighbors are upset about the present services in the water and sewer area. The water rationing is uppermost in people's minds. It was suggested that "the applicant wait until the services are in place before approval; heard too many promises from the City". I think the neighbors may not be aware of the amount of lead time necessary to do such a project. The applicant cannot wait until the services are in place, and then begin the project without an eight-months delay. Planning, zone changes, plan approval, site review, platting, subdivision approval, building permits, loan applications, finance approval, bidding, construction, City inspections and finalizing, to name a few, all take time. Most work to protect the neighbors but seem to complicate the process.

The sewer system while of concern to everyone is not going to be overtaxed by this development. The City Engineer has stated this fact.

Summary:

The area under consideration for the zone change is located in an area of town that is dedicated for urbanization. The Comp. Plan shows a need for more high density residential property.

The Planning Commission's recommendation is not supported by the record. The LCDC Goals were addressed at the hearing and the City Planner stated such. The development will have no significant impact on the transportation system, however, the applicant is willing to help with any problem as stated above. The sewer and water services will be available as reported by the City Engineer.

This development is not an apartment complex. It will have site-review designation to insure proper access and compatibility.

The applicant respectfully requests the City Council to approve the zone change and plan amendment as recommended by the City Planner.

CITY OF NEWBERG, ORE.
OFFICE OF RECORDER

Mrs. Edith M. Plews
712 Wynooski St.
Newberg, OR 97132
August 31,1980

Newberg City Council
Newberg,OR 97132

Gentlemen and Ladies:

I am writing in response to Mr. Mahr's letter appealing the Planning Commission's August 18th recommendation.

Mr. Mahr's refutation contains some discrepencies worth noting:

1. The first point he brought forth concerned adequate sewage and water. Mr. Mahr states the City Engineer's report claims sewage and water will be available, but my question is: Will it be adequate? Right now, without additional building, our water supply is so "inadequate" we have even been threatened with $200 fines for just attempting to maintain our yards. Therefore, this matter of additional sewage and water is not a question of availability, but adequacy.
Even though there may be plans for additional water and sewage, a zone change should not be granted until adequate water and sewage services exist.

2. Whereas violation of no specific LCDC goal was pointed out at the hearing, it is my opinion that no sufficient cause for zone change was clarified. It is the responsibility of the petitioning party to show need for this zone change.

3. Mr. Mahr ambiguously claims that the property is located "near" the downtown core. How close is near, 10-12 blocks? It is at least 10 blocks from the downtown core, and not more than 2 blocks from the city limits.
He further asserts that the property accesses two collector roads:
A. One of these is Wynooski Street which is 20 feet substandard width. Parts of Wynooski Street have no curbs or sidewalks, and unsafe shoulders, specifically the area bordering this property.

B. Traffic on this street is already hazardous and will become more dangerous with a zone change. Mr. Mahr contends that this change will have "nosubstantial impact" on traffic or transportation problems. However, as a resident of Wynooski St., I would argue from past experience. First, how does Mr. Mahr define substantial? Construction of multiple dwellings on Wynooski St. in the recent past has noticeably increased traffic and threatened the safety. I cannot help but be skeptical of a proposition adding again as many apartments to our street.

C. The other collector street must be Pacific Street, which is only 5½ blocks long. The quickest route to the downtown core would be via Wynooski, since Pacific ends on 7th street. So no matter which exit is used, traffic will likely end up on Wynooski St.

The above rebutal coupled with the other points stated clearly at the August 18th hearing present clearly reasons why changing the zoning would not be in the best interest of the community.

We have lived in thi neighborhood for 15 years and enjoyed it; we fear the magnitude of this project serves a threat. We plead with the Newberg City Council to maintain the present zoning.

Sincerely,

Edith M. Plews

Re: Appeal from Planning Commission Recommendation to the Newberg City Council
File Z-4-80 - Zone Change with sub-district and Comprehensive Plan Amendment.

Dear Mr. Moorehead:

The following points are presented for your consideration in regard to Mr. Thomas Hailey's request for a zone change for property located south of eighth street and being between Wynooski and Pacific Streets.

1. The applicant for the zone change has not proven that:

    1. The proposed change is consistent with and promotes the objectives of the Comprehensive Plan and of the Zoning Ordinance of the city;
    2. There is a public need for a change of the kind in question;
    3. The need will be best served by changing the classification of the particular piece of property in question as compared with other available property.

    Mr. Hailey stated in the hearing before the Planning Commission that: The reason for the request for a zone change was to obtain financing.

2. It was not proven that water and sewer were adequate since 1- Water is still under construction 2-The Hess Creek pumping station does not have capacity at present. The storm sewers will dump into Hess Creek which floods and backs up already. Perhaps an Enviromental Impact Study should be prepared?

3. Wynooski Street is narrow and more traffic will cause problems and although the applicant has donated for a wider right of way other residents will not or cannot give since in some cases the right of way will be too close to their residences.

4. The applicant has stated that the purpose of the Comprehensive Plan was the need to spread low cost housing, but they are proposing an additional development within two blocks of that existing north of eleventh street.

Yours very truly,

James D. Darby

September 1, 1980

Ladies & Gentlemen:

Regarding the appeal from the Planning Commission Recomendation To the city council.

File #Z-4-80 zone change by Terrance D. Mahr for Thomas Haily, lots #3220CA,-2401, 1202, 1300, 1400, 1401 & 1500.

I would like to call to your attention a number of points that I feel should be considered closely;

1. In the 28 years I have lived in Newberg every time we have installed new water facilities we have, within the next year, been informed that we are out of water again.

2. As I understand they plan to hook to the sewer trunk line in Hess Creek. Every winter this line overloads and sewage can be seen boiling from the man hole covers. I have been told, by reliable sources, that the pump station on 11th street is to small to handle the present load. The south side of Newberg is without sewer, and no one has been allowed to hook to this line. Yet it is available for new development. Why?

3. We have a comprehensive plan that originally designated this area as R1. This was recomended by a professioanl advisor. It is now R2 and trying for R3. This was turned down by the planning commission. If we are not going to listen to them why keep them on.

4. The condition of Wynooski Street is very deplorable. It has never been resurfaced and only patched very sparingly since the state put in the new bridge. Yet it has always had a lot of heavy truck and car traffic.

5. The people in this area bought here because they like a little room. Now we are told we are going to have a high density (R3) neighborhood when it was originally R1. We have already had one high density complex 2 blocks down the street, which has greatly increased the litter, traffic, noise and pilferage. Why do we need another one?

In conclusion it appears that we have in the past been inclined to add more housing, thinking there was no problems. Then when every thing - water, sewer, schools, police and fire turned up short we are forced into more bond issues to bring services back to par.

Regards,

Robert D. McCutchen

Newberg City Council
Newberg, Ore.
August 31, 1980

Dear members:

As homeowners in the city of Newberg on 721 Wynoosk St. we are concerned about the proposed building of apartments facing Wynoosk St. and the extension of 8th Street in our neighborhood.

During the 3 years we have resided here we have found our present water supply to be less than adequate for the number of people that already live here. Throughout the years we have been promised improved water supply by the city but have never seen any action taken. If new apartments were to go in, we see an increased demand on our already inadequate water supply.

Secondly, Wynoosk Street is already extremely narrow for such a heavily traveled street. If apartments were built on this street, this would only increase the traffic by our houses, increasing the danger to our children and pets. We feel before an extension of 8th Street is developed,

Wynooski street needs to be wickened to accomodate the present traffic, to and from the mill.

Thirdly we see our current sewage system overloaded. Many houses along Wynooski street are already subject to backed up drains and toilets possibly as a result of the added sewage needs of the Boston Square apartments, facing Wynooski Street. Before any new housing is developed we need a larger, more efficient sewage system.

We are proud of the City of Newberg and our neighborhood. We need to improve our present living conditions.

Sincerely yours,
Mr. & Mrs. David Wilson

September 1, 1980

Newberg City Council
Newberg, Oregon

Gentlemen:

Regarding the proposed Zone change by Mr. Thomas H. Hailey for that piece of property west of Wynooski, east of pacific, and south of eight street, encompassing the following lots; 3220CA, 2401, 1202, 1300, 1400, 1401 & 1500.

I think the City Council should reject the zone change for the following reasons:

(1) This is a area adjacent to older well kept homes and does not fit in with high density dwelling construction.

(2) Mr. Haily proposed to donate 10 feet of under developed property to widen Wynooski Street. A lot of people who have already developed their property on Wynooski Street over the years don't have room to widen wynooski street without the street being in their front door.

(3) The people I know who own property on Wynooski Street have it written in their deeds that they own property to the center of Wynooski Street. How wide is Wynooski Street legally?

(4) Does this property have a legal easement to the Hess Creek Sewer line?

(5) The present water line on Wynooski Street is always having new leaks and is to small for the number of people already being serviced. The proposed new water line was turned down as the bid was to high. Is water going to be available for this new construction.

(6) I don't think the other property owners in this neighborhood should have to suffer because a few epeople want to make a few extra dollars. I am in favor of single dwellings being built on this property with decent lot sizes as the rest of the already developed property in this area has.

(7) To much traffic already, no decent sidewalks on Wynooski Street. Also sewer and water could not be available soon.

Yours very truly,

Ray Mahaney

Newberg, Oregon 97132

Sept. 2, 1980
810 Wynooski
Newberg, Ore.

As an intrested party of the zone change for Thomas Hailey from R-2 to R-3. We see no just cause for the benefit of one at the inconvience of many.

We are property owners in the City of Newberg. We now have and maintain rentals and have bought and sold other rental properties in this city.

From the list of reasons listed by the Planning Commission. We see no need for high density housing, as rentals are not of that great a demand and saleable housing is not moving that rapidly to warrent the zone change.

Sincerely

Advisory Committee for Cable Television
City of Newberg
414 E. First
Newberg, OR 97132

Dear Sirs:

In April I called Mr. Gilbert with reference to a cable T.V. system that is being considered for Newberg. At that time he indicated that a committee was working on the project and it was still in the planning stage. I assume the committee is still investigating all possibilities.

At this time, I would like to recommend that consideration be given to adapting the same cable system throughout the county, so that all school systems within the county could use the system for educational purposes.

Mary Kerns, I.M.C. Director for the Yamhill County E.S.D. made the same recommendation in a letter to the McMinnville Advisory Committee. She also made some specific recommendations, quote:

"In order to enable cooperation between local school districts in Yamhill County it is recommended that:

1. Channel 24 be designated as the elementary/secondary public educational channel. (This will simplify matters if all county cable systems use a common channel number for educational purposes.)

2. Interconnect capabilities be built into the system so that at some time in the future it would be possible for the schools and communities to have direct cable connections.

3. A mobile studio with a portable microwave system be provided by the franchise for use by educational and community channels. This would allow live broadcasting from any location to which it was sent, ie; city council meetings, sports events, concerts, etc. A mobile unit would allow to be broadcast live throughout the system."

I would like to second these recommendations and offer them for your consideration in the screening process.

Sincerely,
Helen J. Goldstein

City Hall
Newberg, Oregon 97132

Gentlemen:

Enclosed is a memorandum submitted to Clay Moorehead regarding application of David Solberg to extend a building permit due to extenuating circumstances. It involves the interpretation of a city ordinance allowing extension of building permits legally issued prior to the effective date of the ordinance. David Solberg has been ready, willing and able to complete development for several months, but has not been able to proceed due to the cautious interpretation of the ordinance by the Planning Department.

I would appreciate your review of this memorandum prior to the October 6, 1980 hearing date, and approval of the extension at that time. Thank you for your consideration.

Very truly yours,

J. David Bennett

JDB:dt

cc: Mr. David Solberg

BEFORE THE NEWBERG

PLANNING DEPARTMENT

DAVID SOLBERG and KATHY SOLBERG, Applicants	))))	APPLICATION TO EXTEND BUILDING PERMIT Tax Lot 3217DD1506

I.

FACTS

Applicants hold a one-half fee simple title to the property. The other one-half interest is owned by William and Marie Gregory. The property is described as Lot 1, Block 2, Boulevard Park in the City of Newberg.

The property is zoned R-2 and was zoned R-2 prior to amendment of the Newberg Zoning Ordinance on August 2, 1979. Under the old R-2 zoning, Applicants were permitted to build a 10-unit condominium on the subject property by allocating one unit for the first 5,000 square feet and one unit for each additional 1,200 square feet. Under the new R-2 zoning, one unit is permitted for each 3,750 square feet. Applicants were issued a building permit on April 16, 1979. Applicants made substantial expenditures toward the development of the 16,023 square foot lot, but were unable to obtain adequate financing to complete the project. On June 27, 1980, Applicants again applied for a building permit but were

informed that a new building permit could not be issued beyond August 2, 1980 because of language in § 572 of the Newberg Building Code prohibiting extensions of existing permits past a period of one year from the date of adoption of the ordinance. Applicants have received substantial financial commitments to complete the project, but have been unable to proceed due to an unwillingness of the Planning Department to issue an extension to the building permit past the August 2, 1980 deadline. Applicants are ready to finish construction upon approval of an extension by the Planning Department.

II.

STATEMENT OF CASE

A. The Statute Intent Was to Allow Development That Was Started to Be Completed.

The applicable statute reads as follows:

> "To avoid undue hardship, nothing in this ordinance shall be deemed to require a change in plans, construction, or use of any building on which a building permit in accordance with the Newberg Building Code has been legally issued prior to the effective date or amendment of this ordinance, except that applications for extension of a building permit shall not be approved to exceed a period of one year for the date of adoption or amendment of this ordinance."
>
> § 572 Newberg Zoning Ordinance

City officials had no reason to believe that the building industry would be crippled in the coming months by excessive interest rates accompanied by a tight money supply. As a result of the depressed money supply, Applicants were unable to obtain financing that was necessary to complete development. By imposing the one year limitation, city officials felt that they were allowing sufficient time for a prudent developer to complete construction. Due to the ensuing recession, this arbitrary one-year limitation was insufficient to allow Applicants time to get financing to complete development. The Newberg Code § 572 should be interpreted to allow a reasonable time for development that, once started, can be completed with due diligence.

B. Substantial Expenditures Give Applicants A Right To Complete Development.

Applicants paid $39,000 for the property on the basis of existing zoning permitting the 10-unit development. On the basis of ten units, the land costs were $3,900 per unit which was moderate to high at the time the land was purchased. On the basis of four units, which would apparently be permitted under the present zoning, the per unit cost would amount to nearly $10,000 which is exorbitant. Applicants have made the following additional expenditures based on approval by the City of the building permit:

Date	Description		Amount
2/28/79	Pioneer National Title Insurance - Earnest money	(A)	$ 1,500.00
5/4/79	PNTI - Refund from closing	(A)	43.00
3/19/79	State of Oregon (Div. of Fire, Life Safety) - Plan check fee		174.20
3/19/79	City of Newberg - Permit Applic. fee		665.98
5/9/79	Dan Butler - Portion of architect $3,000 fee and $33.00 plan reprod.		1,033.00
5/7/79	Jim Petrovick - Haul dirt (trucking)		1,950.00
5/15/79	Jim Petrovick - Rock and Gravel		1,706.40
5/23/79	Richard Schaad Excavating - Excavation of foundation		880.00
5/28/79	Mike Nelson - Miscellaneous supplies		89.57
6/20/79	Hertz Equipment Rental - dozer rent		368.25
6/20/79	Hessell Tractor - Transportation, dozer rental charge		90.00
7/20/79	Dan Butler - Architectural Plans		2,081.28
9/13/79	Dan Butler - Condo. floor plans and xeroxing		263.26
9/13/79	Andrew Paris - Surveying		295.00
9/13/79	State Farm Insurance - Liability Insurance 8/79 - 8/80		347.00
8/8/79	Keane, Harper, Pearlman and Copeland Legal fees		42.50
8/8/79	Hessell Tractor - Heavy equipment rental		154.53
1/28/80	City of Newberg - Pump water from site		50.60
1/30/80	Marilyn Smith - Tax Collector 1979-80 taxes		19.53
3/31/80	Dan Butler - Revise Plans $500 + printing $134.54		634.54
	TOTAL		$12,571.61

This list includes substantial expenditures of excavation and foundation preparation as well as planning, permit approval and preliminary development expenses. Prohibiting development would create a serious economic hardship to Applicants and be counter-productive to planned development. Although Applicants have found no Oregon decisions regarding savings clauses, the court in Transland Properties, Inc. v. Board of Adjustment, 18 N.C. App. 712, 198 SE 2d 1, said

that the zoning board erred in revoking a building permit after a 180-day savings clause had run. Even though plaintiff had not begun construction, he had expended large sums for land, equipment and materials, and thereby acquired a vested right to continue the project.

Although the City is not bound by this decision, it is well reasoned that the City should attempt to prevent waste when development is proposed in accordance with planning goals, guidelines and intent of the zoning code.

C. Approval of Permit Extension Complies With Goals Of Land Use Planning.

Goal 9 requires the economy of the state to be considered. The last year has been an extremely difficult year to obtain financing due to an extremely tight money policy. Prior to the recession, Applicants had expended substantial sums to create a 10-unit condominium in accordance with the existing zoning code. Until recently, no funds were available to complete development. Now that funds are available, building permits that were previously approved are delayed. Recognition of the economy is required by the planning goals and should be considered in interpreting the intent of the zoning code to allow a reasonable time to complete development.

Goal 10 requires that housing needs be assessed and provided for through wise land use planning. Applicants parcel is contiguous to commercial development and is in a developed neighborhood. In order to preserve agricultural

lands in outlying areas, land must be developed at sufficient density to discourage sprawl. Applicants wish to provide housing at adequate densities to conform with the planning goals.

Goal 14 requires an orderly and efficient transition from rural to urban land. This requires building at adequate densities for the future transition to higher density life. Applicants are proposing the most efficient use of the land and request extension of the building permit to provide this service.

III.

CONCLUSION

Applicants request that § 572 of the Newberg Zoning Ordinance be interpreted by the Planning Department to allow Applicants a reasonable time for development begun prior to amendment of the ordinance. Applicants feel that the economy and the statewide planning goals provided ample justification to deviate from a strict interpretation of the ordinance. As Applicants now have financing commitments for the project, construction will begin immediately upon approval.

In the alternative, if the Planning Department believes it is without authority to make the interpretation requested by the Applicants, it is respectfully requested that this

application for extension be forwarded to the Newberg City Council for consideration.

Respectfully submitted,

J. David Bennett
Attorney for Applicants

Newberg, Oregon,
Oct. 10, 1980

City of Newberg
City Council

Dear Council Members:

We would like to submitt for your approval a vacation of the small portion of N.W. Lincoln Street between the Southern Pacific tracks and Hancock street. (see attached plot map)

We are presently developing plans for the property adjacent to this street. We would use the area for parking and egress to our present property.

Submitted therewith please find; plot map detailing the Lincoln street vacation proposed for your approval.

Thank You for your consideration.

NOTICE OF A
SPECIAL EXECUTIVE MEETING
OF THE COUNCIL

To the Members of the Newberg City Council:

The Honorable Mayor Elvern Hall hereby calls a Special meeting of the Newberg City Council pursuant to his authority under Section 15, Chapter IV of the Newberg City Charter. The Meeting will be held in EXECUTIVE SESSION pursuant to ORS 192.660 (1) (a).

PURPOSE: To act upon filling the position of City Administrator

DATE: Monday, November 10, 1980

TIME: 7:30 P.M.

PLACE: Council Chambers

Elvern Hall
Honorable Mayor Elvern Hall

Monday, 7:30 P.M. November 10, 1980

A SPECIAL EXECUTIVE MEETING
OF THE CITY COUNCIL

Council Chambers Newberg, Oregon

The meeting was called to order by Mayor Elvern Hall.

Roll Call:

Present:	Maurice Chandler	Jack Nulsen
	Alan Halstead	Clarence Stouffer
	Robert Hurford	Tom Tucker
Absent:	Roger Gano	Fred LaBonte

Also Present: Arvilla Page, City Recorder
Mike Fagen, "Newberg Graphic"

Mayor Hall stated the meeting was being held under the rules of ORS 192.660 governing filling the position of Chief Executive Officer, Manager or Administrator.

The Council interviewed Doug Robinson, City Manager of Silverton, Oregon. Mr. Robinson has not submitted a written application for the position. He stated he had not applied for the position at the time it was advertised because he wished to complete or get on line several projects. He feels he has now accomplished these. He is now considering the position at the urging of M. C. Gilbert. He is content in his present position and would see a change to Newberg as furthering his career. Silverton is a smaller city with very little growth problems.

Mr. Robinson stated his education includes a master's degree in Public Administration. He has 10 years experience with the last 5 years at Silverton. His departments at Silverton are very similar to Newberg, but on a smaller scale.

Mr. Robinson answered questions from a prepared list. He stated his greatest interest are Police/Fire and Finance. He has experience in efficiency of operations by combining police and fire communications. He has been instrumental in creating a users group for computerizing records of Silverton and other nearby small towns.

Mr. Robinson asked questions of the Council and answered questions from the Council members.

Mr. Robinson was excused.

The consensus of the Council was to make no decision until the Citizen's Committee and staff had had an opportunity to interview the applicant.

Meeting adjourned.

OFFICE OF RECORDER

October 31, 1980

Myrland Gilbert, City Administrator
City of Newberg
414 East First Street
Newberg, Oregon 97132

Dear Myrland:

I have attached the bid analysis form that was completed following the opening of bids for patient room televisions and master antenna system, including installation. This was the second bid opening that we have had. A bid opening was set for October 17th and we only received one bid at that time, which was RCA. We advertised and had a second bid opening on October 31st and were unable to attract any other suppliers.

It is our recommendation that the bid from RCA be accepted as noted on the analysis sheet. We are recommending a 5 year lease with 60 monthly payments of $39905 per month. This is approximately an effective interest rate of 8.3%.

We request that this item be presented for acceptance and approval of the City Council at its next meeting. If you have any questions, please don't hesitate to call.

Sincerely,

Donald S. Elsom
Administrator

October 14, 1980

Myrland Gilbert, City Administrator
City of Newberg
414 East First St.
Newberg, Oregon 97132

Dear Myrland:

The hospital Executive Committee at it's last meeting on October 10, 1980, reviewed bids as submitted for exterior iluminated signage and traffic control signage in the parking lot; patient room furniture, to include beds, overbed tables and bedside cabinets; and landscaping and irrigation systems.

The competitive bid analysis sheets are attached. It is recommended that the low bidders in all three instances as identified on the attached sheets be awarded the contracts and purchase orders be issued. The low bidder for exterior signage and traffic control signage is Martin Brothers Sign Inc., Eugene, Oregon, the low bid of $14,204. Low bidder for the patient room furniture meeting the specifications was the Hil Rom Company for a total bid for patient beds of $31,290.35. Bedside cabinets $5,002 and overbed tables $5,187. The low bidder for the landscaping and irrigation systems and conceptional design for plan B which is being implemented by the Hospital is Landscape Specialists of Eugene, Oregon $8,232.85. This bid includes automatic sprinkling and watering systems.

If you have any questions about these three contracts, please let me know.

Sincerely yours,

Donald S. Elsom
Administrator

NOTICE OF A BUDGET MEETING

Notice is hereby given that on the 26th day of August, 1980, at 7:30p.m., in the Council Chambers in the City Hall, City of Newberg, Oregon, a meeting of the Budget Committee for the City of Newberg will be held to consider a new tax base to be submitted to the voters of the City of Newberg to become effective July 1, 1981.

ARVILLA PAGE
City Recorder

Publish: August 14, 1980

TAX BASE

The 1979 legislature directed that cities must submit a tax base question to their voters if they meet each of the following requirements in three of the four fiscal years 1975-1976, 1976-1977, 1977-1978, and 1978-1979:

1. Submitted to the voters a tax measure for operating purposes; and
2. Received voter approval to levy the taxes; and
3. Actually levied this tax outside its tax base.

All three conditions are present for the City of Newberg and now makes it mandatory for the City to place a tax base increase on the November 4th ballot.

In 1893 the first tax base established for the City of Newberg was $1,857.07. This was a 5 mills general tax, a 2 mills street tax and a $2.00 poll tax. If the 6% limitation had been added to the initial tax the tax base today would amount to $280,118 exclusive of any addition by annexation.

The tax base established for the City of Newberg was very small. Newberg was a very small town and the service requirements were small. In addition our City fore fathers chose to levy only a minimal tax for many years, using water revenues in place of tax monies to operate the City. This method was good for the citizens at that time, but certainly did not help in operating the City and constructing necessary utility facilities in later years.

The technological changes in the past 20 years are so great that it almost defies comparison. The changes in the last 40 years are almost incomprehensible.

In 1857, the framers of the Constitution of the State of Oregon determined the affairs of the individual communities could best be governed by the Citizens of those communities and provide for what is known as home rule. In order to put a safety valve on the cities, a limitation as to the methods of financing were incorporated into the document. In brief,

it provided that a community may determine the tax levy for the services provided in the individual town and as the City grows and provides more services, the levy would automatically advance to meet the growing financial requirements based upon the history of the United States over one hundred years ago, this method on the surface appeared to be justified; However the tremendous growth of our national economy and the accelerated growth of the City of Newberg has developed problems not anticipated.

The City of Newberg will continue to grow in leaps and bounds therefore, we have an obligation to ourselves and our children, to provide a sound financial base to permit the orderly, economical and efficiently planned growth of the City.

Its fine to grow, but what does this mean to the community? How does it benefit you? As you know, industrial growth is directly related to increased City revenue and jobs, thereby permitting the City to maintain necessary services without increasing service costs to the taxpayer. Industrial growth is also related to the type of police, fire, water, sewerage, and other services a City can furnish to attract industry. This then provides needed jobs in a community.

In 1975-76 we exceeded the constitutional six percent tax increase limitation of $82,828. For the first time a tax election was held and the voters approved an additional $210,027 tax levy above the six percent in order to meet our municipal obligations. The following year we had to ask for $204,000 above the six percent in order to meet our municipal obligations, and each year the comparison between our tax base and our revenue requirements has grown larger, just as our population increase has grown wider. This year our tax base was $111,584 and we had to again hold an election to obtain $353,359 above the six percent limitation needed to keep the City functioning.

As a result of projecting the normal needs of the City departments,

taking into account cost increases and revenues expected to be received the next three years we have estimated the need of a tax base in amount of $790,683 for the year beginning July 1, 1981. The new tax base of $790,683 less 10 percent for uncollected taxes will result in a net property tax of $711,615.

Twenty years ago, when some of us were starting out in married life we were probably in a salary bracket of about $325-$350 a month. This became our cost of living base. Rent was $50 for the same period. Medical costs were down accordingly, and so were clothes and other necessities in those, so called "good old days". How would you like to depend on that $325. figure today to sustain a family? Obviously it would be impossible. What happened, is that our salaries have steadily risen to attempt to meet today's cost of living.

What about the City of Newberg twenty years ago? The City got along quite well, as we did during that period with a tax base equal to the needs of the City at that time. The tax base was adequate to run the City then as was our salary to take care of our family, and here lies the crux of the problem. The tax base with its 6% limitation has remained the same over the years, but the expense to operate the City has far outstripped the tax base figure. The tax base then can be related to a family fund; i.e. an amount of money established to operate a City. However, a provision in the state law permits increasing the tax base 6% each year to take into account expected growth of a municipality. As you know, we a city have exceeded by quite a wide margin the slow growth anticipated back in the early years. In fact since 1960 the population growth has increased 162%.

Most of us take one look at our annual tax bill and shudder, but municipal taxes account for only about 19 percent of your total property tax. This 19 percent pays for some of the most important services we receive, such as police and fire protection.

The time has arrived to look at our tax bill in light of economical and other benefits we derive. For most of us, the home we buy is the largest single investment we make in our lives. We invest in more than just a plot of ground and a shelter, we are also purchasing an interest in the services provided by our community. If the water, sanitation, police and fire protection services that are sold with a home are of little value, then it naturally follows that the value of the home will suffer. There are very few of us who would invest much money in a company that was poorly financed, and it likewise doesn't make much sense to live in a city that does not have a solid financial foundation.

To protect the investment in our community, our city officials must develope long range plans for the future of our community and this can only be done when they have been provided with a solid financial platform on which to base future plans ----- an adequate tax base.

TAX BASE -- ELECTION, NOV. 4, 1980

A tax base in amount of $790,863 should be adopted for the year beginning July 1, 1981. New tax base of $790,683 less 10% uncollected taxes will result in a net tax of $711,615.

The attached projected reveunes for years to and including 1983-1984 have deleted the State Revenue Sharing funds to $175,000. Also parking meter revenues have been eliminated. This is a reduction of $84,327 from 1980-81 revenues.

The estimated expenditure projection does not include any new programs.

The projection is based on a 10% personal service cost increase each year and approximately 7½% in operating supplies and materials.

Population of Newberg is estimated to increase at rate of over 7½% per year.

NOTICE OF A SPECIAL COUNCIL MEETING
TO BE HELD IN EXECUTIVE SESSION

To the Members of Newberg City Council:

The Honorable Mayor Elvern Hall hereby calls a special meeting of the Newberg City Council, pursuant to his authority under Section 15, Chapter IV of the Newberg City Charter. The meeting will be held in Executive Session pursuant to ORS 192.660 (1) (b). The meeting will be followed by an open session.

DATE: November 13, 1980

TIME: 6:00 P.M.

PLACE: Council Chambers, Newberg

PURPOSE: For appointment of City Administrator position.

Elvern Hall
Honorable Mayor Elvern Hall

Thursday, 6:00 P.M. November 13, 1980

AN EXECUTIVE MEETING
OF THE CITY COUNCIL

Council Chambers Newberg, Oregon

The meeting was called to order by Mayor Elvern Hall under the rules of ORS 192.660 governing filling the position of Chief Executive Officer, Manager or Administrator.

Roll Call:

Present:	Maurice Chandler	Fred LaBonte
	Roger Gano	Jack Nulsen
	Alan Halstead	Tom Tucker
	Robert Hurford	

Absent: Clarence Stouffer

Also Present: Arvilla Page, City Recorder
Elisabeth Harney, "Statesman-Journal Reporter"

The Mayor reported that the latest applicant interviewed, Doug Robinson, would need a salary of $35,000 but after he had had further discussion with his family he declined the position.

The Mayor stated he had kept in touch with Mike Warren and he is still interested. He would like to have a three year contract with a nine month termination clause, but would accept a two year contract with six months termination. Salary $35,000 beginning January 1, 1981 and a car allowance of $75 per month with no mileage allowance.

Clarence Stouffer now present.

Chandler-Hurford to adjourn the Executive Session. Carried unanimously.

Arvilla Page

OFFICE OF RECORDER

November 7, 1980

Mr. Hall
Mayor, City of Newberg
414 E. 1st.
Newberg, Oregon 97132

Mr. Hall:

I am presently aware that there will be a forthcoming opening on the Planning Commission of the City of Newberg, on which I am interested in serving.

Previously I sent Mr. Gilbert a letter stating that I was interested and this letter is to inform you that I am still interested.

Yours Truly,

James R Tumbleson

James R. Tumbleson

Council 11/17/80
Planners Report -

RELATING TO THE ACKNOWLEDGEMENT OF THE NEWBERG COMPREHENSIVE PLAN

1. In order to comply with Goal 2 and Goal 5, the City intends to amend General Hazard subdistrict overlay found within the Newberg Zoning Ordinance to preserve significant wildlife habitats and the natural landscape. The City still intends to allow building within certain portions of these drainageways with restrictions which might relate to slope, preservation of natural vegetation and consideration of general wildlife habitat. A condition relating to slope such as 'no development shall occur on slopes above 20% with the exception of daylight basements' would in itself, largely preserve the open-space character of the City's drainageways.

2. In order to satisfy the requirements of Goal 6, the City intends to change the language in the adopted policy which reads "The City will strive to meet State and Federal environmental standards" to "The City shall meet..."

   In addition, the City will provide the results of an inventory for noise pollution within the City. It may be that the results of this inventory indicate that there is no major noise pollution sources within the City.

3. Goal 10--In order achieve compliance of the Newberg plan, the City will provide the rational used for determining the amount of vacant buildable land within the Urban Growth Boundary into the Comprehensive Plan Text. In addition, the rational used for determining the amounts of needed lands within various land use classifications and an overall table which will not include a 30% vacancy factor will be included. In addition, the City will re-evaluate the amount of lands presently designated for High Density Residential uses to insure that adequate lands are provided to meet that particular need. The City further intends to amend the Plan to be consistent with its current Zoning Ordinance requirements relating to where mobile home parks and subdivisions may be permitted. In doing this, it is anticipated that the conflicting language be deleted from the Plan and the basic policy indicating that density is the most important criteria be inserted in its place. This will allow the City the flexibility to, at some later date, provide further alternatives for the location of mobile home parks and sub-divisions without the need for amendments to the Comprehensive Plan. The City will also make a generalized analysis of assumed household incomes as they may relate to the current cost of housing.

4. Goal 14--Beyond the land use needs that may be identified, the City intends to justify the existing Urban Growth Boundary based upon the locational factors 3-7 of Goal 14. In addition, the City will provide the Department of Land Conservation and Development a copy of the recently adopted annexation ordinance and a copy of ordinances relating to any Urban Growth Boundary amendment since the initial continuance was issued to Newberg by LCDC.

COMPREHENSIVE PLAN AMENDMENT

It is anticipated that if the items listed on the following pages are pursued in providing a Comprehensive Plan Update, that the full update process, including hearings, will take from 1 to 2 years depending upon the type and accuracy of information currently available and the amount of staff time that can be dedicated to the project.

Again, I strongly recommend that the City wait until the 1980 census data is available before pursueing a complete overhaul of the Comprehensive Plan, as this information will substantially reduce the cost of the Plan update by providing acceptable information from the onset and reducing the duplication of data formulation and retrieval by City staff.

Another Option

While having discussions with Craig Greenleaf of the Department of Land Conservation and Development, it was found that LCDC currently does not have a method by which they may formally review comprehensive plan amendments, once a jurisdiction has become acknowledged. It is anticipated that the 1981 legislature will provide for the continuance of some form of State review of local plans. It is anybody's guess at this point what the legislature will provide.

Newberg has been granted a continuance of four months in which to complete the requirement for acknowledgement of our plan. The City should work diligently to meet these requirements within this time frame, as once acknowledged, we are released from the State's hold (at least until some method is adopted by the legislature).

Once acknowledged, the City, if interested, could actively pursue an amendment to include a few selected properties into the Urban Growth Boundary without going forward with a full Comprehensive Plan Update. In discussion with Craig Greenleaf, it was felt that reasonable justification could be established for including some specific properties into the Boundary in order to provide for a reasonable extension to the "bypass" route. It is anticipated that, with the present amount of staff time available, this option could be completed in about eight months, which corresponds to the present plan update schedule. Once this proceedure was completed, the 1980 census material would be available and the full update of the plan could be continued.

Second Option

The second possible option is less desirable in that it affects the current plan acknowledgement process. The option would be that the City would immediately schedule hearings for amendment to the Urban Growth Boundary in order to include certain properties associated with the "bypass" area. In discussing this option with Craig Greenleaf, it was determined this could be possible under the acknowledgement process but:

1. More than likely, the acreage that the City added to the Boundary in one place, may have to be subtracted and excluded from the Boundary in another area. This would be a "trade" type of situation and the Council would have to determine what areas have a higher priority for growth.

2. This process may require extra delays in the acknowledgement of the plan as most of the staff energy would be directed toward this item rather than the necessary items required under the continuance order. Further extensions from our present continuance schedule would not be viewed favorably by the State.

3. This option would be a plan amendment which would be reviewed by the State and all other agencies for compliance with the Statewide goals which would further complicate the acknowledgement schedule.

This option could take from four months to however long, depending upon the effect it would have on our acknowledgement process.

The following suggestions are made with reference to updating the 1981 Comprehensive Plan:

1. An inventory will need to be designed and modified to reflect the changing needs and projections of the city. An inventory is necessary in order to provide initial data to be used in determining the City's overall land use needs. In order to cut long-term costs and to maintain an accurate information system which can be easily updated, it is recommended that the inventory be programmed into the City computer system if at all possible. This system could maintain accuracy in terms of growth and development of the City on a daily, monthly, quarterly or yearly basis.

2. The vacant land inventory which is presently found within the Comprehensive Plan is inadequate and should be modified by using map overlays (topographical map and accessory maps), redrafting and precision area calculations. An inventory will be necessary for all lands proposed within a projected Urban Growth Boundary.

3. The commercial and industrial land needs analysis presently found within the Comprehensive Plan will project a relatively low acreage figure. If the Council wishes that this analysis be changed to reflect a higher acreage figure, then research will be required in order to establish determining factors. The 1980 census will help to back up this type of analysis.

4. An Urban Growth Plan should be prepared to establish how and in which directions the City intends to encourage growth. This plan should be tied into a City sewer and water system improvement and expansion plan as well as an economic development and capital improvement plan.

5. The City should review its plan policies against any new information or inventories in order to provide a clear framework for development.

6. Industrial land use needs should be carefully evaluated as this directly effects the ability for new industries to locate or expand within the area.

7. Policies should be established which relate to the impacts of existing transportation routes as they may relate to adjoining planned or existing developments.

8. An overall transportation network plan should be prepared and coordinated with any plan update materials.

9. Policies should be adopted relating to the acknowledgement of the Corp. of Engineers studies and Federal Flood Insurance Program. Included along with this, the City should adopt a Flood Plain Ordinance to implement these policies.

10. The City should review identified historic structures and sites for possible protection under the "Historic District" of the Zoning Ordinance.

11. Further review and policies should be established to include environmental quality performance standards for new development in cooperation with the Department of Environmental Quality.

12. The City should cooperate with the Yamhill Soil and Water Conservation District in addressing methods to handle erosion and sedimentation resulting from anticipated developments along the drainageways and on slopes being greater than 20°.

13. Newberg should work with the Department of Economic Development in refining its economic goals and policies as these policies will help to direct and encourage economic growth within the City consistent with local needs.

14. The standards established for site review and planned unit development processes within the Zoning Ordinance should be reviewed and amended to provide greater clarity.

15. Newberg should work with the Department of Transportation in addressing transit possibilities, in development of an airport approach zone, and in planning for traffic and access along the major arterial streets within the City.

16. In addition, the City has committed through previous ordinances the preparation and adoption of the following:

    (a) phased utility expansion plan
    (b) six year capital improvement programs
    (c) housing plan
    (d) bikeway and pedestrian plan
    (e) street plan
    (f) commercial development plan
    (g) overall economic development plan

OFFICE OF RECORDER

City Recorder
City of Newberg
414 E. First Street
Newberg, Oregon 97132

Attention: Arvilla Page

Dear Sirs:

Refer to the public hearing on the vacation of a portion of Lincoln Street adjacent to Southern Pacific Transportation Company's Newberg Branch in Newberg on December 1, 1980.

Our records differ from that of the County Assessor's map 3-2-19AB, which indicates a portion of Lot 4, Block 9, Tax Lot 4000 lying Southeast of the tracks. When Hancock Street was improved along the southeast SPT Co. railway to First Street, indications were that this was all street. At that time certain drainage reservations were made to insure adequate drainage to Southern Pacific's culvert southwest of the proposed vacation.

Due to access and drainage protection, we request the entire westerly half of the proposed vacated street be assigned to Southern Pacific Transportation Company.

Yours truly,

R A Engelbert

CITY OF NEWBERG
Request for Bids ---- Oil & Gasoline

Sealed proposals for furnishing the City of Newberg with gasoline, diesel oil, fuel oil and motor oils for the period of December 1, 1980 to December 1, 1981 will be received in the office of the City Administrator, 414 E. First Street, Newberg, Oregon, until 2:00 P.M., November 18, 1980, and will be publicly opened and read at that time. The bid will be awarded or proposals rejected within 15 days after the opening.

Bidders may submit separate proposals for each numbered category:

Octane Rating				BID
	1.	GASOLINE		
88.0		Regular grade	7,500 gallons	1.029
92.0		Premium grade	7,500 gallons	1.089 - 1.059
90.5		Unleaded graded	20,000 gallons	1.089 - 1.112
	2.	DIESEL OIL	3,000 gallons	.884
	3.	FUEL OIL		
		P.S. #200 or equal Delivered to City Hall, ~~Hospital~~ and Library	4,000 gallons	.884
	4.	MOTOR OILS & LUBRICANTS		
		#10-40 Motor oil	55 gallons	
		#30 detergent - ND -	165 gallons	
		Chassis Lube-Moly base	40 gallons	
		Cleaning solvent	55 gallons	

Bids shall state net price, f.o.b. City of Newberg, exclusive of all federal taxes.

M.C. GILBERT
City Administrator

Shell is introducting two new products in the near furture replacing premium and unleaded grades with new unleaded products. Bid prices included.

Octane Rating		-Bid
87.0	Shell Unleaded regular grade	1.059
91.5	Shell Super Unleaded premium grade	1.112

Any increases in costs will be passed on accordingly.

Charles E Douglas

Choose the one that's right for your car

Shell Super Unleaded, in the red pump. For cars that need a premium unleaded gasoline with extra octane.
Because of its higher octane, Shell Super Unleaded can help keep your car from knocking and running on. And since it's blended for good drivability, it can help keep your car from hesitating and stalling out.

Shell Unleaded, in the tan pump. It may be all your car really needs.
About half the cars that need unleaded gasoline will run just fine on Shell Unleaded.

We blend it for cars that don't need extra octane. So give it a try. It may be all your car really needs.

Shell Regular, in the yellow pump. It's for cars that still use leaded regular.
With all the excitement over our unleadeds, it's easy to lose sight of an old favorite — Shell Regular.

If your car can use a leaded regular, use this.

*Average of Research and Motor Octane numbers ($\frac{R+M}{2}$) as posted on the pump.

How to do without Super Shell leaded gasoline.
Shell Super Unleaded could work just fine. If it doesn't, see your Shell dealer or mechanic for advice.

Now Shell has two unleadeds...

and you have a choice

Shell

OFFICE OF RECORDER

November 21, 1980

Mr. M. C. Gilbert
City Administrator
City of Newberg
Newberg, Or. 97132

Dear Mr. Gilbert:

Tri-City Fuel, Inc., an independent petroleum jobber, submitted a bid to supply the City of Newberg's gasoline, diesel fuel and lube oil requirements for the bidding year December 1, 1980 to December 1, 1981.

Tri-City Fuel is wholly owned by Metro-West Oil, Inc., a Chevron jobber. We own plants on Meridian Street in Newberg, as well as in McMinnville, Cornelius and Molalla. We have two employees living in the Newberg area. Tri-City Fuel was a company which Metro-West Oil bought in 1977 and was a heating oil company serving Oregon City, Canby and Gladsone areas. We have expanded this company to cover 8 counties, including the City of Portland. Since we have not branded this company, we are able to bid and to supply you with major brand products with whom we have contracts.

We are writing to you in the hopes that we, if we are low bidders, can assure you that we are bona fide suppliers of petroleum products and to acquaint you somewhat with whom we are.

Yours Truly,

TRI-CITY FUEL, INC.

Floyd E. Hartzell
Vice-President

CITY OF NEWBERG, ORE.
OFFICE OF RECORDER

November 25, 1980

Mr. Myrland Gilbert
City Administrator
414 East First Street
Newberg, Oregon 97132

Dear Mr. Gilbert:

The Intensive Care Committee and the Executive Committee of the Board of Directors, upon receiving bids for patient monitoring equipment for Intensive Care and Cardiac Care Unit have recommended the bid of Microtronics Inc., 3110 N. E. 162nd Ave., Portland, Oregon be accepted. Microtronics is the dealer for Space Labs monitoring equipment. All bidders met the specifications as required and the bid notice. We have evaluated all of the bids in relationship to eleven different important criteria such as, meeting delivery schedules, warranty, utilization of existing monitors and defibrillating equipment, reported service and maintenance levels from hospitals where different systems are installed, the cost effectiveness of arythmia analysis and other factors. The bids and the companies are itemized below.

a.	Abbott Labs	$45,603 plus transportation
b.	Space Lab	$48,110
c.	Electronics for Medicine	$52,855
d.	General Electric	$54,450
e.	Tektronics	$55,040
f.	American Optical	$59,840
g.	Hewlett Packard	$62,567

The Intensive Care Committee and the Executive Committee of the Board of Directors recommend that the apparent low bid of Abbott Labs be rejected. Abbott Labs was the only vendor that required the hospital to purchase freight, and it appears from other quotations that freight charges may exceed $1,500. Secondly, and more importantly, it appears that Abbott may require the Hospital to purchase a "module bank" of repair parts to have on hand in the Portland area. There is no local maintenance program for Abbott Laboratories and the maintenance service appears questionable and probably very expensive. Thirdly, there is only one recorded installation of Abbott equipment in the state of Oregon and the next closest installation is in Idaho. For these reasons, as well as users satisfaction, we recommend that the low bid not be accepted as not being in the best interest of Newberg Community Hospital.

We have also reconsidered some of the items that we required in our specifications and have deleted some quantities, especially in the area of arterial blood pressure monitoring, which would allow the Space Lab bid from Microtronics to be lowered to $46,175.

We request that this information be brought to the attention of the next City Council Meeting so that proper purchase orders may be issued.

If you have any questions about this I will be happy to come to the City Council Meeting to answer those questions.

Sincerely yours,

Donald S. Elsom
Administrator

DSE:jp

NEWBERG COMMUNITY HOSPITAL

SPECIFICATIONS FOR MONITORING EQUIPMENT

NOTICE TO BIDDERS: All bidders should submit their bids in sealed envelopes, plainly marked "MONITORING EQUIPMENT". Bids must be received by 8:00 A. M. October 31, 1980. Bids will be publicly opened and read after 8:00 A. M. that date. See instructions.

I. GENERAL REQUIREMENTS

A. Newberg Community Hospital (NCH), a municipally owned Community Hospital, has a requirement to acquire and install new patient monitoring systems in coordination with the new building and remodeling project. Plans, working drawings and building specifications are available through the construction coordinator, Mr. Warren Simpson, at NCH.

B. By submitting bids, the successful bidder represents that it has visited the site, familiarized itself with the local conditions, current construction drawings and assumes responsibility for providing and installing an operable system, satisfactory to the owner in accordance with the stated requirements and current life safety codes.

C. Delivery: The Contractor shall provide all labor, materials, equipment and supervision necessary to complete the monitoring system by February 15, 1981 at 12:00 P. M.

In the event the supplier cannot provide the complete installation by the above mentioned date, the contractor may submit to the owner at bid time a proposal to provide a temporary system that would have the capability to monitor a minimum of four (4) units. by February 15, 1981. It would be necessary that the completed system be in full operation within six (6) weeks after February 15, 1981.

If the supplier fails to provide the required monitoring system or if needed temporary system by February 15, 1981, for each day thereafter that the systems are not completed the supplier shall pay to the owner the sum of Five Hundred Dollars ($500.00) in penalties in addition to any actual damages suffered by the owner due to the supplier's failure to meet the schedule.

Excused delays shall include the following, the owner, general building contractor, flood, earthquake, general strike (Labor Disputes requiring the work and all similar work in the local area to be totally shut down), acts of war, riot, fire, unusual delay in transportation or other causes clearly beyond the contractor's control, in the opinion of the owner. The time of completion shall be extended for such reasonable time as the owner shall decide.

D. Terms:

1. All equipment to be bid as FOB, NCH.
2. 80% net 30 days after installation, - 20% net 90 days after acceptance of installation.

E. Installation:

1. Owner agrees to:
   a. Furnish electrical outlets, junction boxes
   b. Provide conduit, if required. State size requirement in bid.
   c. Mount wall brackets for bedside monitors supplied by supplier.

2. Supplier agrees to accomplish all other necessary cabling, installation, etc,, required for successful operation of described system.

F. Owner reserves the right to accept or reject any bid, or portion thereof provided that either warranty or compatability is not adversely affected. Bidders will be evaluated on meeting stated specifications, cost, quality, warranty, options, service record/performance and compatibility with existing systems.

II. BEDSIDE MONITORS (4 beds)

A. GENERAL REQUIREMENTS

1. May be modular or integrated design

2. Push button to control central station recorder. Capable of withholding all alarms at the bedside. Alarm reset available at bedside. Adjustable alarm sound control.

3. Adjustable high and low alarm limits.

4. Furnish wall brackets for mounting cabinets. All bidders must submit shop drawings for monitor wall brackets with bid.

5. Furnish all interconnecting cables between bedside units/central station/recorder sufficient to install system. Locations are shown on architects detailed working drawings, dated 6 June, 1980, of ICU/CCU area. Drawings available at NCH. Successful bidder must coordinate provision of cable and installation with construction schedule.

B. Two Units Each With the Following Requirements:

1. Two channel ECG non-fade display. Amplifies and processes received from three patient electrodes. Select lead 1, 2, or 3 for monitoring.

2. Digital display of heart rate.

3. Displays one blood pressure wave form with numeric display for systolic, diastolic, or mean pressure.

   a. Selectable, calibrated pressure waveforms with at least three scales up to 250 M M Hg.
   b. Include electronic zero.
   c. Separately specify models of compatible patient connectors (transducers) and holders for transducers. State price for each compatible transducer and holders. System requires two (2) transducers to be included in bid price.
   d. Transmits pressure signals to central station.

4. Test button to generate calibrated waveforms for both ECG and blood pressure.

C. Two Units Each With the Following Requirements:

1. Same as B. 1, 2 above.

2. Displays two blood pressures wave forms with numeric display for systolic, diastolic or mean pressure. Balance of requirements same as B. 3., above.

III. TELEMETRY (2 beds, installed)

1. 2 beds installed, central station capable of displaying two additional beds at future date.

2. Telemetry to have 2 or 3 lead pick up. State which is provided.

3. Each bidder to state battery life of supplied transmitter, and cost of each replacement battery.

4. Receiver to display heart rate in digital form.

5. Transmitter to be defibrillator protected.

6. Successful bidder to furnish and install satisfactory antenna system, cabled to central station in CCU. Responsibility to survey and provide satisfactory antenna system rests with successful bidder. Telemetry area to include

7. System shall not interfere with other electronic systems, TV's etc.

8. Telemetry display unit to be integrated with central station recorder.

9. Delivery and installation to be complete within 12 weeks from notification by NCH of acceptance of bid.

IV. CENTRAL STATION

1. Provides individual patient information for 4 bed hardwire, 2 bed telemetry with capability of adding 2 additional beds of telemetry.

2. Time date group provided.

3. Displays alarm messages, ECG and pressure waveforms and numeric values of vital signs.

4. Display must have high resolution.

5. Trace signals capable of being FROZEN.

6. Alarms to generate delayed or real time recordings on integrated or compatible recorder, capable of serving 8 patients.

7. Recorder prints time, date, bed number and parameter I. D. upon each alarm.

8. Recorder can be manually activated from central unit or bedside monitor.

9. Delivery and installation to be completed within 14 weeks from notification by NCH of acceptance of bid.

V. OPTIONS/ALTERNATES

1. State whether existing Hewlett Packard monitors 7830A could be integrated into central station system provided. If so, state cost, to include cable, installation charges, etc., to accomplish.

2. State whether system as provided is compatible with existing H-P defibrillator for synchronized cardio versions. If not, include as separate alternate price, cost of compatable monitor/defibrillator capable of synchronized cardio version with system supplied.

3. All bidders to state current cost of:

   a. Complete maintenance contract, including parts and labor after warranty.

   b. Preventive maintenance contracts, and furnish copies/descriptions of available programs after warranty.

   c. Maintenance/service cost per hour, or per visit and state whether labor charges are billed from point of origin, or arrival time. State distance of service facility from NCH. State availability of and added costs for service after regular hours and Saturday, Sunday, Holidays.

4. If available as separate component or integrated in monitor, state alternate price of adding temperature monitoring device to each bedside unit, transmitted to central station.

5. State alternate price of adding cardiac output calculator compatible with system. Provide descriptive material with sealed bid.

6. State alternate price for adding bid of arrhythmia analysis to system. Provide descriptive material with sealed bid.

7. State credit for liquidated damages if owner chooses not to enforce paragraph I. C. delivery dates.

NEWBERG COMMUNITY HOSPITAL
501 VILLA RD. NEWBERG, OREGON 97132 (503) 538-3121

December 1, 1980

Elvern Hall, Mayor
City of Newberg
414 East First Street
Newberg, Oregon 97132

Dear Mr. Hall:

At the last regular Commission meeting, the Hospital received bids for outdoor electrical site work in the parking lot for wiring parking lots lights and directional signage. Two bids were received: A. Fisher Electric $7,576. B. Meeker Electric, $6,176. Both bidders meet all specifications and all applicable provisions of the public bidding law have been complied with.

We ask that you present this at the next City Council meeting so that we may commence immediately with providing outdoor lighting in front of the hospital area.

Sincerely yours,

Donald S. Elsom
Administrator

SPECIFICATIONS FOR TELEPHONE SYSTEM FOR NEWBERG COMMUNITY HOSPITAL

NOTICE TO BIDDERS:

* ALL BIDDERS SHOULD SUBMIT THEIR PROPOSALS IN SEALED ENVELOPES, PLAINLY MARKED "TELEPHONE SYSTEM". BIDS SHOULD BE RECEIVED NOT LATER THAN 10:00 A. M., DECEMBER 1, 1980. BIDS WILL BE OPENED AND PUBLICLY READ AT 10:00 A. M., DECEMBER 1, 1980.

I. General

The Hospital has a requirement to acquire and install a new telephone system in coordination with the new building and remodeling plan. Plans, detailed working drawings are available through the construction coordinator, Mr. Warren Simpson at Newberg Community Hospital.

By submitting bids, the successful bidder represents that it has visited its site, familiarized itself with its local conditions, the detailed construction drawings and assumes responsibility for providing and installing a satisfactory operable system meeting the owner's stated requirements.

II. SCHEDULE REQUIREMENTS

The below listed schedule requirements are the maximum allowable time frames for the stated phases:

Phase I. Above ceiling wiring:

Installer must place above ceiling wiring on unit B-North by December 15, 1980; Unit B-South by December 29, 1980 and tentatively to Unit A by March 16, 1981.

Phase II. Merge with Existing System:

Connect existing hospital phone system, provide new phone instruments, operator console and off premise extensions to switching equipment by February 1, 1981. Involves approximately 49 existing stations plus new off premise stations to be connected.

Phase III. Patient Rooms:

Provide station phones connected to switching equipment for 45 patient rooms in Units B North/South and associated supporting areas in the existing West Wing by February 1, 1981.

Phase IV. Ancillary Services/Administrative Wing (Unit A) and Final Installation Details:

Provide station phones connected to switching equipment for operation of phone system in Unit-A and complete the transfer of existing phones and system to new work areas as hospital department moves occur. Unit A tentatively available for occupancy by May 1, 1981. Involves 66 separate stations upon completion of installation.

III. REQUIRED SYSTEM COMPONENTS AND FEATURES TO BE PROVIDED AND INSTALLED

A. Switching Equipment - Digital

1. Switching equipment to be installed in present general storage area, located in hospital basement. Supplier to notify hospital of environmental conditions requiring alterations.

2. Switching unit to be wired for:

   (a) 40 Trunks
   (b) 200 Lines
   (c) 2 Consoles

3. Switching unit to be equipped for:

   (a) 16 Trunks
   (b) 135 Lines
   (c) 1 Console

4. Uninterruptable power supply. Battery chargers connected to hospital emergency power circuits.

5. Dictation access from off premise.

6. Music on hold/camp on.

7. Voice paging access.

8. Intercom blocking.

9. Call forwarding, parking, privacy, transfer by station and operator.

10. Data line security.

11. Trunk queing.

12. Toll/access restriction.

13. Assigned night answer at two multiple line phones at central nurses station.

14. Hunt groups.

15. Redundant central processor and power supply.

16. Supplier guarantees user access to diagnostic and other subsequent traffic reports.

B. Other

1. Provisions in each patient room to allow ECG, EEG data to be transmitted by phone using existing equipment.

2. Hand set (Trend Line, Touchtone) phones for patient rooms.

3. Patient room phones to be wired by bidder through Patient Service Modules (PSM) provided by general contractor. Phone supplier res-

ponsible for face plates on bottom of PSM. Bidder responsible to coordinate line and phone system installation with general contractor.

4. 14 off premise extensions.

5. Multiple line phones in adminstrative office suite (4 offices). Relocate during Phase IV.

6. Two multiple line phones at night answer location (Central Nurses Station) and two multiple line phones at Emergency Room Nurses Station. (May be necessary to relocate during Phase II or Phase IV.).

IV. REQUIRED STATION FEATURES

45 patient room stations.

66 administrative stations.

Most all stations will require relocation of extension numbers or phones during Phase II or Phase IV. All station locations are shown on detailed construction drawings located at NCH.

A. Conference Calls

B. Call forwarding, hold, waiting indicator, park, pick up.

C. Do not disturb.

D. Data line security.

E. Extension to extension dialing.

F. Station forwarding.

V. CAPABILITIES/OPTIONS/ALTERNATES

A. System must have DID capability

B. Capability for system performance statistics

C. Bidder must state whether user/owner can program changes and accomplish moves.

D. Bidder must supply adequate training for attendants and users, supply in house directions during all phases of scheduled installation.

E. Bidder to furnish alternate price for:

1. Each additional line card

2. Each additional trunk card

3. Each additional phone/station to be added to above the specified and bid price of 45 patient room phones, 66 administrative phones/ stations if requested during bid opening date and final completion of Phase IV.

4. Universal outward SMDR sub system.

5. Remote maintenance diagnostics. Bidder to furnish description of remote diagnostic capabilities at each service office.

6. Present maintenance costs per hour, per visit and state whether labor charges on site are billed from point of origin or arrival time. State if parts and or labor are billed separately. Present programming costs of altering computor program on site and from remote service facilities must be stated in bid.

7. Outright purchase

8. One, three, five and eight year lease

G. Bid price to be all inclusive for complete system and broken out as follows:

1. Installation/cable

2. Switching equipment

3. Phones

H. Owner reserves the right to accept or reject any bid or any portion of inclusive bid provided that either warranty or compatability is not adversely affected.

I. Outright purchase price, terms will be net 30 days from date of acceptance of each installed phase.

J. All equipment installation shall be quoted as FOB Hospital.

K. All bidders must state whether trade in of existing equipment will be allowed and if so, dollar allowance.

CONSULTING AGREEMENT

THIS AGREEMENT made as of the 21 day of Nov., 1980 by and between the City of Newberg, Oregon, hereinafter called "City", and Bryce Halonen, 160 Miller Street South, Salem, Oregon 97302, hereinafter called "Planning Consultant", witnesseth that whereas the City needs assistance in preparing its comprehensive plan, hereinafter called "Plan".

NOW, THEREFORE, the City and Planning Consultant for the consideration hereinafter set forth agree as follows:

1. The planning consultant shall provide his services to assist in the preparation and completion of necessary revisions to Plan, which are needed for the acknowledgment of said Plan by LCDC, which particularly relate to compliance with LCDC goals 2, 5, 6, 10, and 14. Said services are subject to the direction of the City Administrator of the City and any other designated representatives of the City.

2. Term of this agreement shall begin on December 1, 1980 with the work to be completed by January 12, 1981.

3. The maximum compensation to Planning Consultant under this agreement shall be $15.00 per hour of work for a maximum of 175 hours, with a further compensation for travel expense at the rate of 20 cents per mile.

4. The Planning Consultant is an independent contractor for all purposes and is not an employee of said of City under this agreement.

5. All work shall be to the satisfaction of City. This agreement may be terminated by either party by seven days written notice in the event of substantial failure to perform in accordance with the terms hereof by one of the parties through no fault of the other party.

6. This agreement shall enure to the benefit of and be binding upon the City and the Planning Consultant respectively, and their partners, successors, assigns and legal representatives. Neither the City nor the Planning Consultant shall have the right to assign or transfer his interest or obligation hereunder without written consent of the other party.

IN WITNESS WHEREOF, the parties hereto have made and executed this agreement the day and year first above written.

Bryce Halonen
Planning Consultant

City Administrator

City Recorder

ADDENDUM
Attachment "A"

It is hereby agreed by City and Planning Consultant that this addendum shall amend paragraphs 2, 3 and 5 of the Consulting Agreement entered into by the parties on November 21, 1980, to-wit:

1. Paragraph 2 is hereby modified to extend the date of completion from January 12, 1981 to January 20, 1981.

2. Paragraphs 3 and 5 are modified to include the following:

a. Paragraph 3 - Method of Payment.
   1. Planning Consultant shall submit an invoice for costs of preparation of each product in accordance with the schedule and description shown in Addendum Attachment "B".
   2. The City of Newberg shall review each product and upon determination of it's acceptability shall make payment within 10 days of billing. If a product is deemed unacceptable, the City of Newberg shall within 5 days of delivery of the product provide the Planning Consultant with a written statement of revisions needed to make the product acceptable.

b. Paragraph 5 - Method of Performance.
   1. Planning Consultant is to correct statewide goal deficiencies in the Newberg Comprehensive Plan as described by the Department of Land Conservation and Development Staff Report of August 26, 1980.
   2. All written material necessary to prepare corrections to the above deficiencies are to be delivered in accordance with Addendum Attachment "B" Products and Schedule for Delivery. This addendum is continued on a separate sheet which is Addendum Attachment "B".

ADDENDUM
Attachment "B"

LIST OF PRODUCTS AND SCHEDULE FOR DELIVERY

PRODUCT	MAXIMUM HOURS	DATE DRAFT DUE	DATE FOR STATEMENTS	MAX. HOURS FOR REVISION	DATE FINAL PRODUCT DUE
A. Updates and Revisions to Inv. of Cul. & Nat. Resources	70	12/15/80	12/19/80	8	12/22/81
B. Revisions to Newberg Comp. Plan Text and Amendments	89 159	1/12/81	1/16/81	8 16	1/19/81

Product A shall consist of technical research and analysis necessary to revise and update the Natural and Cultural Resources Inventory document, reflecting recent demographic and economic data, a basis for the revision to the Newberg Comprehensive Plan Text in accordance with LCDC staff report of August 16, 1980.

Product B shall consist of revisions to the Comprehensive Plan Text and Land Use Map and amendments proposed for adoption by the Newberg City Council and for submission to LCDC in accordance with their continuance order.

Products shall be arranged and have appropriate content such that they may be made part of the two above documents.

IN WITNESS WHEREOF, the parties hereto have made and executed this addendum attachments "A" and "B" this 17 day of December, 1980.
