Subject: RE: DEQ Comments on Year 2 Comprehensive Performance Monitoring Report for Basin M, Terminal 4 Slip 1 (ECSI 2356) Email 3 of 3
Date: Friday, November 3, 2023 4:51:15 PM

Hi Jeff,

Thank you for providing the following reports and draft DEQ comments for each:

1. Basin M Vegetated Infiltration Basin Operational Year 2 Comprehensive Report, dated 10/2/23 for the Port of Portland of Terminal 4, Slip 1
2. Basin K1 Bioinfiltration Basin Operational Year 2 Comprehensive Report, dated 10/2/23 for the Kinder Morgan Port of Portland of Terminal 4, Slip 3
3. Basin L Stormwater Treatment Performance Verification Report, dated 10/2/23 for the Port of Portland of Terminal 4, Slip 3

EPA has reviewed these documents and we do not plan to issue formal comments. Your comments are thorough and in general the stormwater controls seem to be working. We appreciate the opportunity to review. Have a good weekend.

Laura Hanna, RG
Remedial Project Manager

Caution: This email originated from outside EPA, please exercise additional caution when deciding whether to open attachments or click on provided links.

Greetings-

DEQ is pleased to present this report provided by Geosyntec on behalf of the Port of Portland documenting performance stormwater monitoring related to implementation of a DEQ-approved source control measure (SCM) in the Terminal 4 Slip 1 upland facility. The report documents Year 2 performance monitoring for the Basin M infiltration basin. For your convenience, DEQ is also providing its draft comments on the report.

DEQ is providing these materials as a courtesy and is not specifically asking for input. However, DEQ will consider any comments you wish to provide prior to finalizing its comments on the document.

This is the **third of three emails** containing reports received for stormwater source control at Terminal 4. If you plan to provide feedback, please submit to DEQ by COB on Friday November 17.

Please contact me if you have questions in the meantime. Regards,

Jeff K. Schatz, R.G.
